METALS

BUILDING EUROPE'S NEXT GOLD CAMP

November 2024

Cautionary Statement

This management presentation (the “presentation”) is not a prospectus, offering memorandum or an advertisement and was prepared as a summary overview only of the current affairs of First Nordic Metals Corp. (“First Nordic Metals”). This presentation, and the information contained herein, is not for release, distribution or publication into or in the United States or any other jurisdiction where applicable laws prohibit its release, distribution or publication.

CONFIDENTIALITY

This presentation is confidential, and the contents are not to be reproduced or distributed to the public or the press. Securities legislation in all provinces and territories prohibits such unauthorized distribution of information. Each recipient of the information contained in this presentation will treat such information in a confidential manner and will not, directly or indirectly, disclose or permit its affiliates or representatives to disclose such information to any other person or reproduce this presentation in whole or in part, without the prior written consent by First Nordic Metals.

TECHNICAL REPORTS

This presentation includes disclosure of scientific and technical information concerning the First Nordic Metals mineral projects from technical reports (“technical reports”) prepared in accordance with Canadian NI 43-101 - standards of disclosure for mineral projects (“NI 43-101”), which is available on SEDAR at www.SEDAR.Com under each of Barsele Mineral Corp.’s and Gold Line Resources Ltd.’s corporate profiles. Investors are cautioned to review the following technical reports:

For further information regarding the Barsele project, reference should be made to the following NI 43-101 technical report titled “NI 43- 101 technical report and mineral resource estimate for the Barsele Property” with an effective date of February 21, 2019 prepared by Carl Pelletier, P.Geo., Harold Brisson, P.Eng., Stéphane Faure, P. Geo., and Vincent Nadeau-Benoit, P. Geo. of Innovexplo Inc. Val-d’or. (Québec).

For further information regarding the Kylmäkangas project, reference should be made to the following NI 43-101 technical report titled “NI 43-101 technical report and mineral resource estimate for the Kylmäkangas Gold Project” with an effective date of July 25, 2022 prepared by Eemeli Rantala, P.Geo., and Ove Klavér, Eur. Geo. of AFRY Norway AS.

For further information regarding the Långtjärn Project, reference should be made to the following NI 43-101 technical report titled “NI 43- 101 technical report and mineral resource estimate for the Långtjärn property” with an effective date of June 30, 2020 prepared by Amanda Scott, MSc. Geology of Scott Geological and Thomas Lindholm, Msc. Fausimm of Geovista.

CAUTIONARY NOTE

Certain statements in this presentation are “forward-looking statements”, including within the meaning of applicable laws. All statements other than statements of historical fact included in this presentation, including, statements regarding the effect of the Proposed Transaction on First Nordic Metals’ resources, gold grades, metallurgies, and future plans and objectives of First Nordic Metals are forward-looking statements based on forecasts of future operational or financial results, estimates of amounts not yet determinable and assumptions of management that involve various risks and uncertainties. Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, using words or phrases such as “expects” or “does not expect”, “is expected”, “anticipates” or “does not anticipate”, “plans”, “estimates” or “intends”, or stating that certain actions, events or results “may”, “could”, “would”, “might”, or “will” be taken, occur or be achieved) are not statements of historical fact and may be “forward-looking statements.” First Nordic Metals cautions that forward-looking information involves known and unknown risks, uncertainties and other factors that may cause actual results, performance or achievements to be materially different from those expressed or implied by such information, including, but not limited to, failure to obtain the necessary regulatory and other approvals; gold and silver price volatility; fluctuations in foreign exchange rates and interest rates; the impact of any hedging activities; discrepancies between actual and estimated production, between actual and estimated reserves and resources or between actual and estimated metallurgical recoveries; capital expenditure requirements; and the success of exploration and permitting activities. Although First Nordic Metals has attempted to identify important factors that could cause actual results, performance or achievements to differ materially from those contained in forward- looking information, there can be other factors that cause results, performance or achievements not to be as anticipated, estimated or intended. There can be no assurance that such information will prove to be accurate or that management’s expectations or estimates of future developments, circumstances or results will materialize. Accordingly, readers should not place undue reliance on forward-looking information.

Market data and other statistical information used throughout this Presentation are based on internal company research, independent industry publications, government publications, reports by market research firms or their published independent sources. Industry publications, governmental publications, market research surveys and forecasts generally state that the information contained therein has been obtained from sources believed to be reliable. Although First Nordic Metals believes such information is accurate and reliable, it has not independently verified any of the data from third party sources cited or used for our management’s industry estimates, nor has First Nordic Metals ascertained the underlying economic assumptions relied upon therein. While First Nordic Metals believes internal company estimates are reliable, such estimates have not been verified by any independent sources, and First Nordic Metals makes no representations as to the accuracy of such estimates.

