

MUX

Gold & Silver Production Plus a Huge Copper Option

Corporate Presentation
November 2024

Cautionary Statement

This presentation and the information included herein do not constitute an offer to buy or the solicitation of an offer to subscribe for or to buy any of the securities described herein, nor shall there be any sale of these securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction.

This presentation contains certain forward-looking statements and information, including "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 ("Forward-looking Statements"). The Forward-looking Statements are intended to be subject to the safe harbor provided by Section 27a of the Securities Act of 1933, Section 21e of the Securities Exchange Act of 1934 and Private Securities Litigation Reform Act of 1995. The Forward-looking Statements express, as at the date of this presentation, McEwen Mining Inc. (the "Company") estimates, forecasts, projections, expectations or beliefs as to future events and results. Forward-looking Statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by management, are inherently subject to significant business, economic and competitive uncertainties, risks and contingencies. There can be no assurance that such statements and information will prove to be accurate. Therefore, actual results and future events could differ materially from those anticipated in such statements and information. Risks and uncertainties that could cause results or future events to differ materially from current expectations expressed or implied by the Forward-looking Statements include, but are not limited to, factors associated with fluctuations in the market price of precious metals, mining industry risks, political, economic, social and security risks associated with foreign operations, the ability of the corporation to receive or receive in a timely manner permits or other approvals required in connection with operations, risks associated with the construction of mining operations and commencement of production and the projected costs thereof, risks related to litigation, the state of the capital markets, environmental risks and hazards, uncertainty as to calculation of mineral resources and reserves, risk of delisting from a public exchange, and other risks. Readers should not place undue reliance on Forward-looking Statements, which speak only as of the date hereof. The Company undertakes no obligation to reissue or update Forward-looking Statements as a result of new information or events after the date hereof, except as required by law. See McEwen Mining's Annual Report on Form 10-K/A for the fiscal year ended December 31, 2023, the Quarterly Report on Form 10-Q for the quarters ended March 31, 2024, and other filings with the Securities and Exchange Commission (the "SEC"), under the caption "Risk Factors", for additional information on risks, uncertainties and other factors relating to the Forward-looking Statements. All Forward-looking Statements made in this presentation are qualified by this cautionary statement. Unless otherwise stated, all currency information quoted in this presentation is in U.S. dollars.

The technical contents of this presentation, including reserves, have been reviewed and approved by William Shaver, COO; the exploration technical contents of this presentation including resource content have been reviewed and approved by Luke Willis, P. Geo., Director of Resource Modelling; all are Qualified Persons as defined by Canadian Securities Administrators National Instrument 43-101 "Standards of Disclosure for Mineral Projects".

Securities and Exchange Commission ("SEC"). We are subject to the reporting requirements of the Securities and Exchange Act of 1934, as amended (the "Exchange Act") and applicable Canadian securities laws, and as a result, we have reported our mineral reserves and mineral resources according to two different standards. U.S. reporting requirements are governed by Item 1300 of Regulation S-K ("S-K 1300"), as issued by the U.S. Securities and Exchange Commission ("SEC"). Canadian reporting requirements for disclosure of mineral properties are governed by National Instrument 43-101 Standards of Disclosure for Mineral Projects ("NI 43-101"), as adopted from the definitions provided by the Canadian Institute of Mining, Metallurgy and Petroleum. Both sets of reporting standards have similar goals in terms of conveying an appropriate level of confidence in the disclosures being reported, but the standards embody slightly different approaches and definitions. All disclosure of mineral resources and mineral reserves in this report are reported in accordance with S-K 1300.

Investors should be aware that the estimation of measured resources and indicated resources involve greater uncertainty as to their existence and economic feasibility than the estimation of proven and probable reserves, and therefore investors are cautioned not to assume that all or any part of measured or indicated resources will ever be converted into S-K 1300 compliant reserves. The estimation of inferred resources involves far greater uncertainty as to their existence and economic viability than the estimation of other categories of resources. It is generally assumed that the majority of Inferred resources will be later upgraded to the Indicated or Measured categories with further exploration. Investors are cautioned not to assume that all or any part of inferred resources exist, or that they can be mined legally or economically.

