CORPORATE PRESENTATION
SEPTEMBER 2022

Cautionary Language

Introduction

Montage Gold Corp. ("Montage" or the "Company") is a Canadian-based precious metals exploration and development company focused on opportunities in Côte d'Ivoire. The Company's flagship property is the Koné Gold Project, located in northwest Côte d'Ivoire, which currently hosts a Probable Mineral Reserve of 161.1Mt grading 0.66g/t for 3.42Moz of gold, as will be detailed in an updated technical report to be filed by the Company on SEDAR at www.sedar.com, which report will also constitute a definitive feasibility study of the Koné Gold Project (the "DFS").

Forward-looking Information

This presentation contains "forward-looking information" (referred to herein as "forward-looking statements") under the provisions of applicable Canadian securities legislation regarding Montage and the mineral properties of Montage located in Côte d'Ivoire (the "Montage Projects"), including the Koné Gold Project. Generally, these forward-looking statements can be identified by the use of words such as "plans", "expects", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates", "believes" or variations of such words and phrases or statements that certain actions, events or results "may", "could", "would", "might" or "will", "occur" or "be achieved" or the negative connotation thereof.

The mineral reserve estimates and the mineral resource estimates (collectively, the "MRE") for the Koné Gold Project and the Gbongogo deposit and the economic analysis thereof included in the DFS are forward-looking statements in that they reflect a prediction of the mineralization that would be encountered, and the results of mining, if a mineral deposit were developed and mined. Forward-looking statements in this presentation include, but are not limited to, those in respect of: the MRE; the timing and amount of future production from the Koné Gold Project; expectations with respect to the IRR, NPV, payback and costs of the Koné Gold Project; anticipated mining and processing methods of the Koné Gold Project; anticipated mine life of the Koné Gold Project; expected recoveries and grades of the Koné Gold Project; timing for the DFS; planned expansion of the Koné Gold Project; the expected closing of the Mankono Transaction; the future exploration programs at Mankono and districtwide at the KGP; expectations that the Gbongogo Inferred Mineral Resource will become an Indicated Mineral Resource; other current and planned initiatives and objectives in respect of Montage's capitalization, liquidity, capital resources and expenditures; mineral resource expansion potential and other growth opportunities; exploration and drilling plans; development timelines; business development strategies and outlook; planned capital expenditures, planned work programs and targets, drilling programs and other initiatives in respect of the Montage Projects; and economic performance, financial conditions and expectations.

Forward-looking statements are developed by management based on factors and assumptions that management considers reasonable, including: those factors and assumptions with respect to grade, recoveries, realized prices, costs, planned construction and production schedules set out on the slide titled "Disclosure Regarding Mineral Reserve and Resource Estimates" and that are set out in the press release dated February 14, 2022 with respect to the MRE and the DFS and that will be set out in the DFS and filed on SEDAR at www.sedar.com; that the MRE is accurate; that the cost to develop the Koné Gold Project will be as set out in the DFS; that the Company will have sufficient working capital to explore, develop and operate any other proposed mineral projects; that the Company will have access to adequate services and supplies; that there will be no material adverse change affecting the Company or its properties; that all required approvals and permits will be obtained when required, including concession renewals and permitting; that the political and legal environment will be stable and that developments will be consistent with current expectations; that currency, interest and exchange rates will be consistent with current levels; that there will be no significant disruptions affecting the Company or its properties; that the Company will have access to capital and debt markets and associated costs of funds will be as expected; that a qualified work force will be available when needed; that the ultimate ability to mine, process and sell mineral products will be on economically favourable terms; and that the effects of COVID-19 on the global economy and the operations of Montage and the Montage Projects will not be more adverse than expected.

Forward-looking statements are subject to known and unknown risks, uncertainties and other important factors that may cause any of the following to be materially different from those expressed or implied by such forward-looking statements: the MRE; the timing and amount of future production from the Koné Gold Project; the IRR, NPV, payback and costs of the Koné Gold Project; anticipated mining and processing method of the Koné Gold Project; anticipated mine life of the Koné Gold Project; or expected recoveries and grades of the Koné Gold Project. Actual results, level of activity, performance or achievements of Montage and/or the Montage Projects may be materially different from those expressed or implied by such forward-looking statements. Risks that may cause these forward-looking statements to be materially different, include but are not limited to: risks related to uncertainties inherent in the preparation of mineral reserve and resource estimates and definitive feasibility studies such as the MRE and the DFS, including but not limited to, assumptions underlying the production estimates not being realized, incorrect cost assumptions, unexpected variations in quantity of mineralized material, grade or recovery rates, unexpected changes to geotechnical or hydrogeological considerations, unexpected failures of plant, equipment or processes, unexpected changes to availability of power or the power rates, failure to maintain permits and licenses, higher than expected interest or tax rates, adverse changes in project parameters, unanticipated delays and costs of consulting and accommodating rights of local communities, environmental risks inherent in the Côte d'Ivoire, title risks, including failure to renew concessions, unanticipated commodity price and exchange rate fluctuations, risks relating to COVID-19, delays in or failure to receive access agreements or amended permits.