THE NORDIC ADVANTAGE

Region is the leading producer of metals in Europe – Sweden #1, Finland #2

History of mining

Security of tenure

Taxation incentives - No mineral tax, 20.6% corporate tax rate

Low political risk - Mature, well-defined environmental & permitting procedures in a mining friendly country

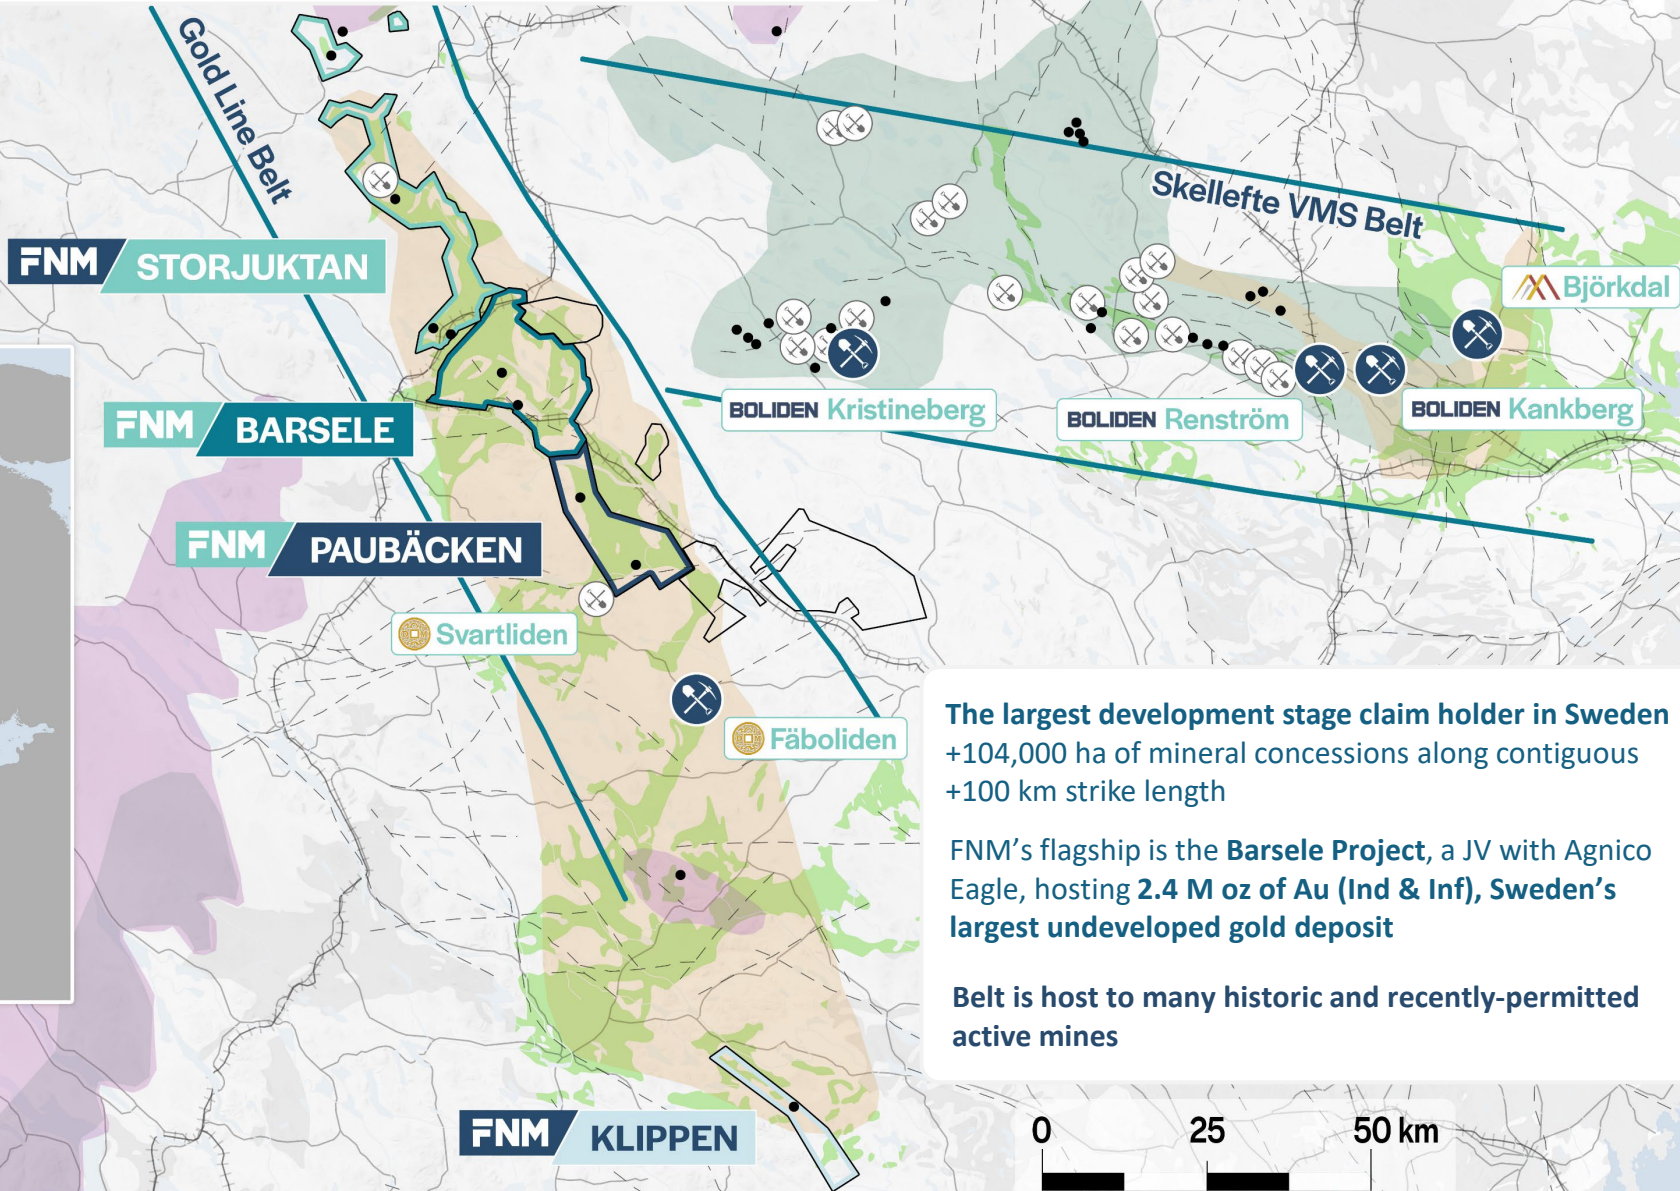

Ranked by Fraser Institute as mining's "Top Jurisdictions to do Business" in 2024

FNM GOLD LINE BELT

FNM OIJÄRVI BELT

THE GOLD LINE BELT

The largest development stage claim holder in Sweden
 +104,000 ha of mineral concessions along contiguous
 +100 km strike length

FNM's flagship is the **Barsele Project**, a JV with Agnico Eagle, hosting **2.4 M oz of Au (Ind & Inf)**, Sweden's largest undeveloped gold deposit

Belt is host to many historic and recently-permitted active mines

- FNM Licenses
 - Greenstone
 - Active Mine
 - Historical Mine
 - Known Deposit
- Metallogenic Area**
- Precious metals
 - Base metals
 - Energy metals

Gold Line Belt

Sweden

Belt contains gold-rich intrusive-hosted and VMS deposits, and the geology and mineralization is like the prolific greenstone belts of northern Ontario and Quebec.

- Known Deposit
- Greenstone
- FNM Licenses

Abitibi Belt

Canada

Total Production: >200M Oz Au

- Producing Mine
- Development Project
- Greenstone

Barsele Project

Favorable deposit characteristics & significant upside potential

	Mineral Resource Estimate (2019)						
	Cut-off	Indicated			Inferred		
		Tonnage	Grade	Au	Tonnage	Grade	Au
	g/t	kt	g/t	koz	Kt	g/t	koz
Open Pit	0.5	3,452	1.32	147	1,819	1.59	93
UG – Bulk	1.5	1,442	2.53	117	8,759	2.58	728
UG –Bulk-Selective	1.8	684	2.75	60	14,917	2.64	1,265
TOTAL				324			2,086

