

Beaver Creek Precious Metals Summit

September 2023

NYSE: CDE

> Cautionary Statements

This presentation contains forward-looking statements within the meaning of securities legislation in the United States and Canada, including statements involving strategic priorities and company strategies, goals and targets, growth, anticipated production, costs and expenses, exploration and development efforts, operations, expectations and initiatives at Palmarejo, Rochester, Kensington, Wharf and Silvertip, inflation and other cost pressures, capital allocation and estimates and mineral reserve and resource estimates. Such forward-looking statements involve known and unknown risks, uncertainties, and other factors which may cause Coeur's actual results, performance, or achievements to be materially different from any future results, performance, or achievements expressed or implied by the forward-looking statements. Such factors include, among others, the risk that the Rochester expansion project is not completed on a timely basis or requires more capital than currently anticipated for completion, the risk that anticipated production, cost and expense levels are not attained, the risks and hazards inherent in the mining business (including risks inherent in developing and expanding large-scale mining projects, environmental hazards, industrial accidents, weather or geologically-related conditions), changes in the market prices of gold and silver and a sustained lower price or higher treatment and refining charge environment, the uncertainties inherent in Coeur's production, exploration and development activities, including risks relating to permitting and regulatory delays (including the impact of government shutdowns), mining law changes, ground conditions, grade and recovery variability, any future labor disputes or work stoppages (involving the Company and its subsidiaries or third parties), the risk of adverse outcomes in litigation, the uncertainties inherent in the estimation of mineral reserves and resources, impacts from Coeur's future acquisition of new mining properties or businesses, the loss of access or insolvency of any third-party refiner or smelter to whom Coeur markets its production, the continued effects of the COVID-19 pandemic, including impacts to workforce, materials and equipment availability, inflationary pressures, continued access to financing sources, government orders that may require temporary suspension of operations at one or more of our sites and effects on our suppliers or the refiners and smelters to whom the Company markets its production and on the communities where we operate, the effects of environmental and other governmental regulations and government shut-downs, the risks inherent in the ownership or operation of or investment in mining properties or businesses in foreign countries, Coeur's ability to raise additional financing necessary to conduct its business, make payments or refinance its debt, as well as other uncertainties and risk factors set out in filings made from time to time with the United States Securities and Exchange Commission, and the Canadian securities regulators, including, without limitation, Coeur's most recent reports on Form 10-K and Form 10-Q. Actual results, developments, and timetables could vary significantly from the estimates presented. Readers are cautioned not to put undue reliance on forward looking statements. Coeur disclaims any intent or obligation to update publicly such forward-looking statements, whether as a result of new information, future events, or otherwise. Additionally, Coeur undertakes no obligation to comment on analyses, expectations, or statements made by third parties in respect of Coeur, its financial or operating results or its securities.

The scientific and technical information concerning our mineral projects in this presentation have been reviewed and approved by a "qualified person" under Item 1300 of SEC Regulation S-K, namely our Senior Director, Technical Services, Christopher Pascoe. For a description of the key assumptions, parameters and methods used to estimate mineral reserves and mineral resources included in this presentation, as well as data verification procedures and a general discussion of the extent to which the estimates may be affected by any known environmental, permitting, legal, title, taxation, sociopolitical, marketing or other relevant factors, please review the Technical Report Summaries for each of the Company's material properties which are available at www.sec.gov. 2022 reserves and resources were determined in accordance with Item 1300 of SEC Regulation S-K. Reserves and resources for prior periods were determined in accordance with Canadian National Instrument 43-101. Both sets of reporting standards have similar goals in terms of conveying an appropriate level of confidence in the disclosures being reported, but the standards embody slightly different approaches and definitions.

Non-U.S. GAAP Measures - We supplement the reporting of our financial information determined under United States generally accepted accounting principles (U.S. GAAP) with certain non-U.S. GAAP financial measures, including adjusted net income (loss), operating cash flow before changes in working capital, adjusted EBITDA, adjusted EBITDA margin, total leverage, net leverage, free cash flow, adjusted costs applicable to sales per ounce/pound and adjusted liquidity. We believe that these adjusted measures provide meaningful information to assist management, investors and analysts in understanding our financial results and assessing our prospects for future performance. We believe these adjusted financial measures are important indicators of our recurring operations because they exclude items that may not be indicative of, or are unrelated to our core operating results, and provide a better baseline for analyzing trends in our underlying businesses. We believe adjusted net income (loss), adjusted EBITDA, adjusted EBITDA margin, total leverage, net leverage, free cash flow, adjusted costs applicable to sales per ounce/pound and adjusted liquidity are important measures in assessing the Company's overall financial performance. This presentation does not represent an offer of any securities for sale.

> Cautionary Statements (cont.)

Cautionary Statements Regarding Company Outlook

In connection with Coeur's regular planning process, Coeur's management prepared certain unaudited financial and operating projections, some portions of which are included in this presentation. These projections were not prepared with a view toward complying with published guidelines of the SEC, the guidelines established by the American Institute of Certified Public Accountants with respect to prospective financial information or GAAP, but, in the view of Coeur's management, were prepared on a reasonable basis, reflect the best then-available estimates and judgments, and present, to the best of management's knowledge and belief at the time, the expected course of action and the expected future financial and operating performance of Coeur. However, this information is not fact and should not be relied upon as necessarily indicative of actual future results, and readers of this presentation are cautioned not to place undue reliance on these projections.

These projections have been prepared by, and are the responsibility of, Coeur's management. Neither Coeur's independent auditors, nor any other independent accountants, have compiled, examined, or performed any procedures with respect to these projections, nor have they expressed any opinion or any other form of assurance on such information or its achievability, and assume no responsibility for, and disclaim any association with, such projections.

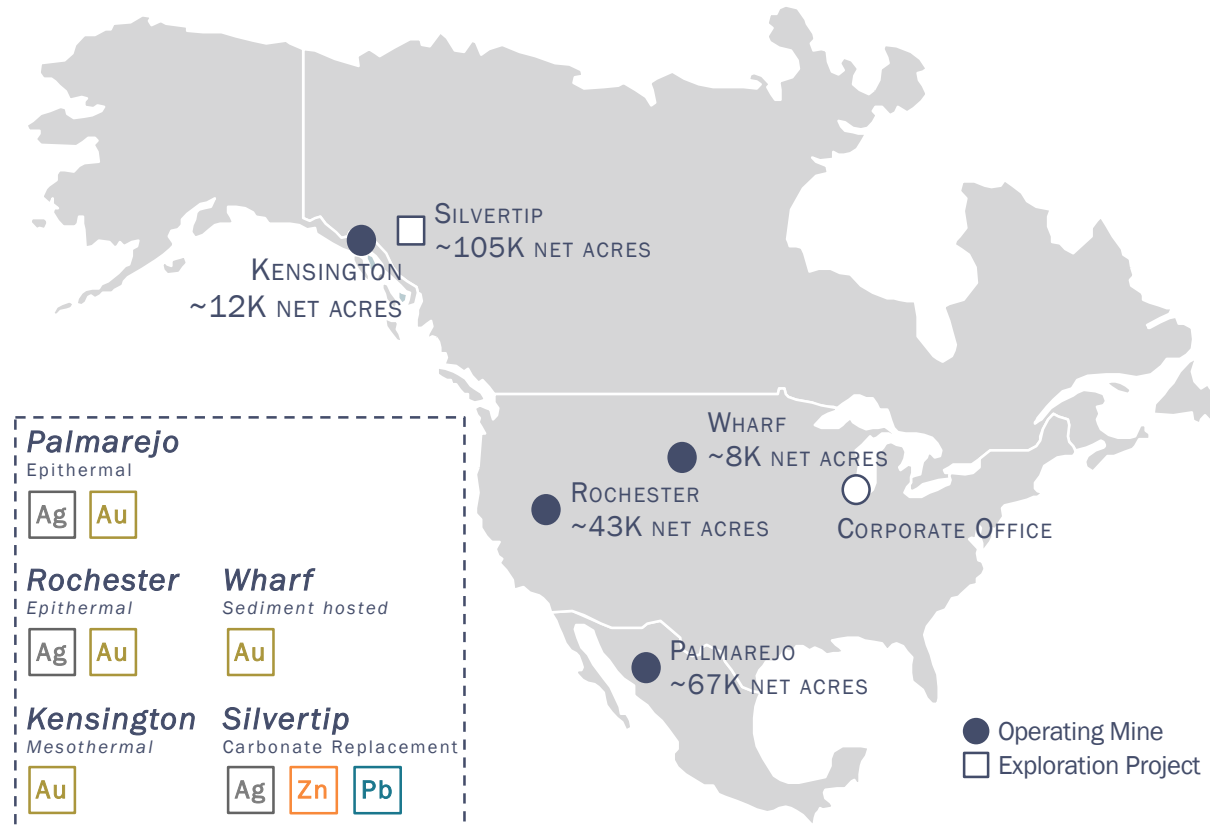

The assumptions and estimates underlying these projections are inherently uncertain and, although considered reasonable by the management of Coeur as of the date of their preparation, are subject to a wide variety of significant business, economic, and competitive risks and uncertainties that could cause actual results to differ materially from those contained in these projections, including, among others, risks and uncertainties relating to Coeur's businesses (including its ability to achieve strategic goals, objectives and targets over applicable periods), industry performance, the regulatory environment, general business and economic conditions and other factors described in the "Risk Factors" section of Coeur's most recent reports on Form 10-K and Form 10-Q and its other periodic reports filed with the SEC. Accordingly, there can be no assurance that these projections are indicative of the future performance of Coeur or that actual results will not differ materially from those presented. Inclusion of these projections in this presentation should not be regarded as a representation by any person that the results contained in these projections will be achieved.

Coeur does not intend to update or otherwise revise these projections to reflect circumstances existing since their preparation or to reflect the occurrence of unanticipated events, even in the event that any or all of the underlying assumptions are shown to be in error. Furthermore, Coeur does not intend to update or revise these projections to reflect changes in general economic or industry conditions.

> Company Overview

Headquartered in Chicago, IL, Coeur Mining is a well-diversified, growing precious metals producer with a focus on generating sustainable, high-quality cash flow from its North American asset base

U.S. organic growth offers unique near-term catalyst

Company Snapshot	
Listing:	NYSE: CDE
Shares O/S ¹ :	~353M
Market Cap ² :	~\$851M
ADTV ^{2,3} :	~\$16M
Proven & Probable Reserves⁴:	
	3.4 million ounces Au 245.7 million ounces Ag
2023E Gold Production⁵:	
	304,000 – 352,500 ounces
2023E Silver Production⁵:	
	10.0 – 12.0 million ounces

Note: See slides in appendix for additional information related to mineral reserves and resources.

(1) As of August 7, 2023.

(2) As of August 31, 2023.

(3) ADTV = Average Daily Trading Volume. Data Observed over a 90-day trading period.

(4) As of December 31, 2022.

