CORPORATE PRESENTATION

TSX.V: CDB OTCQX: CDBMF

Forward-Looking Statement

These presentation slides (the “Slides”) do not comprise a prospectus or other form of offering document relating to Cordoba Minerals Corp. (“the Company”), and do not constitute an offer or invitation to purchase or subscribe for any securities of the Company or any other company and should not be relied on in connection with a decision to purchase or subscribe for any such securities. The Slides and the accompanying verbal presentation do not constitute a recommendation regarding any decision to sell or purchase securities of the Company or any other company. Your attention is drawn to the risk factors set out below.

This presentation contains forward-looking statements including, but not limited to, comments regarding the timing and content of upcoming work programs, geological interpretations, receipt of property titles, potential mineral recovery processes, and other related matters. Forward-looking statements address future events and conditions and therefore involve inherent risks and uncertainties. The Company’s current projects in Colombia are at an early stage and all estimates and projections are based on limited, and possibly incomplete data. More work is required before geological and economic aspects can be confidently modeled. Actual results may differ materially from those currently anticipated in this presentation. No representation or prediction is intended as to the results of future work, nor can there be any guarantee that estimates and projections herein will be sustained in future work or that the Project will otherwise prove to be economic.

Christian Grainger, P.Geo., a qualified person under National Instrument 43-101, has reviewed the technical information contained herein.

Investment Highlights

- Company's flagship San Matias Project is located at sea level and hosts district scale copper-gold potential in a newly discovered region of Colombia
- Excellent infrastructure; near two large operating open-pit mines and power with a skilled workforce readily available
- The San Matias Project hosts the Alacran deposit with an active drill program currently underway
 - Historical resource of 37M tonnes at 0.62% Cu and 0.40 g/t Au
 - Initial NI 43-101 resource expected in Q3 2016
- Partnership with High Power Exploration (Robert Friedland company) to fund a discovery through feasibility study within the San Matias Project

Capital Structure

Share Capital

Symbol (TSX-V)	CDB
Shares Outstanding	86.7 Million
Warrants (\$0.21 - \$1.50)	15.1 Million
Market Cap @ \$ 0.90	\$78 Million
Insider Ownership	~ 45%

1-Year Share Price Performance

- ◆ CNL
- ◆ Minatura
- ◆ BlackRock
- ◆ Mackenzie
- ◆ Sprott

Prolific Mid-Cauca Belt

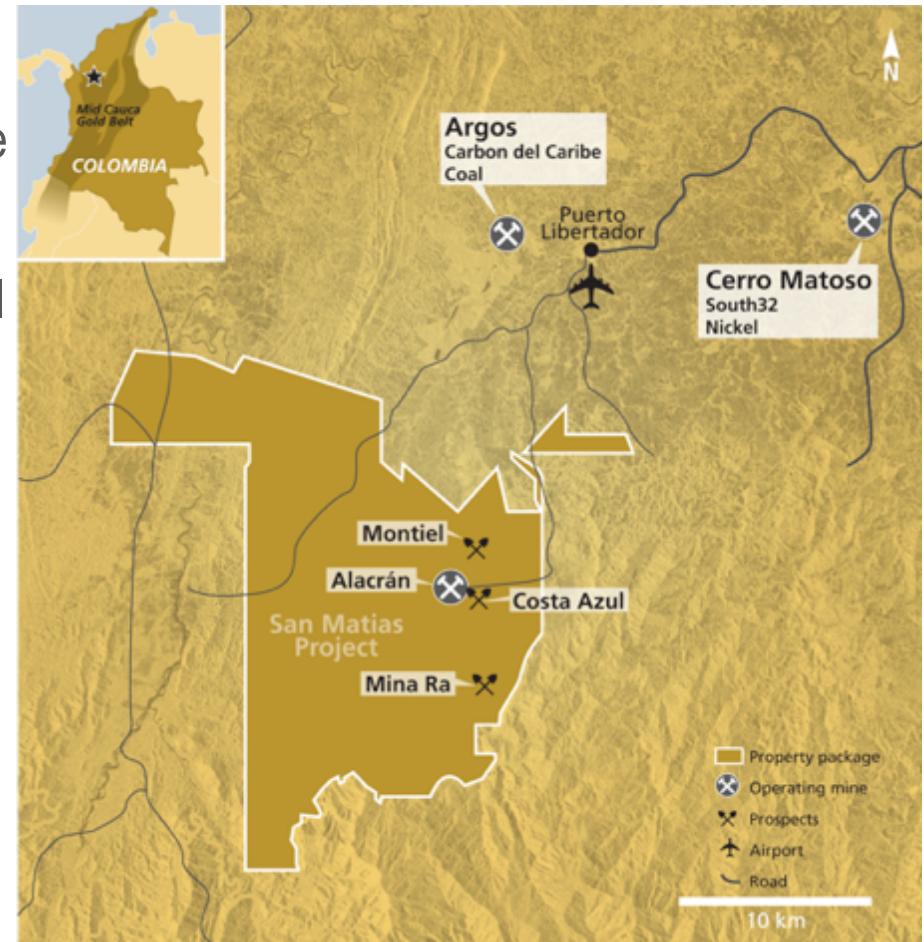

The Mid-Cauca Gold-Porphyry Belt is a 300 to 400-kilometre long, north-south geological trend that has resulted in significant greenfield and brownfield discoveries.

These discoveries have made the belt the most prolific in Colombia in terms of discovered ounces to date.