Resource grades rank well vs. other bulk underground mines / projects

UG Mine/Project	Operator	Location	Resource Grade
Bjorkdal	Mandalay	Sweden	1.70 g/t Au
Ikkari	Rupert	Finland	2.15 g/t Au
Kittila (refrac.)	Agnico	Finland	2.93 g/t Au
Young-Davidson	Alamos	Ontario	2.31 g/t Au
Laronde	Agnico	Quebec	2.87 g/t AuEq
Goldex	Agnico	Quebec	1.64 g/t AuEq
Malartic UG	Agnico	Quebec	1.88 g/t Au
Detour UG	Agnico	Ontario	2.23 g/t Au

Favourable Geometry / Dimensions

Mineralized ore lodes range from 10 m to > 100 m wide, strike of 3.5 km; multiple parallel zones of varying thickness on same levels = huge cost savings

Simple Metallurgy

Free-milling sulphide ore – met testing from all three zones yielded recoveries of 93-96%, of which 45-50% could be recovered via conventional gravity circuit

Obvious Resource Upside at Depth

Average resource depth is 550 m but drilling has intersected strong grades down to 925 m depth and remains open in all directions

Geophysical results infer a continuity of granodiorite host rock to at least 2.0 km depth

Additional Potential Upside along Strike

Current resource covers 3.6 km of strike along a potential 8.0 km mineralized trend

Grade Upside

Discovery of high-grade bonanza veins at Avan zone and subsequent remodeling would improve vs. 2019 resource

Regional targets

Targets Risberget, Norra, and Bastutrask already host current internal resources

2024 Gold Mine Opex in Northern Sweden

Bulk underground mining costs & low processing set the region apart

- Mandalay Resources' Bjorkdal Mine is located ~225 km E of Barsele
- Operating since the 1980s
- Has had record cashflow generation through 2024
- Current electricity costs in Västerbotten are ~3.5c/kWh (hydro), among lowest globally

	Björkdal
	Västerbotten, SWE
<u>Operating details</u>	
UG Mining Method	longhole
Average UG gold grade	1.6 g/t
UG Mining Cost	\$25.43
Processing Method	mill-flot-concentrate-smelt
Gold Recovery	85-88%
Processing & Refining Cost	\$10.18
G&A Cost	\$8.77
Total Processing & G&A Cost	\$18.95
<u>Q2 2024</u>	
<i>(all in \$US)</i>	
Gold Production	12,553 oz
Cash Costs / oz	\$1,216/oz
All-in Sustaining costs /oz	\$1,553/oz

Greenstone Belts

Depth potential

Abitibi Belt Canada

Gold Line Belt Sweden

Target 1 - Paubäcken | Aida

+4km Target, Barsele look-alike, diamond drill-ready

- Target structure is blind to surface under 10-20 m of glacial till; BoT (base-of-till) drilling is proven technique for testing bedrock anomalism under glacial till cover
- Base-of-till (BoT) drilling confirmed shallow gold mineralization across 1.5 km strike; at least 2.5 km identified corridor still open to N and S, still to be tested
- 2024 results include 2.05 g/t Au and 5.01 g/t Au - highest BoT result here to date
- 6 core holes (1,100 m) drilled in Phase 0 with significant success / discovery
- NEXT:**
 - 4Q24 BoT drilling remaining corridor
 - 1Q25 Phase 1 core drilling planned for (10,000 m)