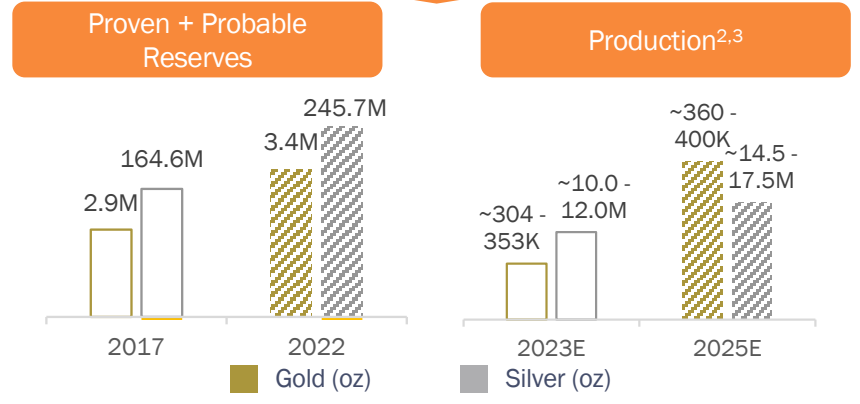

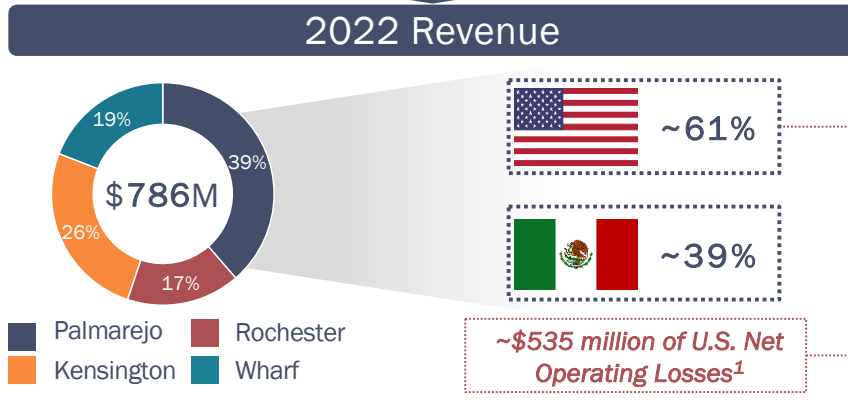

(5) Guidance as published by Coeur on August 9, 2023.

> Overview of Strategy

Coeur Mining aims to be America's premier, growing provider of precious and critical metals

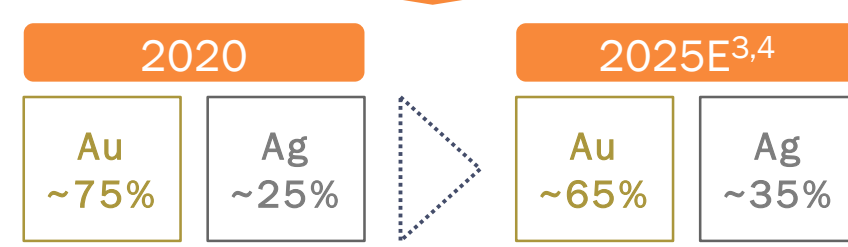

Balanced, prospective asset base in mining friendly jurisdictions
- Unique U.S. centric model -

Growth from investments in exploration and expansions
- Sector leading near-term expected growth -

Unique metals mix
- Growing expected silver contribution -

Developing a culture and team to deliver and protect value
- Leading ESG practices -

Note: See slides in appendix for additional information related to mineral reserves and resources.

(1) As of December 31, 2022.

(2) 2023 guidance as published by Coeur on August 9, 2023.

(3) 2025 guidance (including related assumptions) as published by Coeur on December 15, 2022.

(4) Assumes metals prices of \$1,800/oz Au and \$22.00/oz Ag.

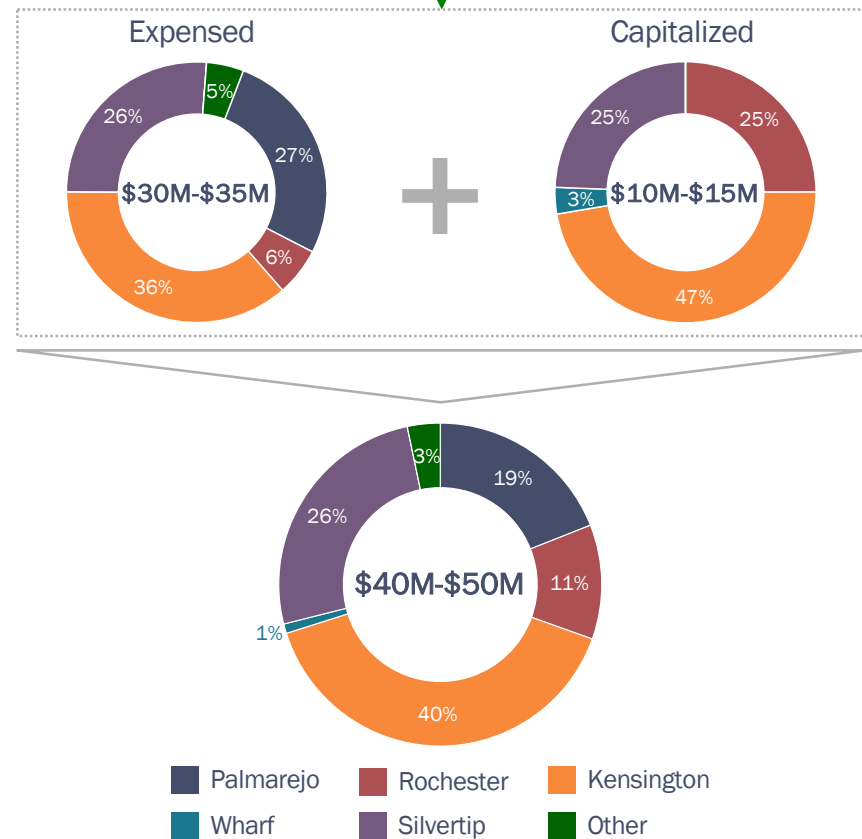

> Sustaining a Higher Level of Exploration Investment

Coeur completed another strong year of exploration investment during 2022 and remains focused on delivering results through the drill bit in 2023 with significant planned investments at Kensington and Silvertip targeting resource expansion

Total Exploration Investment (\$M)

2023E Exploration Investment by Site^{1,2}

(1) Guidance as published by Coeur on August 9, 2023.

(2) Figures and percentages reflect midpoint of guidance as published by Coeur on August 9, 2023.

> Expanded Reserve and Resource Base

Coeur's 2022 exploration program was highly successful in replacing depletion and growing resources. The Company has invested nearly \$245 million in exploration over the past five years, contributing to significant overall reserve and resource growth from its large, prospective and underexplored land holdings

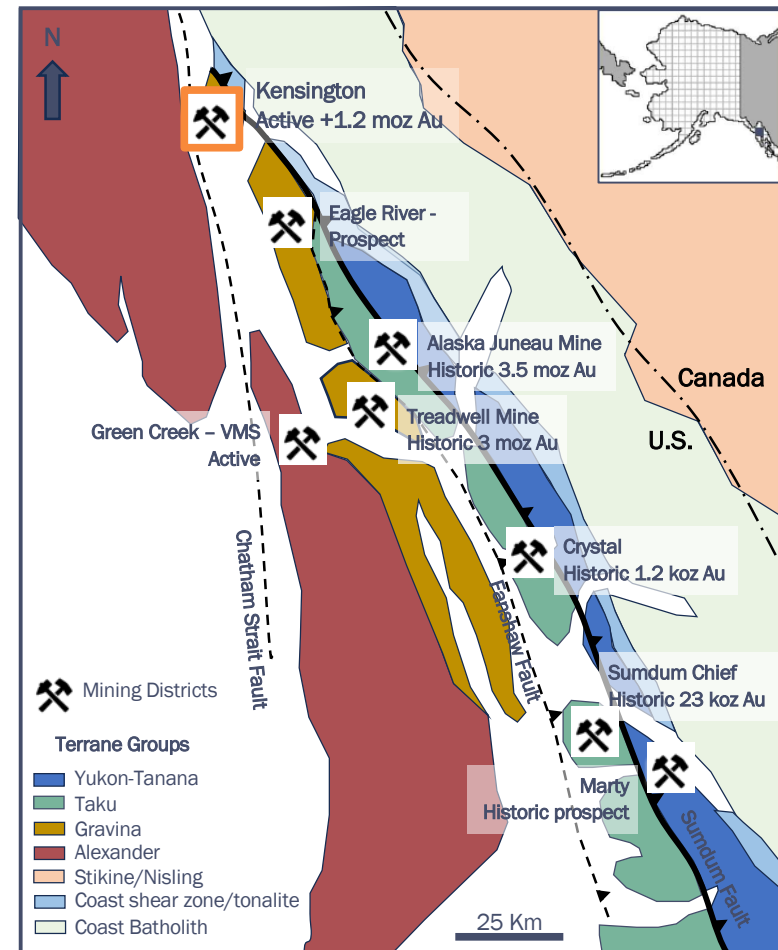

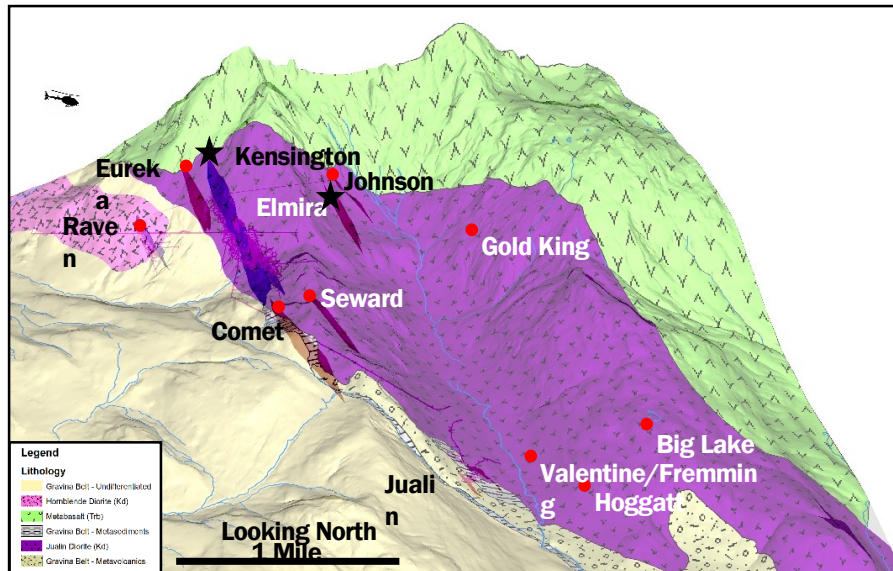

Note: See slides in appendix for additional information related to mineral reserves and resources.
 (1) Gold equivalence assumes gold-to-silver, -lead, -zinc ratios of 1:60, 1:1,200 and 1:1,000, respectively.

