Gold is more precious than ever before. In the early stage of a once-in-a-generation systemic inflation cycle, demand for gold, notably from central banks around the world, is at an all-time high.

Northern Superior Resources is consolidating the Chibougamau Gold Camp in Quebec...

... and capitalizing on district scale exploration potential in Ontario with 72% ownership of **ONGold Resources Ltd.**

# Forging the future in gold.

# Why choose Northern Superior?

Investment highlights and key takeaways.

## Chibougamau Proven Districts

The idea of consolidating the camp to make it viable has been discussed for years. Northern Superior is stepping up and seizing the opportunity.

As our projects are near underexplored proven auriferous structural breaks, providing for a clear potential to host more ore deposits of various types.

## Conviction

With **25%+** of insider ownership, interest is well aligned with shareholders. Our core management team comprises stalwarts in mineral exploration and finance with several accomplishments.

In the recent \$8 million Cormark-underwritten equity financing, insiders participated for **\$1 million** in total.

## Exploration in Ontario

We own **72% of ONGold Resources** (TSXV: ONAU), our spin-off company advancing the famous district scale **TPK Project** in Ontario. ONGold is led by a team of unparalleled sustainability and social acceptability experts.

**ONGOLD**  
RESOURCES LTD.

# Visionary Leaders

**VICTOR CANTORE**  
Executive Chairman

President and CEO of AMEX Exploration Inc., one of the most successful gold exploration companies in the country.

Over 25 years of advisory and leadership experience and serves on the boards of various companies both private and public.

**KATRINA DAMOUNI**  
Director, Corporate Development

Over 15 years of corporate development, IR and capital markets experience, primarily within the junior mining sector.

**SIMON MARCOTTE**  
President, Chief Executive Officer and Director

Founder, President & CEO of Royal Fox Gold Inc. until its acquisition by Northern Superior in 2022.

Nearly 25 years of experience, including with CIBC World Markets, Sprott & Cormark Securities, and founder, officer, or director of several resource companies including Arena Minerals, Freeman Gold Corp., NorthX Nickel, Black Swan Graphene, and Mason Graphite.

**ADREE DELAZZER**  
Vice President Exploration

Professional Geologist P.Geo with over 15 years of experience in exploration and mining.

Formerly Superintendent of Geology for Kirkland Lake, Detour Lake Gold Mine and Exploration Manager responsible for near mine and greenfield exploration programs.

# Accomplished Directors

**MICHAEL GENTILE**  
Largest Shareholder and Director

Over 20 years as institutional money manager investing in commodity sector. Recently co-founded Bastion Asset Management.

Seasoned mining investor; member of the board of Roscan Gold Corporation and Radisson Mining Resources.

**ANDREW FARNCOMB**  
Director

Founder of Cairn Merchant Partners LP; founder and director of Contact Gold Corp and Cairn Memory Care Fund GP.

Formerly a Partner (Investment Banking) at Paradigm Capital Inc.; Director of several TSX and TSX Venture Exchange listed companies.

**SIMON MARCOTTE**  
President and CEO

**ERIC DESAULNIERS**  
Director

Currently Founder, President and CEO of Nouveau Monde Graphite Inc.

Seasoned professional geologist specializing in geophysics. He earned a bachelor's degree in geology and a master's degree in geophysics from Laval University in Quebec City, Quebec, Canada.

**FRANÇOIS PERRON**  
Director

Currently President and CEO of Lucky Minerals.

30 years of experience in various roles including mining portfolio manager with Caisse de Depot (Qc) and NBC Alternative Investments; VP Corporate Development, President, CEO, or director for various TSX Venture Exchange listed companies.

**VICTOR CANTORE**  
Executive Chairman

**PETER DAMOUNI**  
Director

Currently President and CEO of Mason Resources, Executive Director of Black Swan Graphene.

He was also a director of Arena Minerals Inc., until its acquisition by Lithium Americas. He co-founded Chesterfield Resources and was a director of Gating Exploration that was acquired by MAG Silver.

**FRANK GUILLEMETTE**  
Director

Entrepreneur with over 20 years of experience in finance and venture capital.

Advanced the Philibert Project until its acquisition by Royal Fox; other transactions including the Black Dog project to Osisko Mining and the Monster Lake Project to IAMGOLD.

# Technical Experts

**RODNEY BARBER**  
Technical Committee

Professional Geologist P.Geo with over 35 years of experience in exploration and mining.

Previously employed as the Geology Superintendent at Barrick-Hemlo, Ontario; added 4.5 M oz of gold reserves.

**WILL RANDALL**  
Technical Committee

Professional geologist P. Geo with over 20 years of experience in the mining and mineral exploration industry. Acquired, discovered and developed the Sal de los Angeles lithium brine project in Argentina.

Involved in raising over \$200M and successful development of several mining projects including JV's with majors and national governments.

**JEAN LAFLEUR**  
Technical Committee

Mr. Lafleur is a seasoned geologist well known in the Province of Quebec with over 40 years of mining industry experience.

Currently acting as a senior consultant for Appian Capital, and previously with Newmont, Falconbridge, Placer Dome.

**KELLY MALCOLM**  
Technical Committee

Professional geologist P.Geo. Recently VP, Exploration for Amex Exploration, which has made numerous gold discoveries, raised over \$90 million, and named Exploration Company of the Year at Mines and Money in 2022.

Previously involved win the discovery and delineation of Detour Gold's high grade 58N gold deposit.

**DAVID BEILHARTZ**  
Technical Committee

Professional Geologist P.Geo with over 35 years of experience in exploration and mining.

Formerly Vice-President Exploration of Trelawney Mining and Exploration, Vice-President, Exploration of Lakeshore Gold and Chief Geologist for Holmer Gold Mines.