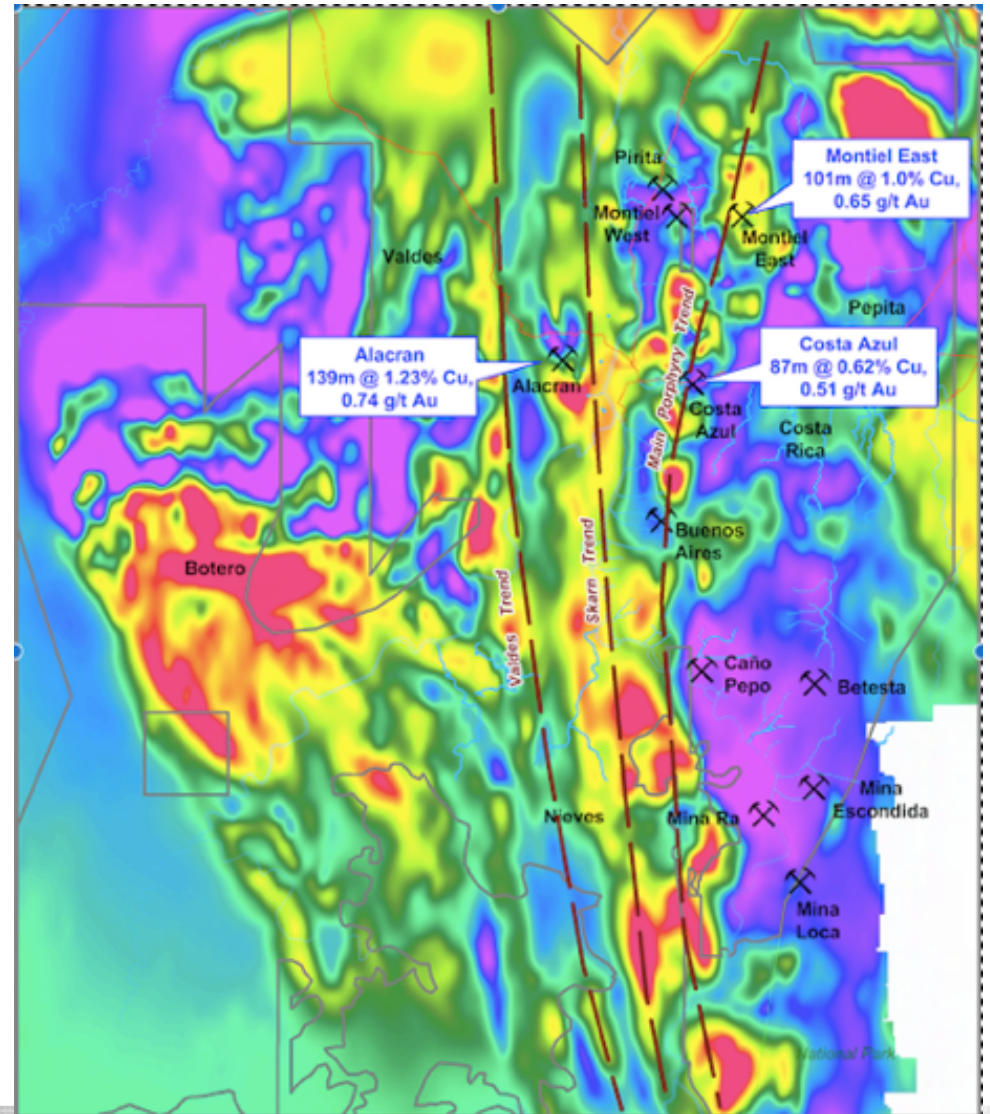

Ideal Location with Infrastructure

- Two operating open-pit mines nearby
 - Cerro Matoso (South32): Ni-laterite mine and ferro-nickel smelter
 - Carbon del Caribe (Argos): open-pit coal operations
- Infrastructure including power and paved national highway and roads
 - \$450 million thermal coal plant recently commissioned
- Skilled workforce readily available
- Ideal open-pit topography - sea level