> Kensington: Overview

The Kensington Mine sits at the northern edge of the Juneau Gold Belt within the Berners Bay Mining District and has produced over one million ounces of gold since 2010

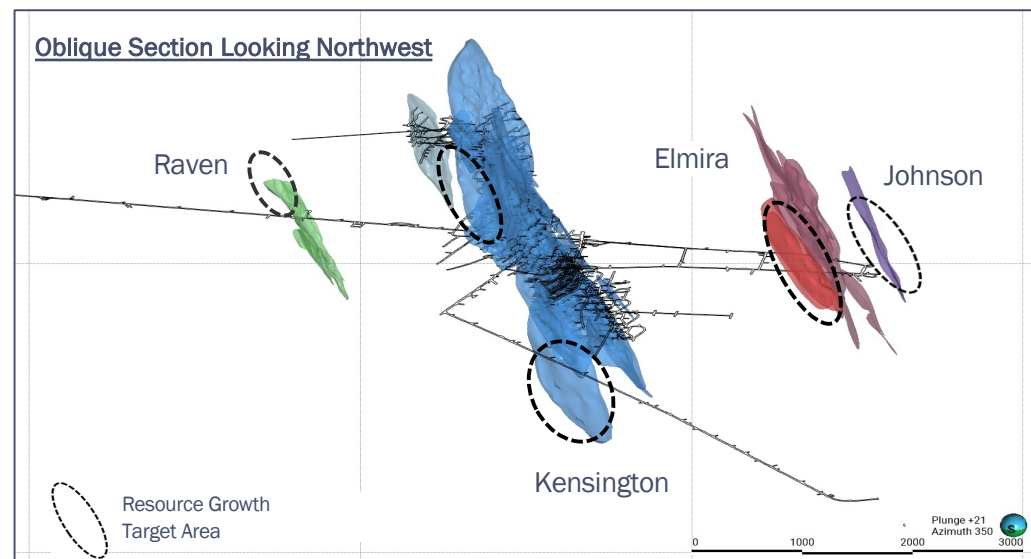

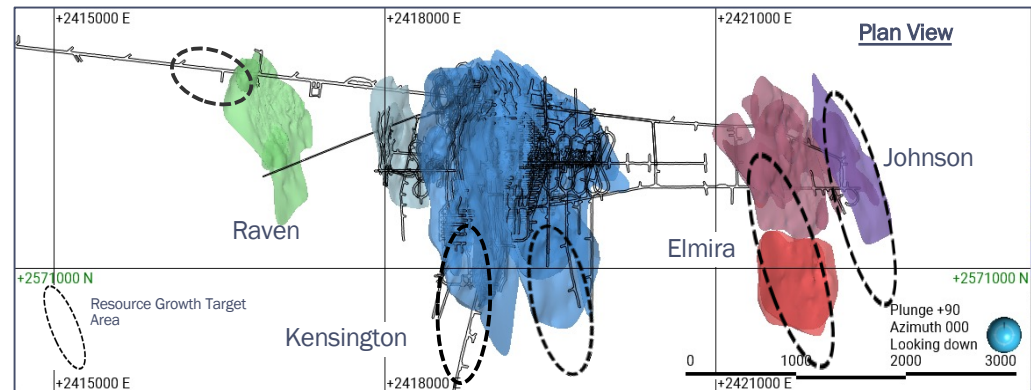

- ✓ The Juneau Gold Belt is a 120-mile long, 10-mile wide, structural zone hosting several major gold producers
- ✓ Kensington mineralization occurs as mesothermal gold-bearing quartz-carbonate-pyrite vein system hosted within the Cretaceous Jualin Diorite

> Kensington: Blueprint for a Longer Mine Life

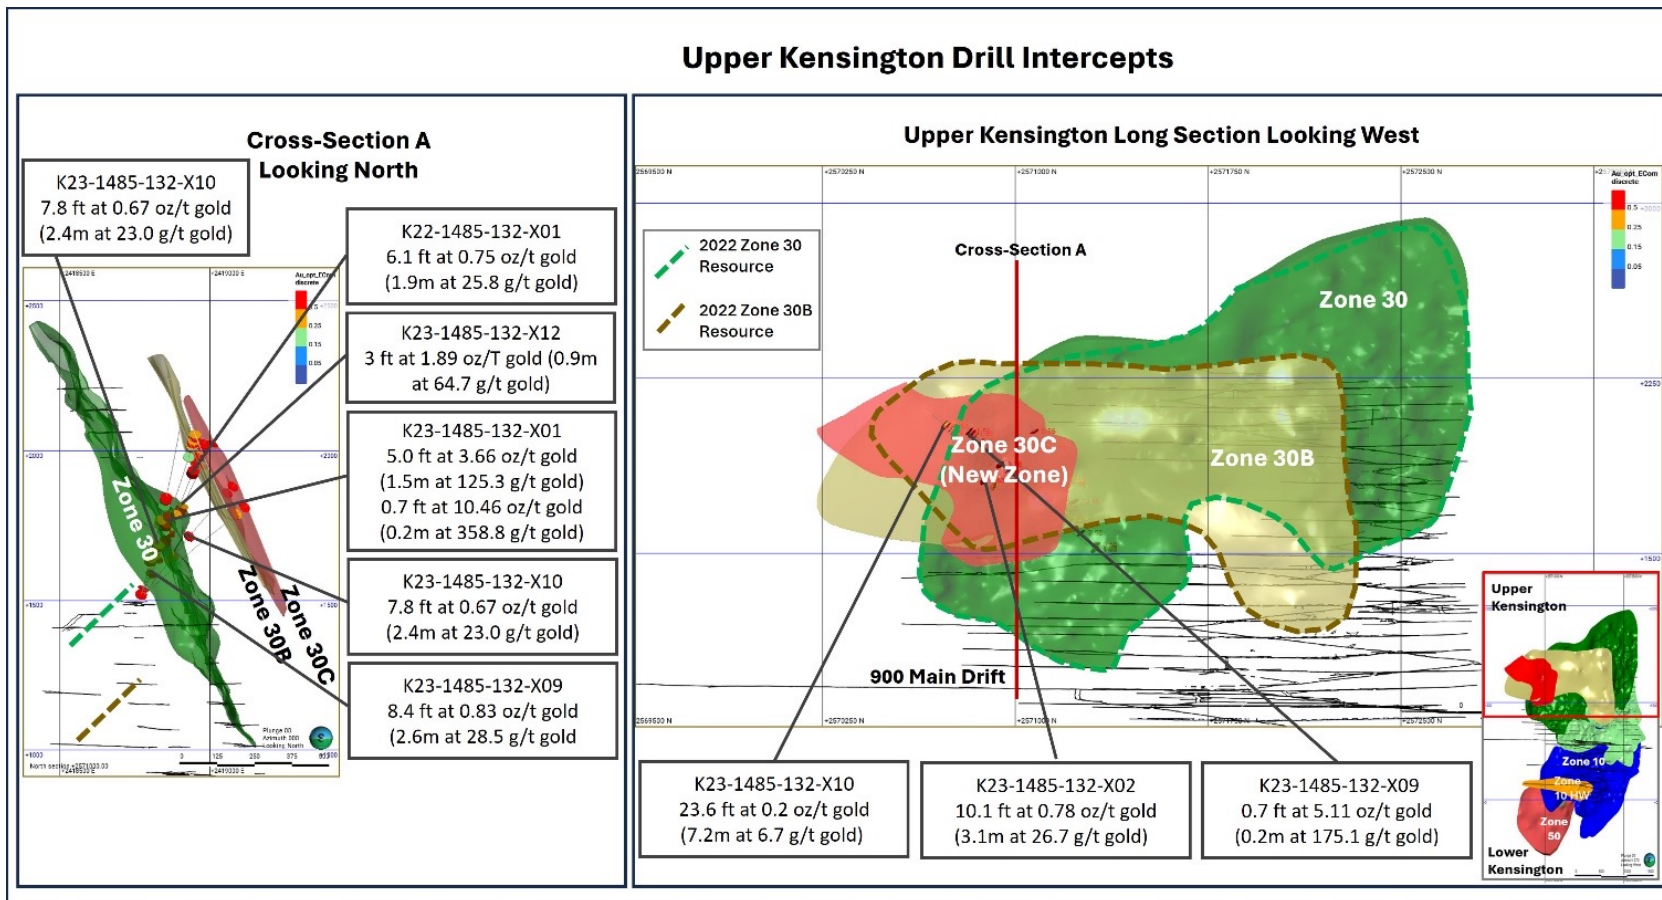

The Company began an aggressive, multi-year exploration investment plan in 2022 aimed at leveraging evolving geologic understanding of Kensington's primary deposits and extending the mine life beyond 2030

- ✓ Early success resulted in the addition of 1.5 years of mine life, net of depletion, as of year-end 2022 (first reserve growth since 2018)
- ✓ Ongoing technical review and geologic modeling is enhancing the understanding of controls to mineralization with positive implication for near-mine targeting and resource growth
- ✓ Current program aims to add mine life at three key deposits (Kensington main, Elmira and Johnson) with recent drill results showing continuity to the south and down-dip
- ✓ POA 1 tailings and waste rock storage approval allows for infrastructure to accommodate longer mine life; investigating long-term line power solution

