

ADVANCING EUROPE'S GOAL TO BECOME THE FIRST CARBON NEUTRAL CONTINENT

CORPORATE PRESENTATION

APRIL 2024

CSE: ULTH | OTCQX: ULTHF | FWB: OUL

CAUTIONARY NOTE

THIS MANAGEMENT PRESENTATION (The "Presentation") was prepared as a summary overview only of the current affairs of United Lithium "or the "Company") and was not prepared for the purpose of assisting prospective investors in making a decision to invest in United Lithium. Information disclosed in this Presentation is current as of September 2023, except as otherwise provided herein and United Lithium does not undertake or agree to update this presentation after the date hereof. All information contained on the presentation is derived pose not make any representation as to the completeness, truth or accuracy of the information contained in this Presentation. The Company expressly warns readers not to rely on the information contained herein as advice (legal, financial, tax or otherwise) to current or potential investors. Accordingly, any use of this information is at your risk and without liability to the Company. This Presentation does not constitute and should not be construed as either a public or private offer to sell or the solicitation of an offer to purchase securities in the capital stock of United Lithium in any jurisdiction in which such offer, solicitation or sale would be unlawful. Each prospective investors should contact his/her or its own legal adviser, independent financial adviser for legal, financial or tax adviser for legal financial or tax adviser for legal decisions to the repersentation of the Company. No person has been authorized to give any information or make any representation of the rother than those contained in this Presentation and, if given and/or made, such information or representations having been so authorized.

FORWARD-LOOKING INFORMATION This Presentation contains certain statements, which may constitute "forward-looking information" within the meaning of Canadian and United States securities legislation. All statements, other than statements of historical facts, are forward-looking information and can be identified by the use of statements that include, but are not limited to, words such as "anticipate", "plan", "continues", "estimate", "expect", "proposes", "propects", "proposes", "potential", "farget", "implement", "scheduled", "fordia", "would", "w

FORWARD-LOOKING STATEMENTS are not guarantees of future performance and involve risks, uncertainties and assumptions, which are difficult to predict. Assumptions underlying United Lithium's expectations regarding forward-looking statements or information contained in this Presentation include, among others, United Lithium's ability to comply with applicable governmental regulations and standards, its success in implementing its strategies, achieving its business objectives, the ability to raise sufficient funds from equity financings in the future to support its operations, and general business and economic conditions. The foregoing list of assumptions is not exhaustive. Prospective in investors reading this Presentation are cautioned that forward-looking statements are only predictions, and that United Lithium's and that United Lithium's mineral properties being subject to performance are subject to certain risks and uncertainties including: risks related to United Lithium's history of losses, which may continue in the future; risks related to United Lithium's history of losses, which may continue in the future; risks related to increased competition and uncertainty related to additional financing that could adversely affect its ability to attract necessary capital funding or obtain suitable properties for mineral exploration in the future; risks related to its officers and directors becoming associated with other natural resource companies, which may give rise to conflicts of interest; uncertainty and volatility related to stock market prices and conditions; further equity financings), which may substantially dilute the interests of United Lithium's shareholders; risks relating to its exploration operations; dependence on general economic, market or business conditions; changes in business strategies; environmental risks and remediation measures; and changes in laws and regulations.

FORWARD-LOOKING ASSUMPTIONS/ESTIMATES in this Presentation reflects United Lithium 's current views with respect to future events and are necessarily based upon a number of assumptions and estimates that, while considered reasonable by United Lithium, are inherently subject to significant business, economic, competitive, political and social uncertainties and contingencies. Many factors, both known and unknown, could cause actual results, performance or active performance or related to many of these factors. Such factors include, without limitation: fluctuations in spot and forward markets for silver, gold, base metals and certain other commodities (such as natural gas, fuel oil and electricity); restrictions on mining in the jurisdictions in which United Lithium operates; laws and regulations governing our operation, exploration and development activities; its ability to obtain or renew the licenses and permits necessary for the operation and expansion of its existing operations and for the development, construction and commencement of new operations; risks and hazards spotential unintended releases of contaminants, industrial accidents, unusual or unexpected geological or structural formations, pressures, cave-ins and flooding); inherent risks associated with the libusiness of mineral exploration and development; the inability to determine, with certainty, production and cost estimates; inadequate or unreliable infrastructure (such as roads, bridges, power sources and water supplies); environmental regulations and legislation; the effects of climate change, extreme weather events, water scarcity, and seismic events, and the effectiveness of strategies to deal with these issues; risks relating to United Lithium's exploration operations; fluctuations in currency markets gusts as the Us dollar, Swedish to the Usual Communities and supply of the metals markets, and its preventations, spirity to meet its financial obligations; United Lithium's ability to reputine she of the Company's ability to reputine she of the

