Forward-Looking & Cautionary Statements

This presentation contains forward-looking statements and forward-looking information (collectively, "forward-looking statements") within the meaning of applicable Canadian and US securities legislation. All statements, other than statements of historical fact, included herein including, without limitation, statements regarding the potential for the Livengood mine to become one the greatest producing gold mines in North America; the mine plan and design details described in the 2017 Pre-Feasibility Study; the potential for the expansion of the estimated resources at Livengood; the potential to optimize the Livengood project including through the use of a different resource model and additional metallurgical test work; the potential commencement of any development of a mine at Livengood following a production decision; and anticipated annual and aggregate gold production following development of a mine at Livengood are forward-looking statements. Information concerning mineral resource estimates, the preliminary economic analysis thereof and operating metrics related thereto, also may be deemed to be forward-looking statements in that it reflects a prediction of the mineralization that would be encountered, and the results of mining it, if a mineral deposit were developed and mined. Forward-looking statements are based on a number of assumptions which may prove incorrect, including, but not limited to, assumptions about the level and volatility of the price of gold; the timing of the receipt of regulatory and government approvals; permits and authorizations necessary to implement and carry on the Company's planned exploration and potential development program at Livengood; the Company's ability to attract and retain key staff, particularly in connection with the development of any mine at Livengood; the timing of the ability to commence and complete the planned work at Livengood; and the ongoing relations of the Company with its underlying lessors, local communities and applicable regulatory agencies.

Accordingly, the Company cautions that any forward-looking statements are not guarantees of future results or performance, and that actual results may differ, and such differences may be material, from those set out in the forward-looking statements as a result of, among other factors, variations in the nature, quality and quantity of any mineral deposits that may be located, the Company's inability to obtain, or any delays in the timing of, any necessary permits, consents or authorizations required for its activities, material adverse changes in economic and market conditions, changes in the regulatory environment and other government actions, fluctuations in the price of gold and exchange rates, the inability of the Company to raise the necessary capital for its ongoing operations and business and operational risks normal in the mineral exploration, development and mining industries, the Company's ability to attract and retain key staff, particularly in connection with the development of any mine at Livengood; the timing of the ability to commence and complete the planned work at Livengood; and the ongoing relations of the Company with its underlying lessors, local communities and applicable regulatory agencies, as well as the risks and uncertainties disclosed in the Company's most recent Annual Information Form filled with certain provincial securities commissions in Canada and in the Company's most recent Form 10-K and Forms 10-Q filled with the United States Securities and Exchange Commission, available at www.sedar.com and www.sec.gov, respectively. The Company undertakes no obligation to update publicly or release any revisions to these forward-looking statements to reflect events or circumstances after the date of this presentation or to reflect the occurrence of unanticipated events except as required by law. Christopher C. Puchner (CPG 07048), a Qualified Person as defined by the National Instrument (NI) 43-101, has reviewed and approved the technical information contained in this presentation and has

This presentation contains information with respect to adjacent or similar mineral properties in respect of which the Company has no interest or rights to explore or mine. Readers are cautioned that the Company has no interest in or right to acquire any interest in any such properties, and that mineral deposits on adjacent or similar properties are not indicative of mineral deposits on the Company's properties.

Scientific or technical information contained herein is derived from the independent NI 43-101 technical reports which include more detailed information with respect to the Company's properties, including the dates of such reports and the estimates included therein, details of quality and grade of each resource, details of the key assumptions, methods and parameters used in the resource estimates, a general discussion of the extent to which the resource estimates and the other estimates and projections included in the reports may be materially affected by any known environmental, permitting, legal, taxation, socio-political, marketing, or other relevant issues and you are urged to review such reports in their entirety. Mineral resources that are not mineral reserves do not have any demonstrated economic viability.

The Company uses certain terms in this presentation, such as "resources," "indicated" and "inferred" that are defined in, and required to be disclosed by, NI 43-101 but that the SEC's guidelines strictly prohibit U.S. registered companies from including in their filings with the SEC. Accordingly, the Company's disclosures regarding mineralization may not be comparable to similar information disclosed by US registered companies that are not subject to NI 43-101. You are urged to consider closely the disclosure in the Company's latest 10-K annual report, which may be secured from the Company website www.ithmines.com, or from the SEC's website at www.sec.gov. Note: All monetary values are USD unless otherwise stated.