> Kensington: Upper Kensington Recent Drill Results

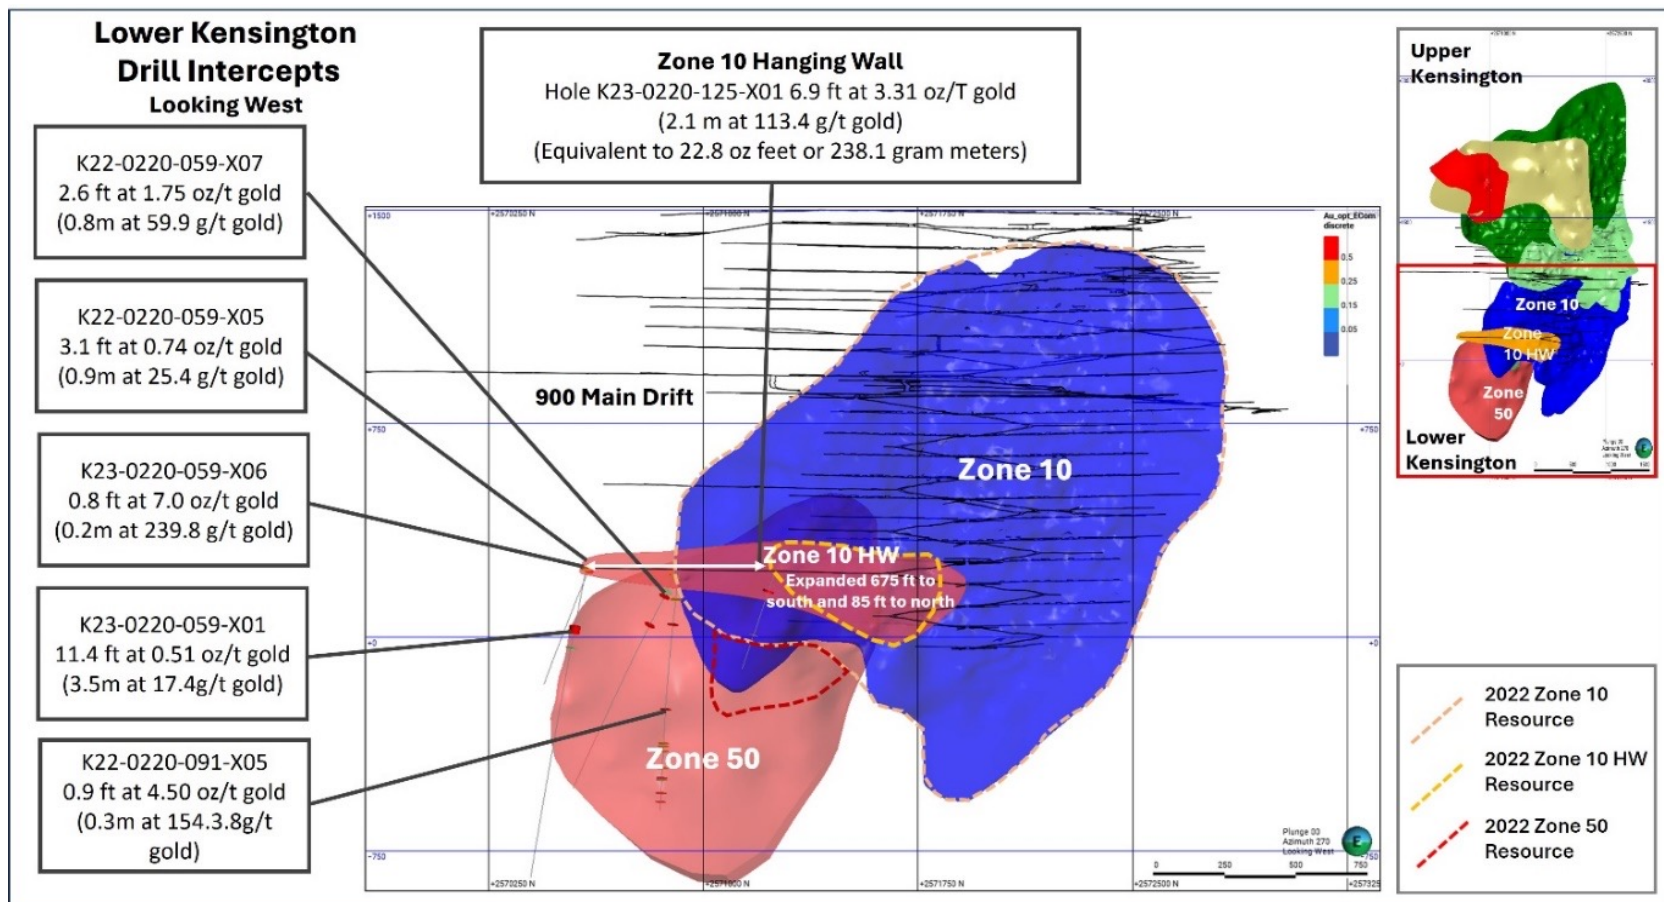

Recent expansion drilling at Upper Kensington led to the discovery of Zone 30C. The drill program at Upper Kensington continues to trace key mineralized structures to the south and down dip and has outlined a new parallel vein structure that already extends 950 feet along strike

Note: For a complete table of all drill results published in 2023, please refer to the following link:
https://www.coeur.com/files/doc_downloads/2023/09/2023-09-12-exploration-update-appendix-final.pdf

> Kensington: Lower Kensington Recent Drill Results

Drilling along strike at Lower Kensington has intersected some of the best grade thickness ever encountered at Kensington, extending mineralization by over 760 feet as well as defining new hanging-wall splay and a series of mineralized linking structures

Note: For a complete table of all drill results published in 2023, please refer to the following link:
https://www.coeur.com/files/doc_downloads/2023/09/2023-09-12-exploration-update-appendix-final.pdf.

> Palmarejo: Overview

The Palmarejo gold-silver complex is located in the state of Chihuahua, Mexico and includes four underground mining operations: Guadalupe, Independencia, Zapata and Nación

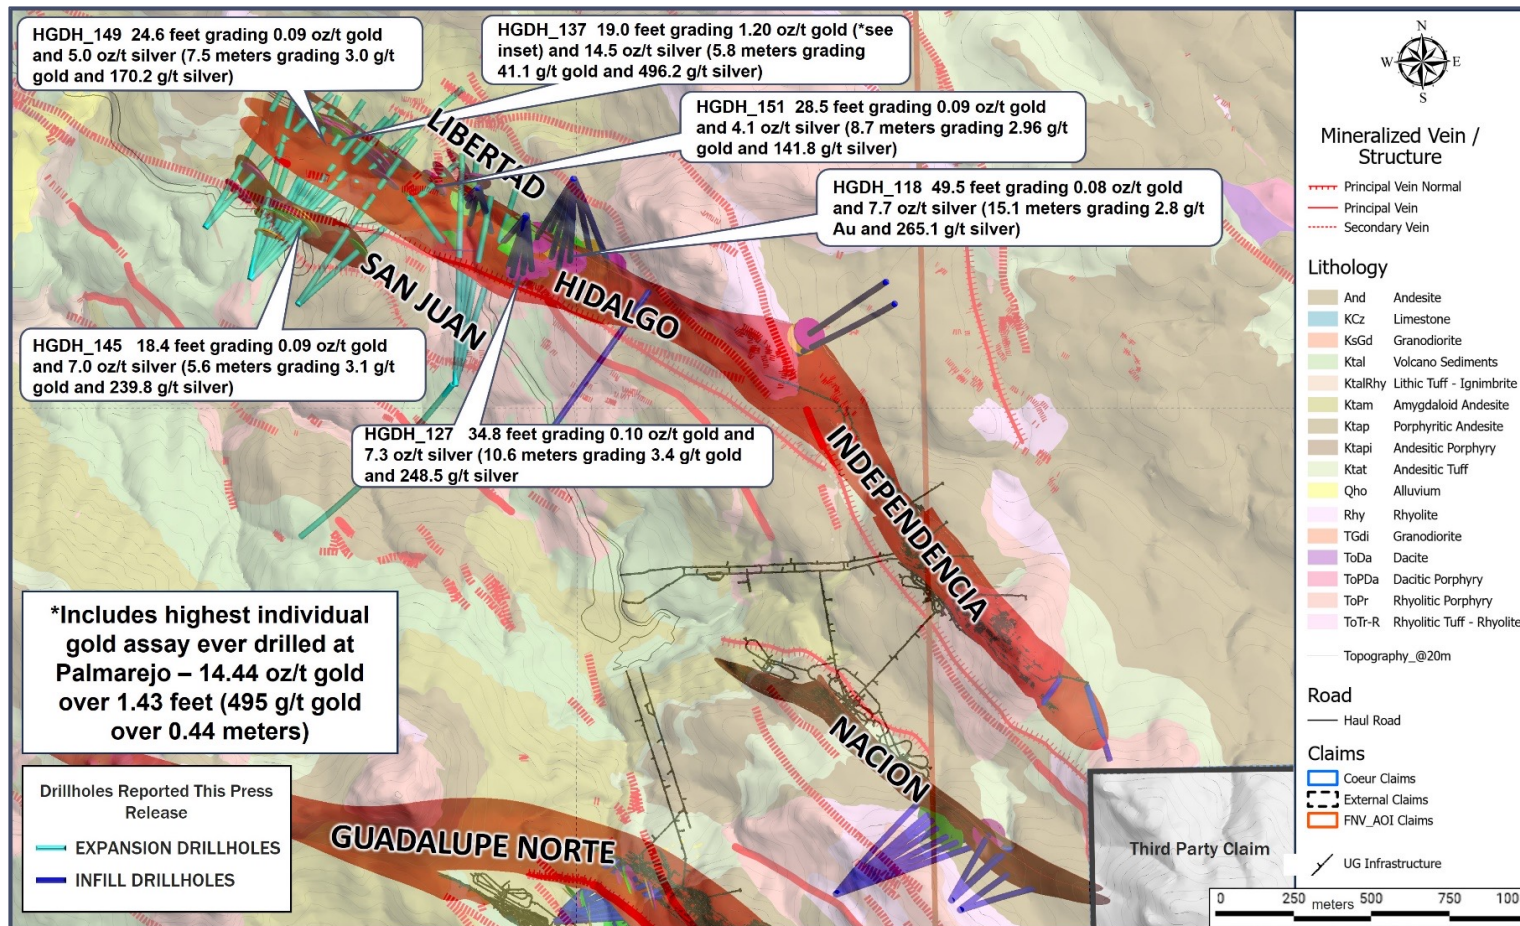

- ✓ Intermediate sulfidation gold-silver veins with lateral and vertical zoning
- ✓ Several current deposits and numerous targets with a land package only approximately 7% drilled
- ✓ High-grade ore-shoot located at structural intersections
- ✓ Veins blind to surface, identified by discrete zones of argillization and silicification

Note: See slides in appendix for additional information related to mineral reserves and resources.

> Palmarejo: Exploration Success

Recent drill results from the Hidalgo deposit at the Company's Palmarejo gold-silver complex returned some of the best grade thicknesses in recent years, including one assay returning 19 feet at an average gold grade of 1.3 ounces per ton

Note: For a complete table of all drill results published in 2023, please refer to the following link:
https://s201.q4cdn.com/25409064/files/doc_downloads/2023/08/08/2023-08-09-Exploration-Update-Appendix-Final.pdf

> Palmarejo: District Upside

Exploration focus has now shifted to the eastern part of the district beyond the gold stream area of interest with prospective, detailed mapping currently underway. Several new trends have been identified for scout drilling in 2024 with initial shallow drilling on La Curra and Los Llanos trends encouraging

> Silvertip: Critical Minerals in a Top Jurisdiction

Coeur remains optimistic about the long-term opportunity for Silvertip as a transformative cornerstone asset. The Company is focused on targeted exploration and prudent cost management to further grow this high-grade resource and advance a robust business case

