

Exploring for Copper and Zinc in North America

October 2018

TSX-V: BAY OTCQB: ATBHF

Cautionary Statement

TSX-V: BAY

Not an Offer to Purchase or Sell Securities. This website is for informational purposes and is not an offer to sell or a solicitation of an offer to buy any securities in Aston Bay Holdings Ltd. (the "Company"), and may not be relied upon in connection with the purchase or sale of any security.

Forward-Looking Statements and General Disclaimer:

This presentation is Copyright 2018 Aston Bay Holdings Ltd., which reserves all rights in and to this presentation.

Aston Bay Holdings Ltd. (the "Company") is a public company listed on the TSX Venture Exchange (TSX-V: BAY), with a principal office in Toronto, Ontario and a registered office in British Columbia, Canada.

The statements contained in this presentation which are historical in nature are accurate to the best of our knowledge. However, the Company makes no assurances and does not guarantee that the statements included herein are accurate.

Forward-Looking Statements (Safe Harbor Statement):

The information set forth in this website may contain "forward-looking statements" that are not historical fact and are subject to certain risks and uncertainties. Statements in this website which are not purely historical in nature, including statements regarding beliefs, plans, expectations or intentions regarding the future, are forward-looking. Statements that are not historical facts, including statements that are preceded by, followed by, or that include such words as "estimate," "anticipate," "believe," "plan", "intend", "expect", "may" or "should" or similar statements, are forward-looking statements. Forward-looking statements which may be contained within this website include, but are not limited to, statements regarding the economic prospects of the Company's projects, general economic conditions, the Company's future plans or future revenues, timing of development and potential expansion or improvements. Such forward-looking statements are subject to risks and uncertainties which could cause actual results to differ materially from estimated results. Such risks and uncertainties include, but are not limited to, the Company's ability to raise sufficient capital to fund development, changes in general economic conditions or financial markets, changes in prices for the Company's mineral products or increases in input costs, litigation, legislative, environmental and other judicial, regulatory, political and competitive developments in Canada and world-wide, technological and operational difficulties or inability to obtain permits encountered in connection with exploration and development activities, labor relations matters, and changing foreign exchange rates. There can be no assurance that the Company's efforts will succeed and ultimately achieve sustained commercial success. These forward-looking statements are made as of the date of this presentation. There can be no assurance that beliefs, plans, expectations or intentions of the Company will prove to be accurate. We seek safe harbour.

Cautionary Note to U.S. Investors:

The United States Securities and Exchange Commission (the "SEC") permits U.S. mining companies, in their filings with the SEC, to disclose only those mineral deposits that a company can economically and legally extract or produce. We may use certain terms on this presentation, such as "measured," "indicated," "inferred," and "resources," that the SEC guidelines strictly prohibit U.S. registered companies from including in their filings with the SEC. As of the date of this Presentation, the Company has made no filings with the SEC, and makes no representations that it has or will have a duty to make filings with the SEC.

Qualified Person:

The technical information contained within this website has been reviewed and approved by the Company's Consultant, Primary Geologist and Director, Michael Dufresne, M.Sc., P. Geo., a qualified person as defined by NI 43-101.

- Copper and Zinc
- Discovery play

Mine finders

Copper and Zinc

- Demand: economic expansion, infrastructure renewal, electrified economy
- **Supply**: discovery deficit
- Old metals for the new economy

Discovery Play

- **Add value through exploration discovery**
- **Large, high-grade targets in good jurisdictions**
- *Business model: steep slope of the discovery curve, jump before it's too late

Discovery Play

Improve the odds in a high-risk game

- Commodities
- Jurisdictions
- Prospective geology
- Business model
- Technical expertise

- Copper and Zinc
- Discovery play

Mine Finders

Thomas Ullrich - CEO

Former Chief Geologist North America for Antofagasta Minerals, Senior Geologist for Almaden Minerals

David Broughton – Chief Geologist, Storm and Seal Projects

Award-winning geologist, responsible for discovery of Flatreef and Kamoa-Kakula Mines for Robert Friedland's Ivanhoe Mines