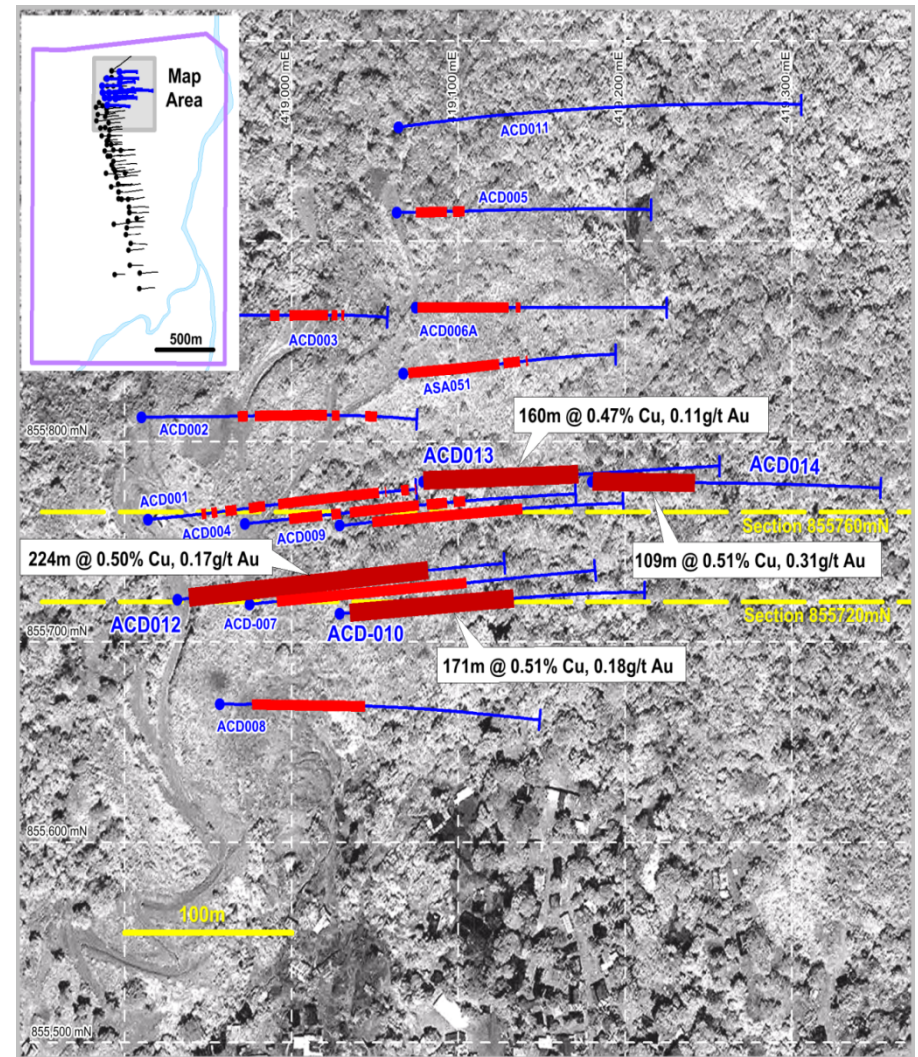

District Scale Potential

- Three parallel 13-km north-south trending structures
- The Skarn trend is highlighted by the Alacran deposit with significant potential for expansion
- Main porphyry trend hosts multiple porphyry intrusive centres (Montiel and Costa Azul) with large, high grade gold targets east of the trend
- Numerous artisanal open-pit and underground mining areas

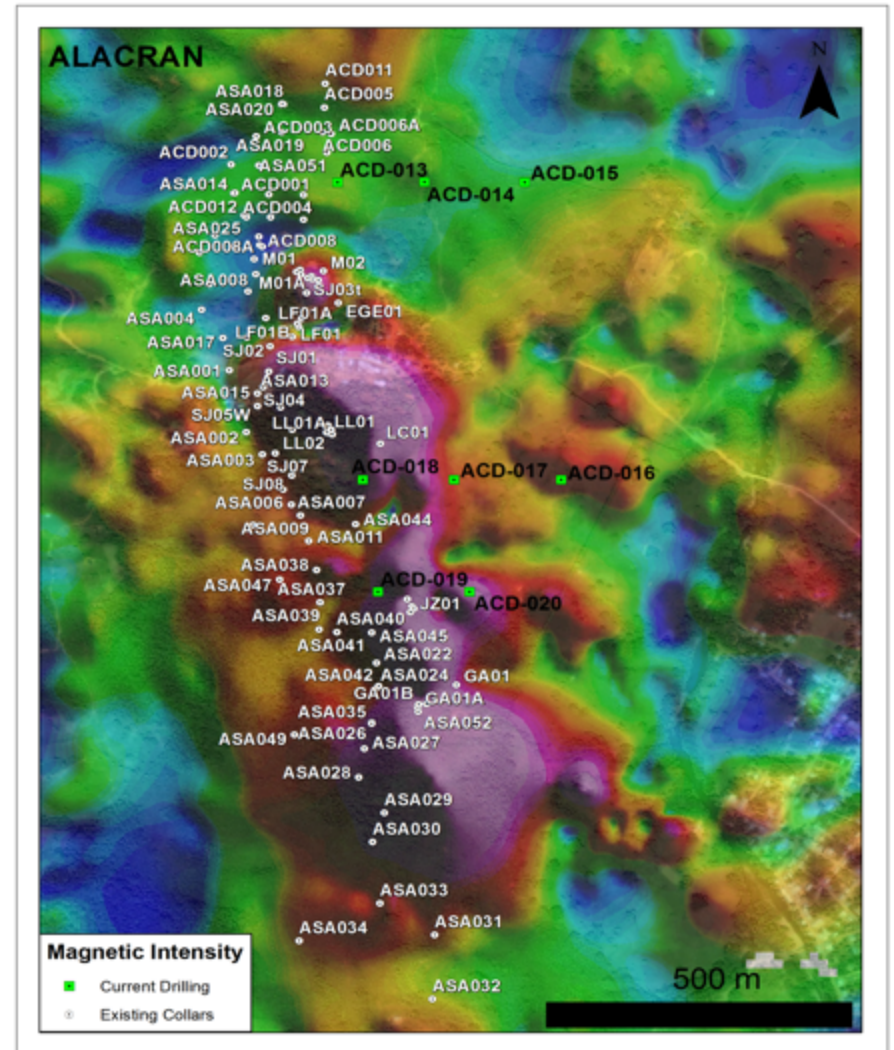

Alacran Deposit

- Skarn deposit with a historical inferred resource of 37 million tonnes at 0.62% copper and 0.40 g/t gold
- Objective to increase resources at depth and on strike with a targeted NI 43-101 for Q3 2016
- Ongoing 10,000-metre drill program with mineralization now over 1.3km in strike
- Overall size and complexity of hydrothermal system indicates significant mineralized event