The Company also faces generally risks that companies developing gold mines face, including that the Company has a limited business history, with no assurance of revenues; that estimating mineral reserves and mineral resources is risky; that exploration and development is speculative and may not result in profitable mining operations; that mining requires substantial capital, resulting in significant financing risks and shareholder dilution; that global financial conditions may impact Montage's ability to raise additional funds; that the COVID-19 pandemic is impacting mining operations and the global economy; that negative operating cash flows are expected to continue and will need to be funded; that the future price of gold is uncertain and may be lower than expected; that gold prices and exchange rates are volatile and unpredictable and may not be as anticipated; that commercial viability may not be achieved even with an acceptable gold price; mining operations are very risky; operations during mining cycle peaks are more expensive; that built or planned infrastructure may be inadequate; that Montage's rights in its mineral properties could be lost, be defective or be subject to challenges and claims; that Montage's insurance coverage may be inadequate and result in losses; that Montage may fail to comply with the law resulting in adverse financial penalties; that Montage may fail to obtain or renew necessary permits and licences to develop and operate its properties; that climate change may make mining operations more expensive; that compliance with environmental regulations can be costly; that social and environmental activism can negatively impact exploration, development and mining activities; that unexpected geological, hydrological and climatic events could suspend mining operations or increase costs.

In addition, Montage faces the following risks: that Perseus Mining Limited exercises significant control over Montage; that price volatility of publicly traded securities may impact returns to and investor; that foreign investments and operations are risky; that there are conflicts of interest that may result in the interests of other issuers or shareholders being preferred to the Montage shareholders; that the influence of third-party stakeholders may result in the interests of other parties being preferred to the detriment of Montage; that taxes may be significantly higher than expected; that Montage must compete with larger entities for resources; that Montage is dependent on management; that legal proceedings can be costly and distract management from operating the business; as well as those factors discussed in the section entitled "Risk Factors" in Montage's Annual Information Form available on SEDAR at www.sedar.com.

Cautionary Language

Forward-looking Information

Although Montage has attempted to identify important factors, assumptions and risks that could cause actual results to differ materially from those contained in forward-looking statements, there may be others that cause results not to be as anticipated, estimated or intended. There can be no assurance that such forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such forward-looking statements. Accordingly, readers should not place undue reliance on forward-looking statements. Forward-looking statements are made as of the date hereof and, accordingly, are subject to change after such date. Forward-looking statements are provided for the purpose of providing information about management's current expectations and plans and allowing investors and others to get a better understanding of Montage's projects and operating environment. Montage does not intend or undertake to publicly update any forward-looking statements that are included in this presentation, whether as a result of new information, future events or otherwise, except in accordance with applicable securities laws.

Technical Disclosure – Gbongogo

The Mineral Resource Estimate for Gbongogo was carried out by Mr. Jonathon Abbott of MPR Geological Consultants of Perth, Western Australia who is considered to be independent of Montage Gold. Mr. Abbott is a member in good standing of the Australian Institute of Geoscientists and has sufficient experience which is relevant to the commodity, style of mineralization under consideration and activity which he is undertaking to qualify as a Qualified Person under National Instrument 43-101 ("NI 43-101"). Mr. Abbott consents to the inclusion in this presentation of the information, in the form and context in which it appears.

Technical Disclosure – Koné Gold Project

The Mineral Reserve Estimate for the Koné Gold Project has an effective date of February 14, 2022 and was carried out by Ms. Joeline McGrath of Carci Mining Consultants Ltd. who is considered to be independent of Montage. Ms. McGrath is a member in good standing of the Australian Institute of Mining and Metallurgy and has sufficient experience which is relevant to the work which she is undertaking to qualify as a Qualified Person under NI 43-101.

The Mineral Resource Estimates for the Koné Gold Project have an effective date of August 12, 2021 and were carried out by Mr. Jonathon Abbott of MPR who is considered to be independent of Montage Gold. Mr. Abbott is a member in good standing of the Australian Institute of Geoscientists and has sufficient experience which is relevant to the commodity, style of mineralization under consideration and activity which he is undertaking to qualify as a Qualified Person under NI 43-101.

For further details of the data verification undertaken, exploration undertaken and associated QA/QC programs, and the interpretation thereof, and the assumptions, parameters and methods used to develop the Mineral Reserve Estimate and the Mineral Resource Estimates for the Koné Gold Project, please see the definitive feasibility study, entitled "Koné Gold Project, Côte d'Ivoire Definitive Feasibility Study National Instrument 43-101 Technical Report" (the "DFS") and filed on SEDAR at www.sedar.com. The DFS was prepared by Lycopodium Minerals Pty Ltd. and incorporates the work of Lycopodium and Specialist Consultants, including Mr. Abbott, under the supervision of Sandy Hunter, MAusIMM(CP), of Lycopodium, a Qualified Person pursuant to NI 43-101 who is independent of Montage. Readers are encouraged to read the DFS in its entirety, including all qualifications, assumptions and exclusions that relate to the details summarized in this news release. The DFS is intended to be read as a whole, and sections should not be read or relied upon out of context.

