PASSING THE TIPPING POINT !!

Since consolidation of the land position the company has developed 6 underground mines, 12 open pits and fully refurbished and commissioned 3 processing plants.

Capital investment over the last 3 years in the Murchison Assets (including acquisitions) has been:

Big Bell as a single mine does 100,000oz year - 1/3rd of total output.

MURCHISON REGION OPERATING MODEL

WESTGOLD
RESOURCES LIMITED

Mine & Cart to a centralized processing hub from anywhere within a 100 km radius.

Blended plant feedstocks to manage consistent physical output and consistent gold production.

A trend toward underground mining as the main output because it is sustainable and provides a higher grade base load.

Open pits mining reducing to a smaller volume of plant feeds to maintain capacity and lower unit processing costs.

UNDERGROUND MINES TO DOMINATE