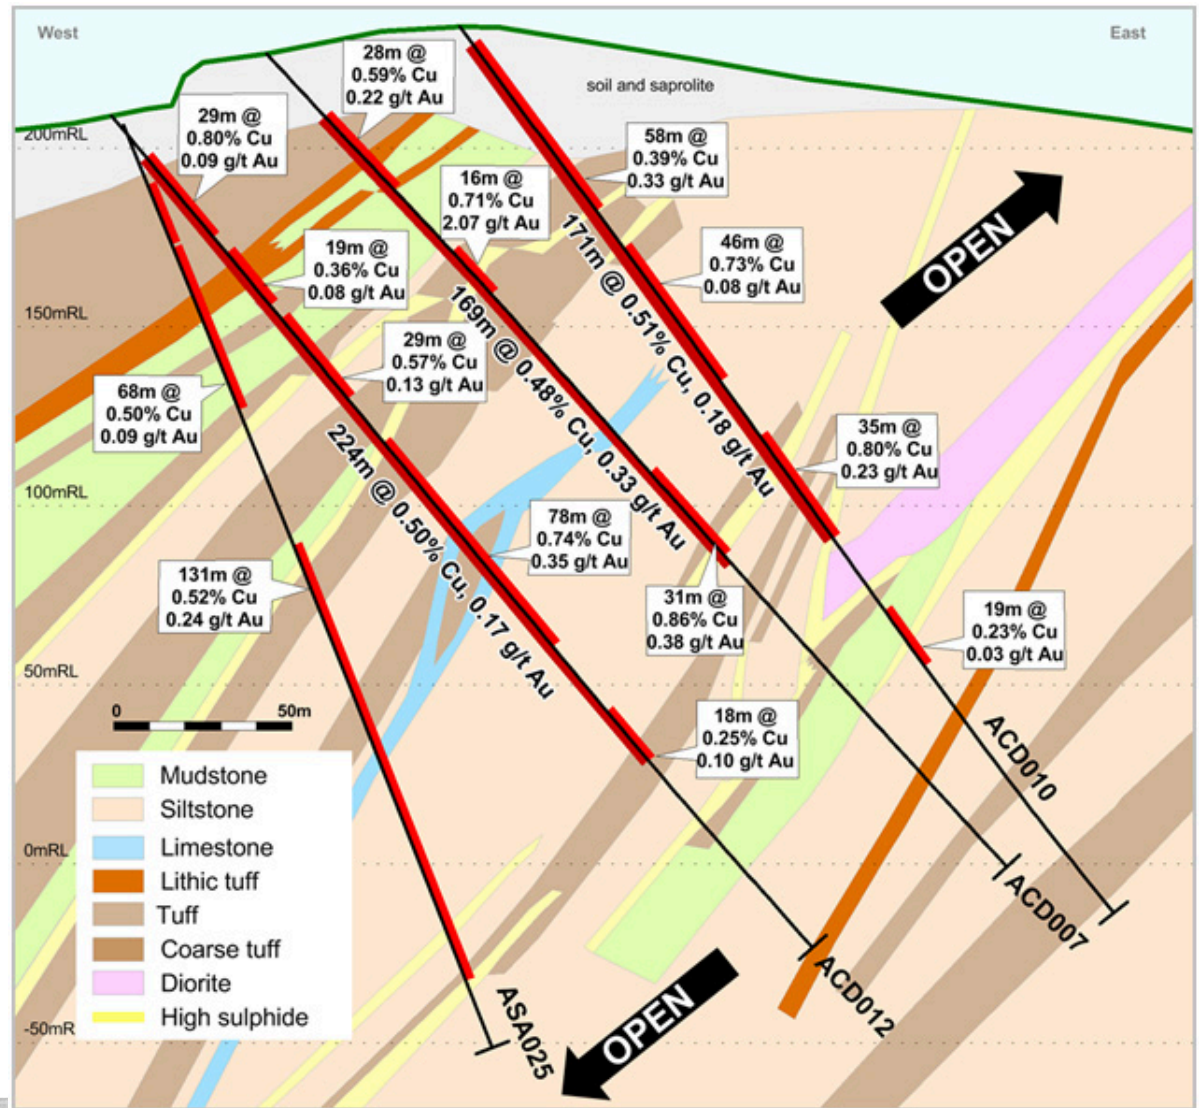

Alacran Deposit

- Consistent near surface wide high-grade intercepts
- Mineralization remains open in all directions and depth
- Drilling highlights:
 - 188 m @ 0.71% Cu and 0.25 g/t Au
 - 111 m @ 1.01% Cu and 0.38 g/t Au
 - 128 m @ 0.84% Cu and 0.45 g/t Au
 - 103 m @ 1.00% Cu and 0.41 g/t Au
 - 139 m @ 1.23% Cu and 0.74 g/t Au
 - 150 m @ 0.73% Cu and 0.49 g/t Au
 - 42 m @ 2.83 g/t Au and 0.40 Cu

