Forward Looking - Safe Harbor Statement

MAG Silver Corp. is a Canadian issuer.

This presentation is prepared by MAG Silver Corp ("MAG – TSX / MVG – NYSE.MKT") management and MAG is solely responsible for content and format. Peter Megaw, P.Geo is a non-independent Qualified Person and has reviewed this presentation and its content derived from industry information and 43-101 reports and news releases with specific underlying Qualified Persons as set out in the releases and reports. Industry Information has been compiled from publicly available sources and may not be complete, up to date or reliable.

- This presentation contains forward-looking statements within the meaning of Canadian and U.S. securities laws. Such forward looking statements are subject to risks and uncertainties which could cause actual results to differ materially from estimated results. Such risks and uncertainties include, but are not limited to: the Company's ability to raise capital to fund development and exploration, changes in general economic conditions or financial markets, changes in metal prices, general cost increases, litigation, legislative, environmental and other judicial, regulatory, political and competitive developments in Mexico or Canada, technological and operational difficulties or inability to obtain permits encountered in connection with the Company's exploration activities, community and labor relations matters and changes in foreign exchange rates, all of which are described in more detail in the Company's filings with the US. Securities and Exchange Commission. There is no certainty that any forward looking statement will come to pass and investors should not place undue reliance upon forward-looking statements.
- **Cautionary note to investors concerning estimates of Indicated and Inferred mineral resources.** This document uses the terms "Indicated Mineral Resources" and "Inferred Mineral Resources". MAG advises investors that although these terms are recognized and required by Canadian regulations (under National Instrument 43-101 Standards of Disclosure for Mineral Projects), the U.S. Securities and Exchange Commission does not recognize these terms. Investors are cautioned not to assume that any part or all of the mineral deposits in these categories will ever be converted into reserves. In addition, "Inferred Mineral Resources" have a great amount of uncertainty as to their existence. It cannot be assumed that all or any part of an Inferred Mineral Resource will ever be upgraded to a higher category. Under Canadian rules, estimates of Inferred Mineral Resources are considered too speculative geologically to have the economic considerations applied to them to enable them to be categorized as mineral reserves and, accordingly, Inferred Mineral Resources may not form the basis of feasibility or pre-feasibility studies, or economic studies except for a "Preliminary Economic Assessment" as defined under Canadian National Instrument 43-101.
- Investors are cautioned not to assume that part or all of an Inferred Resource exists, or is economically or legally mineable. The Company may access safe harbor rules. Please see complete information on SEDAR and at the SEC on EDGAR.

This presentation is for information purposes only and is not a solicitation. Please contact the Company for complete information and consult a registered investment representative / advisor prior to making any investment decision.

Note to U.S. Investors: Investors are urged to consider closely the disclosure in our Form 40F, File no. 001-33574, available at our office: Suite 770-800 West Pender, Vancouver BC, Canada, V6C 2V6 or from the SEC: 1(800) SEC-0330. The Company may access safe harbor rules.

Investors are urged to consider closely the disclosures in MAG Silver's annual and quarterly reports and other public filings, accessible through the Internet at www.sedar.com and www.sec.gov/edgar/searchedgar/companysearch.html

Neither the TSX nor the New York Stock Exchange MKT has reviewed or accepted responsibility for the accuracy or adequacy of this presentation, which has been prepared by management.

- Please also note, that since the UPEA was produced prior to the recent Mexican tax law reform the ensuing numbers do not factor in that adjustment.

