### **Brewery Creek Project – Conceptual Production Phases**

#### Phase 1- (2012 through 2016) Projected Cap Ex of ~\$ 25 - \$30 mm

- 2012 Construct 3.5 mm tonne expansion of current leach pad (results in 5.5 mm tonne available capacity under current permits)
- 2012 Construct ADR plant, construct 114 man camp, power system, on site lab facilities and ancillary items
- 2013 Commence mining from Foster's deposit in Q2-Q3;
- 2013 Commence wetting of the pad Q3

#### 2013 Initial gold pour Q4

Internal block modeling indicates potential for more than 5.5 mm tonnes oxide material grading between 0.82 and 0.94 g/t Au (NI 43-101 compliance disclosure: the potential quantity and grade is conceptual in nature, there has been insufficient exploration to define a mineral resource and it is uncertain if further exploration will result in the target being delineated as a mineral resource); Anticipated recovery of 65-70% of contained gold (Recovery estimates are based on historic production, resource and recovery information as well as current geological and metallurgical studies); Operations in excess of 5.5 mm tonnes new material will require amendment to QML and/or Water License

### **Brewery Creek Project – Conceptual Production Phases**

#### **Phase 2** - (2012 through 2023) Projected Cap Ex ~ \$100 – \$140 mm

- 2012 Long term baseline studies underway for permitting; geotechnical drilling and studies; continued exploration
- 2012 Commence feasibility studies on new deposits
- 2013 Conduct design and permitting activities
- 2015 Commence construction activities for expansion
- 2015 Finish construction and begin ore placement on new leach facilities
- 2016 Initial gold pour from Phase 2
   Design parameters to be based on anticipated post September 2012 resource estimate update concentrating on new discoveries at Sleeman, Schooner and Classic; Goal is in excess of 1 mm open pit oxide ounces Au to support a 100,000+ oz per year stand-alone operation

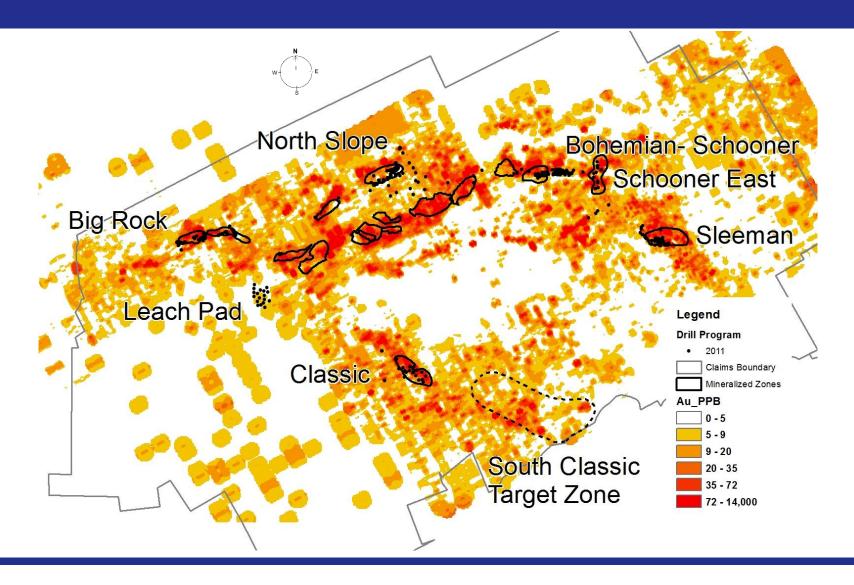

#### **Phase 3** - (2015 and beyond)

· Design, permit, and construct mill for open pit sulfide ores; evaluate underground potential