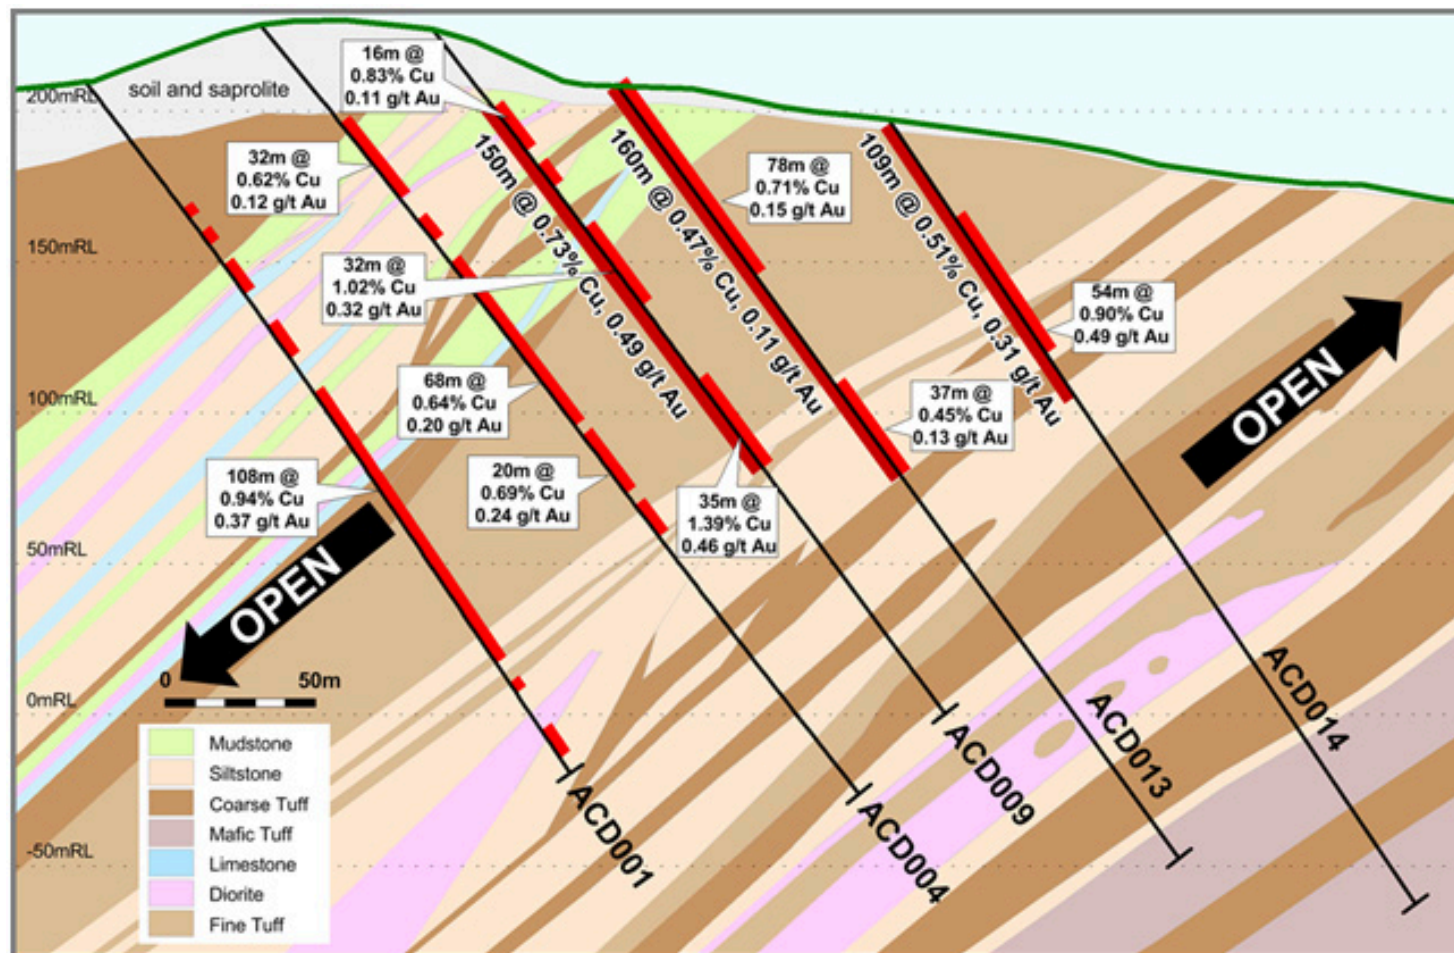

Alacran Deposit

- In August 2016, Cordoba announced drilling results that outlined significant widths of high grade, near-surface copper-gold mineralization at Alacran.
- Drilling highlights:
 - 224 m @ 0.50% Cu and 0.17 g/t Au, including 78 m @ 0.74% Cu and 0.35 g/t Au
 - 171 m @ 0.51% Cu and 0.18 g/t Au; including 35 m @ 0.80% Cu and 0.23 g/t Au
 - 160 m @ 0.47% Cu and 0.11 g/t Au including 78 m @ 0.71% Cu and 0.15 g/t Au
 - 109 m @ 0.51% Cu and 0.31 g/t Au including 54 m @ 0.90% Cu and 0.49 g/t Au