Forward-looking information is made based on management's beliefs, estimates and opinions and are given only as of the date of this Presentation. United Lithium undertakes no obligation to update forward-looking information if these beliefs, estimates and opinions or other circumstances should change, except as may be required by applicable law. Current and potential investors should not place undue reliance on forward-looking statements due to the inherent uncertainty therein. All forward-looking information is expressly qualified in its entirety by this cautionary

statement.

HISTORIC INFORMATION This Presentation contains historical public information on samples from, and geological features on, the Bergby property claims and the Kietyōnmāki property claims. This presentation also contains public information on historically producing mines and businesses that may be important to current and future work related to any of the Company's projects and target areas. This information has been sourced from publicly available and other other-party sources as well as the Company's good faith estimates. While the Company believed the information was prepared by reputable sources, it did not independently verify the information or underlying sources.

QUALIFIED PERSON The scientific and technical data contained in this presentation was reviewed and approved by Cathy Fitzgerald, M.Sc., P.Geo. Ms. Fitzgerald is a registered Professional Geoscientist in British Columbia, Canada and is a Qualified Person as defined by NI 43-101 Standards of Disclosure for Minerals Projects.

DIVERSIFIED PORTFOLIO

In Sweden and Finland, projects are located near major infrastructure, including deep-water ports
In the USA, projects are located in historic lithium-

pegmatite mining districts with extensive outcrops

Well-funded with aggressive plans for exploration and project advancement

Strong management team and board with extensive

experience in the metals and mining industry

Targets areas with advanced infrastructure, allowing

for cost-effective exploration and rapid project advancement

OUR TEAM

Scott Eldridge, President, CEO & Director

15 years experience in Metals & Mining Industry. Dir. of Nevada Lithium Resources, Founder of Euroscandic.

Michael Kobler, Director

35 years experience in multiple executive roles. Founded American Lithium Corp and Osum Oil Sands Corp.

Andrew Bowering, Strategic Advisor

30+ years experience in mineral exploration and development. Founded Millennial Lithium Corp & American Lithium Corp.

Victor Cantore, Strategic Advisor

25+ years of advisory / leadership and capital markets experience. Founder, Nemaska Lithium & President / CEO, Amex Exploration.

Chris Cairns, CFO

12 years experience in the mining and finance industry. CFO of Apollo Silver Corp., experience in North and South America.

Rona Sellers, VP Compliance & Corporate Secretary

12 years experience in corporate and securities law. VP of Commercial & Compliance, Corp Secretary for Apollo Silver Corp.

Henrik Lundin, Director

Swedish citizen with extensive experience in the natural resource sector. Previous Chair at Gold Line, COO of Tag Oil Ltd. Currently at EMX Royalties.

Robert Schafer, Director

Registered Professional Geologist w/ 35+ years experience. Past president of the Canadian Institute of Mining.

lain Scarr, Director

29 years with Rio Tinto including Director & VP Exploration. Has been responsible for mineral discoveries worldwide.

LITHIUM INDUSTRY SUCCESS

- . Andy Bowering Founded
- Iain Scarr COO
- Sold to Lithium Americas for US\$491M (\$4.91 / share) in 2022
- Properties featured robust PEA's, approved EIAs, DIA's issued and pilot plant in production

- . Andy Bowering Founded
- Properties in Nevada and Peru, all with Robust PEAs and a combined NPV of
- US\$5.3B Recently listed on NASDAQ (January 2023)
- Published its maiden ESG report in August 2023

- Experienced management and board (including Andy Bowering and Iain Scarr)
- Large property portfolio in Sweden, Finland, & USA
- Properties in areas with extensive infrastructure to allow rapid exploration and development

MACRO OPPORTUNITY | EUROPE'S QUEST FOR HOME-GROWN LITHIUM

OPPORTUNITY:

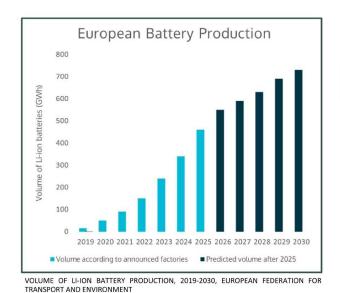

Europe is the 2nd largest EV market combined with government level support

GOAL:

Climate Neutrality by 2050

ACTION:

The Critical Raw Materials Act aims to strengthen Europe's critical raw materials capacities along all stages of the value chain

2030 Benchmarks

EV Processing

EV Recycling

External

10%

EV Extraction

40%

15%

No More Than 65% From 1 Country

BUILDING EUROPEAN CAPACITIES:

Identify Strategic Projects

Fast-track Permitting

Boost Exploration for EU Projects

SOURCE: EUROPEAN COMMISSION - FACTSHEET ON EUROPEAN CRITICAL RAW MATERIALS ACT

pegmatites identified that extend over more than 4 km combined

Excellent transport infrastructure (paved roads, power, and within 2 km of major deep-water port

Sweden is one of Europe's leading ore and metal-producing countries with 12 mines active across the country

Optimally positioned to benefit from EU/UK markets and contribute to meeting European green energy objectives

Three Key Elements:

NEAR INFRASTRUCTURE 01

Easily accessible and costeffective exploration & drilling

MINING FRIENDLY Long history of mining & aims to remain the EU's leading mining country

03

CRITICAL RAW MATERIAL ACT

European Council pending legislation to support domestic objectives

Historical Work and Significant Results

2021

United Lithium Acquires Bergby & Begins Exploration

- Discovers several lithium-mineralized boulder trains indicating the presence of **new mineralized bodies**
- Significant surface rock sample results include 3.33% Li₂O, 3.15% Li₂O and 2.82% Li₂O¹

2022

First Drill Program Completed by United

- Further drilling at Pegmatite A, and drill-confirmed two new discoveries (Pegmatites "B" and "C")
- Discovery drill hole BBY21069 at Pegmatite B intercepted **47.75 m** of **1.34% Li₂O** from 2.25 m depth (estimated true thickness 10 m)²

1 See news releases dated September 30 , 2021 and October 19, 2021 2 See news release dated January 20, 2022

SWEDEN

Current Work Program

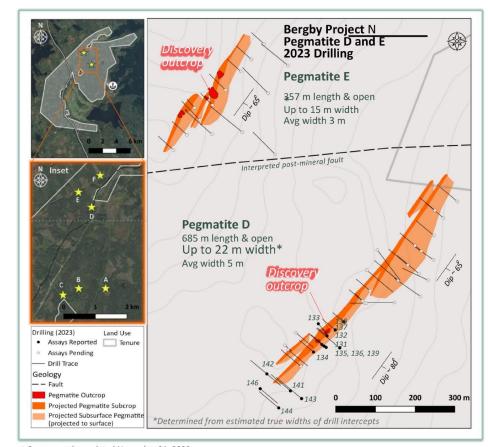

2023

Completed Drilling

- Proposed 4,000 m drill program expanded to 5,600 m based on early success. Drilling completed at Pegmatites D, E and F
- All three new pegmatites discovered by prospecting and identifying spodumene-bearing pegmatite outcrop
- Highlights from 2023 drilling at Pegmatite D include1:

01.92% Li₂O over 26.80 m from 3.60 m depth (hole BBY23132)*; 01.82% Li₂O over 12.97 m from 14.05 m depth (hole BBY23138); 01.96% Li₂O over 9.68 m from 38.87 m depth (hole BBY23141).

- Highlights from 2023 drilling at Pegmatite E include²:
 - o1.05% Li₂O over 23.75 m from 75.96 m depth (hole BBY23155); o1.01% Li₂O over 8.01 m from 22.89 m depth (hole BBY23150); 00.86% Li₂O over 14.45 m from 35.23 m depth (hole BBY23152).
- 5,600 m has been completed across 60 holes in Pegmatites D, E and F. 24 out of 60 holes have been released
- Program used two drill rigs