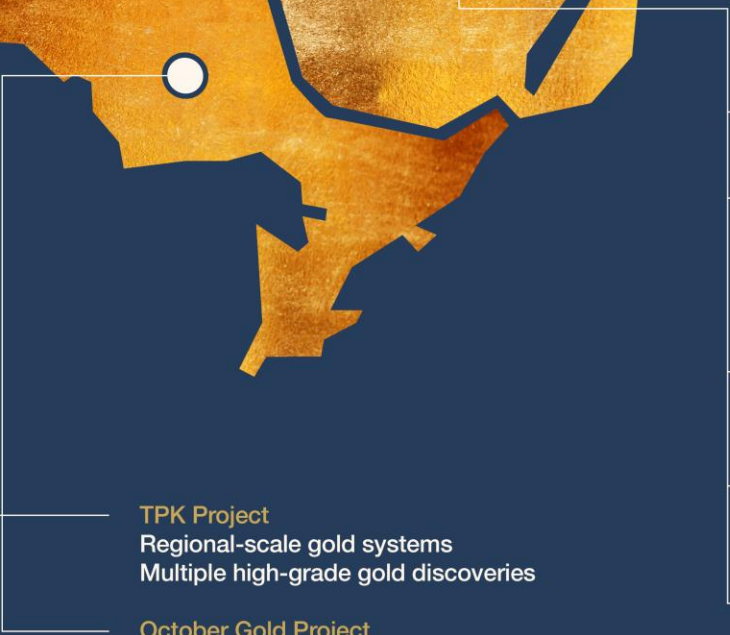

**MELANIE PICHON**  
Senior Exploration Geologist

Professional Geologist P.Geo with over 15 years of experience in exploration.

Formerly Senior Exploration Geologist at Eldorado Gold Corp., and Exploration Manager at QMX Gold Corp.

# Leading the Consolidation of the Chibougamau Gold Camp

By consolidating the most relevant gold deposits in the Chibougamau Gold Camp under one roof, Northern Superior is **increasing the viability of the resources**. The deposits are located within a small radius, which will eventually allow them to be combined into a single operational design, feeding a single mill.

