

Forward Looking Statements

This document contains forward-looking statements under Canadian securities legislation. Forward-looking statements include, but are not limited to, statements with respect to the development potential and timetable of the Rosita project; the timing and amount of estimated future development and exploration; costs of future activities; capital and operating expenditures; success of exploration activities; government regulation of mining operations; and environmental risks. Generally, forward-looking statements can be identified by the use of forward-looking terminology such as "plans", "expects" or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or statements that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved". Forwardlooking statements are based on the opinions and estimates of management as of the date such statements are made. Forward-looking statements are subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of the Company to be materially different from those expressed or implied by such forward-looking statements, including but not limited to risks related to: timing and availability of external financing on acceptable terms; unexpected events and delays during construction, expansion and start-up; variations in ore grade and recovery rates; receipt and revocation of government approvals; actual results of exploration and mining activities; changes in project parameters as plans continue to be refined; future prices of metals; failure of plant, equipment or processes to operate as anticipated; accidents, labour disputes and other risks of the mining industry. Although management of the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. The Company does not undertake to update any forward-looking statements except in accordance with applicable securities laws.

The technical and scientific information included herein has been reviewed and approved by Laurence Curtis, P.hD, P. Geo., a director of the Company and a qualified person under National Instrument 43-101 of the Canadian Securities Administrators.

La Plata Project – Ticking All The Boxes

- ✓ High grade and high margin deposit
- ✓ Excellent infrastructure
- ✓ Defined permit process
- ✓ Strong community support

- ✓ The right timing in a resurgent Ecuador
- ✓ Significant exploration upside
- ✓ Investing at bottom of the cycle
- ✓ Veteran management team

Veteran Team

Disciplined and Committed to Succeed

Jonathan Goodman Chairman

- Metaform Investment's founder and majority shareholder of Toachi Mining
- Founded and built Dundee Precious Metals into a leading intermediate producer
- One of Canada's leading mining and resources investors

Laurence Curtis

- Renowned economic geologist and highly regarded analyst
- Geologist, Entrepreneur, Mine Builder
- Founded and built Intrepid Mines to +\$1 billion market capitalization

Nick Tintor President & CEO

- Public company and exploration project management for more than 25 years
- Part of Moto Goldmines Canadian team from listing to sale for \$578 m in 2009

Peter Nixon

- More than 30 years in the Canadian investment industry including Dundee Securities
- Deep relationships in the resources sector including directorship at Dundee Precious Metals Inc.

Carolina Vargas

- Career in the Canadian investment banking industry
- Leading analyst in Brendan Wood International rankings from 2009-2011

Julian Barnes

- Founder of RSG Global, one of the world's most respected mining consultancies
- Key team member at Dundee Precious Metals from inception
- Founding principal at Metaform Investments

Toachi Mining - New Company | Veteran Team

Ecuador – Open For Business

A Focus on Mining Investment

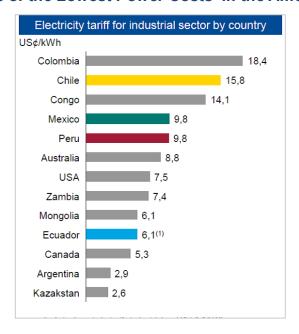

Modernizing Mining Laws, Improved Tax Structure, Investing in Infrastructure

- Government initiative to promote investment in mining.
 Policy shift towards increasing foreign investment. New Mines Ministry created. Lundin Gold leading the resurgence
- Ecuadorian Mining Law of 2009 amended in 2013 with favorable tax base – 22% income tax on small-mid size projects. Total tax rate up to 37% including profit sharing
- Small to mid size mining up to 1,000 tpd royalties 3%-4%
- No government partnership required.
- Total tax base more favorable than in Mexico (1)

