Cautionary Notes

Forward-looking Statements. This presentation contains certain forward-looking information and forward-looking statements within the meaning of applicable securities legislation and may include future-oriented financial information. Forward-looking statements and forward-looking information in this presentation relate to, among other things: the strategic vision for the Company and expectations regarding exploration potential, production capabilities and future financial or operating performance, including investment returns; the Company's production and cost guidance; the timing for and the Company's ability to successfully advance its growth and development projects, including the construction of Greenstone and the expansions at Aurizona, Castle Mountain and Los Filos; the strength of the Company's balance sheet, and the Company's liquidity and future cash requirements; the aggregate value of common shares that may be issued pursuant to the at-the-market equity offering program; the potential future offerings of securities under the Base Shelf Prospectus or corresponding Registration Statement and any Prospectus Supplement; and the expectations for the Company's investments including in Sandbox, i-80 Gold, Bear Creek, Inca One and Pilar Gold. Forward-looking statements or information generally identified by the use of the words "will", "objective", "achieve", "intends", "envision", "potential", "on schedule", "on budget", "improve" and similar expressions and phrases or statements that certain actions, events or results "could", "would" or "should", or the negative connotation of such terms, are intended to identify forward-looking statements and information. Although the Company believes that the expectations reflected in such forward-looking statements and information are reasonable, undue reliance should not be placed on forward-looking statements since the Company can give no assurance that such expectations will prove to be correct. The Company has based these forward-looking statements and information on the Company's current expectations and projections about future events and these assumptions include: Equinox Gold's ability to achieve the production, cost and development expectations for its respective operations and projects; existing assets are retained and continue to produce at current rates; expectations regarding the impact of macroeconomic factors on the Company's operations, share price performance and gold price; prices for gold remaining as estimated; currency exchange rates remaining as estimated; availability of funds for the Company's projects and future cash requirements; prices for energy inputs, labour, materials, supplies and services remaining as estimated; construction at Greenstone being completed and performed in accordance with current expectations; the expansion projects at Aurizona, Castle Mountain and Los Filos being completed and performed in accordance with current expectations; the mine plans outlined in the technical reports for each project, including estimated development schedules, are unchanged; tonnage of ore to be mined and processed; ore grades and recoveries remaining consistent with mine plans; capital, decommissioning and reclamation estimates; Mineral Reserve and Mineral Resource estimates and the assumptions on which they are based; no labour-related disruptions and no unplanned delays or interruptions in scheduled construction, development and production, including by blockade; the Company's working history with the workers, unions and communities at Los Filos; all necessary permits, licenses and regulatory approvals are received in a timely manner; the Company's ability to comply with environmental, health and safety laws; the strategic visions for Sandbox, i-80 Gold, Bear Creek, Inca One and Pilar Gold and their respective abilities to successfully advance their businesses; and the ability of Bear Creek, Inca One and Pilar Gold to meet their payment commitments to the Company. While the Company considers these assumptions to be reasonable based on information currently available, they may prove to be incorrect. Accordingly, readers are cautioned not to put undue reliance on the forward-looking statements or information contained in this presentation. The Company cautions that forward-looking statements and information involve known and unknown risks, uncertainties and other factors that may cause actual results and developments to differ materially from those expressed or implied by such forward-looking statements and information contained in this presentation and the Company has made assumptions and estimates based on or related to many of these factors. Such factors include, without limitation: fluctuations in gold prices; fluctuations in

prices for energy inputs, labour, materials, supplies and services; fluctuations in currency markets; operational risks and hazards inherent with the business of mining (including environmental accidents and hazards, industrial accidents, equipment breakdown, unusual or unexpected geological or structural formations, cave-ins, flooding and severe weather); inadequate insurance, or inability to obtain insurance to cover these risks and hazards; employee relations; relationships with, and claims by, local communities and Indigenous populations; the effect of blockades and community issues on the Company's production and cost estimates; the Company's ability to obtain all necessary permits, licenses and regulatory approvals in a timely manner or at all; changes in laws, regulations and government practices, including environmental, export and import laws and regulations; legal restrictions relating to mining; risks relating to expropriation; increased competition in the mining industry; a successful relationship between the Company and its joint venture partner; the failure by Bear Creek, Inca One or Pilar Gold to meet one or more of their respective payment commitments to the Company; and those factors identified in the Company's MD&A for the year ended December 31, 2022 and its most recently filed Annual Information Form, copies of which are available on SEDAR at www.sedar.com and on EDGAR at www.sec.gov/edgar. Forward-looking statements and information are designed to help readers understand management's views as of that time with respect to future events and speak only as of the date they are made. Except as required by applicable law, the Company assumes no obligation to publicly announce the results of any change to any forward-looking statement or information contained or incorporated by reference to reflect actual results, future events or developments, changes in assumptions or changes in other factors affecting the forward-looking statements and information. If the Company updates any one or more forward-looking statements, no inference should be drawn that the Company will make additional updates with respect to those or other forward-looking statements. All forward-looking statements and information contained in this presentation are expressly qualified in their entirety by this cautionary statement.