**We look at the camp as one project.**

# Zooming-in on the Core Area of the Chibougamau Gold Camp

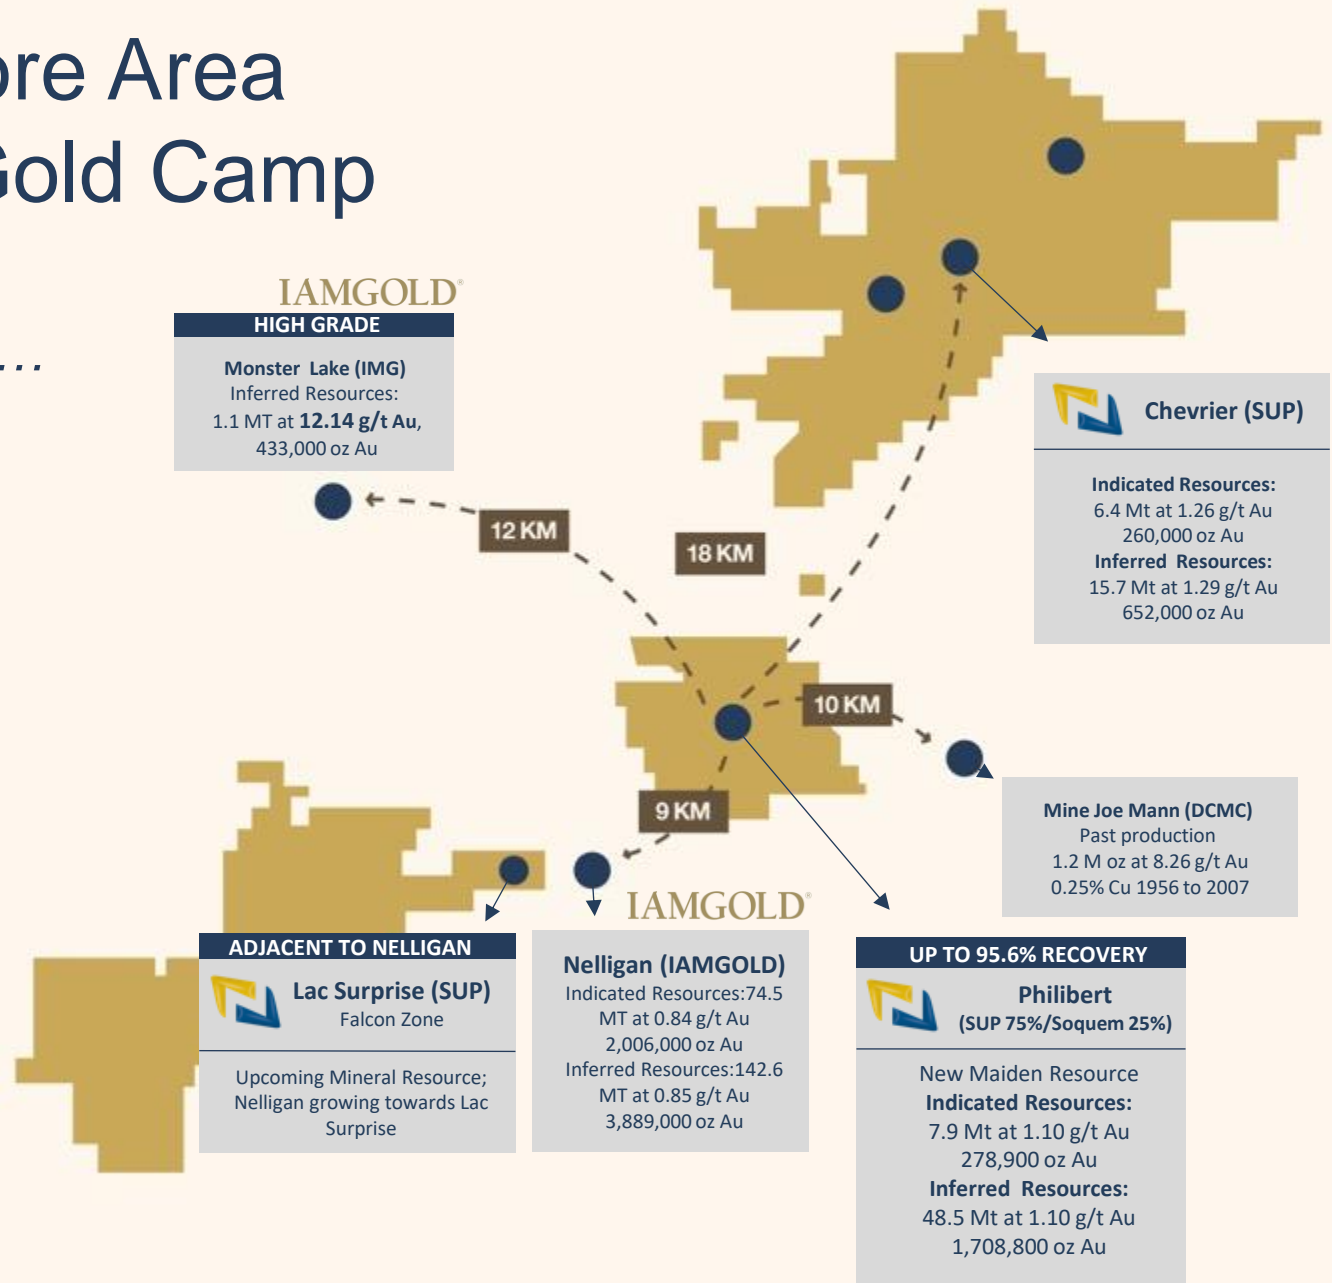

*...Ideally suited to feed a single mill...*

Following its long history of copper driven exploration, it has become evident that the southern Chibougamau camp carries great potential for gold mineralization. We believe the key gold deposits will expand, and further discoveries are inherent.

Our properties are surrounding or even adjacent to IAMGOLD's Nelligan, which was the "Discovery of the Year" in 2019

All properties are accessible by road and have nearby access to hydroelectricity.

A Tier-1 mining jurisdiction. Quebec is one of the most sought-after jurisdictions in the world with unmatched government support and clear permitting framework.

# Acquisition of Vanstar by IAMGOLD: Further Evidence IAMGOLD Redirecting Resources Toward the Camp

- Vanstar owned 20% of the Nelligan deposit<sup>1</sup>
- Acquired by IAMGOLD in December 2023 for \$45 million<sup>2</sup>
- 74% premium to the 20-day VWAP
- A value of \$40.90 / oz<sup>3</sup>

"This transaction consolidates our interests in the highly prospective **Nelligan deposit** while building our exploration portfolio within Northern Québec," **commented Renaud Adams, President and Chief Executive Officer of Iamgold.** "Our exploration efforts at Nelligan to date, in partnership with Vanstar, have shown the potential for further resource expansion, which we will continue to advance. While this transaction bolsters our Canadian exploration portfolio, the priority for Iamgold today remains focused on the successful commissioning, ramp-up and growth of Côté gold in Ontario. Côté is a project that is critical for the repositioning of this company, as once online, Iamgold will have a significantly higher production base and lower cost profile, **providing a strong foundation of cash flow and growth opportunities in Canada.**"