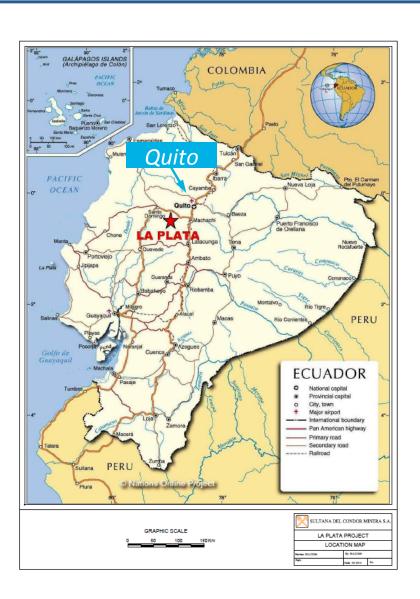

- Ecuador has invested heavily in regional infrastructure projects
- La Plata is located less than 10 km from the new Toachi-Pilaton hydro project
- La Plata will enjoy some of the lowest power costs in the Americas – 66% lower than costs in Colombia

Some of the Lowest Power Costs in the Americas

La Plata – Gold-Copper-Silver-Zinc VMS Project

Location

- Located 98 km south of Quito. 85 km on paved highway.
 Low elevation 1,600 m
- Hydro line to site. Access to hydro power

Exploration History

- La Mina open pit mine 1975-1981. Power line, water at site of former mine
- Cambior 1996-1999. Drilled 8,628 m in 28 holes and completed preliminary resource estimate (non-43-101)
- Cornerstone 2006-2009. Drilled 5,932 m in 17 holes.
- AMEC Scoping Study, 2015

In Country Partnership and Deal Terms

Partnership with Minera Cachabi and Principal Allen Brown – Established in Ecuador

Deal Terms						
Term	4-6 years					
Payments	US\$2 million					
Expenditure	US\$4 million					
Earn-in	60-75%					

Key Transaction Elements

- Toachi Mining is the project operator
- After 4-year earn in period, option to fund feasibility over a two-year extension period to earn additional 5%
- If project financing of less than \$60 million or more than \$60 million is arranged, Toachi earns additional 5% and 10% respectively

High Grade Resources - A Gold-Rich VMS Deposit

Non 43-101 Inferred Resource Estimate

Tonnes	Au	Ag	Cu	Zn	Pb
914,000	8.01 g	88.29 g	5.01%	6.71%	0.78%

Historic resource estimate. Updated by vendor from Cambior estimate using 50-m polygonal methodology and 2.5 g/t Au equivalent cut off grade. Historic resources provide an indication of potential at the project. Based on 14,568 m of drilling by Cambior and Cornerstone.

High Grade Intercepts

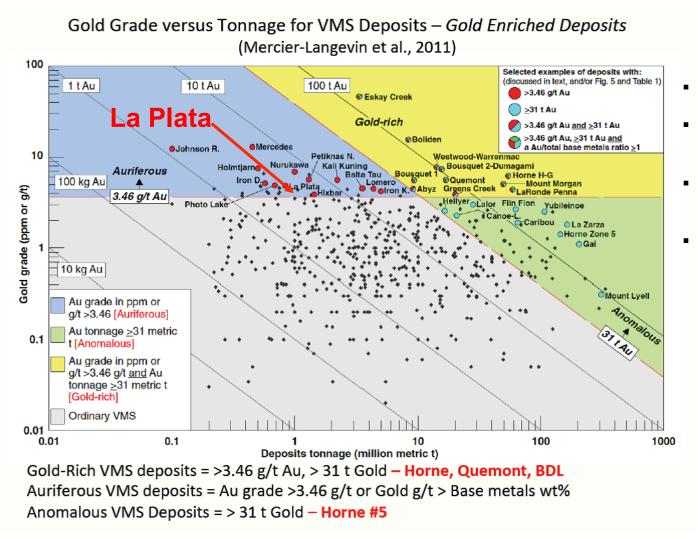

A record of generating spectacular drill results

Hole	Intercept (m)	Au (g)	Ag (g)	Cu (%)	Pb (%)	Zn (%)
177-97-17	5.2	15.31	96.1	6.87	0.75	3.44
177-97-20	17.1	10.38	73.8	7.22	0.31	2.77
LP-06-01	8.9	31.7	289	5.86	1.6	18.1
MT-17	3.0	13.9	7.5	5.27	N/A	0.42

Intersections calculated using US\$150 in situ value (based on US\$2.50/lb Cu, US\$0.90/lb Zn, US\$0.80/lb Pb, US\$1200/oz Au, US\$16/oz Ag), 0.5m external dilution, 2m minimum length & 2m maximum internal waste.

