

## Kalgoorlie Boorara Gold

**ASX: MRP**

**September 2017**

# Disclaimer

The information contained in this presentation has been prepared by MacPhersons Resources Ltd (MRP). This presentation is not an offer, invitation, solicitation or other recommendation with respect to the subscription for, purchase or sale of any securities in MRP. This presentation has been made available for information purposes only and does not constitute a prospectus, short form prospectus, profile statement or offer information statement. This presentation is not subject to the disclosure requirements affecting disclosure documents under Chapter 6D of the Corporations Act.

While the information contained in this presentation has been prepared in good faith, neither MRP nor any of its directors, officers, employees, agents or advisors give any representation or warranty, express or implied, as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this presentation. Accordingly, to the maximum extent permitted by law, none of MRP, its directors, officers, employees, agents, advisers, nor any other person accepts any liability whether direct or indirect, express or limited, contractual, tortious, statutory or otherwise, in respect of the accuracy or completeness of the information or for any of the opinions contained in this presentation or for any errors, omissions or misstatements or for any loss, howsoever arising, from the use of this presentation.

## **Forward looking Statements**

This presentation may contain statements that may be deemed 'forward looking statements'. Forward risks, uncertainties and other factors, many of which are outside the control of MRP, can cause actual results to differ materially from such statements. Such risks and uncertainties include, but are not limited to, commodity price volatility, increased production costs and variances in ore grade recovery rates from those assumed in mining plans, as well as political and operational risks and governmental regulation and judicial outcomes. MRP makes no undertaking to update or revise such statements, but has made every endeavour to ensure that they are fair and reasonable at the time of making the presentation.

Investors are cautioned that any forward looking statements are not guarantees of future performance and that actual results or developments may differ materially from those projected in any forward looking statements made.

Exploration targets are conceptual in nature and drilling may not convert these to resources.

## Why Invest.....

MacPhersons Resources (“MacPhersons”) plans to drill out and evaluate development options for its flagship 100% owned Boorara Gold Project;

- Targeting to increase the existing resource of 232,000 ounces gold (5.95 MT @ 1.2 g/t) by end of CY2017 by the ongoing Reverse Circulation (RC) drilling program at the Southern Stockworks and Northern Stockworks deposits.
- Development options abound;
  - Soft ore, good metallurgical gold recoveries up to 96%
  - Multiple nearby mills looking for additional feed or a new owner operator mill
  - Local Kalgoorlie workforce, on power grid, multiple contractors
- DFS to commence immediately following release of updated resource by end of 2017
- Substantial additional exploration upside;
  - Strike extensions of stacked mineralised layers
  - Newly identified high grade, quartz vein gold mineralisation on contact of mineralised dolerite host

In addition to Boorara, MacPhersons’ nearby Nimbus silver/zinc project is under review for further metallurgical which provides leverage to the improving base metals market.