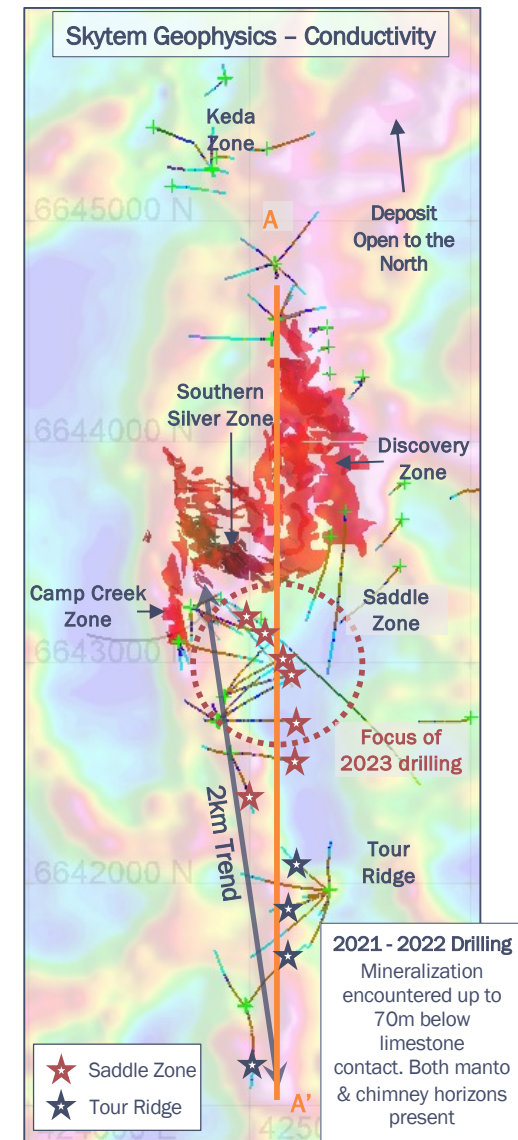

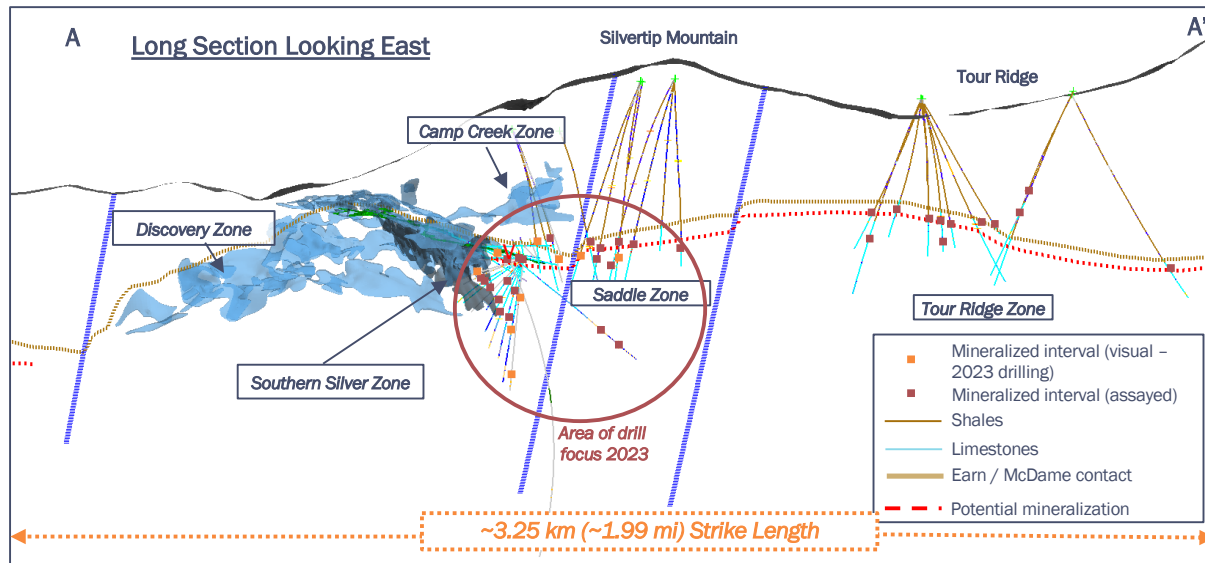

- ✓ Since acquisition, measured and indicated resources tons have tripled¹, with very high grades of silver, zinc and lead
 - From 2017 to year-end 2022 measured and indicated resource grew from ~2.6M tons to ~7.1M tons
 - Inferred resource grew from ~0.5M tons to ~1.9M tons during the same period
- ✓ Significantly enhanced geologic understanding of existing deposits (Silver Creek, Discovery, Southern Silver and Camp Creek) within this large, prospective land package
- ✓ Key stakeholder engagement ongoing—including with the Canadian government—to pursue inclusion of Silvertip in the Canadian Critical Minerals Strategy
- ✓ Anticipated project development timetable provides window for balance sheet de-levering following planned Rochester POA 11 completion in 2023

Note: See slides in appendix for additional information related to mineral reserves and resources.
(1) As of December 31, 2022.

> Silvertip: Near Term Growth Plan

- ✓ Near-term resource growth will focus on ~2km mineralized trend south of the main deposit through Saddle Zone and Tour Ridge (> doubles strike length)
- ✓ Trend originally outlined by geophysics and drill tested between 2020 and 2022 when 16 of 16 scout holes hit mineralization
- ✓ 5 of 5 follow-up holes drilled over this corridor in 2023 have intersected massive sulfide mineralization (visual confirmation – results pending)
- ✓ Other resource growth contributors are expected to be the Southern Silver zone large chimney structure and the Camp Creek and Discovery Zones, both of which are open along strike and down-dip

> Silvertip: Local Exploration Model and Targets

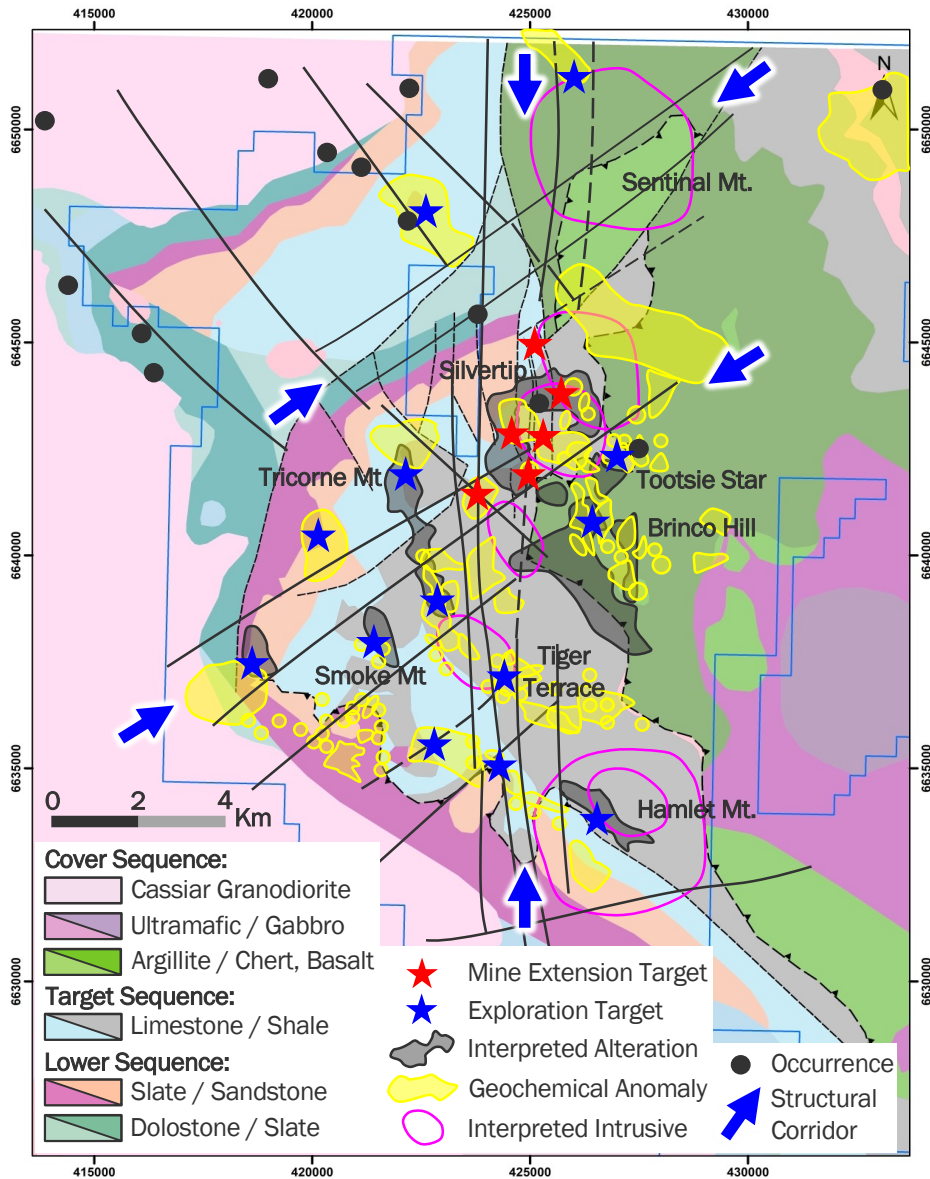

Idealized vertical section looking northeast

Newly Developed Exploration Model

- ✓ The conclusion of the deep “HUB” drillhole has confirmed a high temperature, alteration mineral assemblage and allowed for a robust conceptual exploration model
- ✓ Potential for multiple target types and stacked CRD systems:
 - Manto and chimney mineralization hosted in the McDame, Earn and Atan Groups.
 - Skarn mineralization
 - Porphyry mineralization near the heat source

> Silvertip: Significant District Upside Potential

Target Model

- ✓ Several “ingredients” are needed to form economic carbonate replacement deposit systems in the district:
 - Close proximity (<4km) to a fertile intrusive center (mineralizing fluid source)
 - Favorable N-S and NE structures (chimney-style fluid pathways)
 - Limestone host rocks with impermeable shale contacts within the stratigraphy (manto controls)
 - Favorable erosion that has not removed the most prospective shale / limestone contacts (e.g. Earn / McDame), preserving potential for large systems

Exploration Strategy

- ✓ Grow the near-mine resource
- ✓ Test full stratigraphic package for stacked CRD systems
- ✓ Test high-priority, look-alike targets in the district; Tootsie Star, Tricorne Mt and Brinco Hill, as these are located nearby to the Silvertip intrusive center
- ✓ Drill test intrusive centers for skarn and porphyry mineralization

> Rochester: Overview and Prospective Land Package

The Rochester mine located in Nevada has a large, prospective land package consisting of the Rochester, Lincoln Hill, Gold Ridge and Wilco areas with future upside exploration potential

Regional Map & Claims Boundary

> Why Coeur?

- ✓ Aim to be America's premier growing precious metals producer
 - Growing source of strategically important domestic mineral resources
- ✓ Positioned for growth
 - Near term: Transformational Rochester expansion nearing completion
 - Medium term: Sector-leading multi-year exploration investment with large, prospective and underexplored land packages
 - Long term: Silvertip one of the world's highest-grade silver-lead-zinc deposits
- ✓ Diversified asset portfolio
 - Unique metals mix, mining methods and geography lead to stability
- ✓ Exclusive North American focus – jurisdiction stability
 - Robust legal regime
 - Deeply rooted mining culture
- ✓ ESG leader
 - Continue to be a leader in ESG by advancing Coeur's ESG priorities

Appendix

Production Outlook

	Previous ²		Updated	
	Gold (oz)	Silver (K oz)	Gold (oz)	Silver (K oz)
Palmarejo	100,000 – 112,500	6,500 – 7,500	100,000 – 112,500	6,500 – 7,500
Rochester	35,000 – 50,000	3,500 – 4,500	35,000 – 50,000	3,500 – 4,500
Kensington	100,000 – 112,500	-	84,000 – 95,000	-
Wharf	85,000 – 95,000	-	85,000 – 95,000	-
Consolidated	320,000 – 370,000	10,000 – 12,000	304,000 – 352,500	10,000 – 12,000

CAS Outlook³

	Previous ²		Updated	
	Gold (\$/oz)	Silver (\$/oz)	Gold (\$/oz)	Silver (\$/oz)
Palmarejo (co-product)	\$900 - \$1,050	\$14.25 - \$15.25	\$900 - \$1,050	\$14.25 - \$15.25
Rochester (co-product)	-	-	-	-
Kensington	\$1,500 - \$1,700	-	\$1,650 - \$1,750	-
Wharf (by-product)	\$1,200 - \$1,350	-	\$1,200 - \$1,350	-

The Company expects Rochester's second half 2023 CAS³ to be similar to actual first half 2023 CAS³ as Coeur completes and ramps up the Rochester expansion

Capital, Exploration and G&A

(\$M)	Previous ²	Updated
Capital Expenditures, Sustaining ⁴	\$120 - \$145	\$148 - \$165
Capital Expenditures, Growth	\$200 - \$235	\$230 - \$264
Exploration, Expensed	\$30 - \$35	\$30 - \$35
Exploration, Capitalized	\$10 - \$15	\$10 - \$15
General & Administrative Expenses	\$36 - \$40	\$36 - \$40

Note: The Company's previous guidance figures assume estimated prices of \$1,800/oz gold and \$23.00/oz silver as well as CAD of 1.25 and MXN of 20.00. The Company's updated guidance figures assume estimated prices of \$1,900/oz gold and \$23.00/oz silver as well as CAD of 1.25 and MXN of 20.00. Guidance figures exclude the impact of any metal sales or foreign exchange hedges.