- IAMGOLD Corporation, Press Release December 5, 2023

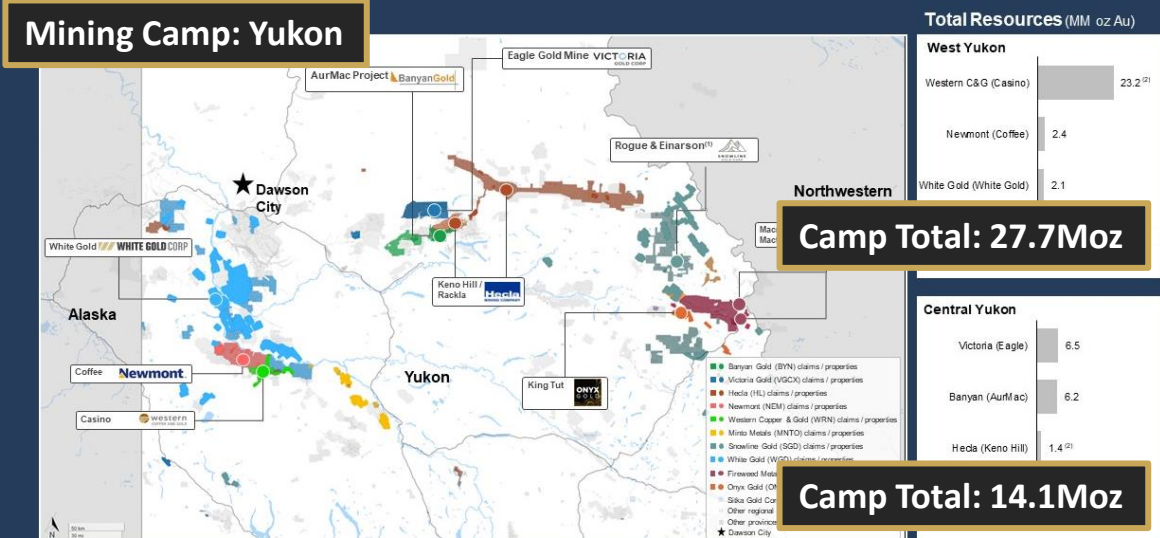

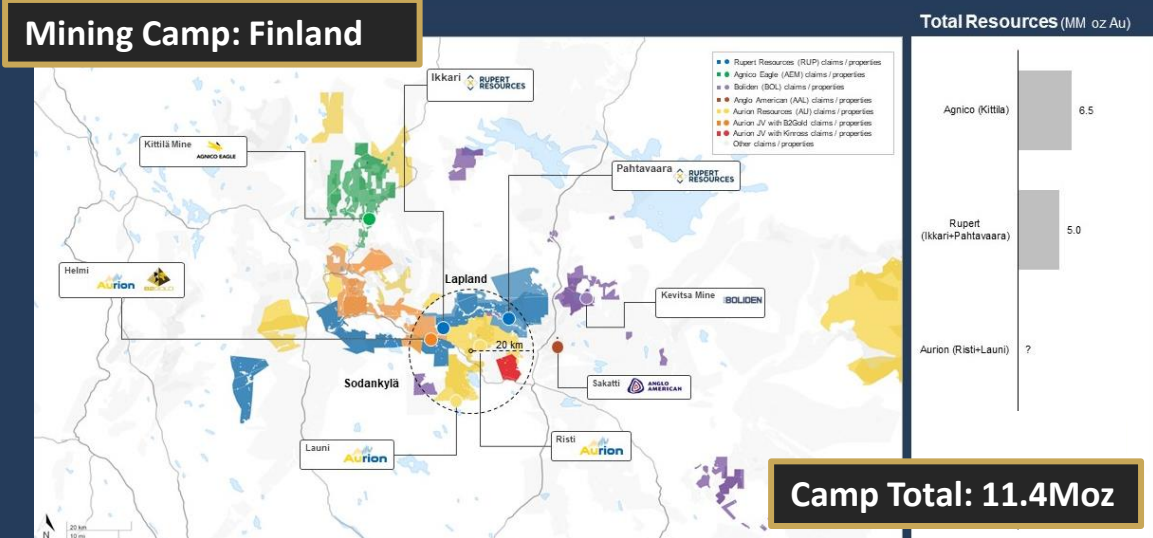

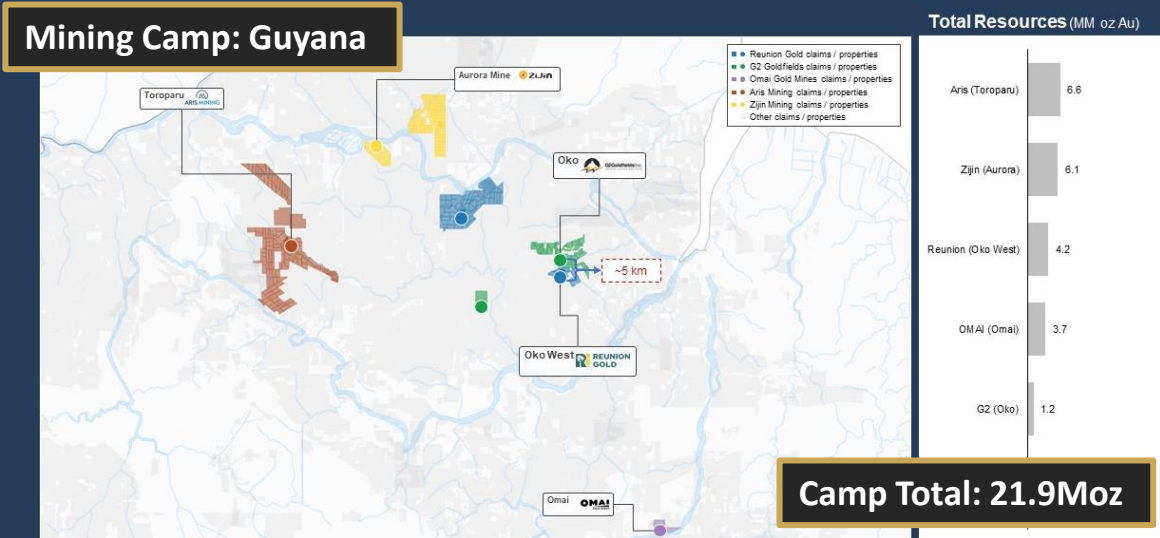

## Activity Ramp Up:

- Northern Superior now well funded and aims to drill more than 20,000 metres in the months ahead
- IAMGOLD currently drilling and unveiled plans to drill more than 15,000 metres in the camp in 2024\*
  - IAMGOLD drilling at Nelligan, Monster Lake, and Anik (located between Nelligan and Philibert)
- IAMGOLD indicated that a new Mineral Resource Estimate on **Monster Lake is expected in 2024\***
- In July 2024, IAMGOLD acquired "Lac-à-L'eau Jaune" (located between Monster Lake and Chevrier)

One of the largest gold-in-till dispersal anomalies in the world, indicating a large gold system or district.

Large mineral-bearing boulders returning assay values as high as **727 g/t gold**, 111 g/t silver, and 4.05 % copper.

Multiple, significant gold discoveries have already been made, including: **25.87 g/t gold over 13.45 metres** (TPK-10-004).

Most gold dispersal trains are 200 m x 3 km. This property hosts two distinct anomalies, the largest one being 6 km x 11 km.

9 km from IAMGOLD's Nelligan Project

“With the Philibert Project having already achieved considerable size on its first NI 43-101 resource, coupled with its **untapped potential**, a relatively **high-grade** nature for a bulk tonnage operation which, generally speaking, provides for shorter payback periods, and attributes such as a low nugget effect, a low overburden cover, and **favorable initial metallurgical** recovery results, it is clear that the Philibert Project has firmly established itself as a cornerstone of the Chibougamau Gold Camp, which is swiftly gaining recognition.”

Mineral Resources are reported at a cut-off grade of 0.35 g/t Au for the pit-constrained. This cut-off is calculated at a gold price of US\$1,746.58 with an exchange rate of 1.3 US\$/C\$ per troy ounce. The pit-constrained resources were based on the following parameters: mining cost 3.25\$/t, processing, transport + G&A costs \$15/t, Au recovery 93%, bedrock slope angle of 45 degrees. The mineral resource presented here were estimated with a block size of 5m X 5m X 5m for the pit-constrained. The blocks were interpolated from equal length composites calculated from the mineralized intervals. Prior to compositing, high-grade gold assays were capped to 26.74 g/t Au applied on 1-meter composites for the pit-constrained. The mineral estimation was completed using the inverse distance squared methodology utilizing three passes. For each pass, search ellipsoids followed the geological interpretation trends were used. For passe 1 and 2 a minimum of 4 composites and maximum of 12 composites with a maximum of 3 composites from the same drillhole (a minimum of two drillholes are needed to estimate each block). For passe 3 minimum of 3 composites and maximum of 6 composites were used. The Mineral Resources have been classified under the guidelines of the CIM Standards on Mineral Resources and Reserves, Definitions and Guidelines prepared by the CIM Standing Committee on Reserve Definitions and adopted by CIM Council (2014), and procedures for classifying the reported Mineral Resources were undertaken within the context of the Canadian Securities Administrators NI 43-101. The classification using a minimum of three drillholes within 30 metres of each other or less defines indicated resources. The inferred resources were classified using 1 pass extends by a maximum of 120 metres and 30 metres thick using one drillhole with a minimum of 2 composites. In order to accurately estimate the resources, the claim limits were taken into consideration for the pit optimization. Tonnage estimates are based on rock densities of 2.8 tonnes per cubic metre for all the zones. Results are presented undiluted and in situ and numbers are rounded to nearest hundred. Numbers may not total due to rounding. The metal contents are presented in troy ounces (tonnes x grade / 31.10348).