The technical contents of this presentation have been approved by Hugh Stuart, BSc, MSc, a Qualified Person pursuant to NI 43-101. Mr. Stuart is the President of the Company, a Chartered Geologist and a Fellow of the Geological Society of London. Mr. Stuart is not independent of Montage as he is an officer, director and shareholder of Montage.

Consolidation Changes Everything

2,258km² Gold District in Côte d'Ivoire

- 85km strike length under control over one of West Africa's most prolific gold belts
- Consolidated in acquisition from Barrick and Endeavour

Koné Gold Project – Positioned to Expand

- Mineral Reserves of 3.42Moz at 0.66g/t¹
- +10 high-grade targets within trucking distance
- Gbongogo prospect gives high-grade head start

Funded for Aggressive Exploration

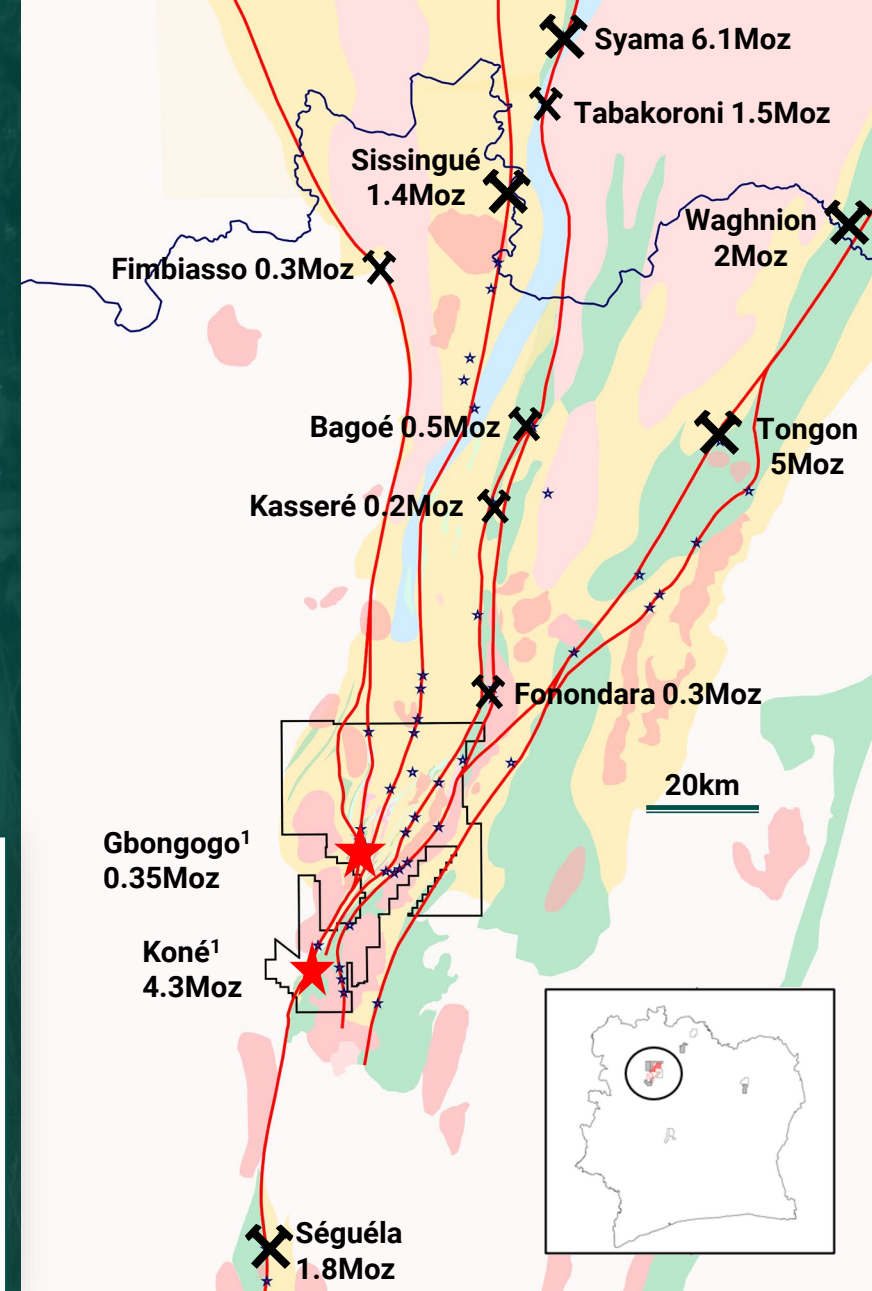

- 25,000m initial drilling planned

Strong Shareholder Backing

- Perseus Mining, Barrick Gold, Endeavour Mining, Lundin Group, Sandstorm Gold

Value Creating Strategy

- Exploration for next 12 months
- Revised economic study in 2023 to incorporate higher grades