(1) Guidance as published by Coeur on August 9, 2023.

(2) Previous guidance as published by Coeur on May 10, 2023.

(3) See non-GAAP reconciliation tables in the appendix to this presentation.

(4) Sustaining capital expenditures exclude capital leases.

> Coeur's Capital Allocation Framework

Mining is capital intensive and requires a disciplined approach to capital allocation with a view toward long-term reserve replacement and growth

	Illustrative Return	Key Benefits	Key Considerations
	Safety/ Environment/ Sustainability	<ul style="list-style-type: none"> ✓ Reflects the Company's values ✓ Mitigates risk for stakeholders ✓ Establishes and sustains social license 	
	Asset Optimization/ Enhancements	<ul style="list-style-type: none"> ✓ Highest returns and quickest impact ✓ Low capital intensity ✓ Lowest risk 	<ul style="list-style-type: none"> ✗ Finite opportunity set
	Brownfield Exploration	<ul style="list-style-type: none"> ✓ High success/lowest risk exploration ✓ Low average discovery cost ✓ Quick payback given existing infrastructure 	<ul style="list-style-type: none"> ✗ Returns dependent on specific deposit ✗ All deposits eventually come to an end
	Opportunistic M&A	<ul style="list-style-type: none"> ✓ Opportunity to meaningfully impact company ✓ Scale and liquidity can be differentiators 	<ul style="list-style-type: none"> ✗ Limited number of opportunities meet criteria ✗ Requires significant organizational commitment ✗ Challenging social dynamics
	Greenfield Exploration	<ul style="list-style-type: none"> ✓ Potential to create substantial value from new discoveries 	<ul style="list-style-type: none"> ✗ Low success rate ✗ Requires long-term, sustained financial and organizational commitment
	Debt Repayment	<ul style="list-style-type: none"> ✓ Eliminates/reduces interest expense ✓ Improves balance sheet flexibility ✓ Mitigates downside metal price risk 	<ul style="list-style-type: none"> ✗ Low ROI ✗ Reduces cash liquidity levels ✗ Bond buybacks can be expensive
	Dividends/ Repurchases	<ul style="list-style-type: none"> ✓ Reflects Board and management confidence in long-term outlook ✓ Provides discipline ✓ Opportunity to differentiate among peers 	<ul style="list-style-type: none"> ✗ Industry's cyclicality and capital intensity ✗ Not a key driver for most investors ✗ Limited under indenture and credit agreement

6% - 10% estimated cost of capital

> Palmarejo

The Palmarejo gold-silver complex is located in the state of Chihuahua, Mexico, consisting of a legacy open pit mine, current underground mining and processing operations as well as several other deposits and exploration targets

Asset Overview

Ownership	100%
Employees ¹	942
Claims	67,296 net acres
Type	Underground

> Reserves and Resources (cont.)

Notes to 2022 Mineral Reserves:

- (1) The Mineral Reserve estimates are current as of December 31, 2022 and are reported using the definitions in Item 1300 of Regulation S-K (17 CFR Part 229) (SK1300) and were prepared by the company's technical staff.
- (2) 3Assumed metal prices for 2022 Mineral Reserves were \$21.00 per ounce of silver, \$1,600 per ounce of gold, \$1.15 per pound of zinc, \$0.95 per pound of lead, except for Kensington at \$1,700 per ounce of gold.
- (3) Mineral Reserve estimates use the following key input parameters: Assumption of conventional longhole underground mining; reported above a variable gold equivalent cut-off grade that ranges from 2.02–2.07 g/t AuEq and an incremental development cut-off grade of 1.05 g/t AuEq; metallurgical recovery assumption of 90.5% for gold and 82.5% for silver; mining dilution assumes 0.4–1.0 meter of hanging wall waste dilution; mining loss of 20% was applied; variable mining costs that range from US\$44.74–US\$47.13/tonne, surface haulage costs of US\$4.01/tonne, process costs of US\$29.17/tonne, general and administrative costs of US\$12.56/tonne, and surface/auxiliary support costs of US\$3.24/tonne. Excludes the impact of the Franco-Nevada gold stream agreement at Palmarejo in calculation of Mineral Reserves.
- (4) Mineral Reserve estimates are tabulated within a confining pit design and use the following input parameters: Rochester oxide variable recovery Au = 77.7–93.7% and Ag = 59.4%; Rochester sulfide variable recovery Au = 15.2–77.7% and Ag = 0.0–59.4%; with a net smelter return cutoff of \$3.25/st oxide and US\$3.35/st sulfide; Nevada Packard oxide recovery Au = 92.0% and Ag = 61.0%; with a net smelter return cutoff of \$4.40/st for oxide, where the NSR is calculated as resource net smelter return (NSR) = silver grade (oz/ton) * silver recovery (%) * (silver price (\$/oz) - refining cost (\$/oz)) + gold grade (oz/ton) * gold recovery (%) * (gold price (\$/oz) - refining cost (\$/oz)); variable pit slope angles that approximately average 43° over the life-of-mine.
- (5) Mineral Reserve estimates use the following key input parameters: assumption of conventional underground mining; gold price of \$1700/oz; reported above a gold cut-off grade of 0.133–0.135 oz/st Au; metallurgical recovery assumption of 94%; gold payability of 97.5%; mining dilution varies from 15–23%; mining loss of 5% was applied; variable mining costs that range from US\$87.13–90.00/ton mined; process costs of US\$54.38/ton processed; general and administrative costs of US\$54.76/ton processed; and concentrate refining and shipping costs of US\$88.39/oz sold.
- (6) Mineral Reserve estimate uses the following key input parameters: assumption of conventional open pit mining; reported above a gold cut-off grade of 0.010 oz/ton Au; average metallurgical recovery assumption of 79.1%; royalty burden of US\$64/oz Au; pit slope angles that vary from 34–50°; mining costs of US\$2.39/ton mined, process costs of US\$11.91/ton processed (includes general and administrative costs)..
- (7) Rounding of short tons, grades, and troy ounces, as required by reporting guidelines, may result in apparent differences between tons, grades, and contained metal contents.

> Reserves and Resources (cont.)

Notes to 2022 Mineral Resources:

- (1) Mineral Resource estimates are reported exclusive of Mineral Reserves, are current as of December 31, 2022, and are reported using definitions in SK1300 on a 100% ownership basis. Mineral Resource estimates were prepared by the Company's technical staff.
- (2) Assumed metal prices for 2022 estimated Mineral Resources were \$25.00 per ounce of silver, \$1,800 per ounce of gold, \$1.30 per pound of zinc, \$1.00 per pound of lead, unless otherwise noted.
- (3) Mineral Resource estimates use the following key input parameters: Assumption of conventional longhole underground mining; reported above a variable gold equivalent cut-off grade that ranges from 1.75-1.84 g/t AuEq; metallurgical recovery assumption of 90.5% for gold and 82.5% for silver; variable mining costs that range from US\$42.50-US\$47.13/tonne, surface haulage costs of US\$4.01/tonne, process costs of US\$29.17/tonne, general and administrative costs of US\$12.56/tonne, and surface/auxiliary support costs of US\$3.24/tonne. Excludes the impact of the Franco-Nevada gold stream agreement at Palmarejo in calculation of Mineral Resources.
- (4) Mineral Resource estimates use the following key input parameters: assumption of conventional longhole underground mining; reported above a variable gold cut-off grade that ranges from 0.125-0.191 oz/ton Au; metallurgical recovery assumption of 94%; gold payability of 97.5%, variable mining costs that range from US\$87.13-175.48/ton mined; process costs of US\$54.38/ton processed; general and administrative costs of US\$54.76/ton processed; and concentrate refining and shipping costs of US\$88.39/oz sold.
- (5) Mineral Resource estimate uses the following key input parameters: assumption of conventional open pit mining; reported above a gold cut-off grade of 0.010 oz/ton Au; average metallurgical recovery assumption of 78.7% across all rock types; royalty burden of US\$64/oz Au; pit slope angles that vary from 34-50°; mining costs of \$2.39/ton mined, process costs of US\$11.91/ton processed (includes general and administrative costs).
- (6) Mineral Resource estimates are tabulated within a confining pit shell and use the following input parameters: Rochester oxide variable recovery Au = 77.7-93.7% and Ag = 59.4%; Rochester sulfide variable recovery Au = 15.2-77.7% and Ag = 0.0-59.4%; with a net smelter return cutoff of \$3.25/st oxide and US\$3.35/st sulfide; Nevada Packard oxide recovery Au = 92.0% and Ag = 61.0%; with a net smelter return cutoff of \$4.40/st for oxide, where the NSR is calculated as resource net smelter return (NSR) = silver grade (oz/ton) * silver recovery (%) * (silver price (\$/oz) - refining cost (\$/oz)) + gold grade (oz/ton) * gold recovery (%) * (gold price (\$/oz) - refining cost (\$/oz)); variable pit slope angles that approximately average 43° over the life-of-mine.
- (7) Underground Mineral Resource estimates are reported using a net smelter return ("NSR") cutoff of US\$130/tonne. Mineral Resources are reported insitu using the following assumptions: The estimate use the following key input parameters: lead recovery of 89-90%, zinc recovery of 82-83% and silver recovery of 83-84%. Lead concentrate grade of 53-54%; zinc concentrate grade of 56-57%; mining costs of US\$68.77/tonne; processing costs of US\$58.20/tonne and US\$46.49/tonne, where the NSR (\$/tonne) = tonnes x grade x metal prices x metallurgical recoveries - royalties - TCRCs - transport costs over the life of the mine.
- (8) Open Pit Mineral Resource estimate is reported in-situ and are contained within a confining pit shell and use the following key input parameters: reported above an oxide gold equivalent cutoff of 0.15 ounces per ton and 0.20 oz ounces per ton assuming a silver to gold ratio of 60:1; gold recoveries of 64%; silver recoveries of 59%; mining costs of US\$3.10/ton; process costs of US\$3.60/ton; general and administrative costs of \$1.50/ton processed; average pit slope angles of 45° over the life-of-mine. The technical and economic parameters are those that were used in the 2018 Resource Estimation. Based on the QPs review of the estimate, there would be no material change to the Mineral Resource if a gold price of US\$1,700/oz, a silver price of US\$22/oz or economic parameters were updated. Therefore the 2018 Mineral Resource is considered current and is presented unchanged.

> Reserves and Resources (cont.)