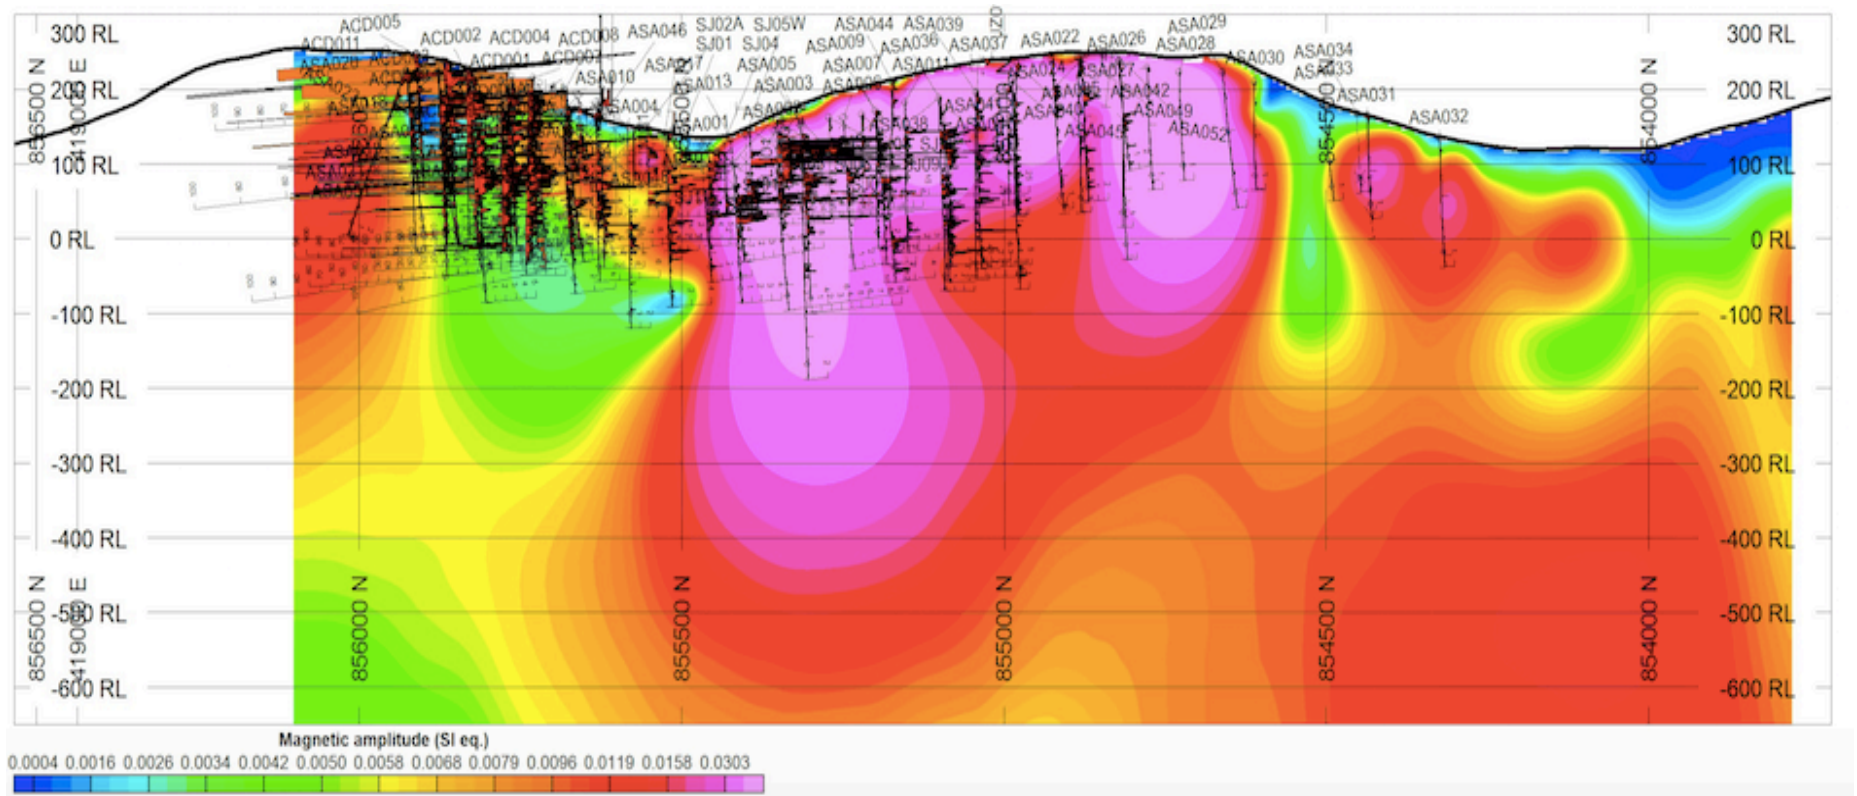

Alacran Deposit

Drillholes ACD-013 and ACD-014 indicate the lateral extent of the Alacran Deposit is significantly larger to the east than previously suggested and remains open