McEwen Copper: Key Strategic Global Partners

RioTinto

STELLANTIS

- ✓ World's 2nd largest mining company
- ✓ 17.2% ownership in McEwen Copper through Nuton US\$100 M total investment
- ✓ Extensive expertise throughout the mining value chain
- ✓ Active in Argentina & recent project development experience at Rincon
- ✓ Nuton's copper leaching technology could be a game-changer from economic and ESG standpoints

- ✓ World's 4th largest automaker
- ✓ 18.3% ownership in McEwen Copper from US\$275 M total investment
- ✓ Extensive operations in Argentina & across South America
- ✓ Focused on securing "green copper" offtake to be produced by Los Azules
- ✓ Expects McEwen Copper to deliver Net-Zero carbon copper by 2038

Rob McEwen

- ✓ 12.7% direct ownership of McEwen Copper (20% total interest in Los Azules)
- ✓ Seasoned mining professional with track record of creating value for shareholders
- ✓ Provided McEwen Copper's financings with US\$45 M
- ✓ Founder of Goldcorp, where he took the company's market cap from US\$50 M to over US\$8 Billion

Exploration Results Suggests Los Azules Could Get BIGGER

North of Los Azules

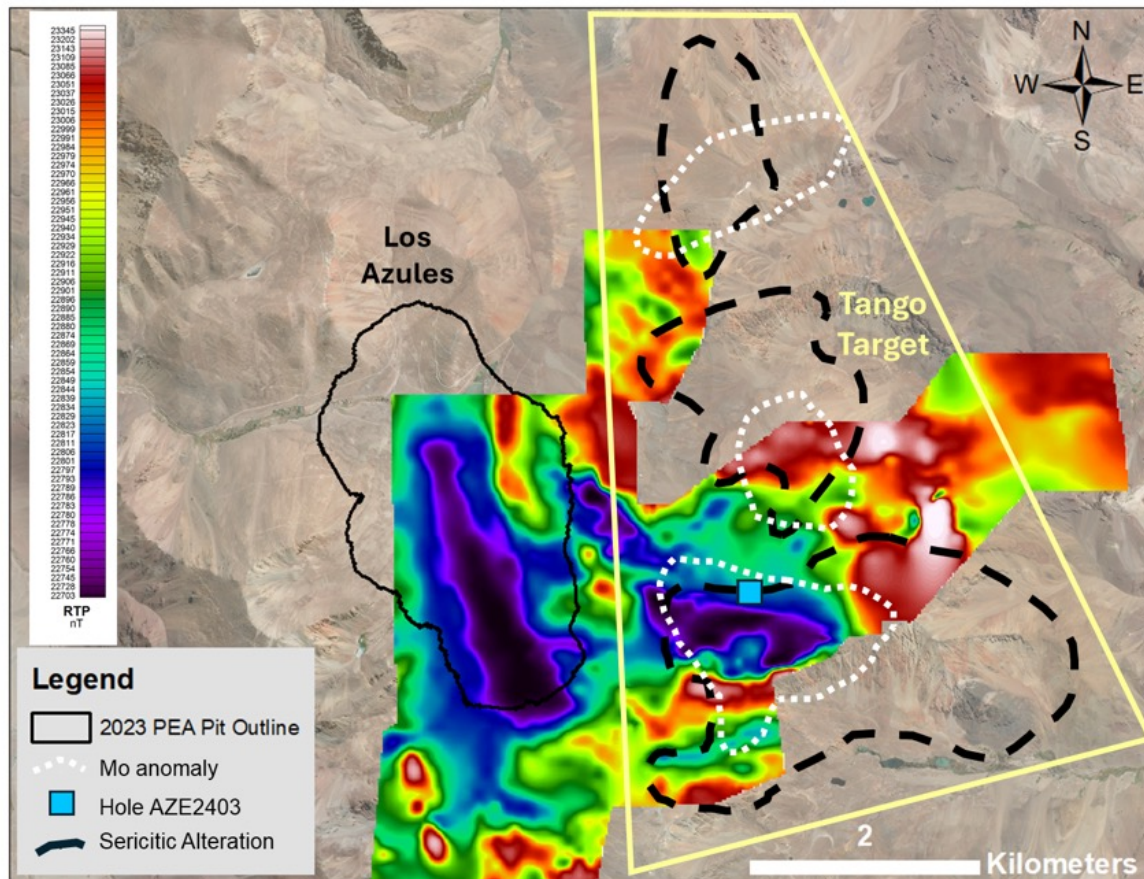

- AZ22174: 0.29% Cu / 1,052 m incl. 0.42% Cu / 480 m coincides with a prominent deep geophysical anomaly
- AZ23241: over 400 m North of AZ22174 encountered 202 m of 0.20% Cu with last 12 m grading 0.44% Cu