## SOQUEM – Option Agreement

50% secured with a total of \$3.5M of expenditures over 5 years - COMPLETED

Northern Superior acquired an additional 25% via an additional \$2M of expenditures (COMPLETED):  
 $50\% + 25\% = 75\%$

Remaining 25% can be acquired for a payment of \$3.5M to SOQUEM (2026):  
 $75\% + 25\% = 100\%$

SOQUEM is a leader in Quebec’s mineral exploration industry. As a subsidiary of Investissement Quebec, its mission is to promote the exploration, discovery, and development of the province’s mineral resources. The company has participated in hundreds of mining projects having led to major discoveries of various mineral deposits.

# Lac Surprise

Remarkable Gold Opportunities in the Highly Prospective Chibougamau Camp

Northern Superior discovered the Falcon Gold Zone Adjacent to Nelligan of IAMGOLD

# Lac Surprise

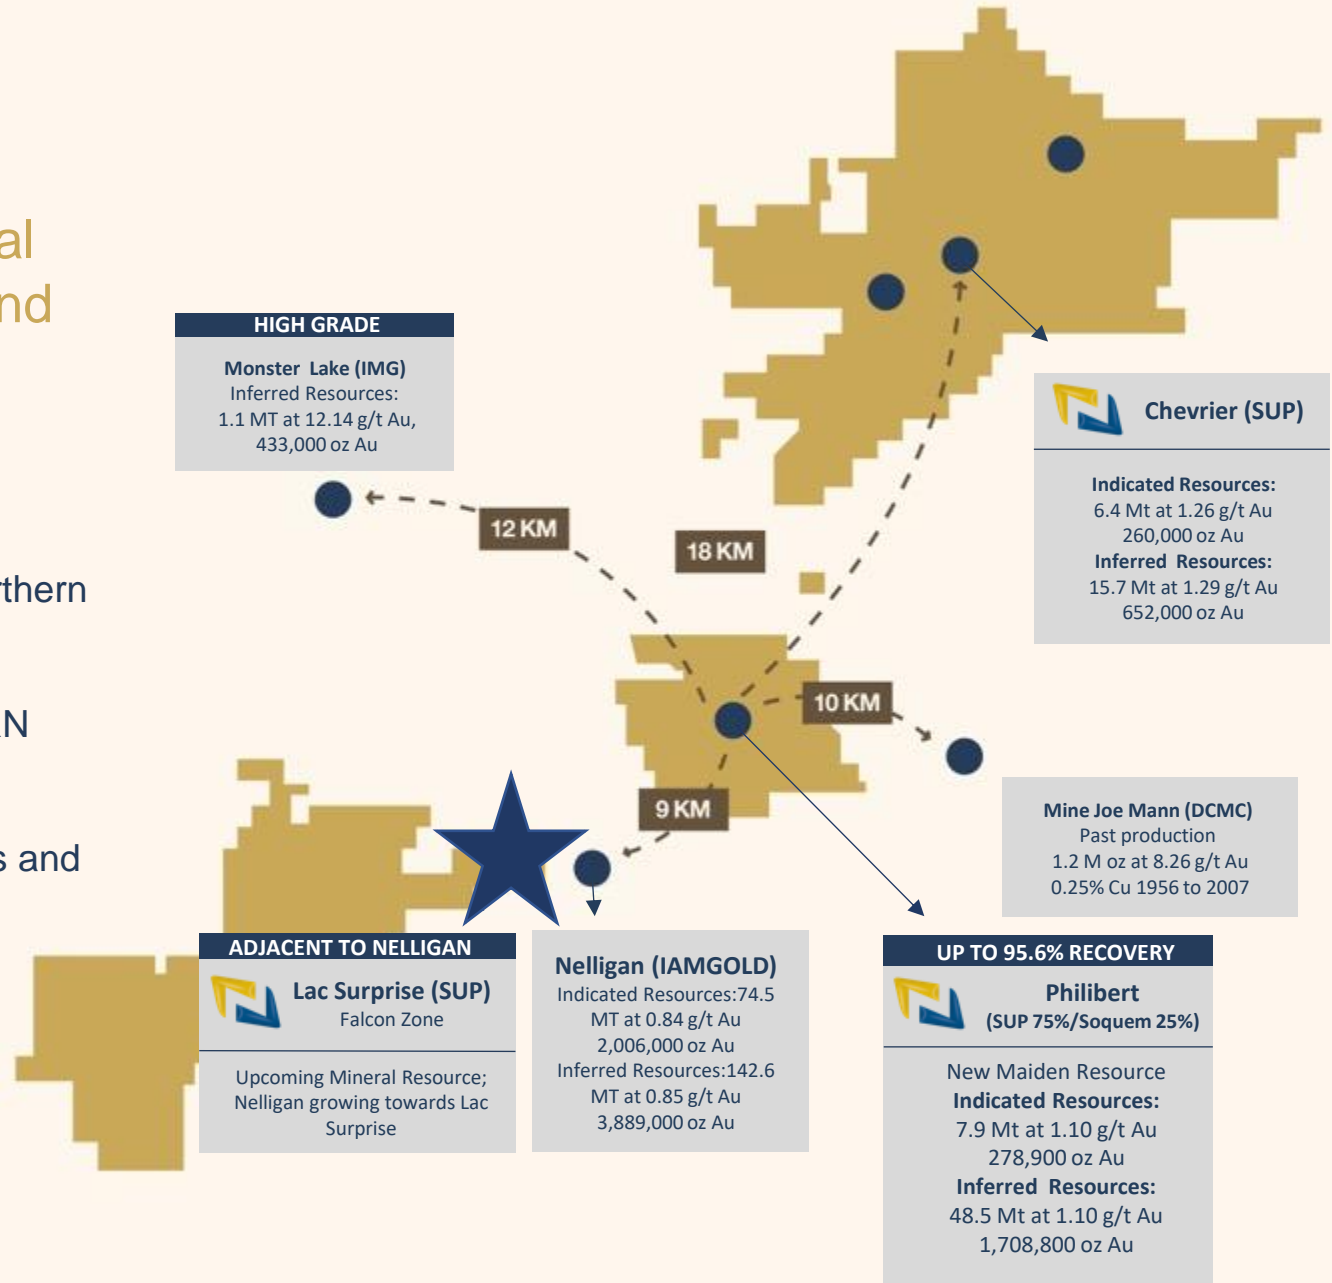

Large property covering key structural breaks in the Chibougamau Camp and adjacent to Nelligan

**2 km** from the NELLIGAN project of IAMGOLD

Large property totalling 152 km<sup>2</sup> 100% owned by Northern Superior and accessible year-round by road access

12 km from the PHILIBERT PROJECT of NORTHERN SUPERIOR

Large regional geochemical and geophysical surveys and datasets completed over property for future targeting

## Targeting, Fingerprinting Nelligan

Falcon Gold Zone located within in the Druillettes syncline an E-W regional D2 fold also hosting the Nelligan deposit.