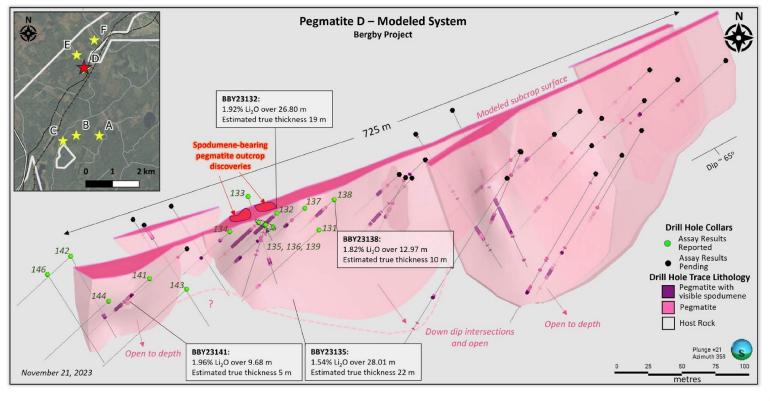

- 1 See news release dated November 21, 2023.
- 2 See news release dated January 11, 2024.
- * Estimated true thickness is approximately 80% of drilled intercepts

- Pegmatite D is drilleddefined over 725 m strike length and is open along strike to the north, and to depth below 120 m
- Maximum true thickness 22 m (variable along strike and to depth)
- . Some areas thicken with depth - pinching and swelling
- . 3D Modeling ongoing for all pegmatites at Bergby
- · Continuing to drill-test new discoveries

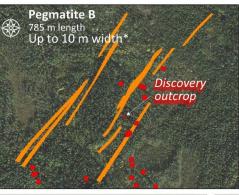

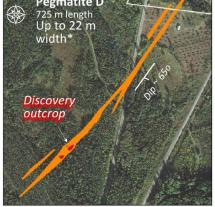

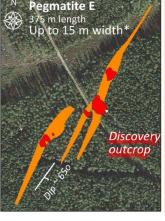

- Pegmatites occur in two clusters, 2 km apart.
- . Bodies are open along strike and to depth.
- Our two largest bodies to date are Pegmatite A and D.
- •Pegmatite A, drill defined over 1,750 m in length and drill tested to 100 m depth.
- Pegmatite D is drill defined over 725 m in length and to 120 m depth.

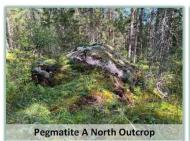

SWEDEN

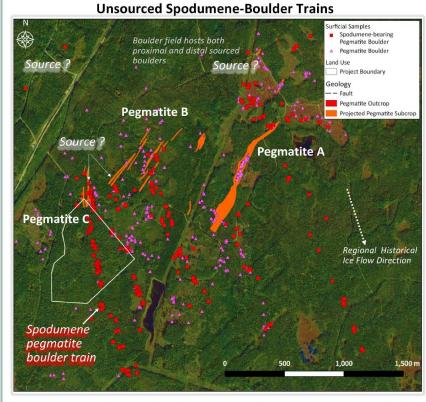

Future Work Programs

- **Exploration:**
 - •At least one-third of the property remains to be explored.
 - Several unsourced spodumene-bearing boulder trains require follow-up.
 - •Further prospecting, sampling and possible geophysical programs to refine understanding of the structural setting
- **Drilling:**
 - •Infill drilling can be to refine geologic model and target predicted high-grade zones
 - Expansion drilling at all bodies
 - •Ideally drill test further new discoveries
- Metallurgy and mineralogy: •Sample Pegmatite A for further testing and complete initial sampling on Pegmatites B, C, D, E and F.

FINLAND +

Kietyonmaki: 900 ha - exploration license; Salkola 20,713 ha - reservation license

- Lithium mineralized pegmatite discovered by the Finnish Geological Survey in 1985. Completed six drill holes on the Main Dyke
- Accessible by major roads and in close proximity to deep water ports; 100 km from the port of Pori, Finland
- Strategically positioned close to critical battery markets for Lithium in Europe; 50 km from new factory in Salo, Finland
- Drilling and detailed surface exploration initiated to expand the Main Dyke and identify additional lithium-mineralize pegmatites

UL UNITED LITHIUM

01

FINLAND +

Historical Work and Significant Results

1985

First Drill Program Completed by Geological Survey

- Discovery hole in Main Dyke intersected **23 m of 1.53 % Li₂O** at surface and ended in mineralization
- Down dip follow-up hole intersected **24.5 m @ 1.3% Li₂O.** Dike remains untested below 65 m depth. Extends at least 400 m along strike
- Completed extensive mapping, prospecting, auger and diamond drilling in the 1970's and 1980's on this project