The Livengood Advantage: Size - Leverage - Location

- Largest North American gold-only deposit by Reserves and Resources not wholly owned by a Major or Producer
- Quality asset provides long-term leverage & opportunity
- Located in a stable jurisdiction with rich mining history
- Easy access to critical infrastructure
- Approved 2019 work plan to move project forward
- Proven local Alaska experience on the Team & Board

Livengood Gold Reserve and Resource

- 9.0M ounce Gold Reserve at \$1,250 oz
 Proven & Probable Reserve
 (392 MT, Grade Avg. 0.71 g/t, cut-off grade varies*)
- 11.5M ounce Gold Resource at \$1,230 oz Measured & Indicated Resource (525 MT, Grade Avg. 0.68 g/t, cut-off grade varies**)
- 783 Drill holes totaling 717,435 feet define the resource

Canadian Institute of Mining (CIM) , Metallurgy and Petroleum 2014 standards were followed in the estimation of the Mineral Reserves.

*Mineral Reserves are based on a cut-off grade of 0.306 g/t for Rock type 4, 0.303 g/t for Rock type 5, 0.345 g/t for Rock type 6, 0.431 g/t for Rock type 7 and 0.393 g/t for Rock type 8 and Rock type 9. The measured and indicated mineral resources are inclusive of those mineral resources modified to produce the mineral reserves for the Livengood Gold Project.

**Mineral Resource: (Effective date August 26, 2016) based on a cut-off grade of 0.33 g/t for Rock Type 4, 0.32 g/t for Rock Type 5, 0.35 g/t for Rock Type 6, 0.40-0.851 g/t for Rock Type 7, 0.38 g/t for Rock Type 8 and Rock Type 9 are from Pit Constraining Parameters Used For the Livengood Gold Project Resource Estimation, August, 26, 2016.

Alaska: Rich Mining Jurisdiction

Red Dog Mines (Teck/NANA)

- Operating since 1989
- Zinc-lead mine top producer of zinc concentrate

Fort Knox (Kinross)

- Operating since 1996
- Surface gold mine produced >7,000,000 oz

Pogo (Northern Star Resources)

- Operating since 2006
- Underground gold mine produced >3,500,000 oz

Usibelli

- Operating since 1943
- Only Alaskan coal ~1,000,000 tons per annum

Kensington (Coeur)

- Operation since 2010
- Underground gold mine

Greens Creek (Hecla)

- Operating since 1989
- Underground silver mine

(Note: The above information is taken from public sources and has not been independently verified by ITH. None of the foregoing information is indicative of the nature of the deposit(s) at Livengood or any potential mine at Livengood.)

Great Access To Infrastructure

- Adjacent to Elliott
 Highway and Trans Alaska Pipeline
 System corridor
- Minimal transmission line required to connect to electric grid
- No need for a camp

Livengood – Gently Rolling Terrain of Interior Alaska

Excellent Project Fundamentals: Jurisdiction & Infrastructure

- 70 miles northwest of Fairbanks via year-round paved highway
- 50 miles from electric grid power
- Livengood Mining District active since 1914 and the State designated the primary surface use as mineral development
- Alaska has a history of mining and a well-defined permitting path

Access to highly skilled workforce

2017 Pre-Feasibility Study Improved Livengood Gold Project

- Project size optimized at 52,600 tons/day
- Lowered CAPEX by \$950 million to \$1.84 billion (34%)
- Reduced Process OPEX by \$2.97/ton to \$7.48/ton (28%)
- 6.8 million ounces of gold produced over 23 years
- Production Costs before Capital \$878/oz
- All-in Sustaining Costs (AISC) \$976/oz (1)
- All-in Costs (AIC) \$1,247/oz (1)

(1) Per World Gold Council guidance.

Based on ITH April 10, 2017 NI 43-101 "April 2017 Pre-Feasibility Study (PFS)".

April 2017 PFS compared to 100,000 ton per day project evaluated in Sept. 2013 Feasibility Study.

2018 Completed Work Plan: Focused Optimization

- Focus on metallurgical studies to better define and refine the project flowsheet.
- 4,000 kg of metallurgical composites shipped to SGS.
 - Composites selected based on grade and geochemistry based on updated 2017 geologic model.

2019 Work Plan: Metallurgical Program

- Board approved 2019 budget of \$3.7 million.
- Continue focus on metallurgical studies to better define and refine the project flowsheet.
- 2,000 kg of metallurgical composites being processed:
 - Evaluate optimum grind size
 - Determine whether different recovery parameters should be applied across orebody.
- BBA Inc. retained to continue guiding metallurgical program.