Robust continuity defined **over 900 metres along strike and up to 300 metres depth**

Geophysical inversion work on Nelligan critical in the discovery of the Falcon Gold Zone. The magnetic signature and fault orientation are now being used to identity new targets on Northern Superior's properties in the Chibougamau camp.

## Project Highlights

January 2022: updated NI 43-101 resource of Main Zone  
 Total Indicated Resources: 6.4 Mt at 1.26 g/t Au for 260,000 oz Au; Inferred Resources: 15.7 Mt at 1.29 g/t Au for 652,000 oz Au

## Location & Property

~35 km to southwest of Chibougamau, project is accessible year-round by road access

## Key Deposits

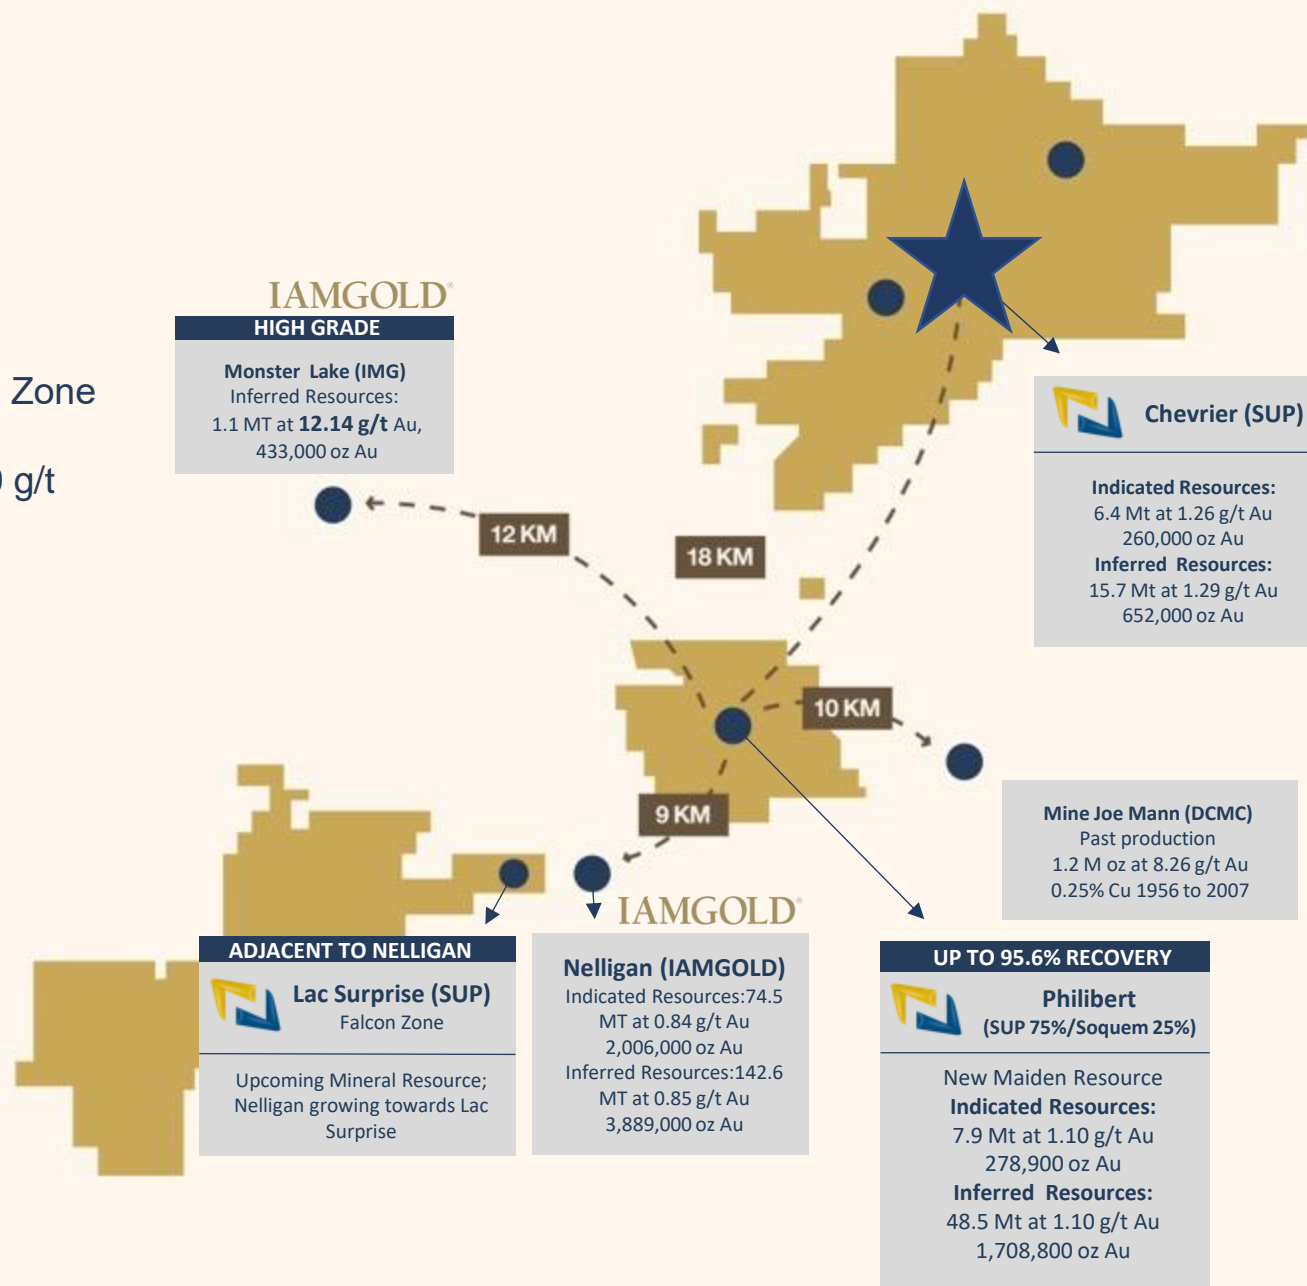

Property covers 15 km of the Fancamp

Deformation Zone host to **Monster Lake - IMG**

Main Zone: steeply-dipping high-grade quartz-ankerite + tourmaline veins over ~1.4 km x 200 m (included in current resource)