A VMS Deposit with High Gold Grades

- Significant gold grades
- Gold values >45% of total gross metal value per tonne
- One of the highest grade VMS deposits in the world
- Significant expansion potential via exploration

High NSR per Tonne – Driving Value

La Plata Gold-Copper-Silver-Zinc VMS Project

Robust NSRs in a High Commodity Cycle

Historic Resource Scenario									
	Gold (g) Copper (%) Silver (g) Zinc (%) Lead (%)								
Tonnes	914,000	8.01	5.01	88.29	6.71	0.78			
Historic Mill Recoveries		74%	88%	81%	77%	80%			
NSR/Tonne (1)							\$543		

Program Objectives

- Double resources from historic 900,000 tonnes to target 1.8 million tonnes
- Wide mineralized envelopes allow for lower cut-off grade and tonnage increases
- Apply 65% of grades in historic resource scenario

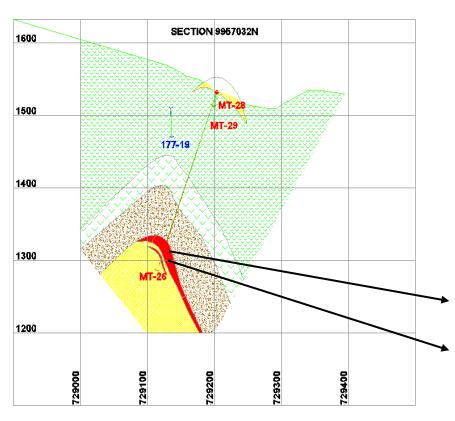

Target Resource Scenario									
Gold (g) Copper (%) Silver (g) Zinc (%) Lead (%)									
Tonnes	1,800,000	5.21	3.26	57.39	4.36	0.51			
Historic Mill Recoveries		74%	88%	81%	77%	80%			
NSR/Tonne (1)						\$	352.99		

La Plata – Deposit Type

- Paleocene Noranda/Kuroko-type gold-rich polymetallic VMS
- Massive and disseminated sulphide lenses hosted in fold limbs and axes along contact between dacites and basalt flows
- High grade lenses average 5 m-6 m true widths

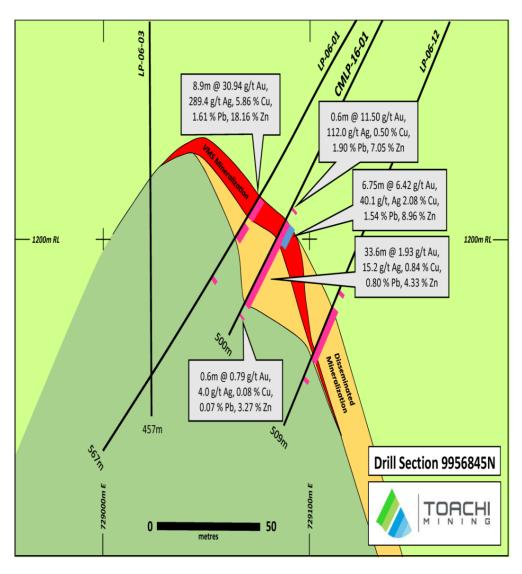

High gold, copper, zinc and silver grades are characteristic of the deposit

18.4m @ 5.11g/t Au, 33.37g/t Ag, 0.78% Cu, 0.0% Pb, 5.57% Zn

 $2.6m @ 10.05g/t \ Au, \ 43.6g/t \ Ag, \ 8.93\% \ Cu, \ 0.0\% \ Pb, \ 13.03\% \ Zn$