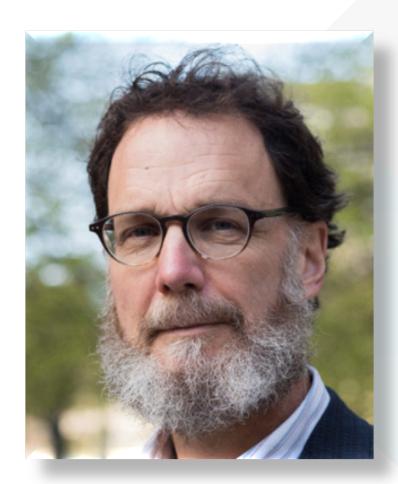

Donald Taylor – Advisor, Blue Ridge Project

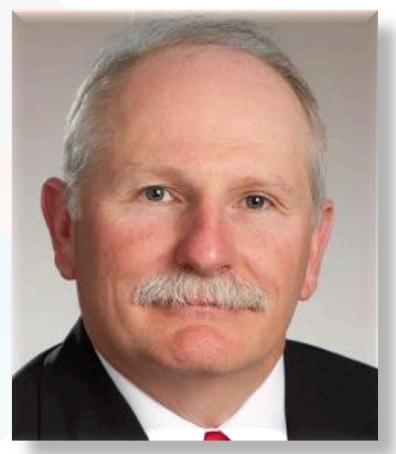

Award-winning geologist responsible for discovery of the Taylor Deposit for Arizona Mining.

Mine Finders

David Broughton *Chief Geologist, Aston Bay Project*

Donald Taylor *Advisor, Blue Ridge Project*

Aston Bay Project, Nunavut

- Sediment-hosted copper and zinc
 - "Congo-style" copper, Polaris-style zinc
 - On tidewater
 - Mining friendly jurisdiction

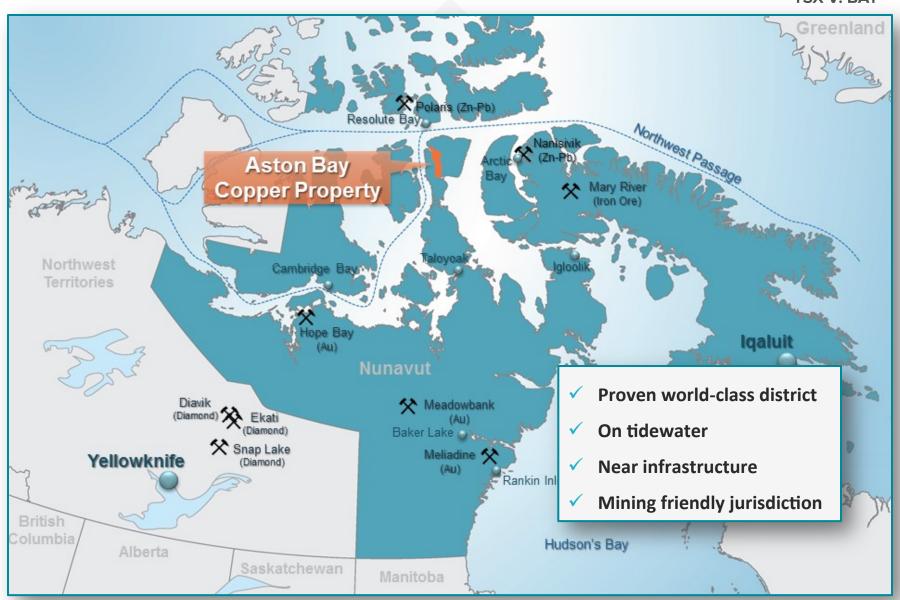

Blue Ridge Project, Virginia

- SEDEX/sediment-hosted copper, zinc and cobalt
- Carolina Slate Belt precious metals
 - Year-round exploration
 - Drill-ready
 - Don Taylor's "other" project

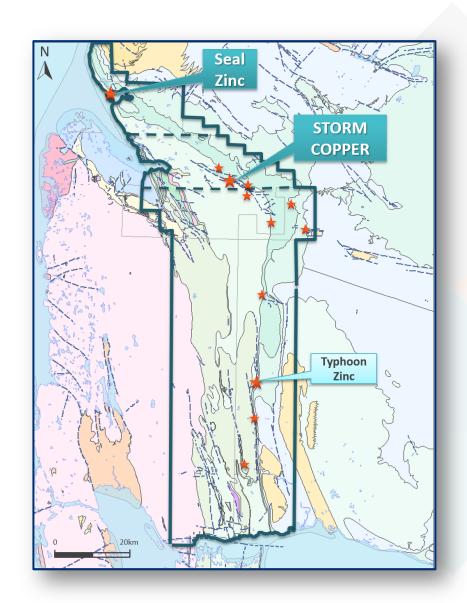

Somerset Island, Nunavut, Canada

TSX-V: BAY

- 100% ownership >1,000,000 acre (4,145 km²) property
- Along strike from past-producing Polaris zinc mine (21Mt @ 14% Zn), "Elephant Country"
- High-grade copper and zinc mineralization at the surface confirmed in shallow drilling at Storm Copper and Seal Zinc
- Multiple Cu and Zn showings along
 >140km strike length of correlative host rocks

Aston Bay Project

ASTON BAY

Storm Copper

TSX-V: BAY

High grade, near-surface copper mineralization confirmed by over 13,000 metres of recent and historic shallow drilling