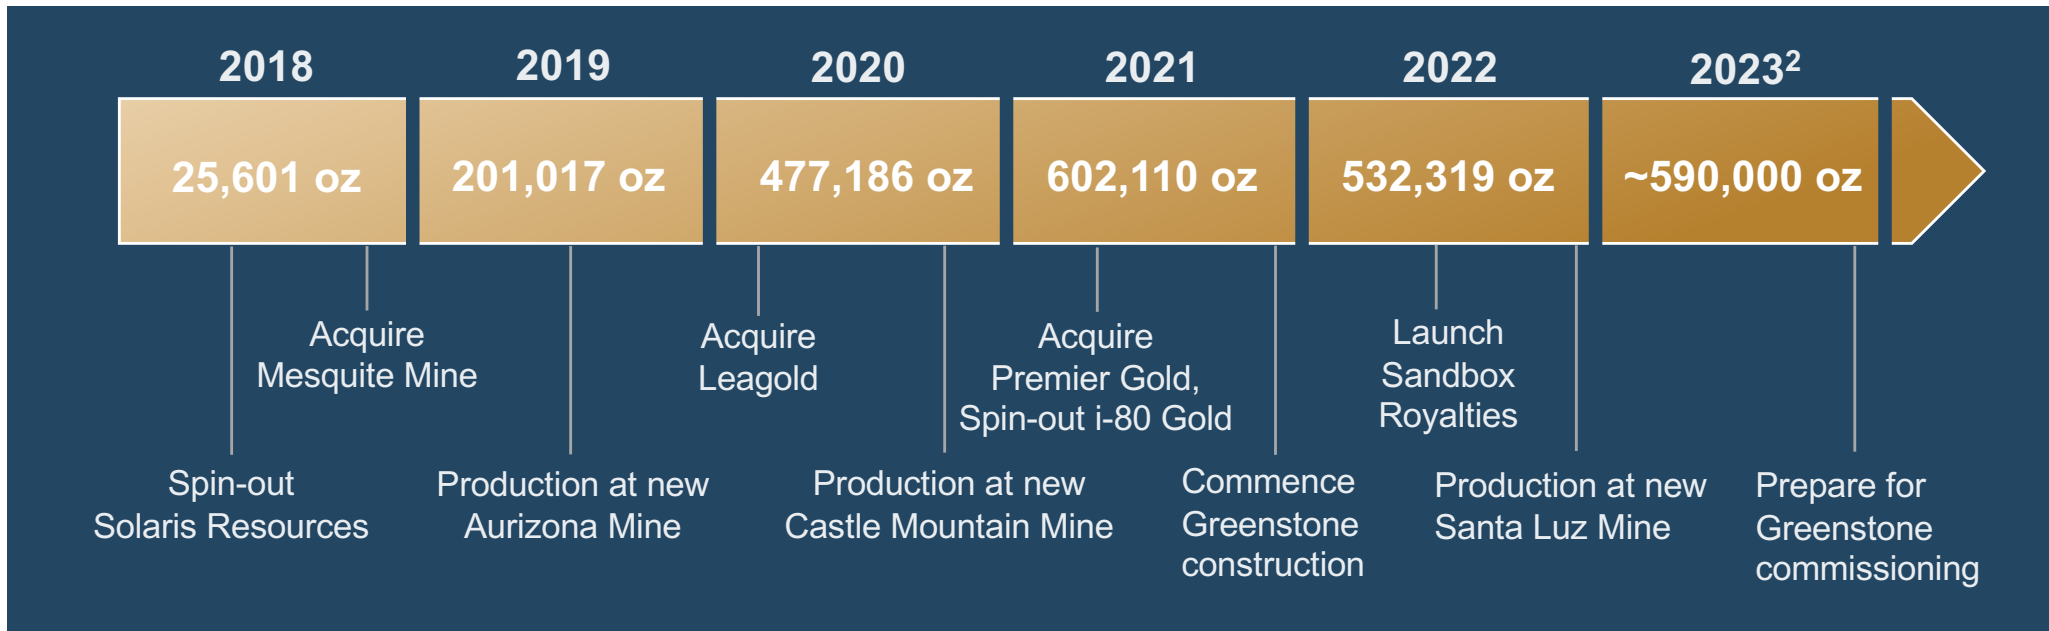

Non-IFRS Measures. This presentation refers to all-in sustaining costs ("AISC") per ounce sold and sustaining capital which are measures with no standardized meaning under International Financial Reporting Standards ("IFRS") and may not be comparable to similar measures presented by other companies. Their measurement and presentation are intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. Non-IFRS measures are widely used in the mining industry as measurements of performance and the Company believes that they provide further transparency into costs associated with producing gold and will assist analysts, investors and other stakeholders of the Company in assessing its operating performance, its ability to generate free cash flow from current operations and its overall value. Refer to the "Non-IFRS measures" section of the Company's MD&A for the year ended December 31, 2022, for a more detailed discussion of these non-IFRS measures and their calculation.