Acquisition of Mankono-Sissédougou JV

Acquisition from Barrick and Endeavour

- C\$14.5M cash plus C\$15.5M in equity at C\$0.70
- Barrick and Endeavour to own 9.9% and 4.3% of Montage

Large land package all relevant to Koné

- 893km² of exploration permits
- US\$20M in historic work
- Gbongogo and Sissédougou are newly granted permits

C\$20 million financing completed

- Backed by orders from Lundin Family, Ross Beaty

Leadership Team

RICK CLARK

Chief Executive Officer

- 35+ Years in Mining Industry
- Successfully built Red Back Mining into intermediate producer; sold to Kinross in 2010
- Led Orca Gold into Sudan, leading to Block 14 discovery and sale to Perseus

HUGH STUART

President | B.Sc (Hons), M.Sc, FGS, CGeol

- 30+ Years in Exploration
- Track record of significant grassroots discoveries (Geita, Block 14)
- Former VP Exploration of Red Back Mining Inc. (Tasiast, Chirano)

ADAM SPENCER

EVP Corp. Development | CFA

- 15+ Years in Mining Capital Markets
- Former SVP Corp Dev, Sandstorm Gold Royalties
- Former Dir. Mining Investment Banking at Cormark Securities

GLENN KONDO

CFO | B.Comm, CA

- 20+ Years in Finance
- Specializes in M&A, Corporate Finance & Operations
- Former CFO, Lucara Diamond Corp.
- CFO of Orca Gold Inc.