Drill Results – Confirming Gold-Rich VMS

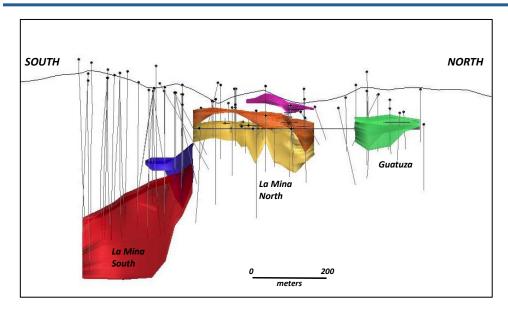

- CMLP-16-01 6.42 g Au, 2.08% Cu, 8.96% Zn, 1.54% Pb and 40.1 g Ag across 6.75 m
- CMLP-16-03 10.2 g Au, 146.3g Ag, 1.8% Cu, 29.4% Zn and 2% Pb across 3.7 m
- Larger disseminated zinc-lead rich zone including VMS totals 33.6 m in first hole
- Tonnage and future mine implications with wider disseminated zone

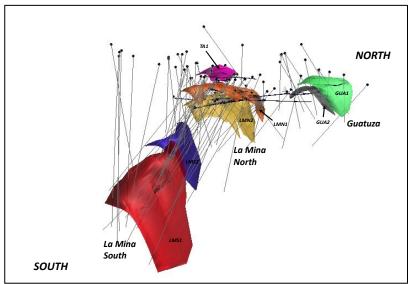

CMLP-16-01 massive banded chalcopyrite and sphalerite

La Mina 3D Model - Room to Grow

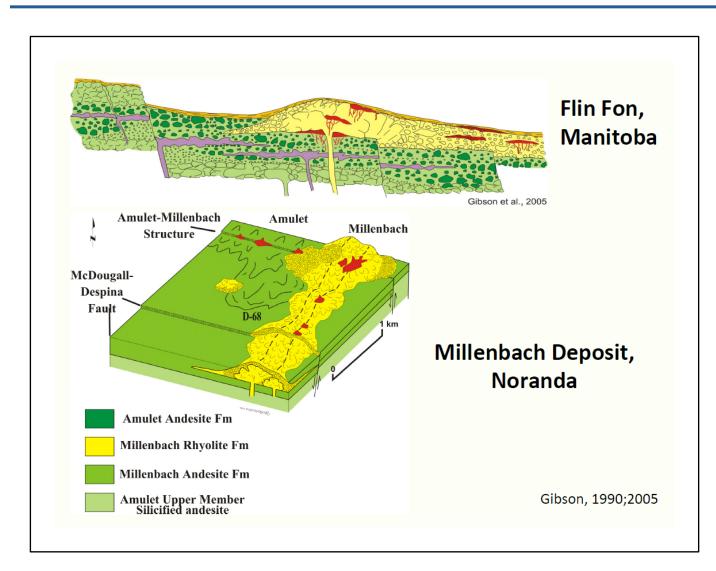

Modelling shows room to significantly increase historic resources

- Gap between La Mina North and Guatuza
- CMLP-16-04: 5.33 m, 5.2 g Au, 40.3 g Ag, 3.2% Cu, 8.98% Zn, 0.59% Pb
- Represents new, near surface mineralized lens in north zone
- South zone extension at depth offset identified by gravity

Cyclical Volcanism – Leads to Multiple VMS Lenses

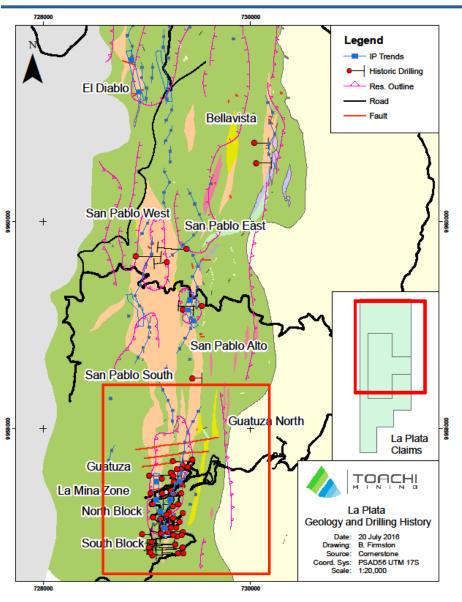

- VMS deposits rarely occur in isolation
- Favorable stratigraphy can host multiple lenses
- Spatially located laterally and stacked
- La Plata hosts multiple targets for VMS discovery