# Boorara Gold Project – Long Section

MACPHERSONS

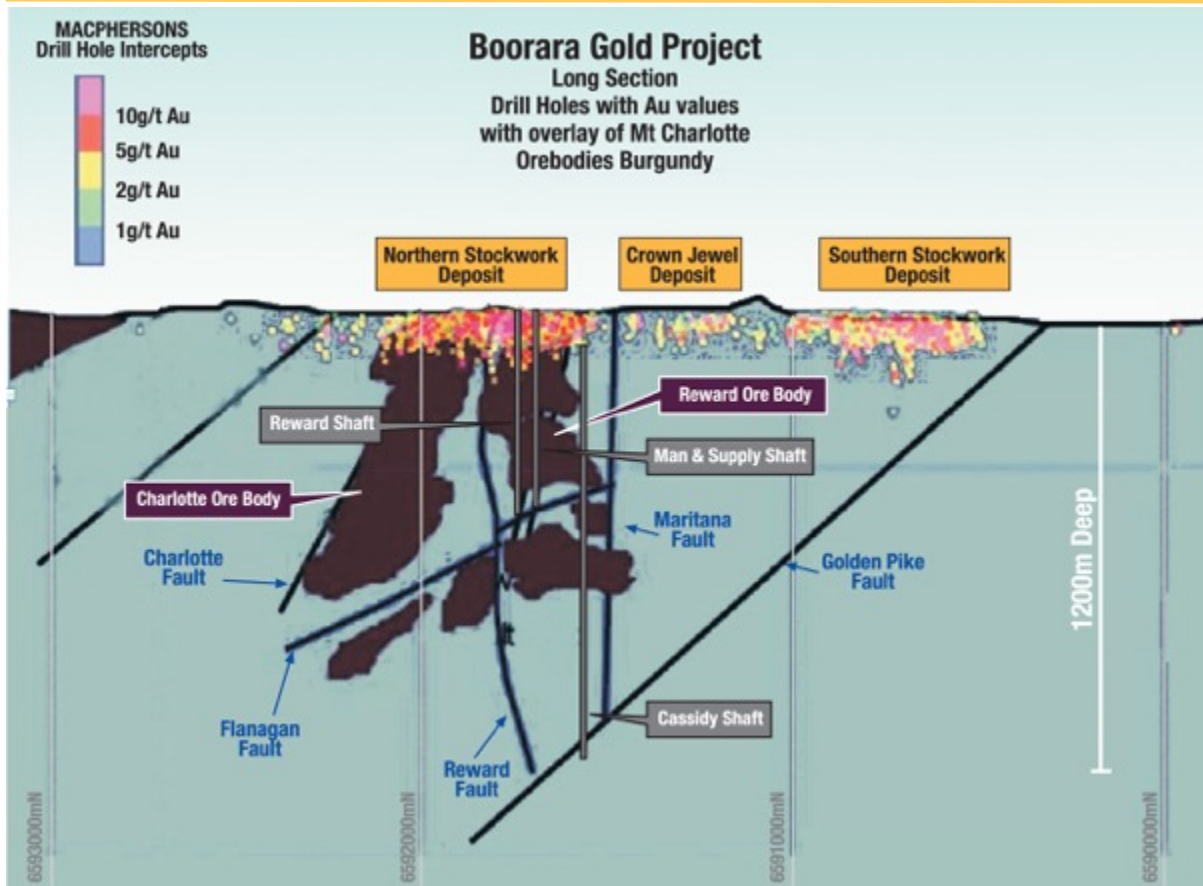

## Similar to Mt Charlotte-Golden Mile

MACPHERSONS

- Boorara gold mineralisation similar to the **six million ounce Mt Charlotte gold deposit** (part of the nearby Kalgoorlie Golden Mile 10 km west of Boorara).
- It took from discovery of gold near Mt Charlotte in 1893 to 1962 to start underground mining.
- It was in 1962 after a detailed evaluation by Western Mining Corporation Ltd (WMC) to identify a starter ore reserve of 2.97 Mt @ 4.9 g/t gold