003	10	113	103	1.29
007	0	91.5	91.5	1.54

Gbongogo

PRIMARY TARGET FOR GROWTH

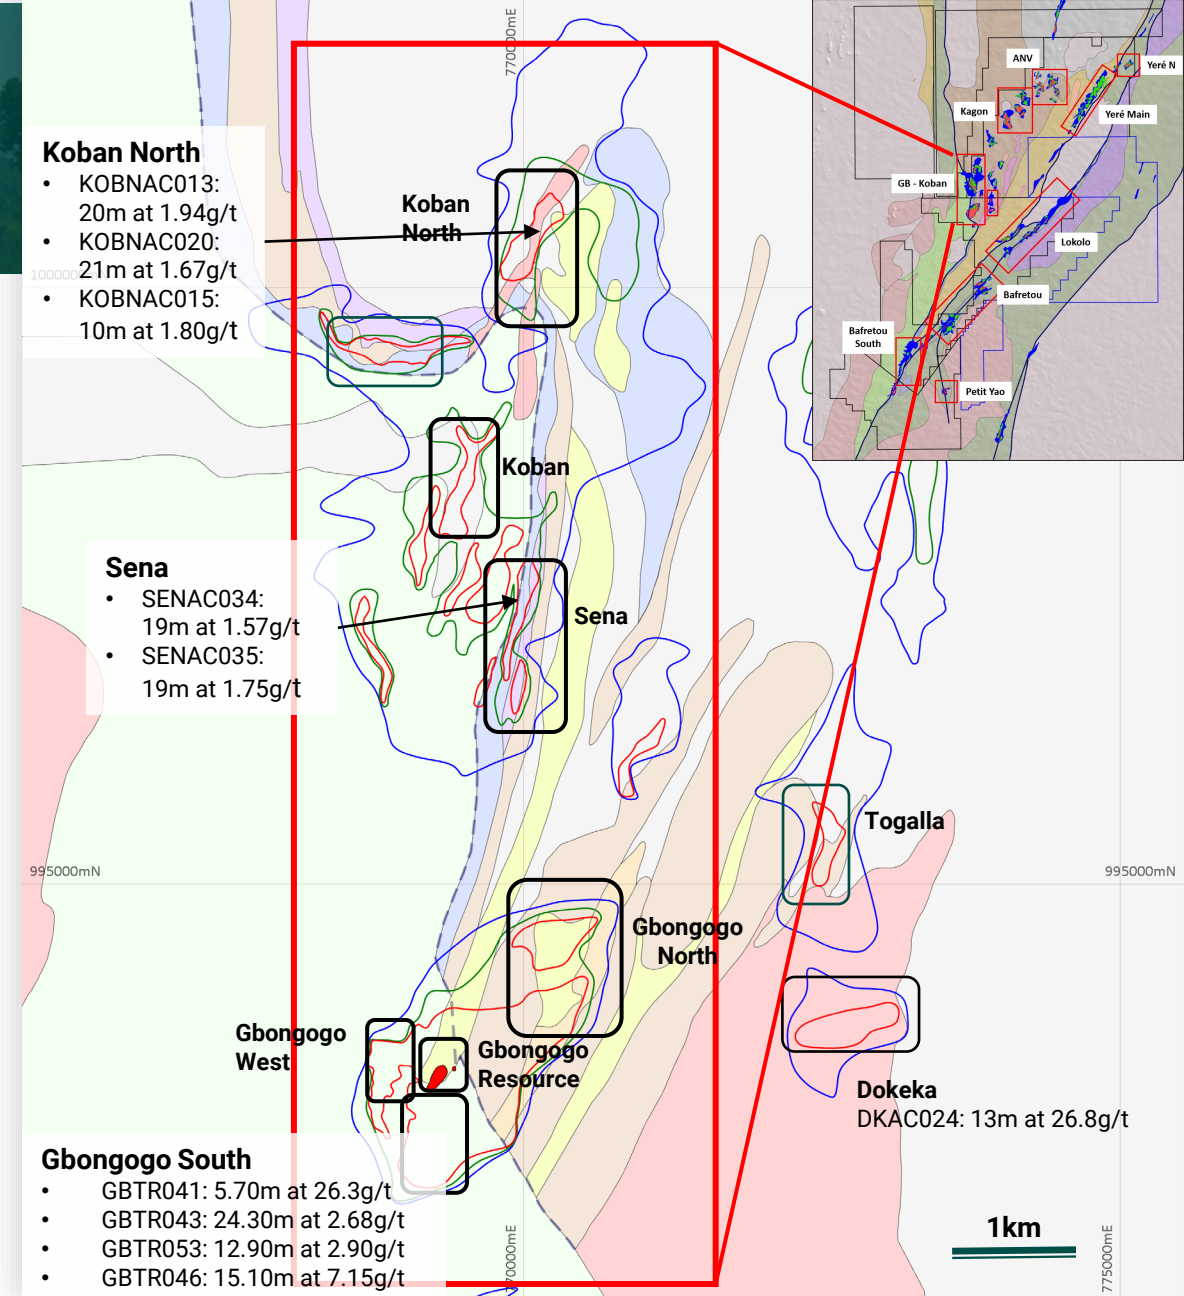

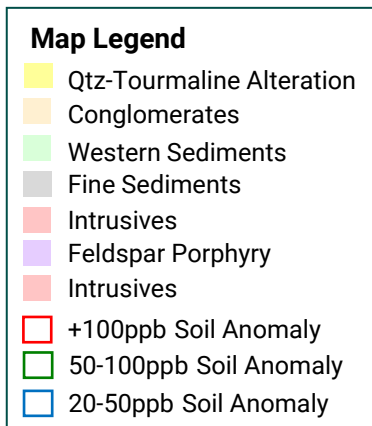

- The plunging diorite plug is yet to be fully defined and is open to the north-east and south-west
- Expansion drilling to be followed by infill
- High-grade reserves, if delineated, could materially improve KGP, even without further growth