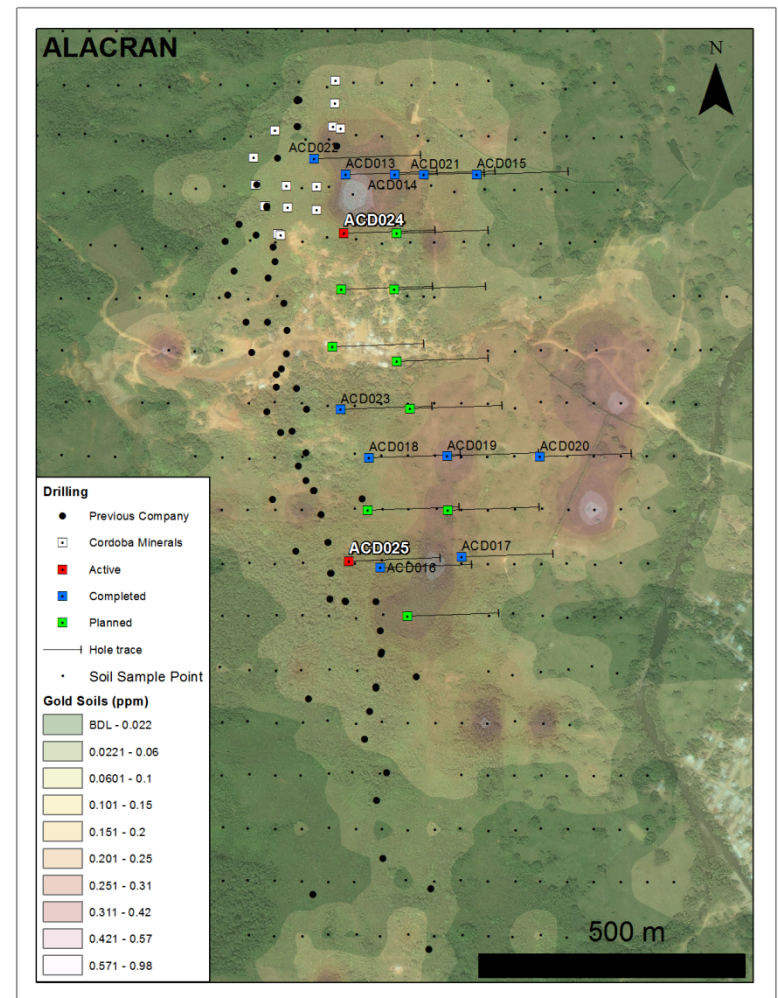

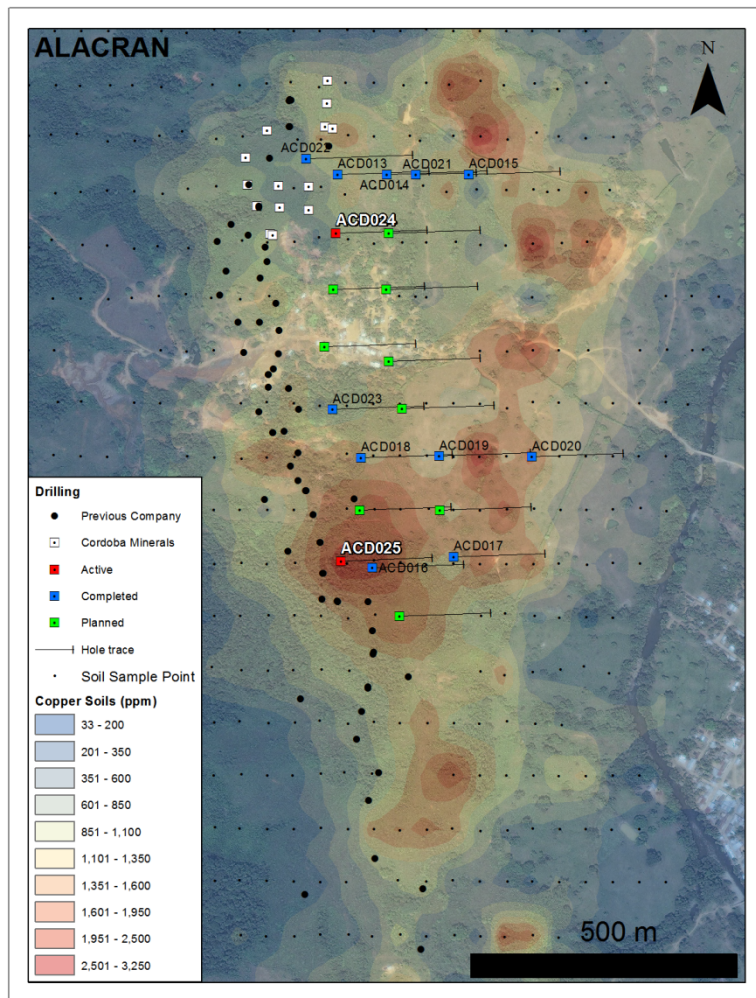

Alacran – Cross Section

Significant potential for large tonnage open-pit copper gold deposit

Alacran Expansion Potential

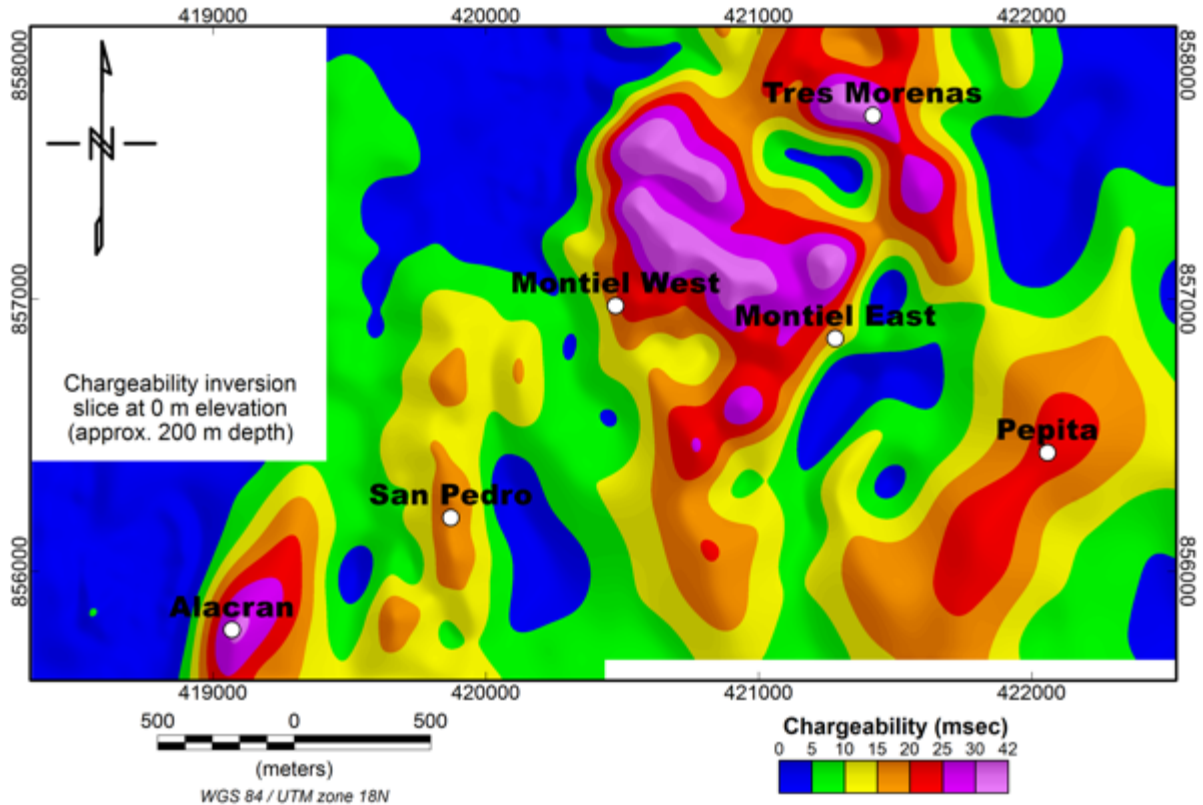

Large 800 m by 1.3 km copper and gold soil anomaly

Alacran Deposit

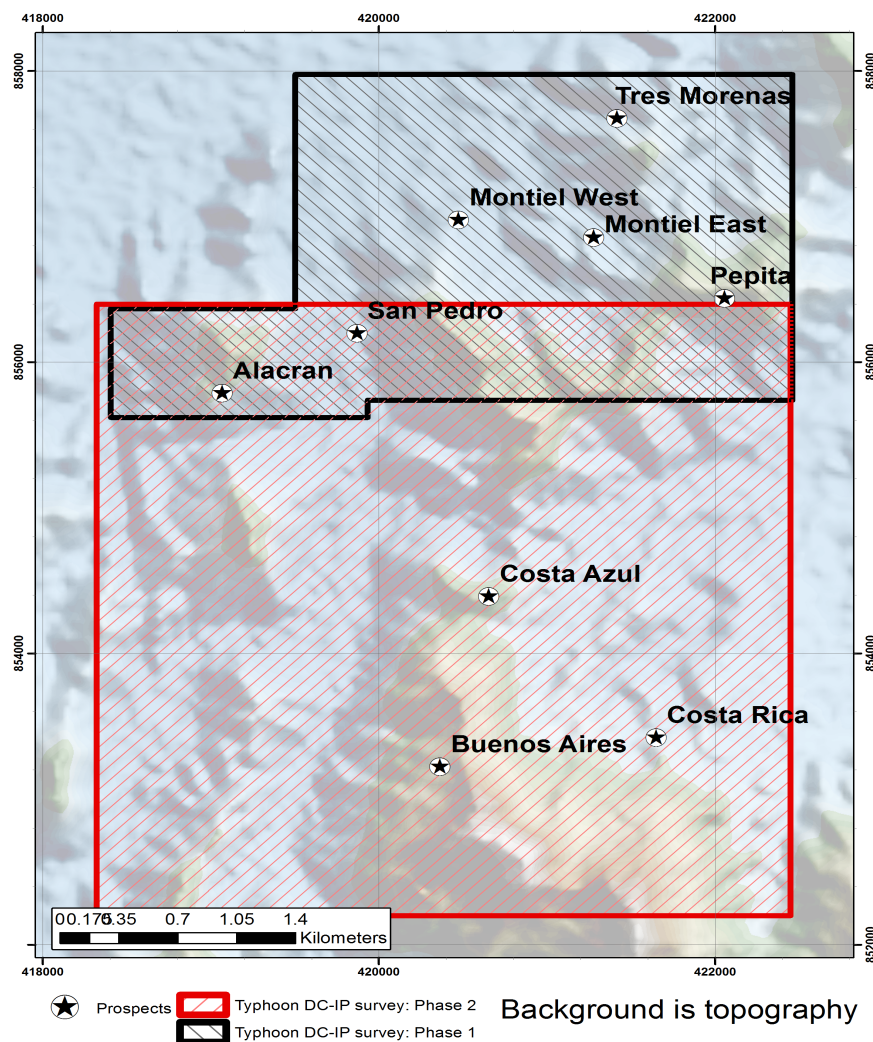

Typhoon IP Targets

- Covered only 7.5 km of 200 km prospective area
- Initial induced polarization (IP) results indicate multiple large and potentially significant sulphide chargeability targets
- Strong correlation of drill intercepts with Cu-Au mineralization and sulphide chargeability targets
- 10,000-metre drill program to test priority targets

Phase 2 of Typhoon IP

- Expanded Typhoon program to cover an additional 14 square kilometres
- Southern Alacran covered to target the large magnetic anomaly
- Numerous targets including Costa Azul porphyry and Buenos Aires copper gossan

Regional Scale

- First to apply for additional ground ahead of the announcement of our copper discovery (over 250,000 hectares)
- Cordoba has effectively locked-up all the prospective ground
- Cordoba will be conducting field exploration over the coming months to better understand the geological potential of the areas under application

Significant Catalysts

3,000-metre diamond drilling program at Alacran Deposit	Completed
---	-----------

Phase One Typhoon Program	Completed
---------------------------	-----------

Expanded 10,000-metre drilling program at Alacran Deposit	Ongoing
---	---------

Expand Typhoon over 14 km ² over San Matias	Ongoing
--	---------

Initial NI 43-101-compliant resource estimate for Alacran	Q3 2016
---	---------

Commence 10,000 metres of drilling at porphyry targets	Started
--	---------

Why a Partnership with HPX

- Proprietary, deep IP Typhoon technology to explore district scale potential of San Matias
- Proven team at finding world class assets – Voisey's Bay (Canada), Oyu Tolgoi (Mongolia), Kamoanga (DR Congo), Platreef (South Africa)
- Joint Venture terms includes:
 - Phase 1 – \$6 million for a 25% interest
 - Phase 2 – additional \$10.5 million for a 51% interest
 - Phase 3 – carry to feasibility for a 65% interest (unlimited spend)
- HPX has entered Phase 2 of the JV and currently drilling 20,000 metres
- HPX owns 37% of Cordoba with a three year standstill agreement

Experienced Management

Mario Stifano – President and CEO