South of Los Azules

- Long intercepts of between 0.2% to 0.3% Cu occur in the southern exploration holes
- AZ24338 intercepted 0.31% Cu over 70 m

Do We Have a Second Los Azules 3 Kilometers to the East? Target Tango - Discovery of a New Porphyry Copper System

Five key elements of a large porphyry system have been identified at Tango:

1. Multiple Intrusives
2. Porphyry Copper Alteration
3. Porphyry Copper Veining
4. Porphyry Geochemical Signatures
5. Geophysical Signature

One drill hole was completed this season and intercepted **106 meters** of **0.11% Cu** at the end of the hole (blue square).

Events Improving the Value of McEwen Copper

- 1. July 8, 2024 - Large Foreign Investment Incentive Regime Approved –**
Increases Los Azules NPV very significantly
- 2. July 29, 2024 - The world's largest Miner, BHP, Is Comfortable**
US\$4.4 Billion copper deal BHP & Lundin Mining
Consolidating Filo del Sol & Josemaria Deposits
- 3. August 23, 2024 - United States Strengthening Relationship**
United States and Argentina signed a Memorandum of Understanding to
strengthen cooperation on critical minerals
- 4. Exploration Expanding Los Azules' Resources & New Discovery**

What Could Los Azules Be Worth?

July 29, 2024, BHP & Lundin Mining JV Josemaria & Filo Del Sol, Combined Value \$4.5 Billion

Los Azules: Same Province, Lower Altitude, Closer to Infrastructure, Larger Resource, Higher Grade, Lower C1 Cost

Encouraging Foreign Investment in Argentina Large Investment Incentive Regime (“RIGI”)

- Designed to attract foreign investment across multiple sectors in Argentina
- RIGI includes mining, which is a key pillar to the country’s plans for economic growth
- Key benefits:
 - ✓ Improved fiscal and financial benefits to mining companies developing large-scale projects in Argentina
 - ✓ Improved foreign exchange regime and ability to re-patriate capital
 - ✓ Stability on tax, customs and foreign exchange for a 30-year period

The RIGI fiscal and financial / tax benefits will result in a significant improvement to Los Azules’ overall economics (NPV and IRR).

Tax Benefits

- **Corporate tax rate** of 25% (currently 35%)
- **Accelerated** depreciation on equipment and infrastructure
- **Unlimited** loss carryforward
- **Unlimited** interest deductions in first 5 years
- **Tax on dividends** 3.5% after 7 years (currently 7%)
- **Foreign technical services** exempt from withholding tax

Foreign Exchange

- **Export proceeds** freely available abroad for big projects 100% 3 years after the start-up of the project¹ (currently 100% must be on-shored)
- **Financing proceeds** freely available with no restriction to access AR foreign exchange when funds available abroad (currently with limitations)
- **Foreign exchange market** freely accessible for repayment of loans, repatriation of investments, or payment of interest and dividends (currently in practice heavily restricted)

Other

- **Exports:** Freedom to export products, with exemption of duties after 3 years (currently 4.5%)
- **Imports:** Freedom to import, with no quotas or restrictions, and exemption of duties on imports of capital goods (currently 0%-21%)
- **Construction VAT:** Payable with tax credit certificate to be issued by the Government. Supplier can use or transfer (sell) the VAT credit to third parties

McEwen Copper Is Planning the World's 1st Regenerative Copper Mine in Argentina

Watch the video here:
<https://youtu.be/stHfWgQpftc>

Copper Heap Leach Mines Is Not New and Works at High Altitudes

Mine	Country	Operator	When	Max. Annual Cu Production* (Tonnes)	MASL
Quebrada Blanca (QB1)	Chile	Teck	1994-2023	87,000	4,400 m
Spence	Chile	BHP	2006-present	249,000	1,700 m
Lomas Bayas	Chile	Glencore	1998-present	72,700	1,200 m

Caserones	Chile	Lundin	2014-present	35,000	4,600 m
Los Bronces	Chile	Anglo	2002-present	43,000	3,500 m

Los Azules' Design vs. Comparably Sized Conventional Copper Mines

Low Cost/lb¹

Less Carbon²

Renewable Energy

Powered by 100% renewable energy sources.