Gbongogo

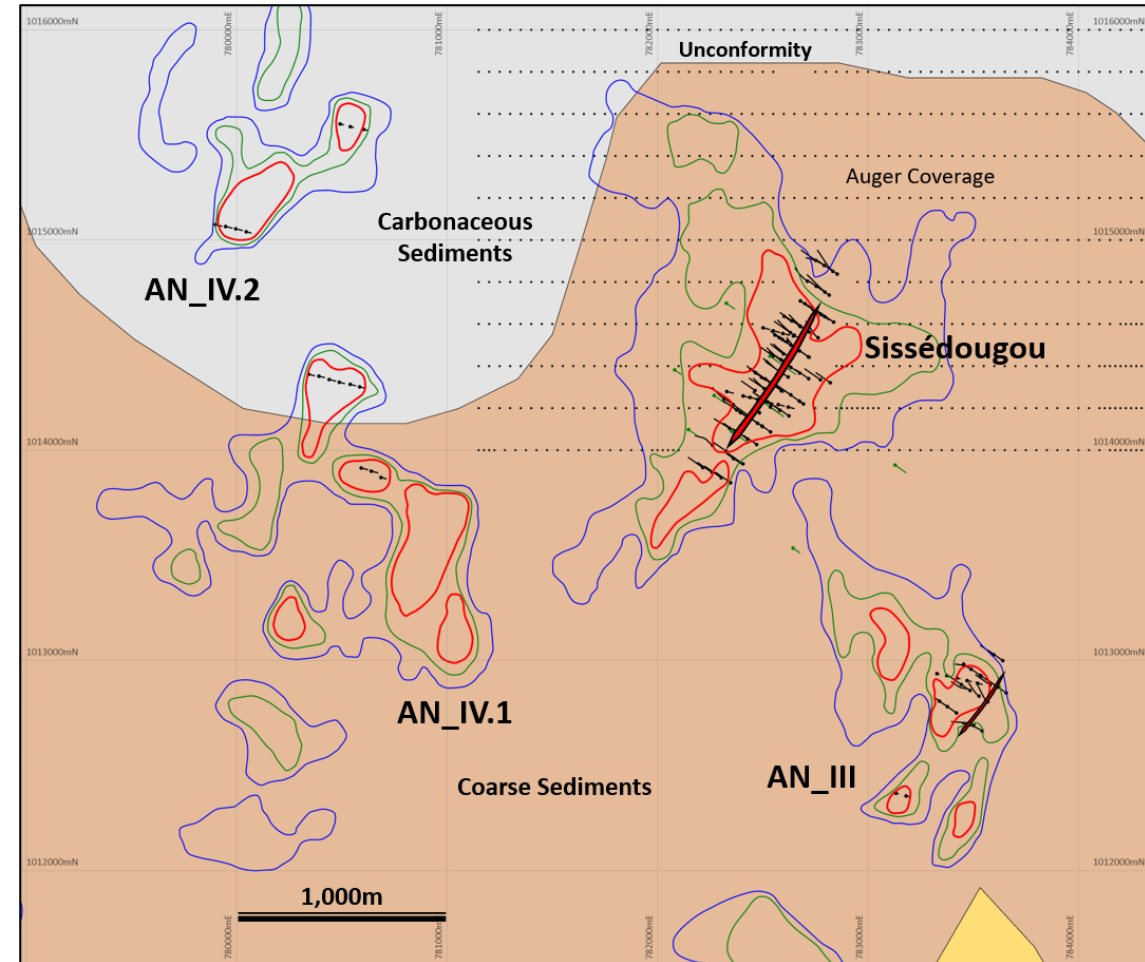

KOBAN TREND

- 10km north-south target centered on a district scale thrust fault
- Significant gold anomalism +100ppb
- Host to the 350koz Gbongogo Inferred Resource
- Widespread quartz – muscovite – tourmaline alteration (as at Gbongogo)
- 6 Priority 1 targets – drill ready
- 3 priority 2 targets
- Single mineralizing event affecting this part of the district

Sissédougou

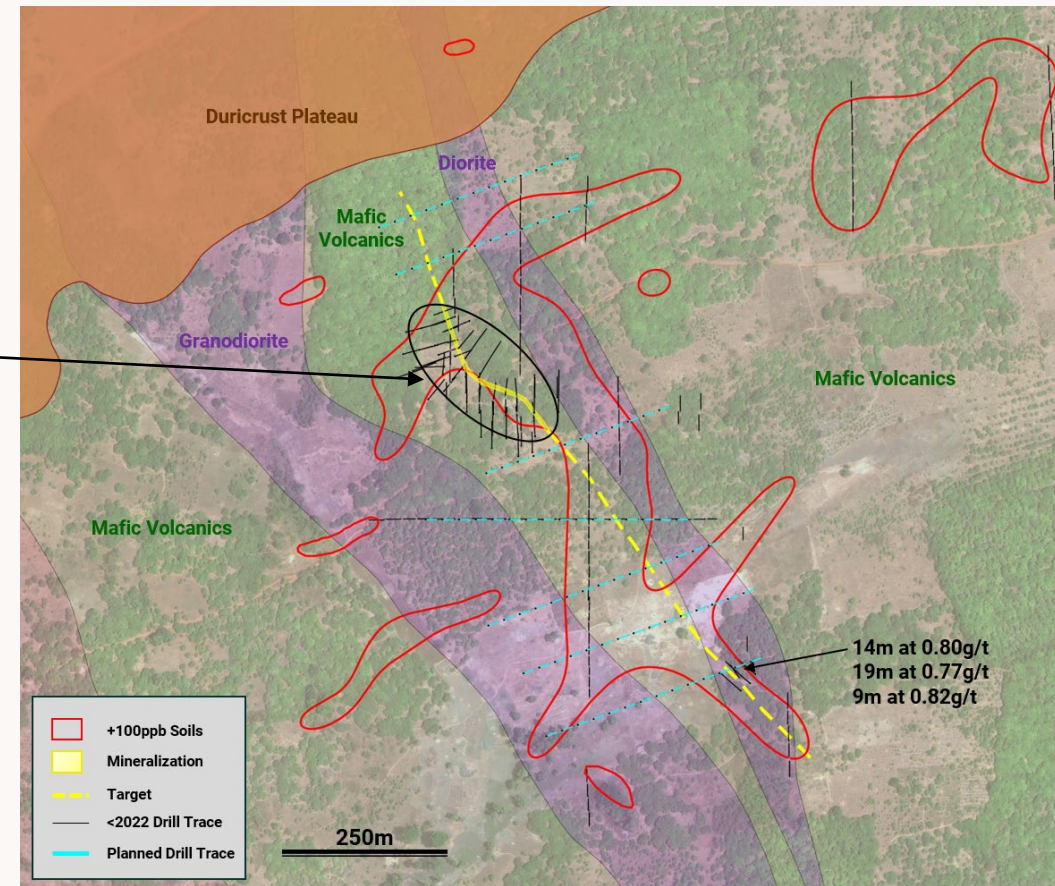

- Drilling by Cominor 2002 – 2010 and LMCI from 2011-2013
 - DD 23 holes for 3,439m
 - RC 85 holes for 10,371m
- 700m strike, 5-15m true width, better grades in oxide
- Ladder veins within a sub-vertical shear hosted by coarse grained volcanic sediments.
- 2015 La Mancha/Coffey Mining non-compliant resource (no RPEE constraint) of 1.46Mt at 1.8g/t for 87,000oz (based on a 0.5g/t COG)

Petit Yao

- 7km from Koné
- 2022 Gradient IP survey
- Anomaly now well understood
- Resource and extension drilling planned
- Shallow dipping
- Dominant oxide