Cautionary Note to U.S. Investors Concerning Estimates of Reserves and Resources. Disclosure regarding the Company's mineral properties, including with respect to Mineral Reserve and Mineral Resource estimates included in this presentation, was prepared in accordance with National Instrument 43-101. NI 43-101 is a rule developed by the Canadian Securities Administrators that establishes standards for all public disclosure an issuer makes of scientific and technical information concerning mineral projects. NI 43-101 differs significantly from the disclosure requirements of the Securities and Exchange Commission (the "SEC") generally applicable to U.S. companies. Accordingly, information contained in this presentation is not comparable to similar information made public by U.S. companies reporting pursuant to SEC disclosure requirements.

Equinox Gold: Creating the Premier Americas Gold Producer

In its first six years Equinox Gold has grown from a single-asset developer to a diversified gold producer with the assets in place to produce more than 1 Moz of gold annually¹

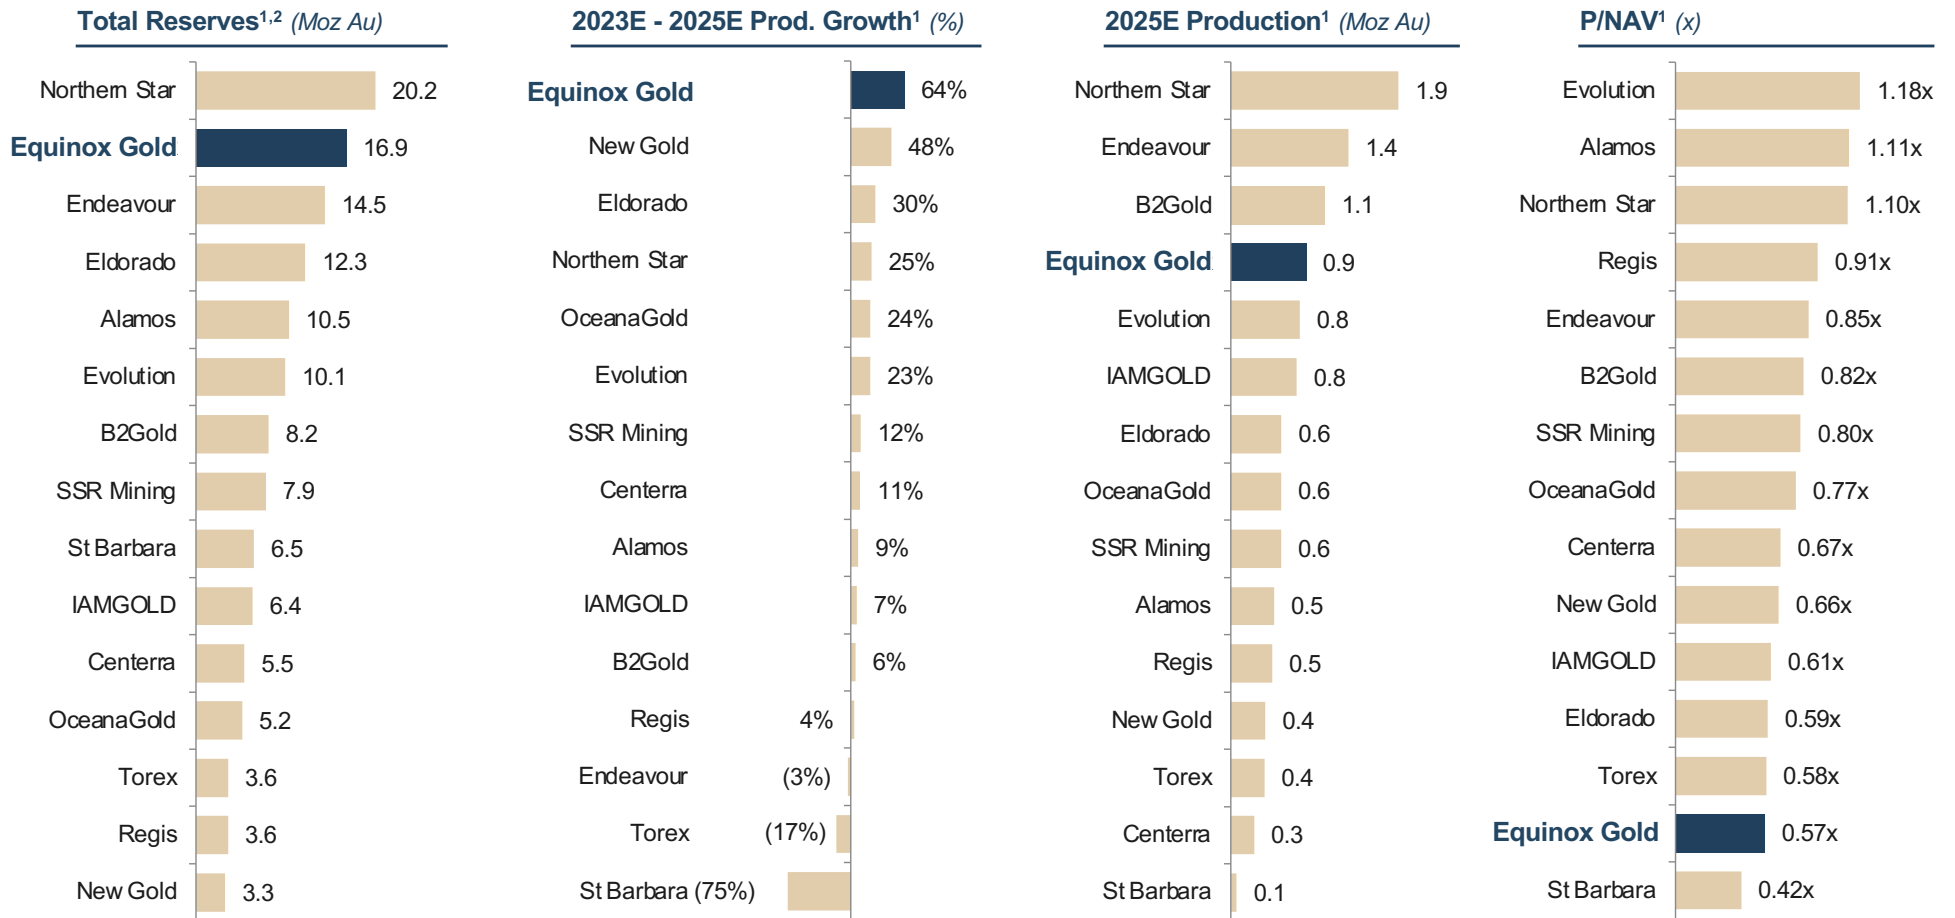

1. Equinox Gold was created with the strategic vision of building an Americas-focused gold company that will responsibly and safely produce more than one million ounces of gold annually. To achieve its growth objectives, Equinox Gold intends to expand production from its current asset base through exploration and development and will also consider opportunities to acquire other companies, producing mines and development projects that fit the Company's portfolio and strategy. 2. Mid-point of Equinox Gold's 2023 production guidance of 555,000 to 625,000 oz of gold.

Accretive M&A: Significant Production and Reserve Growth

1. Assuming Equinox Gold retains its current asset base and completes its growth and expansion projects as currently planned.

Peer-leading Growth Profile: Organic Growth from Existing Assets