## 20 km Strike Length of Leases

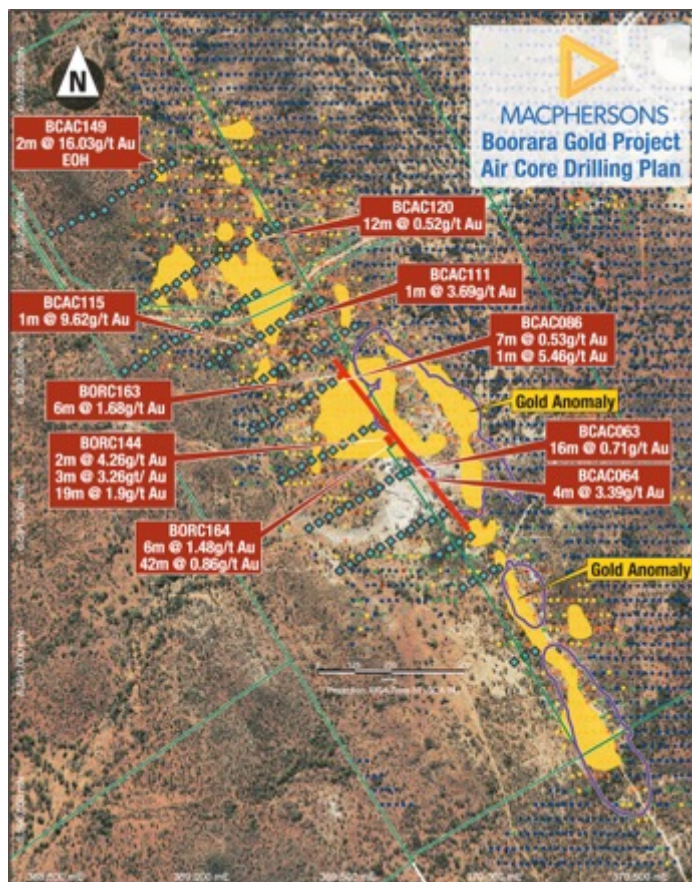

MACPHERSONS

*“the golden mile provides all skills, equipment and power; and within proximity to four operating mills”*

# Boorara Exploration Upside

- Large tenement package  
13,000 ha with numerous drill targets  
including geochemical anomalies to be tested
- Dolerite host mapped north of Boorara
- Western contact limited drill testing south of  
recently drilled BORC144 potential  
opportunity to expand existing resource
- Aircore drilling of geochemical anomalies  
+200ppb gold west and north of current  
Boorara pit designs

Multiple AC hits will  
be further drill tested  
including:

BCAC120 12m @  
0.52g/t Au

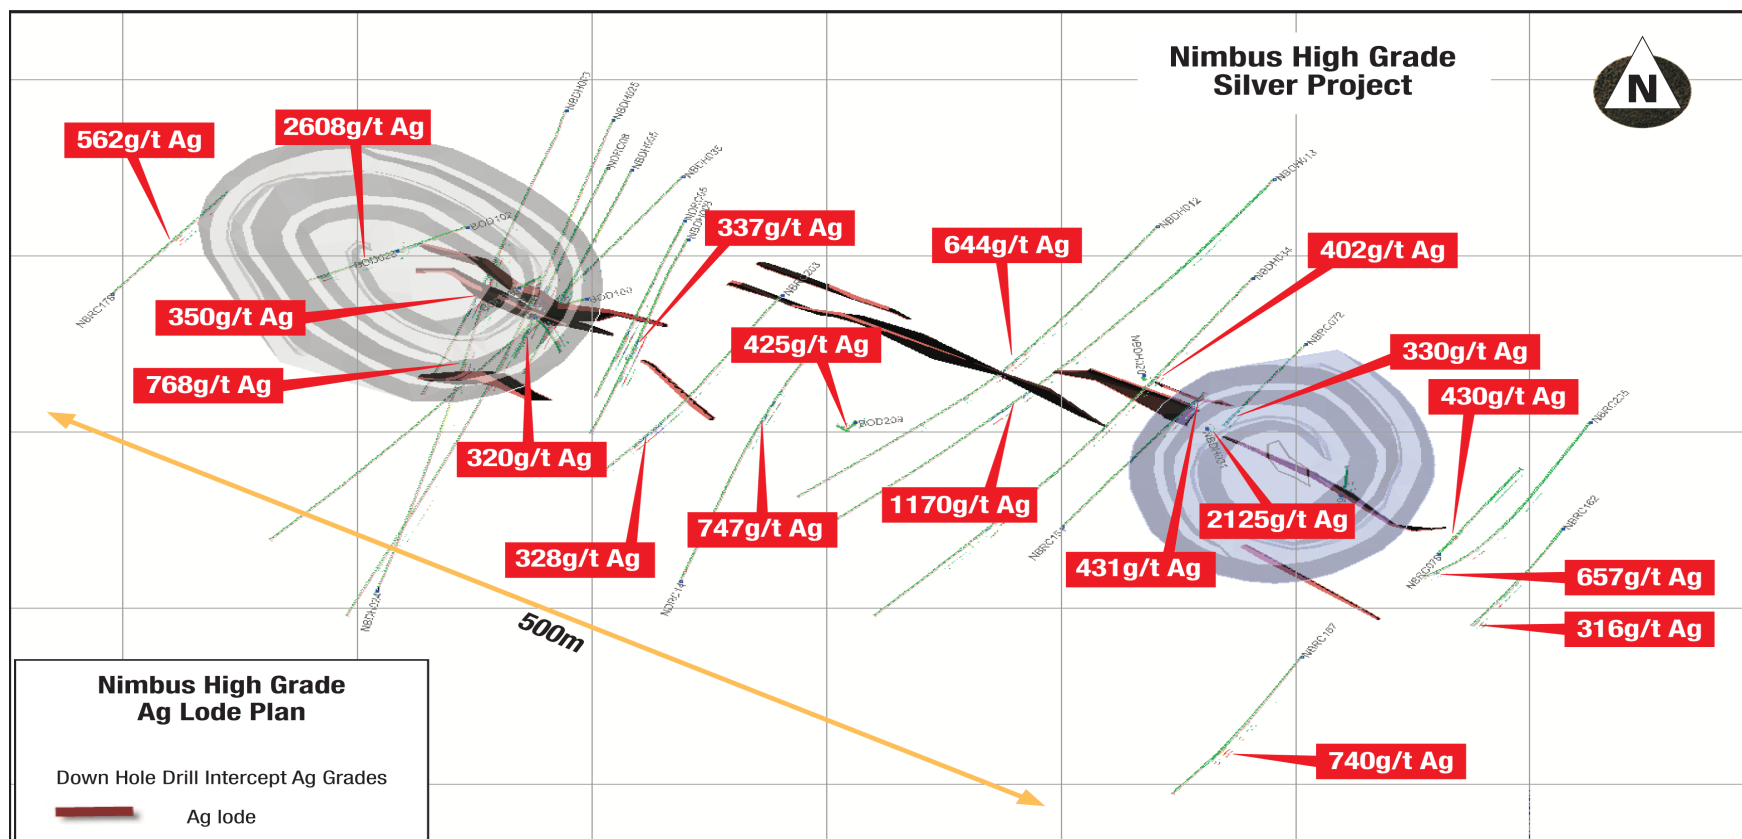

BCAC149 2m @  
16.03g/t Au EOH

## Investment Highlights

- Drill plan to increase existing 232,000 ounces resource focusing on multiple stacked quartz vein arrays
- 10 km from Kalgoorlie - skills and all services
- Development options; Toll treatment, JV, purchase options for MacPhersons ore in addition to owner operator
- DFS to start after release of new mineral resource by end 2017- Tailings Dam and Plant Design
- Additional exploration upside for strike extensions of stacked mineralised layers and newly identified high grade, quartz vein mineralisation on contact of the mineralised dolerite host

# NIMBUS SILVER ZINC PROJECT

# Competent Person's Statement

The information in this report that relates to exploration results is based on information compiled by Andrew Pumphrey who is a Member of Australian Institute of Geoscientists and is a Member of the Australasian Institute of Mining and Metallurgy. Andrew Pumphrey is a full time employee of MacPhersons Resources Ltd and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Pumphrey has given his consent to the inclusion in this report of the matters based on the information in the form and context in which it appears.

Full details of results of the Boorara Gold Project drill holes can be found in the below announcements:

ASX Announcement Date	Drill Hole Reference
14 February 2017	BODH 25