Notes to 2022 Mineral Resources (cont.):

- (9) Open Pit Mineral Resource estimates are reported using an equivalent gold cutoff of 0.20 ounces per ton assuming a silver to gold ratio of 60:1. Resources are reported in-situ and contained within a conceptual measured, indicated and inferred optimized pit shell. Silver price of US\$20/oz, gold price of US\$1,400/oz. Average oxide and sulfide gold recovery is 70%, average carbonaceous gold recovery is 50%. Average oxide and sulfide silver recovery is 60%. Average carbonaceous silver recovery is 50%. Open pit mining cost is US\$1.50/ton, processing and processing and G&A cost is US\$5.46/ton; average pit slope angles of 50°. The technical and economic parameters are those that were used in the 2017 Resource Estimation. Based on the QPs review of the estimate, there would be no material change to the mineral resources if a gold price of US\$1,700/oz, a silver price of US\$22/oz or economic parameters were updated. Therefore the 2018 Mineral Resource report is considered current and is presented unchanged.
- (10) Rounding of short tons, grades, and troy ounces, as required by reporting guidelines, may result in apparent differences between tons, grades, and contained metal contents.

> Reserves and Resources (cont.)

Notes to 2021 Mineral Reserves:

- (1) The Mineral Reserve estimates are current as of December 31, 2021 and are reported using the definitions in Item 1300 of Regulation S-K (17 CFR Part 229) (SK1300) and were prepared by the company's technical staff.
- (2) Assumed metal prices for 2021 Mineral Reserves were \$20.00 per ounce of silver, \$1,400 per ounce of gold, \$1.15 per pound of zinc, \$0.95 per pound of lead.
- (3) Palmarejo Mineral Reserve estimates use the following key input parameters: Assumption of conventional longhole underground mining; reported above a variable gold equivalent cut-off grade that ranges from 1.94-2.51 g/t AuEq and an incremental development cut-off grade of 1.08 g/t AuEq; metallurgical recovery assumption of 93.1% for gold and 81.9% for silver; mining dilution assumes 1 meter of hanging wall waste dilution; mining loss of 5% was applied; variable mining costs that range from US\$36.01-US\$41.75/tonne, surface haulage costs of US\$3.52/t, process costs of US\$27.29/tonne, general and administrative costs of US\$11.00/tonne, and surface/auxiliary support costs of US\$3.19/tonne. Excludes the impact of the Franco-Nevada gold stream agreement at Palmarejo in calculation of Mineral Reserves.
- (4) Rochester Mineral Reserve estimates are tabulated within a confining pit shell and use the following input parameters: Rochester oxide recovery Au = 85% and Ag = 59%; Nevada Packard oxide recovery Au = 95% and Ag = 61%; with a net smelter return cutoff of \$2.55/st oxide and US\$2.65/st sulfide, where the NSR is calculated as resource net smelter return (NSR) = silver grade (oz/ton) * silver recovery (%) * silver price (\$/oz) - refining cost (\$/oz) + gold grade (oz/ton) * gold recovery (%) * gold price (\$/oz) - refining cost (\$/oz); variable pit slope angles that approximately average 43° over the life-of-mine.
- (5) Kensington Mineral Reserve estimates use the following key input parameters: assumption of conventional underground mining; gold price of \$1400/oz; reported above a gold cut-off grade of 0.143-0.201 oz/st Au; metallurgical recovery assumption of 95%; gold payability of 97.5%; mining dilution varies from 15-23%; mining loss of 5% was applied; variable mining costs that range from US\$90.91-150.73/ton mined; process costs of US\$46.93/ton processed; general and administrative costs of US\$38.83/ton processed; and concentrate refining and shipping costs of US\$60.00/oz sold.
- (6) Wharf Mineral Reserve estimate uses the following key input parameters: assumption of conventional open pit mining; reported above a gold cut-off grade of 0.010 oz/ton Au; metallurgical recovery assumption of 80%; royalty burden of US\$56/oz Au; pit slope angles that vary from 34-50°; mining costs of US\$2.15/ton mined, rehandle costs of US\$1.65/ton rehandled, process costs of US\$10.34/ton processed (includes general and administrative costs).
- (7) Silvertip Underground Mineral Resource estimates are reported using a net smelter return ("NSR") cutoff of US\$130-160/tonne. Mineral Resources are reported insitu using the following assumptions: The estimate use the following key input parameters: lead recovery of 87-88%, zinc recovery of 81-82% and silver recovery of 88-89 %. Lead concentrate grade of 51-53%; zinc concentrate grade of 48-50%; mining dilution varies from 5-25%; mining loss of 5% was applied; mining costs of US\$68.77/tonne; processing costs of US\$58.20/tonne and US\$46.49/tonne, where the NSR (\$/tonne) = tonnes x grade x metal prices x metallurgical recoveries - royalties - TCRCs - transport costs over the life of the mine.
- (8) Rounding of short tons, grades, and troy ounces, as required by reporting guidelines, may result in apparent differences between tons, grades, and contained metal contents.

> Reserves and Resources (cont.)

Notes to 2021 Mineral Resources:

- (1) Mineral Resource estimates are reported exclusive of Mineral Reserves, are current as of December 31, 2021, and are reported using definitions in SK1300 on a 100% ownership basis. Mineral Resource estimates were prepared by the Company's technical staff.
- (2) Assumed metal prices for 2021 estimated Mineral Resources were \$22.00 per ounce of silver, \$1,700 per ounce of gold, \$1.30 per pound of zinc, \$1.00 per pound of lead, unless otherwise noted.
- (3) Palmarejo Mineral Resource estimates use the following key input parameters: Assumption of conventional longhole underground mining; reported above a variable gold equivalent cut-off grade that ranges from 1.59-2.21 g/t AuEq; metallurgical recovery assumption of 93.1% for gold and 81.9% for silver; variable mining costs that range from US\$36.01-US\$41.75/t, surface haulage costs of US\$3.52/tonne, process costs of US\$27.29/tonne, general and administrative costs of US\$11.00/tonne, and surface/auxiliary support costs of US\$3.19/tonne. Excludes the impact of the Franco-Nevada gold stream agreement at Palmarejo in calculation of Mineral Resources.
- (4) Kensington Mineral Resource estimates use the following key input parameters: assumption of conventional longhole underground mining; reported above a variable gold cut-off grade that ranges from 0.116-0.164 oz/ton Au; metallurgical recovery assumption of 95%; gold payability of 97.5%, variable mining costs that range from US\$90.91-150.73/ton mined, process costs of US\$46.93/ton processed, general and administrative costs of US\$38.83/ton processed. and concentrate refining and shipping costs of US\$60.00/oz sold.
- (5) Wharf Mineral Resource estimate uses the following key input parameters: assumption of conventional open pit mining; reported above a gold cut-off grade of 0.010 oz/ton Au; metallurgical recovery assumption of 78.7% across all rock types; royalty burden of US\$56/oz Au; pit slope angles that vary from 34-50°; mining costs of \$2.15/ton mined, rehandle costs of US\$1.65/ton rehandled, process costs of US\$10.34/ton processed (includes general and administrative costs).
- (6) Rochester Mineral Resource estimates are tabulated within confining pit shells that uses the following input parameters: oxide gold recovery of 77.7%-93.7% and silver recovery with range of 59%-61%; sulfide gold recovery range of 15.2%-77.7% and silver recovery with range of 0.0%-59% with a net smelter return cutoff of US\$2.55-US\$3.70/ton oxide and US\$2.65/ton sulfide, where the NSR is calculated as resource net smelter return (NSR) = silver grade (oz/ton) * silver recovery (%) * silver price (\$/oz) - refining cost (\$/oz) + gold grade (oz/ton) * gold recovery (%) * gold price (\$/oz) - refining cost (\$/oz); and variable pit slope angles that approximately average 43° over the life-of-mine.
- (7) Silvertip Underground Mineral Resource estimates are reported using a net smelter return ("NSR") cutoff of US\$130/tonne. Mineral Resources are reported insitu using the following assumptions: The estimate use the following key input parameters: lead recovery of 87-88%, zinc recovery of 81-82% and silver recovery of 88-89 %. Lead concentrate grade of 51-53%; zinc concentrate grade of 48-50%; mining costs of US\$68.77/tonne; processing costs of US\$58.20/tonne and US\$46.49/tonne, where the NSR (\$/tonne) = tonnes x grade x metal prices x metallurgical recoveries - royalties - TCRCs - transport costs over the life of the mine.
- (8) Lincoln Hill Open Pit Mineral Resource estimate is reported in-situ and are contained within a confining pit shell and use the following key input parameters: reported above an oxide gold equivalent cutoff of 0.15 ounces per ton and 0.20 oz ounces per ton assuming a silver to gold ratio of 60:1; gold recoveries of 64%; silver recoveries of 59%; mining costs of US\$3.10/ton; process costs of US\$3.60/ton; general and administrative costs of \$1.50/ton processed; average pit slope angles of 45° over the life-of-mine. The technical and economic parameters are those that were used in the 2018 Resource Estimation. Based on the QPs review of the estimate, there would be no material change to the Mineral Resource if a gold price of US\$1,700/oz, a silver price of US\$22/oz or economic parameters were updated. Therefore the 2018 Mineral Resource is considered current and is presented unchanged.

> Reserves and Resources (cont.)

Notes to 2021 Mineral Resources (cont.):

- (9) Wilco Open Pit Mineral Resource estimates are reported using an equivalent gold cutoff of 0.20 ounces per ton assuming a silver to gold ratio of 60:1. Resources are reported in-situ and contained with a conceptual measured, indicated and inferred optimized pit shell. Silver price of US\$20/oz, gold price of US\$1,400/oz. Average oxide and sulfide gold recovery is 70%, average carbonaceous gold recovery is 50%. Average oxide and sulfide silver recovery is 60%. Average carbonaceous silver recovery is 50%. Open pit mining cost is US\$1.50/ton, processing and processing and G&A cost is US\$5.46/ton; average pit slope angles of 50°. The technical and economic parameters are those that were used in the 2018 Resource Estimation. Based on the QPs review of the estimate, there would be no material change to the Mineral Resource if a gold price of US\$1,700/oz, a silver price of US\$22/oz or economic parameters were updated. Therefore the 2018 Mineral Resource report is considered current and is presented unchanged.
- (10) Rounding of short tons, grades, and troy ounces, as required by reporting guidelines, may result in apparent differences between tons, grades, and contained metal contents.

Total Inferred Resources		141,934,000	0.007	0.64			1,070,000	91,545,000	99,447,000	62,634,000

Notes to 2017 mineral reserves and resources:

- (1) Effective December 31, 2017.
- (2) Assumed metal prices for estimated Mineral Reserves were \$17.50 per ounce of silver and \$1,250 per ounce of gold.
- (3) Assumed metal prices for estimated Mineral Resources were \$20.00 per ounce of silver, \$1,400 per ounce of gold, \$1.15 per pound Zinc and \$1.00 per pound Lead.
- (4) Mineral Resources are in addition to Mineral Reserves and do not have demonstrated economic viability. Inferred Mineral Resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of Mineral Reserves, and there is no certainty that the Inferred Mineral Resources will be realized.
- (5) Rounding of tons and ounces, as required by reporting guidelines, may result in apparent differences between tons, grade, and contained metal content.
- (6) For details on the estimation of mineral resources and reserves, including the key assumptions, parameters and methods used to estimate the Mineral Resources and Mineral Reserves, Canadian investors should refer to the NI 43-101 Technical Reports for Coeur's properties on file at www.sedar.com.