Progress at August 25, 2023

- Overall project 90% complete
- Construction 89% complete
- Procurement 89% complete
- Concrete 96% complete
- Structural steel 98% complete
- Mechanical, piping and electrical ~80% complete
- On budget with \$937 M spent at June 30 (76%)

Conveyors, HPGR building and power plant stacks

Greenstone: 90% Complete, Pre-Commissioning Underway

Power Plant

- 99.7% complete
- Successful first start in August
- Commissioning nearly complete
- Natural gas pipeline to site commissioned and operational
- Switching from grid to the power plant in September

Process Plant

- 84% complete
- Both ball mills mechanically complete
- Conveyors installed, belt installation underway
- Crushing, reclaim and HPGR substantially complete
- Hydrotesting leach tanks
- Pre-commissioning activities underway

Tailings Facility

- 88% complete
- South portion complete to final elevation
- Upstream and downstream buttresses 44% complete
- On schedule to be complete and ready for use in Q4 2023

Additional Infrastructure

- Truck shop, warehouse, water treatment plants, sewage treatment plant, explosives plant, fuel stations and reagent storage complete
- Realigned 4.7 km of Highway 11, opened for traffic in August 2023
- Relocated Ministry of Transportation Patrol Yard

Greenstone: Key Milestones to H1 2024 Gold Pour

Q3 2023

- ✓ Highway 11 open to traffic
- Power plant complete
- Process plant construction substantially complete
- Crushing system ready for pre-commissioning
- TMF ready to receive water
- Operational readiness and commissioning teams in place

Q4 2023

- Mechanical, piping and electrical installation complete
- Commence process plant wet commissioning
- Tailings storage facility available for use
- Pre-production ore mining for 800 kt stockpile at start-up

H1 2024

- Hot commissioning with ore and reagents in system
- First gold pour
- Mining at 145 kt/day
- Ore stockpile at 2 Mt