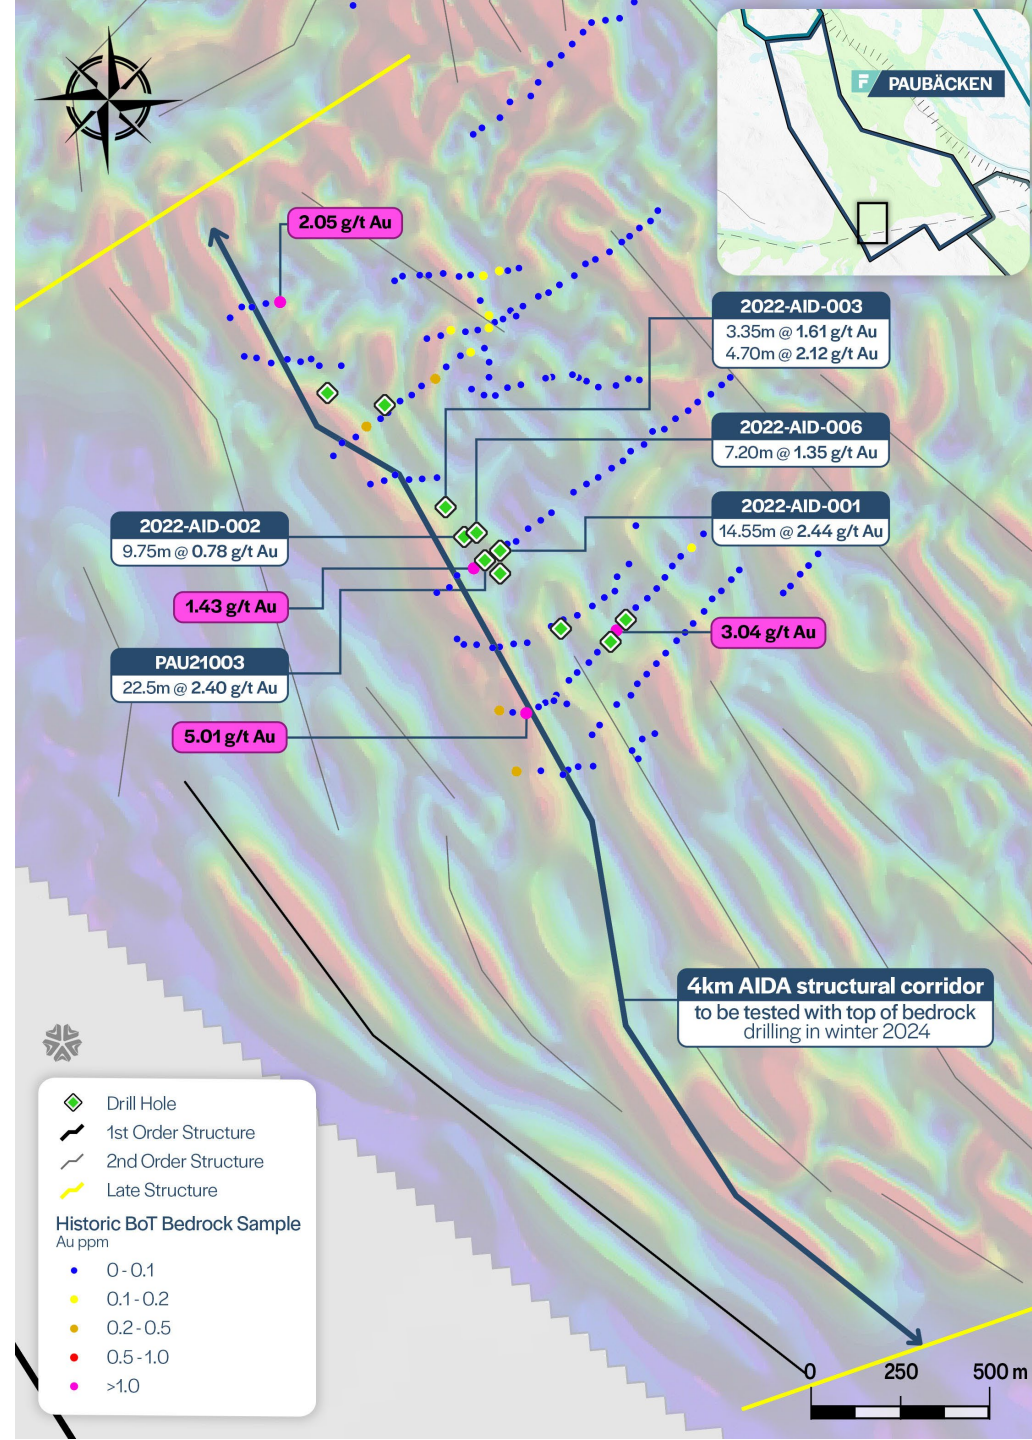

Aida Diamond Drilling Highlights (only 6 holes drilled):