Reduced Water Consumption

Using less than ¼ of the water consumed by a comparable conventional copper mine.

Processing

Heap leach producing green copper cathode. No transport to smelter significantly reduces associated carbon emissions.

No Tailings or Tailings Dam

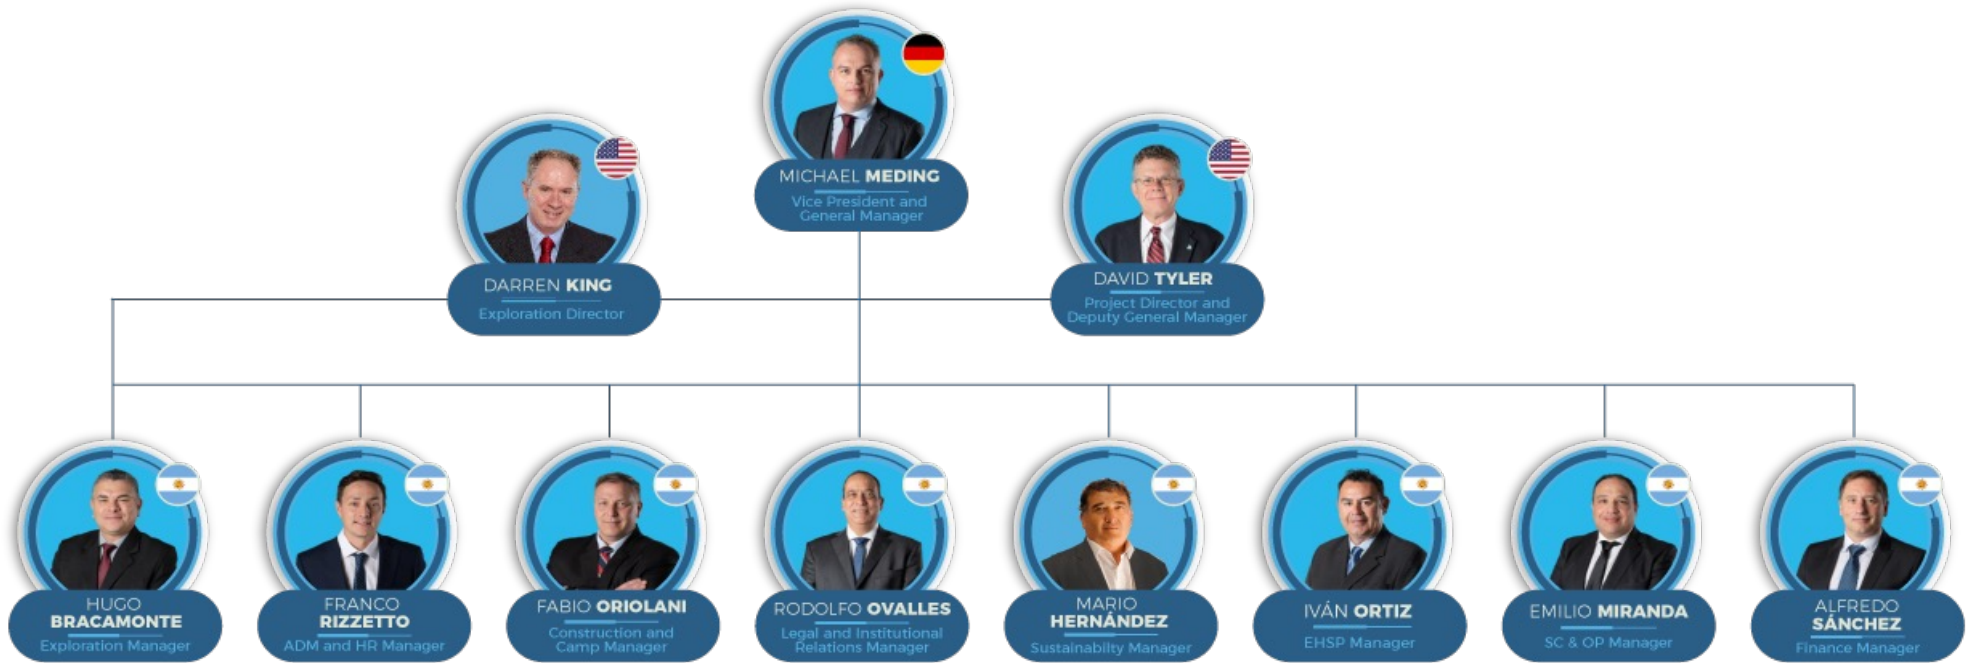

Use of heap leach technology eliminates the need for tailings and tailings dams, addressing key environmental and safety concerns.