Ongoing Environmental Baseline Program

Ongoing programs prepare for future permitting

- Rock Characterization
- Geohydrology
- Surface Water & Hydrology
- Meteorology
- Air Quality
- Wetlands & Vegetation
- Aquatic Studies
- Cultural Resources
- Noise Studies
- Wildlife & Habitat Studies

Opportunity To Invest At Low Valuation

Peer Comparison to ITH

Outstanding Shares, Market Price and Proven & Probable Reserves based on corporate websites as of August 29, 2019. ITH taken from April 10, 2017 NI 43-101.

Alaskan Management Team

Track Record of Large Mine Development and Permitting Success

Karl L. Hanneman Chief Executive Officer	Mr. Hanneman has over 35 years of Alaska-based mining industry experience and most recently was COO of ITH. Prior to joining the Company in 2010, he played a key role on the team that worked to resolve the permit issues at the Red Dog Mine, and previously held a lead role in the development and permitting of the Pogo Gold Mine, both in Alaska. Mr. Hanneman holds a BSc. (Honors) degree in Mining Engineering from the University of Alaska.
Debbie L. Evans <i>Corporate Controller</i>	Ms. Evans has 25 years of experience in the mine controller and mine accounting positions. Prior to joining ITH, Ms. Evans was the Mine Controller for Kinross's Fort Knox Mine and for the Kensington Mine operated by Coeur Alaska Inc. Ms. Evans has a B.Sc. Business Management Degree from Lewis Clark State College.
Denise A. Herzog <i>Environmental Manager</i>	Ms. Herzog has 25 years of extensive project experience in mining and environmental engineering in Alaska. Her work experience has included the U.S. Bureau of Land Management, Fairbanks District Office as the Supervisory Mining Engineer. Ms. Herzog holds a M.S. and B.S. degree in Geological Engineering from the University of Alaska - Fairbanks.
Richard J. Solie, Jr. Investor & Community Relations Manager	Mr. Solie has over 30 years of government and public affairs experience throughout Alaska in oil and gas, healthcare and government sectors. Most recently, he worked as Director of Alaska Government & Community Affairs for Denali – the Alaska Gas Pipeline, a joint venture of ConocoPhillips and BP. Mr. Solie has a Bachelor of Arts in Economics from the University of Alaska.

Board of Directors

Inc. He has held senior positions at Stillwater Mining Company, Barrick Gold Corporation, Rio Algom and Kinross Gold/Amax. Mr. earned a Bachelor and Masters of Science in Mining Engineering from the University of Missouri-Rolla. Mr. Lang also currently se as Chairman of Centerra Gold Inc. Mr. Adamolekun is a Vice President at Paulson, where he has played a vital role in the sourcing and subsequent management of a number of the firm's largest investments. Prior to joining Paulson, Mr. Adamolekun worked in the Investment Banking Division of Goldman Sachs and as a Private Equity Associate at TPG Capital in the North American Buyout Group. Mr. Adamolekun received a Bachelor of Arts in Economics and Urban Studies from Brown University and a Masters of Business Administration from the Harva Business School. Anton J. Drescher President of Westpoint Management Consultants Ltd., which provides tax and accounting consulting services for business reorganizations. Mr. Drescher also currently serves as a director of Corvus Gold Inc. and Trevali Mining Corporation. Mr. Hanneman has over 35 years of Alaska-based mining industry experience and most recently was COO of ITH. Prior to joining to Company in 2010, he played a key role on the team that worked to resolve the permit issues at the Red Dog Mine, and previously a lead role in the development and permitting of the Pogo Gold Mine, both in Alaska. Mr. Hanneman holds a BSc. (Honors) degree Mining Engineering from the University of Alaska. Mr. Harshaw is a seasoned mining executive with a successful international career at Vale and Inco. Most recently, as Vice Preside Ontario Operations for Vale, Mr. Harshaw was responsible for the Base Metal operations of Vale in Ontario, which includes 6 mine mill, smelter, nickel refinery, cobalt refinery, precious metal refinery and Hydro Electric production facilities. Previously, he was Vi President, Marketing & Sales, Base Metals for Vale International, where he was responsible for the marketing and sales of base m in the Asia Pac

Livengood: A Great Leveraged Gold Play

Size - Leverage - Location

- Largest North American gold-only deposit by Reserves and Resources not wholly owned by a Major or Producer
- Quality asset provides long-term leverage & opportunity
- Located in a stable jurisdiction with rich mining history
- Easy access to critical infrastructure
- Approved 2019 work plan to move project forward
- Proven local Alaska experience on the Team & Board