Extensive Target Areas

PRIMED FOR DISCOVERY

Montage to Explore for High-Grade Satellites

- Target Criteria: Anything >50koz at 1.5g/t – 2.0g/t

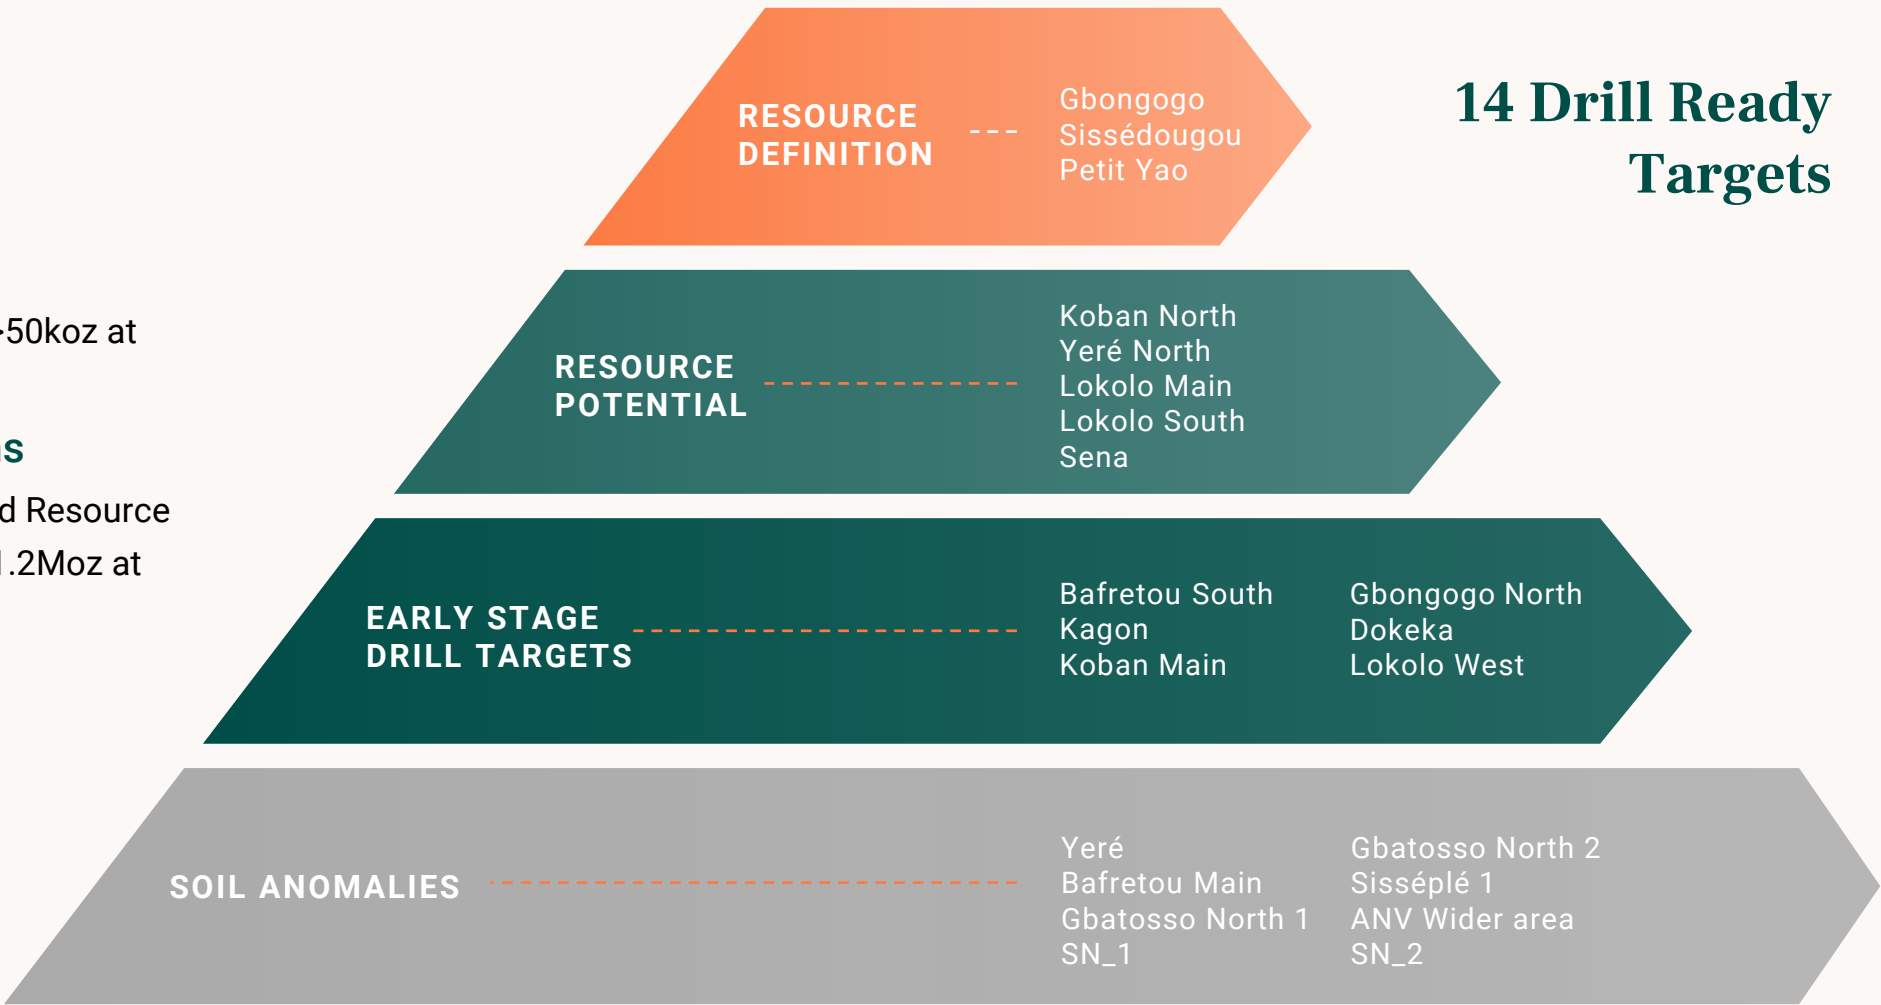

Objectives over 12 months

- Expand Gbongogo Inferred Resource
- Other targets: 0.8Moz to 1.2Moz at 1.5g/t – 2.0g/t

Initial Exploration Plan

- ~10,000m RC
- ~1,000m Core
- ~15,000m Air Core

All Targets Will Be Explored

District Consolidated

2,258km² Land Package;
85km strike-km

High-Grade Strategy

Positions KGP for Significant Improvement

Aggressive Exploration Planned

Initial 25,000m drilling on
>10 targets

Local Impact & Community Relations

Montage Gold is backed by strong community support from the surrounding villages of Fadiadougou, Batogo and Manabri. In addition to being the largest employer in the area, Montage continues to invest in these local communities with over \$100,000 contributed to projects within the last two years, including:

- Water wells in both Fadiadougou and Batogo
- New classrooms constructed in Fadiadougou
- Refurbishment of Batogo medical clinic and new staff housing
- Refurbishment of maternity unit in Fadiadougou
- New classrooms constructed in Manabri

Disclosure Regarding Mineral Reserves and Resources

February 2022 Koné Mineral Reserve Estimate

- The Mineral Reserves are classified according to the “CIM” definitions with an effective date of February 14, 2022.
- All Mineral Reserves were classified as Probable based on the Indicated Mineral Resource
- The Mineral Reserve cut off grade range from 0.19 g/t to 0.31g/t based on a \$1,250/oz gold price
- The Mineral Reserve statement was prepared by Joeline McGrath of Carci Mining Consultants Ltd., who is a Qualified Person as defined by NI 43-101.
- The figures in this tables are rounded to reflect the precision of the estimates and may include rounding errors.
- The estimates may be materially affected by environmental, permitting, legal, marketing, or other relevant issues. Please see “Forward Looking Statements” below and the technical report for the Koné Gold Project that will be prepared in accordance with National Instrument 43-101 and filed on SEDAR.