Seven Operating Mines: 555,000 - 625,000 oz of Gold in 2023¹

Aurizona, Maranhão, Brazil

120,000 - 130,000 oz of gold

Mesquite, California, USA

80,000 - 90,000 oz of gold

Fazenda, Bahia, Brazil

60,000 - 65,000 oz of gold

Castle Mountain, California, USA

25,000 - 30,000 oz of gold

Santa Luz, Bahia, Brazil

60,000 - 70,000 oz of gold

Los Filos, Guerrero, Mexico

1. Figures on this page represent the Company's guidance as provided on February 21, 2023. The Company may revise guidance during the year to reflect changes to expected results. 2. Cash costs and all-in sustaining costs (AISC) are non-IFRS measures. See *Cautionary Notes*.

Organic Growth: Expansion Projects

Castle Mountain Mine, California, USA

Increase mining to stack over 45,000 t/d on heap leach pads
~218,000 oz/year expected average annual production, 14-year mine life¹

Aurizona Mine, Maranhão, Brazil

Mining of new underground and additional open-pit deposits concurrently
~137,000 oz/year expected average annual production, 11-year mine life²

Los Filos Mine, Guerrero, Mexico

Construction of a 10,000 t/d CIL plant to complement existing heap leach facilities
~280,000 oz/year expected average annual production, peak production 360,000 oz/year³

1. March 2021 feasibility study showed \$389 M initial capital costs. Permitting underway. 2. September 2021 pre-feasibility study showed \$154 M initial capital costs. Feasibility study underway. Permits received for three portal locations.
3. October 2022 feasibility study showed \$318 M initial capital costs for CIL plant. Timeline for construction not yet determined. See *Technical Disclosure*.

Investing in Growth: Assets in Place for 1+ Moz Annual Production

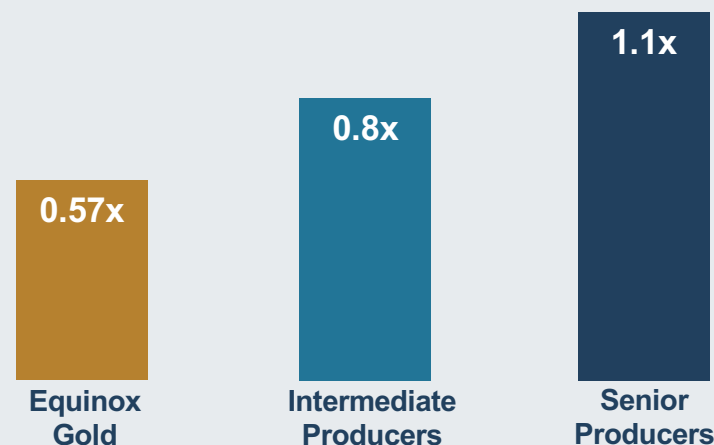

Potential for ~575 Koz incremental growth¹

- Enhanced scale and diversity with Greenstone
- Catalyst rich investment plans
- Year-on-year production growth
- Diversification across four countries

Revaluation potential with growth²

- Increased production, higher cash flow, lower costs
- Enhanced diversification across four countries
- Reduced execution risk as projects advance
- Increased cash flow could fund shareholder returns

1. Annual production estimates upon completion of the planned development and expansion projects, as summarized in technical studies available for review on Equinox Gold's website.

Diversified Producer: Operating in Mining Friendly Jurisdictions

USA

~4.6 Moz Reserves
~115 Koz annual production¹
~300 Koz with expansion²

Canada

~3.3 Moz Reserves³
~240 Koz annual production³
First production in H1 2024¹

Mexico

~5.4 Moz Reserves
~170 Koz annual production¹
~300 Koz with expansion²

Brazil

~3.6 Moz Reserves
~310 Koz annual production¹
~375 Koz with expansion²

1. Mid-point of the Company's 2023 production guidance provided on February 21, 2023, rounded to nearest 5k. The Company may update guidance to reflect changes to expected results. 2. Anticipated annual production assuming a) that development and expansion projects achieve production at the levels envisioned at the date of this presentation, as outlined in the technical reports for each project and in the Company's corporate disclosure, and b) that existing assets are retained and continue to produce at current rates. 3. Equinox Gold's 60% share of Greenstone Reserves and expected annual production.

The accordion feature is subject to lender approval prior to being available for draw. 6. Approximate market value at August 31, 2023 of the Company's investments in I-80 Gold, Bear Creek Mining, Inca One, Pilar Gold and Sandbox Royalties. See *Cautionary Notes*. 7. ATM = \$100 M at-the-market equity facility, from which the Company has drawn \$25 M. 8. Weighted average of remaining gold collar contracts. See Note 9(a)(i) in the Company's Q2 2023 financial statements.