> Executive Leadership

Mitchell J. Krebs – President and Chief Executive Officer. During his twenty-year tenure with Coeur, Mr. Krebs has led nearly \$2 billion in capital raising and debt restructuring activities and has facilitated over \$2 billion of acquisitions and divestitures. Mr. Krebs was previously Coeur's Chief Financial Officer and held various positions in the corporate development department, including Senior Vice President of Corporate Development. Mr. Krebs is a Director of Kansas City Southern Railway Company and the National Mining Association, is Chairman of the National Mining Association, is on the Board of World Business Chicago, and on the Executive Committee of the Silver Institute.

Thomas S. Whelan – Senior Vice President and Chief Financial Officer. Prior to joining Coeur, Mr. Whelan served as CFO of Arizona Mining Inc. from September 2017 to August 2018, when the company was acquired from South32 Limited. Previously, Mr. Whelan served as CFO for Nevsun Resources Ltd. from January 2014 to August 2017. He is a chartered professional accountant and was previously a partner with the international accounting firm Ernst & Young ("EY") LLP where he was the EY Global Mining & Metals Assurance sector leader, the leader of the EY Assurance practice in Vancouver and previously EY's Canadian Mining & Metals sector leader. Mr. Whelan graduated with a Bachelor of Commerce from Queen's University.

Michael "Mick" Routledge – Senior Vice President and Chief Operating Officer. Mr. Routledge has over 25 years' experience with Rio Tinto in various roles beginning in 1987, including as the Chief Operating Officer (2011-2012) and Vice President HSE, Projects & Operational Value (2012-2014) of the Kennecott Utah Copper mine business and served as the Chief Operating Officer of Asahi Refining from 2015 to 2017. As the Senior Director of Operational Excellence at Anagold Madencilik from 2017 to 2020, Mr. Routledge designed and implemented an operational excellence program for the Copler District in Turkey. Most recently, Mr. Routledge served as the Vice President of Major Projects and Studies of Alacer Gold Corp. from February 2020 until May 2020. Mr. Routledge currently chairs the Health & Safety Division Executive Committee for the Society for Mining, Metallurgy & Exploration board. He received an undergraduate degree from the University of Sunderland, England in Electrical and Control Engineering and received his MBA with a focus on business and strategic transformation from Henley Management College in England.

Casey M. Nault – Senior Vice President, General Counsel, and Chief ESG Officer. Mr. Nault has approximately 25 years of experience as a corporate and securities lawyer, including prior in-house positions with Starbucks Corporation and Washington Mutual, Inc. and law firm experience with Gibson, Dunn & Crutcher. His legal experience includes securities compliance and SEC reporting, corporate governance and compliance, mergers and acquisitions, public and private securities offerings, other strategic transactions, general regulatory compliance, cross-border issues, land use and environmental issues, and overseeing complex litigation. In addition to leading the legal function, since 2018 Mr. Nault has overseen the Company's ESG initiatives, and he also has executive responsibility for several other corporate functions including compliance, internal audit, cybersecurity and IT infrastructure, government affairs and land management.

Aoife M. McGrath – Senior Vice President, Exploration. Ms. McGrath has over 20 years of mining industry experience, spanning all stages of exploration from greenfield works to continental-scale exploration programs. Most recently, Ms. McGrath served as Vice President Exploration, Africa and Middle East at Barrick Gold Corp. Prior to that time, she served as head of Exploration and Geology for Beadell Resources Limited as well as serving in various roles at Alamos Gold Inc., including Director, Exploration and Corporate Development and Vice President, Exploration. She holds a Master of Science in Mineral Exploration from the University of Leicester as well as a Master of Science in Engineering Geology from the Imperial College London.

Emilie C. Schouten – Senior Vice President and Chief Human Resources Officer. Ms. Schouten has 15 years of experience in Human Resources, starting her career at General Electric, where she graduated from GE's Human Resources Leadership Program. After 6 years as an HR Manager with GE, her division was acquired by the world's largest electrical distribution company, Rexel, and Ms. Schouten went on to become the Director of Training and Development. Ms. Schouten has a B.A. in Sociology from Michigan State University and a M.S. in Industrial Labor Relations from University of Wisconsin-Madison.

> Board of Directors

Robert E. Mellor – Independent Chairman of the board of Monro, Inc. (auto service provider) since June 2017, and appointed Interim Chief Executive Officer from August 2020 to April 2021. Previously Mr. Mellor was lead independent director from April 2011 to June 2017 and a member of the board of directors since August 2010; Former Chairman, Chief Executive Officer and President of Building Materials Holding Corporation (distribution, manufacturing and sales of building materials and component products) from 1997 to January 2010, director from 1991 to January 2010; former member of the board of directors of CalAtlantic Group, Inc. (national residential home builder) from October 2015 to February 2018, when CalAtlantic was acquired by Lennar Corporation; former member of the board of directors of the Ryland Group (national home builder, merged with another builder to form CalAtlantic) from 1999 to October 2015; and former member of the board of directors of Stock Building Supply Holdings, Inc. (lumber and building materials distributor) from March 2010 until December 2015 when it merged with another company. He was recently named a 2020 National Association of Corporate Directors Directorship 100 honoree.

Mitchell J. Krebs – President and Chief Executive Officer. See prior slide.

Linda L. Adamany – Member of the board of directors of Jefferies Financial Group (formerly known as Leucadia National Corporation), a diversified holding company engaged in a variety of businesses, since March 2014, and Independent Lead Director since March 2022, and a member of the board of directors of Jefferies International Limited, a wholly-owned subsidiary of Jefferies Financial Group Inc., since March 2021; non-executive director of BlackRock Institutional Trust Company since March 2018; non-executive director of Vitesse Energy, Inc. since January 2023; non-executive director of the Wood plc from October 2017 to May 2019; non-executive director of Amec Foster Wheeler plc, an engineering, project management, and consultancy company, from October 2012 until the Company was acquired by Wood plc in October 2017; member of the board of directors of National Grid plc, an electricity and gas generation, transmission, and distribution company, from November 2006 to November 2012. Served at BP plc in several capacities from July 1980 until her retirement in August 2007, most recently from April 2005 to August 2007 as a member of the five-person Refining & Marketing Executive Committee responsible for overseeing the day-to-day operations and human resource management of BP plc's Refining & Marketing segment, a \$45 billion business at the time. She was recently selected as one of Women Inc. Magazine's 2018 Most Influential Corporate Directors.

Paramita Das – Paramita Das has served as the Global Head of Marketing, Development and ESG (Chief Marketing Officer) Metals and Minerals at Rio Tinto since 2022; President of Rio Tinto Nickle Inc., President and CEO of Alcan Primary Products Company, LLC and a member of the Board of Directors of Rio Tinto Services Inc. since 2020; General Manager, Marketing and Development, Metals, and Head of the Chicago Commercial Office, Rio Tinto from 2018 to 2021. Ms. Das served as Chief of Staff/Group Business Executive to the Rio Tinto Group CEO from 2016 – 2017. Ms. Das is a former Board member of World Business Chicago from 2020 – 2022; Chicago Children's Museum from 2019 – 2021 and UN Woman – USNC from 2014 to 2017. Ms. Das received a bachelor's degree in Architectural Engineering in 2001, and MBA in 2004 and additional post-graduate studies in Strategy and Finance in 2014.

Sebastian Edwards – Henry Ford II Professor of International Business Economics at the Anderson Graduate School of Management at the University of California, Los Angeles (UCLA) from 1996 to present; Co-Director of the National Bureau of Economic Research's Africa Project from 2009 to present; taught at IAE Universidad Austral in Argentina and at the Kiel Institute from 2000 to 2004; Chief Economist for Latin America at the World Bank Group from 1993 to 1996. Currently a Member of the Board of Moneda Asset Management, an investment management firm in Chile, and Centro de Estudios Públicos, Chile.

Randolph E. Gress – Retired Chairman (November 2006 until January 2016 and director from August 2004 until January 2016) and Chief Executive Officer (from 2004 until December 2015) of Innophos Holdings, Inc., a leading international producer of performance-critical and nutritional specialty ingredients for the food, beverage, dietary supplements, pharmaceutical, and industrial end markets. Mr. Gress was with Innophos since its formation in 2004, when Bain Capital purchased Rhodia SA's North American specialty phosphate business. Prior to his time at Innophos, Mr. Gress was with Rhodia since 1997 and held various positions including Global President of Specialty Phosphates (with two years based in the U.K.) and Vice-President and General Manager of the NA Sulfuric Acid and Regeneration businesses. From 1982 to 1997, Mr. Gress served in various roles at FMC Corporation including Corporate Strategy and various manufacturing, marketing, and supply chain positions.

> Board of Directors (cont.)

Jeane L. Hull – Ms. Hull has over 35 years of mining operational leadership and engineering experience, most notably holding the positions of Chief Operating Officer for Rio Tinto plc at the Kennecott Utah Copper Mine and Executive Vice President and Chief Technical Officer of Peabody Energy Corporation. She also held numerous management engineering and operations positions with Rio Tinto affiliates. Prior to joining Rio Tinto, she held positions with Mobil Mining and Minerals and has additional environmental engineering and regulatory affairs experience in the public and private sectors. Ms. Hull currently serves as a member of the Board of Directors of Eprioc AB, Interfor Corporation and Hudbay Minerals. She previously served on the boards of Trevali Mining Corporation, Pretium Resources Inc. and Cloud Peak Energy Inc. Ms. Hull also serves on the Advisory Board for South Dakota School of Mines and Technology.

Eduardo Luna – Non-executive Chairman of the Board of Rochester Resources Ltd., Mr. Luna has spent over forty years in the precious metals mining industry and has held prior senior executive and board positions at several companies including Industrial Peñoles, Goldcorp Inc., Luismin SA de CV, Wheaton River Minerals Ltd., Alamos Gold Inc., Dyna Resource, Inc. and Primero Mining Corp. He is currently the Chairman of the board of directors of Rochester Resources Ltd., a junior natural resources company with assets in Mexico. He is also a member of the Board of Directors of Wheaton Precious Metals Corp. Mr. Luna is the former President of the Mexican Mining Chamber and a former President of the Silver Institute. He was recently inducted into the Mexico Mining Hall of Fame and serves as Chairman of the Advisory Board of the Faculty of Mines at the University of Guanajuato where he received a degree in Mining Engineering.

J. Kenneth Thompson – Chairman of Pioneer Natural Resources Company (oil and gas) and member of the board of directors of Alaska Air Group, Inc. (parent company of Alaska Airlines, Virgin America Airlines and Horizon Air) and Tetra Tech, Inc. (engineering consulting). President and Chief Executive Officer of Pacific Star Energy LLC (private energy investment firm in Alaska) from September 2000 to present, with a principal holding in Alaska Venture Capital Group LLC (private oil and gas exploration company) from December 2004 to present; Executive Vice President of ARCO's Asia Pacific oil and gas operating companies in Alaska, California, Indonesia, China, and Singapore from 1998 to 2000.