Reduced to Zero Carbon

Ongoing efforts to reduce emissions, with a transition to carbon neutrality by 2038

McEwen Copper's Los Azules Management Team

Deep Experience Plus a Track Record of Success in the San Juan Province

Over 250 years combined experience at top tier mining projects & operations in San Juan, Argentina, with major mining companies such as:

Reasons to Consider Buying MUX & McEwen Copper!

- 2 Key Value Drivers: Precious Metals & Copper
- Gold & Silver Operations Rebounding
- Massive Copper Option – Pre-IPO
- Exploration Upside at All Sites

MUX: Cautionary Note Regarding

NON-GAAP Measures

In this presentation, we have provided information prepared or calculated according to U.S. GAAP, as well as provided some non-U.S. GAAP ("non-GAAP") performance measures. Because the non-GAAP performance measures do not have any standardized meaning prescribed by U.S. GAAP, they may not be comparable to similar measures presented by other companies.

Total Cash Costs per GEO, and All-in Sustaining Costs ("AISC") per GEO. Total cash costs consist of mining, processing, on-site general and administrative costs, community and permitting costs related to current explorations, royalty costs, refining and treatment charges (for both doré and concentrate products), sales costs, export taxes and operational stripping costs. All-in sustaining cash costs consist of total cash costs (as described above), plus environmental rehabilitation costs, amortization of the asset retirement costs related to operating sites, sustaining exploration and development costs, and sustaining capital expenditures. In order to arrive at our consolidated all-in sustaining costs, we also include corporate general and administrative expenses. Depreciation is excluded from both total cash costs and all-in sustaining cash costs. For both total cash costs and all-in sustaining costs we include our attributable share of total cash costs from operations where we hold less than a 100% economic share in the production, such as MSC, where we hold a 49% interest. Total cash cost and all-in sustaining cash cost per GEO sold are calculated on a co-product basis by dividing the respective proportionate share of the total cash costs and all-in sustaining cash costs for the period attributable to each metal by the ounces of each respective metal sold. We use and report these measures to provide additional information regarding operational efficiencies both on a consolidated and an individual mine basis, and believe that these measures provide investors and analysts with useful information about our underlying costs of operations. A reconciliation to the nearest U.S. GAAP measure is provided in McEwen Mining's Annual Report on Form 10-K/A for the year ended December 31, 2023.

Earnings from Mining Operations

The term Earnings from Mining Operations used in this presentation is a non-GAAP financial measure. We use and report this measure because we believe it provides investors and analysts with a useful measure of the underlying earnings from our mining operations. We define Earnings from Mining Operations as Gold and Silver Revenues from our El Gallo Mine, Black Fox Mine, and our 49% attributable share of the San José Mine's Net Sales, less their respective Production Costs Applicable to Sales. To the extent that Production Costs Applicable to Sales may include depreciation and amortization expense related to the fair value increments on historical business acquisitions (fair value paid in excess of the carrying value of the underlying assets and liabilities assumed on the date of acquisition), we deduct this expense in order to arrive at Production Costs Applicable to Sales that only include depreciation and amortization expense incurred at the mine-site level. The San José Mine Net Sales and Production Costs Applicable to Sales are presented, on a 100% basis, in Note 5 of McEwen Mining's Annual Report on Form 10-K/A for the year ended December 31, 2023.

Cash, Investments and Precious Metals

The term cash, investments and precious metals used in this presentation is a non-GAAP financial measure. We report this measure to better understand our liquidity in each reporting period. Cash, investments and precious metals is calculated as the sum of cash, investments and ounces of doré held in inventory, valued at the London P.M. Fix spot price at the corresponding period. A reconciliation to the most directly comparable U.S. GAAP measure, Sales of Gold and Silver, is provided in McEwen Mining's Annual Report on Form 10-K/A for the year ended December 31, 2023.

Thank you!