South Zone: adjacent to Main Zone, disseminated gold zones (up to 30 m thick), similar to Philibert style mineralization

East Zone: 6 shear zones over 750 m down-dip; exploration targets of gold in till anomalies

## 2022 Resource Update

- In January 2022, announced **a 77% increase in open pit resources and a 39% increase in total gold resources<sup>1</sup>**
- Main Zone comprised of 10 steeply dipping zones over 1,400 m by 200 m area
- Pit wall expanded, incorporating new & deeper zones
- Blue Sky potential with drill ready targets within and beyond the OP and UG resources

## Near Term Resource Growth

### Chevrier South Zone

- Immediately SW and along strike of the Main Zone
- 15 of 18 drillholes returned intercepts over 0.5 g/t Au
- Identified 6 parallel zones over 1,200 m strike
- Disseminated style of mineralization similar to Philibert

### Chevrier East Zone

- 34 drill holes (8,520 m) and 133 surface channel samples
- Defined six shear zones over a 750 m strike
- Strong gold in till anomalies untested

## Regional Targets Across This District Scale Property (290 km<sup>2</sup>)

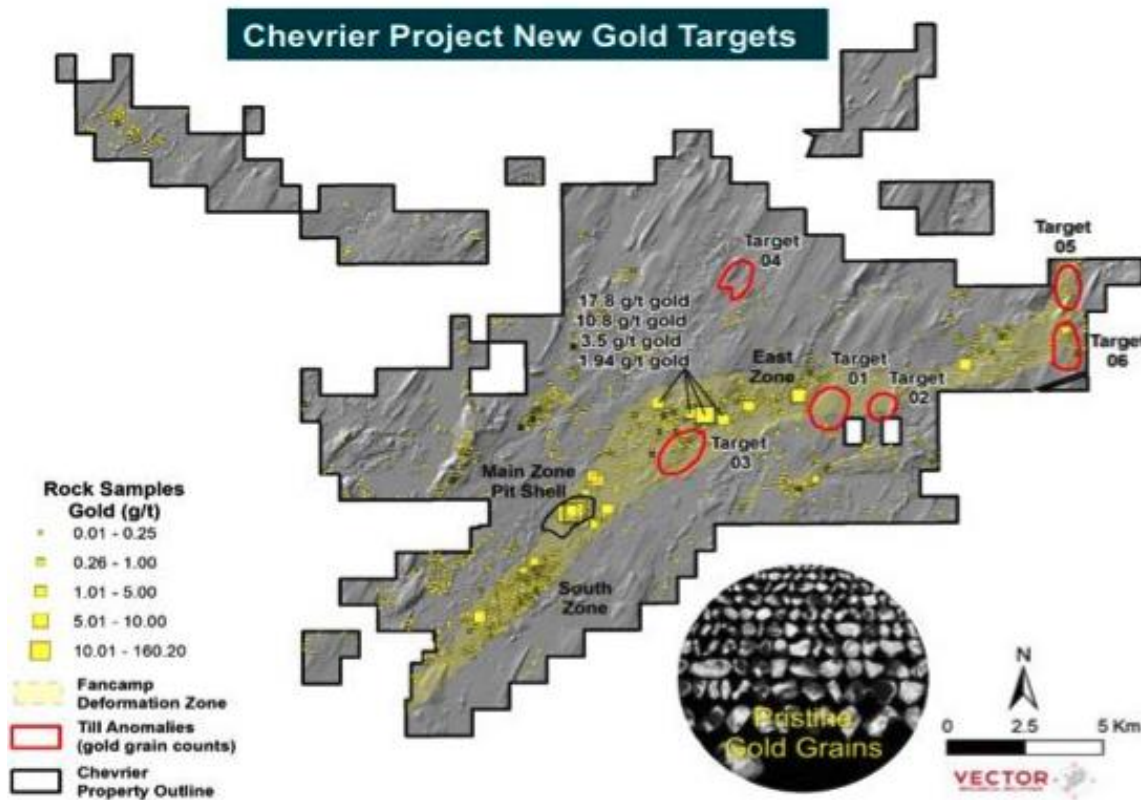

Property is host to parallel breaks with over 20 km of largely untested potential

Identified 23 gold targets, including 6 high priority targets

Targets identified through systematic programs carried out since 2019

Genesis has completed regional programs including mapping, property-scale gold-in-till surveying, soil sampling and IP surveying

Genesis completed an initial ~3,400 m drill program in 2021 testing priority 1 target areas, where anomalous gold mineralization was identified

## Central (~550m strike by 150m width)

Gold cut-off of 1.0 g/t Au, 11.6 million tonnes, grade 1.7 g/t Au; yielding 640,000 ounces of gold;

Additional unclassified component of 270,000 ounces of gold.

Resource based on 64 holes (20,643 m) with 50 m spacing:

CBSZ ~1.1 km long, open along strike, both directions;

Only one hole to 575 m (all others < 350 m), open at depth.

## Larger Gold Footprint outside of the Croteau-Bouchard Shear Zone (CBSZ)

**New gold discovery** associated with CRO22-120, broad low-grade interval of **1.06 g/t Au over 26.3m**, including higher grade intervals of 1.92 g/t Au over 11.0m and 4.98g/t Au over 3.0m

**New high gold discovery** associated with CRO22-150 with **10.94 g/t Au over 7.0m** and another board low grade intersection of 1.66 g/t Au over 21.55m.