2016

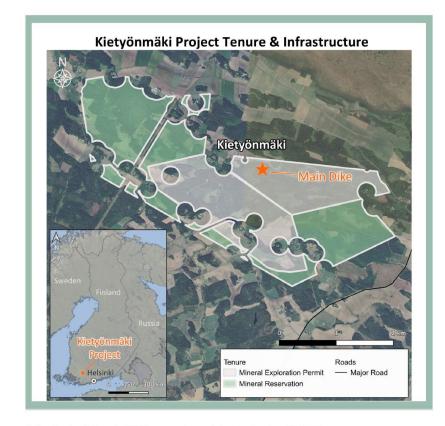

Second Drill Program – Previous Operator

- 1,172 m completed in six diamond drill holes across the Main Dyke. High grade results include 42 m @1.05% Li₂O from 17.9 m depth¹
- Results suggest the body continues and thickens to the south-east. The initial drill results were very encouraging

2022

United Acquires the Kietyönmäki Project

- Acquires 83.6% of the Project from a consortium. Remaining 16.4% held by Nortec Minerals Corp.²
- Commenced surface prospecting and surface rock sampling to define further spodumene-bearing pegmatites

- 1 See Avalon Minerals (ASX) news release dated September 12, 2016
- 2 See news release dated February 14, 2022

FINLAND

Current Work Program

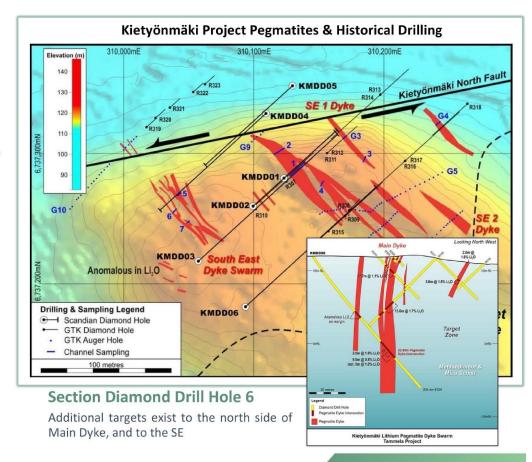

2023 Drilling

- Drilling commenced in September 2022 on a proposed 10-hole, 1,000 m program to further delineate the Main Dyke.
- The program expanded to 13 diamond drill holes and over 1,450 m, which concluded in September 2023.
- 1.52% Li₂O over 25.95 m from 33.70 m depth down hole in ULDH-3; and 1.45% Li₂O over 29.50 m from 69.10 m depth down hole in ULDH-4
- Drilling confirmed the extend of the Main Dyke to be greater than 200 m in length and 160 m depth, remaining open along strike and at depth

Salkola Reservation

Mikkola LCT-outcrop, showing black tourmaline and possible purple lepidolite.

UL UNITED LITHIUM

Current Work Program

2023

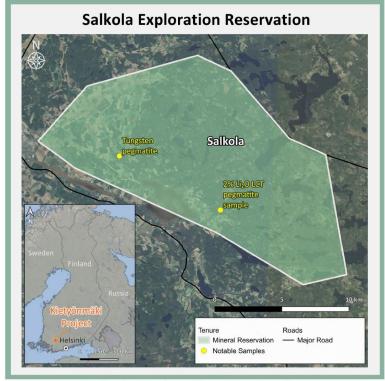

Exploration & Land Package Increase

- Ongoing mapping and surface sampling: two unsourced boulder trains present that require follow-up
- Will commence three-dimensional geological modeling and further geochemical vectoring exercises
- In October 2023, the Salkola Exploration Reservation was secured ~20,000 ha, ~6km south-east of the Main Dyke
- The Salkola Reservation covers one known lithium-caesium-tantalum ("LCT") pegmatite with historical sampling of 2% LI₂O

2024

Exploration & Land Package Increase

In March 2024, acquired 100% interest in Kietyönmäki Project from Nortec Minerals Corp¹

Salkola Exploration Reservation

Covers one known lithium-caesium-tantalum ("LCT") pegmatite with historical sampling of 2% LI₂O.

¹ See news release dated April 9, 2024.