August 2021 Koné Mineral Resource Estimate

- Indicated Mineral Resources and Inferred Mineral Resources are reported in accordance with NI 43-101 with an effective date of August 12, 2021, for the Koné deposit within the KGP.
- The updated mineral resource estimate is reported on a 100% basis and is constrained within an optimal pit shell generated at a gold price of US\$1,500/ounce.
- The identified Mineral Resources are classified according to the “CIM” definitions of Indicated Mineral Resources and Inferred Mineral Resources.
- The updated mineral resource estimate was prepared by Mr. Jonathon Abbott of MPR Geological Consultants of Perth, Australia who is a Qualified Person as defined by NI 43-101.
- The estimates at 0.2g/t cut-off grade represent the base case or preferred scenario.
- Mineral Resources are reported inclusive of Mineral Reserves.
- Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability.
- The estimates may be materially affected by environmental, permitting, legal, marketing, or other relevant issues. Please see “Forward Looking Statements” below and the technical report for the Koné Gold Project that will be prepared in accordance with National Instrument 43-101 and filed on SEDAR.

April 2022 Gbongogo Mineral Resource Estimate

- Inferred Mineral Resources are reported in accordance with NI 43-101 with an effective date of the 22nd of April 2022, for the Gbongogo deposit within the Koné Gold Project.
- The inferred MRE is reported on a 100% basis and is constrained within an optimal pit shell generated at a gold price of US\$1,500/ounce.
- The identified Mineral Resources are classified according to the “CIM” definitions of Inferred Mineral Resources.
- The Inferred MRE was prepared by Mr. Jonathon Abbott of MPR Geological Consultants of Perth, Australia who is a Qualified Person as defined by NI 43-101.
- The estimates at 1.2g/t cut-off grade represent the base case or preferred scenario.
- Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability.