ESG: Committed to Responsible and Ethical Mining

Target to achieve 25% reduction in GHG emissions by 2030

ENVIRONMENT

- Beat 2022 environmental incident target by 61%¹
- Improved environmental performance 7% in 2022 compared to 2021
- New wind power contracts in Brazil will reduce GHG emissions and result in ~\$42M savings over the 10-year contract term
- Published 2022 ESG, Climate Action and Water Stewardship reports

SOCIAL

- Beat 2022 health and safety target by 36%²
- Improved health and safety performance 30% in 2022 compared to 2021
- Supported community health, education, cultural and sports programs
- Funded skills training and infrastructure improvement
- Diversity and inclusion training at mine sites

GOVERNANCE

- Expanded ESG disclosure and performance metrics
- Updated and expanded governance policies with workforce-wide training
- Continued implementing leading industry standards including UN Global Compact, Towards Sustainable Mining and Responsible Gold Mining Principles

1. Significant Environmental Incident Frequency Rate (SEIFR) per million hours worked of 0.63 in 2022, 7% better than 2021 performance and 61% better than the 2022 target. 2. Total Reportable Injury Frequency Rate (TRIFR) per million hours worked of 2.12 in 2022, 30% better than 2021 performance and 36% better than the 2022 target.

1. Basic basis at August 2, 2023, as announced in the Company's Q2 2023 MD&A.
2. Weighted average option exercise prices are shown at the price that would be paid to Equinox Gold to receive one full EQX share. Option numbers are shown as the number of common shares that would be issued upon exercise of the securities.
3. Restricted Share Units are shares committed to management and directors that are issued subject to time-based and performance-based vesting terms, as part of equity-based compensation.
4. Fully diluted shares outstanding includes the Mubadala, Verition and Pacific Road convertible notes. See footnote 8.
5. Average daily shares trading since January 2022.
6. Cash on hand at June 30, 2023, as announced in the Company's Q2 2023 financials.
7. Net debt comprises amount drawn on the revolving credit facility net of transaction costs, plus equity settled notes, minus cash. See footnote 8.
8. Face value of the convertible notes held by Mubadala Investment Company, Verition Advisors (Canada) ULC and Pacific Road Resources Fund. Mubadala and Verition hold notes of \$130 M and \$9.7 M, respectively, convertible at a fixed US\$ price of \$5.25 per share at the holders' option, expiring in April 2024. Mubadala and Pacific Road hold notes of \$130 M and \$9.3 M, respectively, convertible at a fixed US\$ price of \$7.80 per share at the holders' option, expiring in March 2025. If all four notes were fully converted, the Company would issue 44.5 M shares.
9. Calculated using the August 31, 2023 share price for EQX.