- All in Cash Cost of **\$6.61 per oz**

Minimal Geopolitical risk

- Stable, Mining experienced environment in Mexico

Minimal Development risk

- Fresnillo as Operator brings operational expertise
- Valdecañas / Jarillas vein already in production

Complete Access

- Joint Venture owns the surface rights

Infrastructure risk

- 4 significant mines nearby, airport 30 minutes away
- Ready access to Labour, Water and Power

Metallurgy

- Great metallurgy, recoveries and concentrate grade

Probability of more discoveries and additional ounces

Cinco de Mayo : Permitting Update

- Negotiations are progressing with the local Ejido with whom we have had 5 previous agreements
- Previous negotiation experience at Juanicipio property took a year for resolution
- MAG continues to pursue negotiations with the local Ejido towards a mutually successful resolution
- Finite process: geared towards long-term success
- No risk to Mineral rights which fall under Federal Jurisdiction

Cinco de Mayo (100%) – Upper Manto & Pegaso

- 61m Massive Sulphide
- 300m Skarn + Marble
- Open in all directions
- Fits CRD zoning pattern

Pegaso Zone

- Initial Resource Estimation
- High Grade Ag / Zn / Pb
- 125m – 600m below surface
- Open in several directions

Upper Manto Zone

Pozo Seco - High Grade Moly Oxide / Gold

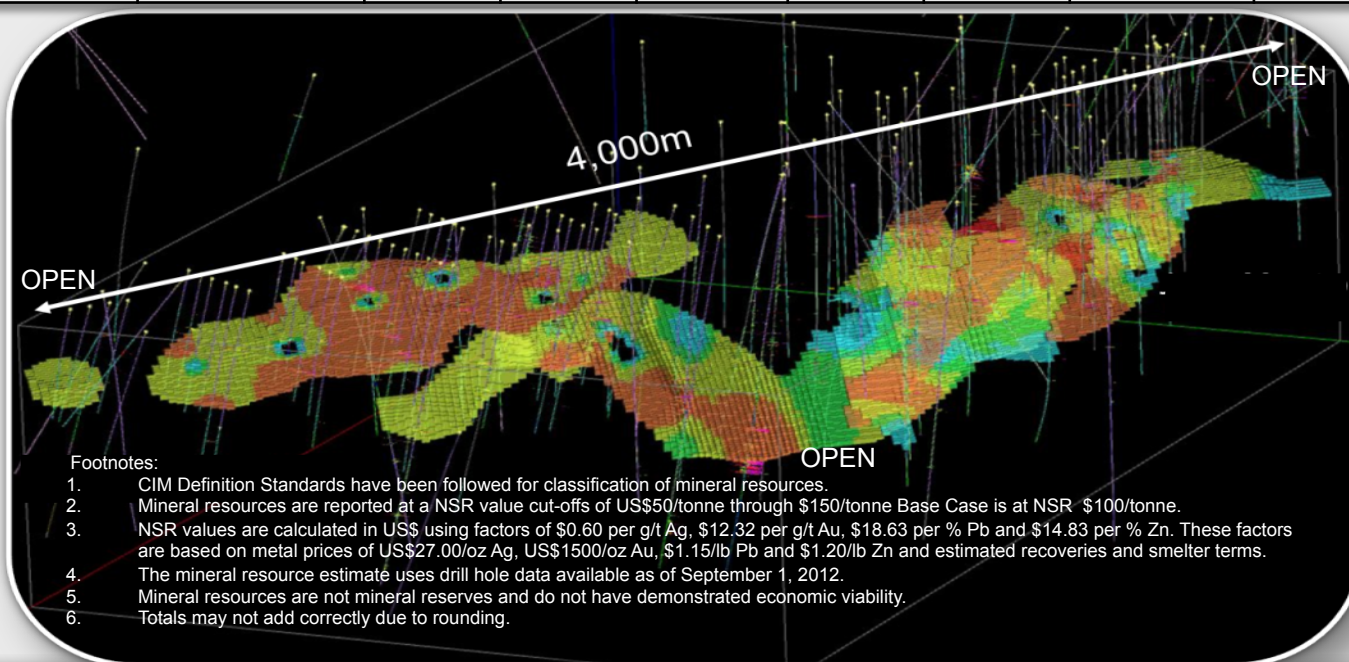

- Shallow / open pit
- Open in several directions
- Nearby water, power, road
- Non Core Asset