Storm Copper 2200N Zone

- Historic Highlights include:
 - 56.3m @ 3.07% Cu
 - 110.0m @ 2.45% Cu
 - 31.7m @ 2.08% Cu
- 2017 Exploration Program:
 - Airborne Gravity Survey
- 2018 drilling targeted using new geologic model
 - Copper signature identified

Seal Zinc TSX-V: BAY

Zinc and Silver at Surface, on Tidewater

- Steeply-dipping stratiform sphalerite + pyrite replacing sandstone matrix
- Same age mineralization as the nearby past-producing (20.1 Mt @ 13.4% Zn) Polaris mine: a regional mineralization event
- 2018 drilling outside of resource area
 - Zinc signature identified

Highlights of Inferred Mineral Resource Estimate @ 4.0% ZnEq Cut-Off (December 2017)

Tonnage Mt	Zn %	Contained Zn kt	Ag g/t	Contained Ag koz	ZnEq%
1.006	10.24	103	46.5	1,505	11.44

^{*(}Stein, 2016)

^{**(}Selby et al., 2005; Dewing et al., 2007)

Aston Bay Project, Nunavut

- Sediment-hosted copper and zinc
 - "Congo-style" copper, Polaris-style zinc
 - On tidewater
 - Mining friendly jurisdiction

Blue Ridge Project, Virginia

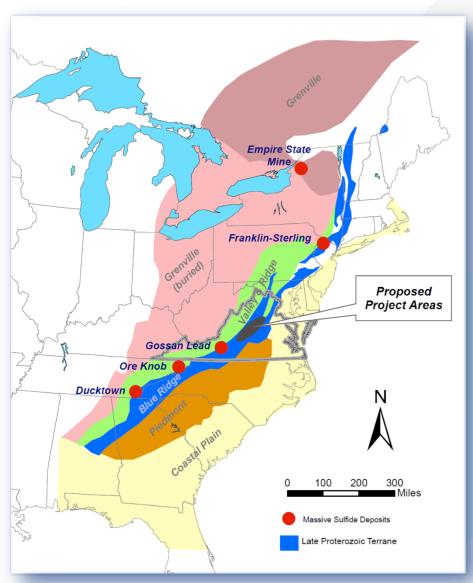

- SEDEX/sediment-hosted copper, zinc and cobalt
- Carolina Slate Belt precious metals
 - Year-round exploration
 - Drill-ready
 - Don Taylor's "other" project

Blue Ridge Project, Virginia USA

TSX-V: BAY

Geology & Mineralization

- Cu-Pb-Zn-Au-Ag mineralized belt prospective for sedimentary hosted, SEDEX and Broken Hill Type deposits
- Geologic extension of Carolina and Avalon Slate Belts – significant precious metal potential
- Significant historic highlights from drilling include:
 - 2.77% Cu, 0.94% Zn, 0.54% Pb, and
 8.2 ppm Ag over 5 metres
 - 1.17% Cu, 5.23% Zn, 0.90% Pb, and
 21.3 ppm Ag over 2.25 metres

Jurisdiction and exploration advantage

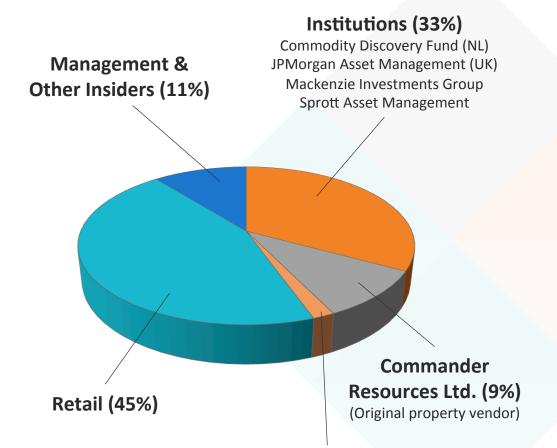

- Private land: timber farms
- Fee simple jurisdiction no drill permitting required
- Database to see through soil cover
 - Airborne EM/Mag survey covering over
 1.2 million acres
 - Regional stream sediment survey
 - Drill hole database
- Expertise, experience and relationships
 - Don Taylor directing exploration

(Licensing agreement for historical data)

Q4 2018

- Blue Ridge Project
 - Jack Fork's acquisition complete
 - Geological and geophysical interpretation
 - Drill targeting: base and precious metals
- Aston Bay Property
 - 2018 exploration drill program results
 - Geological and geophysical interpretation

2019

- Blue Ridge Project
 - Proposed winter/spring drill program

- Aston Bay Property
 - Drill targeting
 - Potential additional geophysics
 - Proposed summer drill program