Over 12 years of experience in the mining sector, having raised over \$600 million in project financings. Former CFO of Lake Shore Gold and Ivernia Inc. with projects moved from exploration to commercial production

Cybill Tsung – Chief Financial Officer

CPA and CA with over 14 years of diverse international experience in TSX and TSXV-listed companies with a mining focus. Former CFO of Sabre Metals Inc. and Corporate Controller for Andina Minerals Inc.

Christian Grainger – Vice President, Exploration

More than 15 years of experience as a geologist in Latin America, Australia and West Africa, specializing in grassroots and brownfield exploration, resource definition and development. Former VP Exploration-Regional for Continental Gold

Claudia Herrera – Country Manager

Over 15 years of experience administering mining companies in Colombia. Attorney at Law and Economist specializing in contracts, government and environmental issues. Recently appointed to the Board of Directors of the National Mining Association of Colombia

Sarah Armstrong – Vice President, General Counsel

Previously with Linklaters and Xstrata and has nine years experience in emerging markets leading transactions in Asia and Latin America including Hong Kong, Singapore, Mongolia, China, Chile, Peru and Colombia

Charles Forster – Special Advisor

P. Geo has more than 45 years experience, including SVP of Exploration at Oyu Tolgoi and led the discovery team of the world class Oyu Tolgoi copper gold porphyry in Mongolia

Luis Fernando de Angulo – Special Advisor

CSR specialist with experience at Cerrajon in Colombia and Occidental Petroleum

Experienced Board

Peter Meredith – Chairman

Director of Ivanhoe Mines Ltd. (formerly Ivanplats), a former Deputy Chairman of Turquoise Hill Resources and a former partner at Deloitte LLP.

David Reading – Director

CEO of Aureus Mining Plc and former CEO of European Gold Fields and general manager African exploration for Randgold

Ignacio Rosado – Director

CEO of Volcan a large Peruvian Zinc and Silver producer and former CFO of Hochschild Mining

Eric Finlayson – Director

Geologist with 30 years of experience including five years as head of exploration for Rio Tinto

Bill Orchow – Director

Former CEO of Revett Minerals Inc. and prior CEO of Kennecott Minerals Co from 1994 to 2002 (Rio Tinto)

Tony Makuch – Director

Former CEO of Lake Shore Gold and current CEO of Kirkland Lake Gold. Engineer with over 25 years of operation experience including COO of FNX Mining

Govind Friedland – Director

Executive Chairman of GoviEx Uranium and founder of Ivanhoe Industries