Lithologies and geochemistry observed from both the core and RC drilling programs in addition to the distribution of anomalous values of gold grains expands our understanding of the robust potential size of the large gold-bearing system associated with the CBSZ.

The new gold zones are > 650m from the CBSZ resource.

## Blue Sky Regional Potential

However... There is a larger “gold” footprint to consider with evidence of more CBSZ’s on the Croteau Property

New work has identified mineralization on the Croteau North Shear Zone (previous slide) about 650 metres north from the CBSZ

# Helming the District Scale TPK Project in Ontario

Northwestern Ontario's Ti-pa-haa-kaa-ning ("TPK") property is the largest till anomaly in North America. For this reason, it literally has a legion of followers.

47,796  
HECTARES

This large property, covers the underexplored Stull-Wunnummin Fault Zone and spans 30 x 20km totaling 47,796 hectares, and is 100% owned by Northern Superior.

We have obtained drilling permits and have spun-off the asset to create ONGold Resources Ltd. to accelerate this remarkable opportunity.

### Comparable

- Malarctic - Val d'Or gold district on splays off major bend, Larder Lake-Cadillac Fault.

### Gold Grain-In-Till Dispersal Aprons/Corridors:

- Unique geological feature, largest in North-America
- Can only get this if there is significant gold exposed at the bedrock surface
- Most gold dispersal trains 200m x 3 km

# October

## Large property in the underexplored Southern Swayze Belt – Timmins Gold Camp

Large land package of 36\*48 km totaling 267 km<sup>2</sup>

Year-round access to the property. Located approximately 100 km southwest of Timmins, Ontario and 162km northwest of Sudbury, Ontario.

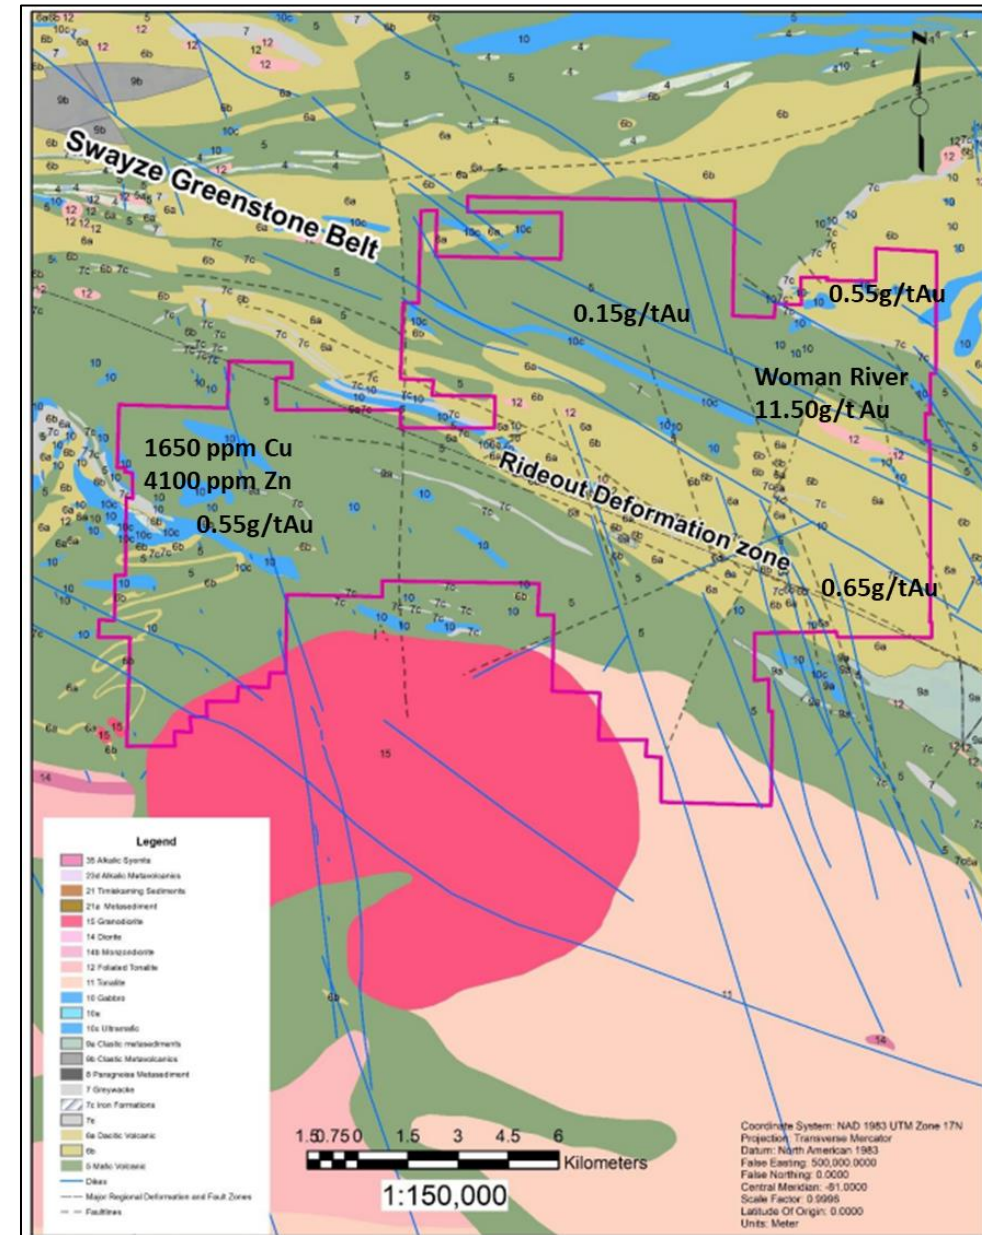

New access routes to the property from recently constructed logging roads opening access to areas previously requiring helicopter supported work.

Property is on trend of the **Borden Lake Mine - Newmont Gold currently in production** and **Cote Lake Mine - IAMGOLD currently in production**

Geologically the property is located in highly prospective Swayze Belt now estimated to have 15M + ounces of gold endowment.

Property strategically **covers > 10 km of the Rideout Deformation Zone** host of Cote Lake Gold deposit.

Historic work on the property identified a number of significant gold and base metal showings including the Women River Showing with grab samples returning > 16 g/t gold
