

DEVELOPING CANADA'S PREMIER COPPER-GOLD MINE

September 2014

TSX: WRN | NYSE MKT: WRN

FORWARD LOOKING STATEMENTS

The information provided in this presentation is not intended to be a comprehensive review of all matters and developments concerning Western Copper and Gold Corporation and its subsidiaries (collectively, the "Company"). It should be read in conjunction with all other disclosure documents of the Company. No securities commission or regulatory authority has reviewed the accuracy or adequacy of the information presented herein.

Statements contained in this presentation that are not historical fact are "forward-looking statements" as that term is defined in the United States Private Securities Litigation Reform Act of 1995 and "forward-looking information" as that term is defined in National Instrument 51-102 of the Canadian Securities Administrators (collectively, "forwardlooking statements"). Forward-looking statements in this presentation include, without limitation, statements regarding the mineral reserve and resource estimates, planned exploration and development activities, corporate objectives, the economic prospects of the Company's projects, the Company's future plans or future revenues, and timing of development, or potential expansion or improvements. Such forward-looking statements are based on certain assumptions that the Company believes are reasonable, including, without limitation, with respect to any mineral reserve or resource estimate, the key assumptions and parameters on which such estimates are based, prevailing and projected market prices and foreign exchange rates, continued availability of capital and financing, availability of equipment and personnel required for construction and operations, the Company not experiencing unforeseen delays, unexpected geological or other effects, equipment failures, permitting delays, and general economic, market or business conditions. Forward-looking statements are subject to known and unknown risks and uncertainties which could cause actual results to differ materially from estimated results. Such risks and uncertainties include, but are not limited to, the Company's ability to raise sufficient capital to fund development, changes in general economic conditions or financial markets, changes in prices for the Company's mineral products or increases in input costs, uncertainties relating to interpretation of drill results and the geological continuity and grade of mineral deposits, that mineral resources and reserves are not as estimated, risks related to cooperation of government agencies and First Nations in the exploration and development of the property, litigation, legislative, environmental and other judicial, regulatory, political and competitive developments in Canada, technological and operational difficulties or inability to obtain permits encountered in connection with exploration and development activities, labor relations matters, and changing foreign exchange rates, all of which are described more fully in the Company's filings with the applicable regulatory agencies. The Company expressly disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise, except as required by applicable securities legislation.

The technical information regarding the Casino Project in this presentation is based upon information contained in the technical report entitled "Casino Project, Form 43-101F1 Technical Report Feasibility Study, Yukon, Canada – Revision 1" (the "2013 Feasibility Study") dated January 25, 2013 and prepared by M3 Engineering & Technology Corp. Readers are encouraged to read the 2013 Feasibility Study for detailed information regarding the Casino Project, which is available under the Company's profile on SEDAR.

Cautionary Note to U.S. Investors:

The United States Securities and Exchange Commission (the "SEC") permits U.S. mining companies, in their filings with the SEC, to disclose only those mineral deposits that a company can economically and legally extract or produce.

We use certain terms in this presentation, such as "measured", "indicated", and "inferred" "resources", that the SEC guidelines strictly prohibit U.S. registered companies from including in their filings with the SEC. "Inferred mineral resources" have a great amount of uncertainty as to their existence, and their economic and legal feasibility. It cannot be assumed that all or part of an inferred mineral resource will ever be upgraded to a higher category. Readers are cautioned not to assume that all or any part of an inferred mineral resource exists or is economically or legally mineable. U.S. investors are urged to consider closely the disclosure in the Company's Form 40-F, which may be secured from the Company or from the SEC's website at www.sec.gov/edgar.shtml.

STEPS TO PRODUCTION

May 2006 ✓	 Spin-out from Western Silver transaction with Glamis (Goldcorp)
Nov 2006 ✓	Acquired Casino Project from Lumina Resources
2008-2012 ✓	 Two Pre-Feasibility Studies completed and drilling to 100,000 m
Jan 2013 ✓	Bankable Feasibility Study Completed
Jan 2014 ✓	Submitted Environmental Assessment Application
2014 ✓	Initiated Detailed Engineering
2015	Secure Project Financing
	Fully Funded Until Construction Decision
2016	Construction Ready
2017	Production – Gold Heap Leach
2019	Production – Milling Operation

KEY MANAGEMENT TEAM WITH SUCCESSFUL TRACK RECORD

Dale Corman, B.Sc., P.Eng - Chairman & CEO

 Extensive experience in mineral development, financing, property acquisition and evaluation. Formerly Chairman & CEO of Western Silver Corporation

Dr. Paul West-Sells - President & COO

 Metallurgical Engineer with significant management and metallurgical experience in increasingly senior roles with BHP, Placer Dome and Barrick

Julien François, CA – VP Finance & CFO

Previously Controller of Western Silver
 Corporation following five years in the audit practice at PricewaterhouseCoopers
 LLP

Cameron Brown, P.Eng - VP Engineering

 Formerly Project Manager for Bechtel Engineering and Western Silver Corporation

Jesse Duke, P.Geo. – VP Environmental Affairs, Casino Mining

 Has led the environmental team advancing Casino since 2008; Previously held senior management positions for both the government and the private sector

- Yukon, Canada Low political risk
- Population 37,000
- 380 km from Whitehorse, Yukon
- 560 km from year round port at Skagway, Alaska
- 16 km from fresh water source (Yukon River)