Significant Exploration Potential

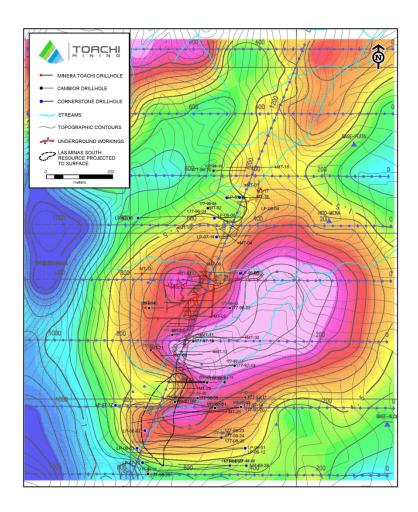

- +9 km of favourable geology along strike
- Guatuza target 150 m N of La Plata and possible deposit extension
- Guatuza intersection 6.84 m| 6.97% Cu| 0.99 g Au
- 14 defined Au-Cu-Ag-Zn exploration targets
- Targets defined by coincident geology, geophysics geochemistry and at times, surface mineralization
- Immediate potential proximal to main VMS lenses
- New interpretive studies by Toachi including reprocessed gravity analysis
- Data mining generated six new, discrete targets
- Kidd Creek target potential underpinned by Noranda-scale VMS district

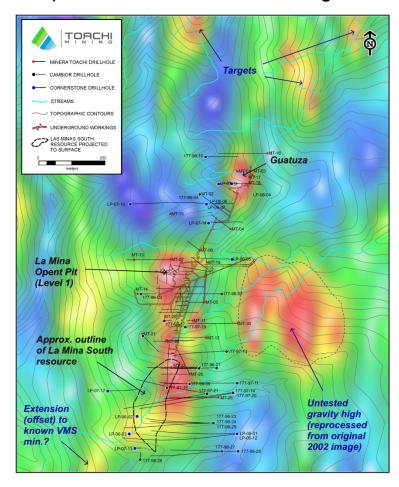

Reprocessed Gravity Data – A New Look

Gravity Data - 2002

Reprocessed Improved Resolution - New Targets

2016-2017 Program Objectives

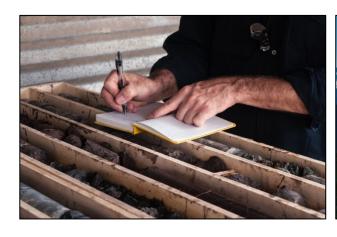

4,000-Metre First Phase Drill Program Underway

La Mina Deposit Resources

- Verify, infill and confirm the historic drill database
- Test for deposit expansion at depth

Exploration Target Drilling

- Drill test prioritized exploration targets
- Second drill rig in November
- 14 exploration targets provide significant upside

Value Creation Catalysts

Modest Investment | Significant Returns

Drill and Expand La Mina

Drill Exploration Targets

Develop and Grow Resources

- Expand La Mina's high grade VMS resources
- Scalable deposit can grow production profile
- High margin tonnes create significant value
- Prioritize and drill La Plata's 14 exploration targets
- Expand gravity survey coverage over the entire concession

La Mina resource target:
 1.8 million tonnes

Exploration target objective: 5-10 million tonnes

Summary

- High grades and high NSR/tonne in a gold-rich VMS project
- Excellent exploration potential to add to historic resources
- Good community relations and social operating license

- Strong in-country partner in Ecuador
- 4,000 m drill program in progress
 started August, 2016
- Exploration objective +10 million tonnes creates significant value