STRONG FUNDAMENTALS

- Premier global portfolio of hard rock lithium projects
- Strong management team with proven track record in the lithium space
- Substantial Nordic presence with projects in mining-friendly Sweden and Finland to support the EU's goal of becoming the first carbon-neutral continent
- USA projects located in historic lithium-bearing pegmatite mining districts Colorado, South Dakota and Wyoming
- Extensive plans for exploration and project advancement

LIBERTY PROJECT

SOUTH DAKOTA, USA 🕮

- Located within a historically significant hard-rock lithium mining district producing US\$66M in pegmatite minerals between 1844 & 1958¹
- Large project area (6,000 ha) that hosts numerous pegmatite bodies, including past lithium-beryllium producers
- Located near major infrastructure such as interstate highways, an airport and the city of Custer
- A first-mover in staking in this very prospective and active exploration region with many companies now exploring for lithium in the area
- Since staking the project in 2022, United has completed extensive surface outcrop and soil sampling to identify drill targets²
- **Inflation Reduction Act** supports domestic mining of lithium in the USA

Liberty Project Location and Tenure

LIBERTY PROJECT

DAKOTA, USA

Work to Date and Future Plans

2022 Staking and Initial Exploration

- Staked more than 6,000 ha of highly-prospective land recognized for its historical mining of Lithium-Cesium-Tantalum (LCT) pegmatites¹ Completed early reconnaissance prospecting, surface bedrock sampling
- (472 samples) with rock chip sampling of exposed pegmatite yielding 1.51% Li₂O (assayed)²

2023 **Current Work and Future Plans**

- Surface bedrock sampling, soil sampling, mapping and prospecting completed over the entire 6,000 ha property²
- At least seven target areas identified from surface work warrant follow up and several exposed pegmatite bodies mapped²
- Advancing towards obtaining drill permits in 2024

PATRIOT PROJECT

COLORADO, USA

- Large land package (2,041 ha) staked by United in 2022 in **Gunnison County**
- Well-positioned infrastructure near Ohio City with access via interstate highway. Nearby airport and services
- Numerous pegmatite bodies several of which were historically mined for lithium, beryllium and tantalum
- Lithium bearing minerals spodumene and lepidolite have been identified in these bodies on the project
- Highly prospective region underexplored, without
- access to modern tools and methods
 - Sampling program complete 15 lithium-bearing
- pegmatite occurrences identified, including nine new discoveries with high-grade assay results

Patriot Project Location and Tenure

PATRIOT PROJECT

COLORADO, USA

Work to Date and Future Plans

2023

Staking and Initial Exploration

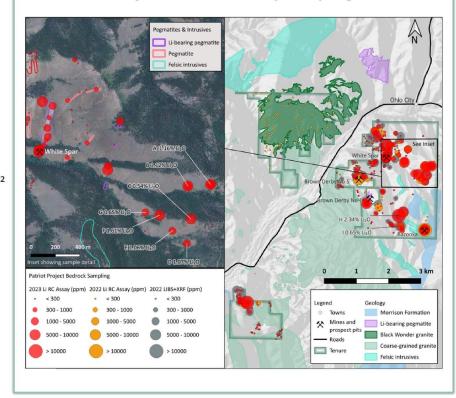

- Staked more than 2,041 ha of highly-prospective land recognized for its more than 1,800 occurrences of pegmatite¹
- Many pegmatite bodies are known to contain lepidolite, cleavelandite and spodumene, including some on the property according to work by the USGS²
- Surface bedrock sampling program completed in Sept 2023 featuring 9 new pegmatite discoveries, with high-grade results of up to 3.97% Li₂O
- The project encompasses a good portion of the Quartz Creek pegmatite filed with a known source pluton
- Advancing towards obtaining drill permits in 2024

Patriot Project Surface Outcrop Sampling Results

² See news release dated May 2, 2022.

FREEDOM PROJECT WYOMING, USA 🕮

- Established a large land package (1,844 ha) in Oct. 2023 through staking and one state mineral lease
- Well-positioned easily accessible from US Route 20, and sits 24 kilometres north of the city of Shoshoni
- Extensive pegmatite outcrops known spodumene, lepidolite and tantalite hosting pegmatites
- Mining friendly state Wyoming is mining-friendly and is the second-biggest net domestic energy supplier¹
- Highly prospective region Located in the historic Copper Mountain Mining District
- Previous mining Region previously produced lithium, tantalum, tungsten, beryllium, feldspar, copper and gold intermittently between 1906 and 1978²