Greenstone: Near-Mine & Belt-Scale Exploration Potential

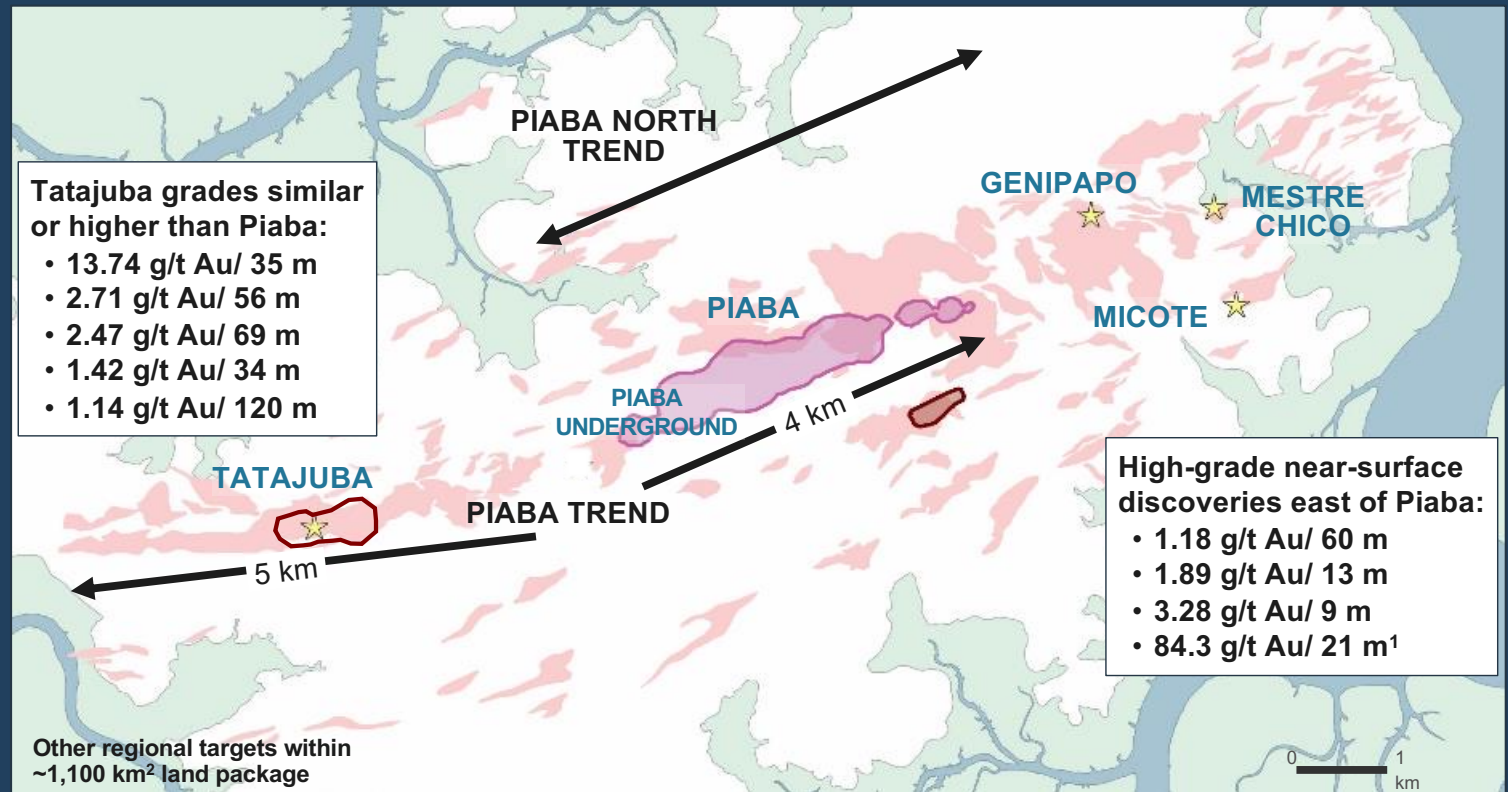

Castle Mountain: Easy Site Access, Synergies with Mesquite

Phase 2 expansion will be contained within existing approved mine boundary

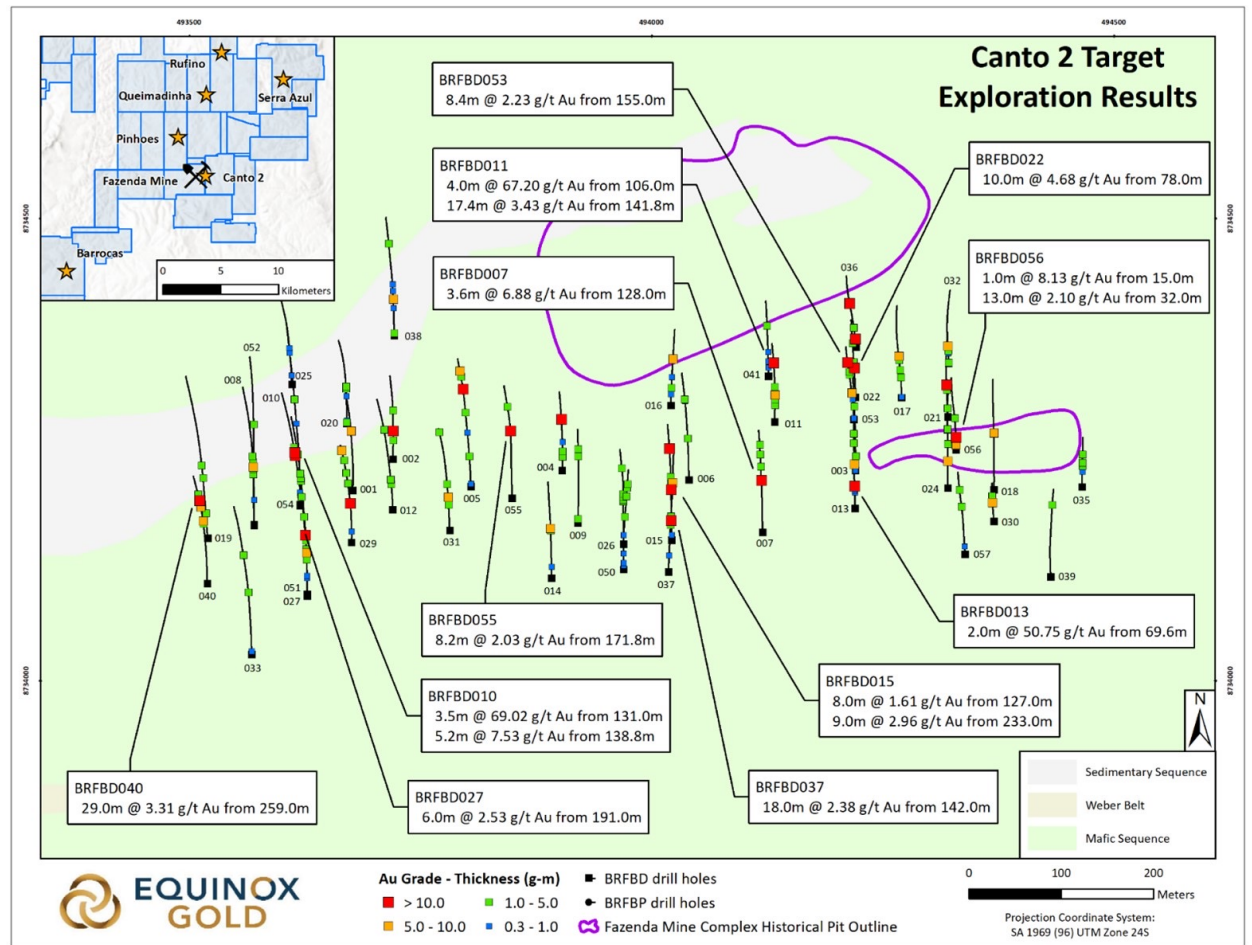

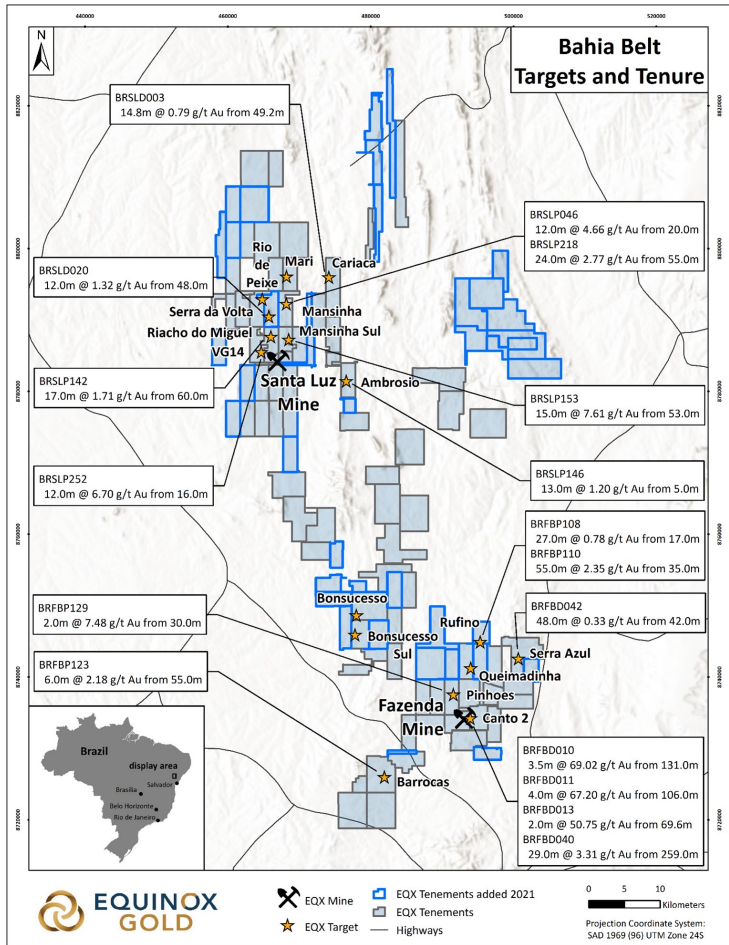

Aurizona: Mine Life Extension Along Strike and Underground

Numerous deposits within trucking distance of existing plant and surface infrastructure

1. Exploration composites are calculated on uncapped assay values. The samples are from the saprolite zone where surficial processes can significantly enrich gold content. Applying the 40 g/t Au cap that was used for saprolitic material in the Piaba resource estimate would change the interval to 5.29 g/t Au over 21.0 m.

Readers are reminded that results outlined in the technical reports for some of these projects are preliminary in nature and may include Inferred Mineral Resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as Mineral Reserves.

There is no certainty that the mine plans and economic models contained in any of the reports will be realized. Readers are further cautioned that Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability. Readers are also advised to refer to the latest annual information form and technical reports of the Companies as well as other continuous disclosure documents filed by the Companies, which are available on SEDAR, for detailed information (including qualifications, assumptions and notes set out accordingly) regarding the Mineral Reserve and Mineral Resource information contained in this document.

Qualified Persons

Doug Reddy, MSc, P.Geo., Equinox Gold's COO, and Scott Heffernan, MSc, P.Geo., Equinox Gold's EVP Exploration, are the Qualified Persons under NI 43-101 for Equinox Gold and have reviewed and approved the technical information in this presentation.

Doug Reddy and Scott Heffernan have reviewed the technical reports for the Greenstone and the Hasaga Property for Equinox Gold. To the best of Equinox Gold's knowledge, information and belief, there is no new material scientific or technical information that would make the disclosure of the mineral resource and mineral reserves or other technical information for the Greenstone Project or the Hasaga Property inaccurate or misleading.