- 5 mines permitted in the Yukon in the past 7 years
- First Nations have settled land claims
- Initial Agreements signed with Selkirk and Little Salmon Carmacks First Nation
- Strong Government and local community support
- Minto Mine currently operating within the same First Nation territory

WORLD CLASS RESOURCE

UPSIDE POTENTIAL

GREAT ECONOMICS

STABLE JURISDICTION

Reserves-1.12 billion tonnes

- Mill Ore 965 Mt @ 0.5% CuEq
- Heap Leach 157 Mt @ 0.29 g/t Au

Additional Inferred Resource

- 1.7 billion tonnes of ore
- Potentially 25+ years to existing 22 year mine life

Bankable Feasibility Study

- \$1.83 billion NPV
- 20.1% IRR after-tax*

Mining Friendly Jurisdiction

- Politically stable Yukon, Canada
- 5 mines permitted in the past 7 years

^{*}US \$3/lb Cu and US \$1400/oz Au. See notes in appendix

MANAGEMENT TEAM

Dale Corman, B.Sc, P.Eng. Chairman & CEO

President & COO

Julien Francois, C.A. VP Finance & CFO

Cameron Brown, P.Eng. VP Engineering

Jonathan Clegg, P.Eng.Engineering

Jack McClintock, MBA, P.Eng.Consulting Geologist

Jesse Duke, P.Geo.VP Environment Affairs

40 years experience as a senior corporate officer of publicly listed companies. Extensive expertise in mineral exploration & development, financing, property evaluation and acquisition. Formerly Chairman & CEO of Western Silver Corporation.

20 years experience in the mining industry in management and metallurgical engineering roles. Worked with BHP, Placer Dome, and Barrick in senior roles in Research and Development and Project Development.

Mr. François has served as Vice President, Finance and Chief Financial Officer since the Company's inception in 2006. Prior to joining the Company, he was the Controller of Western Silver Corporation and worked for five years in the audit practice at PricewaterhouseCoopers LLP.

40 years experience in mineral processing. Responsible for plant maintenance, project management and engineering of major base and precious metal projects. Formerly Project Manager for Bechtel Engineering and Western Silver Corporation.

30+ years experience in design, management and construction of mining projects. Formerly VP & General Manager of Kilborn Engineering and VP Engineering of Western Silver Corporation.

30 years experience in all facets of the mineral exploration business. Formerly Global Exploration Manager with BHP Billiton and is currently CEO of Northisle Copper and Gold.

Extensive experience dealing with public communications, stakeholder consultations and community relations for major mining projects. Held senior management positions for both government and the private sector and has led the environmental team advancing Casino since 2008 as well as supported government and community relations.

BOARD OF DIRECTORS

Dale Corman, B.Sc, P.Eng. Chairman

Robert M. Byford, B.A., FCA Director

Robert J. Gayton, B.Comm., Ph.D., FCA Director

David Williams, LL.B., MBA
Director

Klaus Zeitler, Ph.D.
Director

40 years experience as a senior corporate officer of publicly listed companies. Extensive expertise in mineral exploration & development, financing, property evaluation and acquisition. Formerly Chairman & CEO of Western Silver Corporation.

40 years experience as lead financial advisor on a wide range of finance, divestiture and acquisition transactions in many industry sectors. Formerly Managing Partner of KPMG BC Region consulting practice and founding partner of the corporate finance practice.

Formerly Partner of Peat Marwick Mitchell. Directed the accounting and financial matters of public companies in the resource and non-resource fields since 1987. Currently Mr. Gayton sits on the Board of Directors of Amerigo Resources, B2 Gold Corp., Eastern Platinum Ltd., and Nevsun Resources.

30+ years experience in the investment management business. Formerly Senior Partner of Beutel Goodman, a value management company dealing in equity and fixed income assets. Currently manages Roxborough Holdings Ltd., a family owned private equity holding company. Mr. Williams also sits on the Board of Directors of Atlantis Systems and SQI Diagnostics.

30+ years experience in the mineral industry. Financed, built and managed mines worldwide. Formerly Senior VP of Teck Cominco. Currently President and Director of Amerigo, and Director of Los Andes Copper, Rio Alto Mining and Vena Resources.

Grades In Line with Peers:

GLOBAL COPPER SUPPLY AND DEMAND

YUKON PERMITTING PROCESS

ASSESSMENT STAGE

Identifies environmental and socio-economic effects, their significance, and makes recommendations for mitigation measures

1) YUKON ENVIRONMENTAL & SOCIO- ECONOMIC ASSESSMENT

- Conducted by Yukon Socio-economic Assessment Board (YESAB)
- YESAB is an independent Yukon Agency comprised of Federal,
 Territorial and First Nation Governments (One window process)
- Makes recommendations to governments with licensing authority ("Decision Bodies")

2) DECISION DOCUMENT

- Issued by "Decision Bodies" governments (Federal, Territorial and First Nation) that have licensing authority for a project
- Accepts, varies or rejects assessment recommendations
- Allows project to proceed to regulatory stage

Regulators issue their respective permits, licenses or other authorizations

3) QUARTZ MINING LICENSE

- Issued by Yukon Government Department of Energy, Mines and Resources (EMR)
- Allows construction to commence

4) WATER USE LICENCE

- Issued by Yukon Water Board
- Allows production to commence (covers use of water and deposit of waste)