**22.5 m @
2.40 g/t Au**
from 45 m

**4.70 m @
2.12 g/t Au**
from 79m

**14.55 m @
2.44 g/t Au**
from 142 m

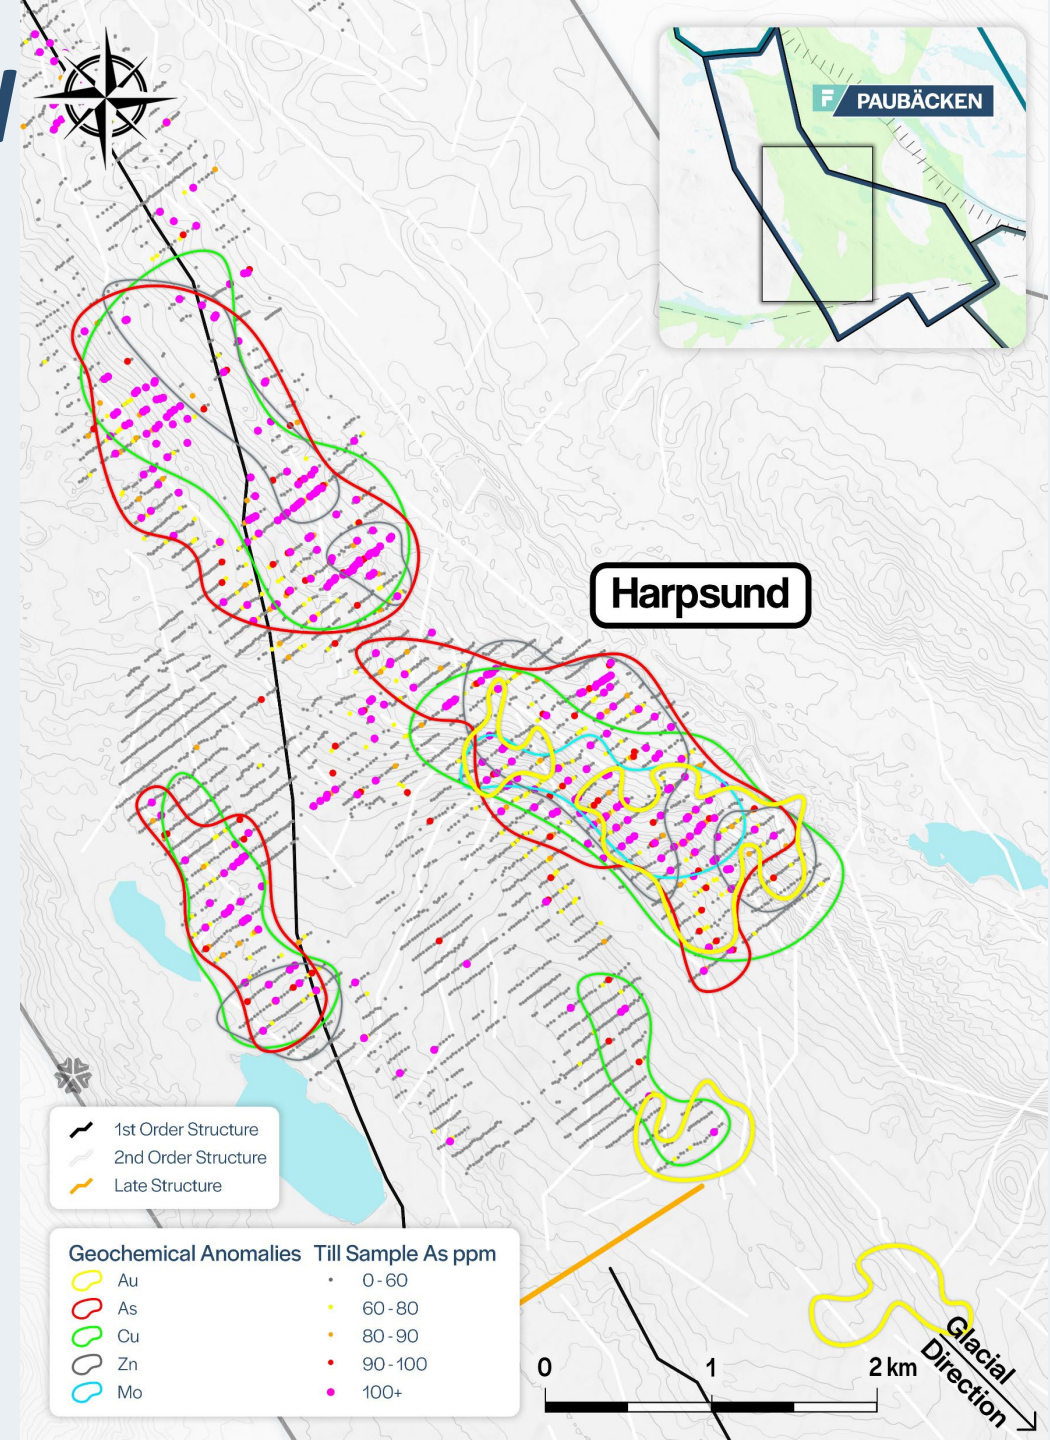

**7.20 m @
1.35 g/t Au**
from 105 m

Target 2 - Paubäcken | Harpsund

5.5 km geochem anomaly, ready for BoT drilling

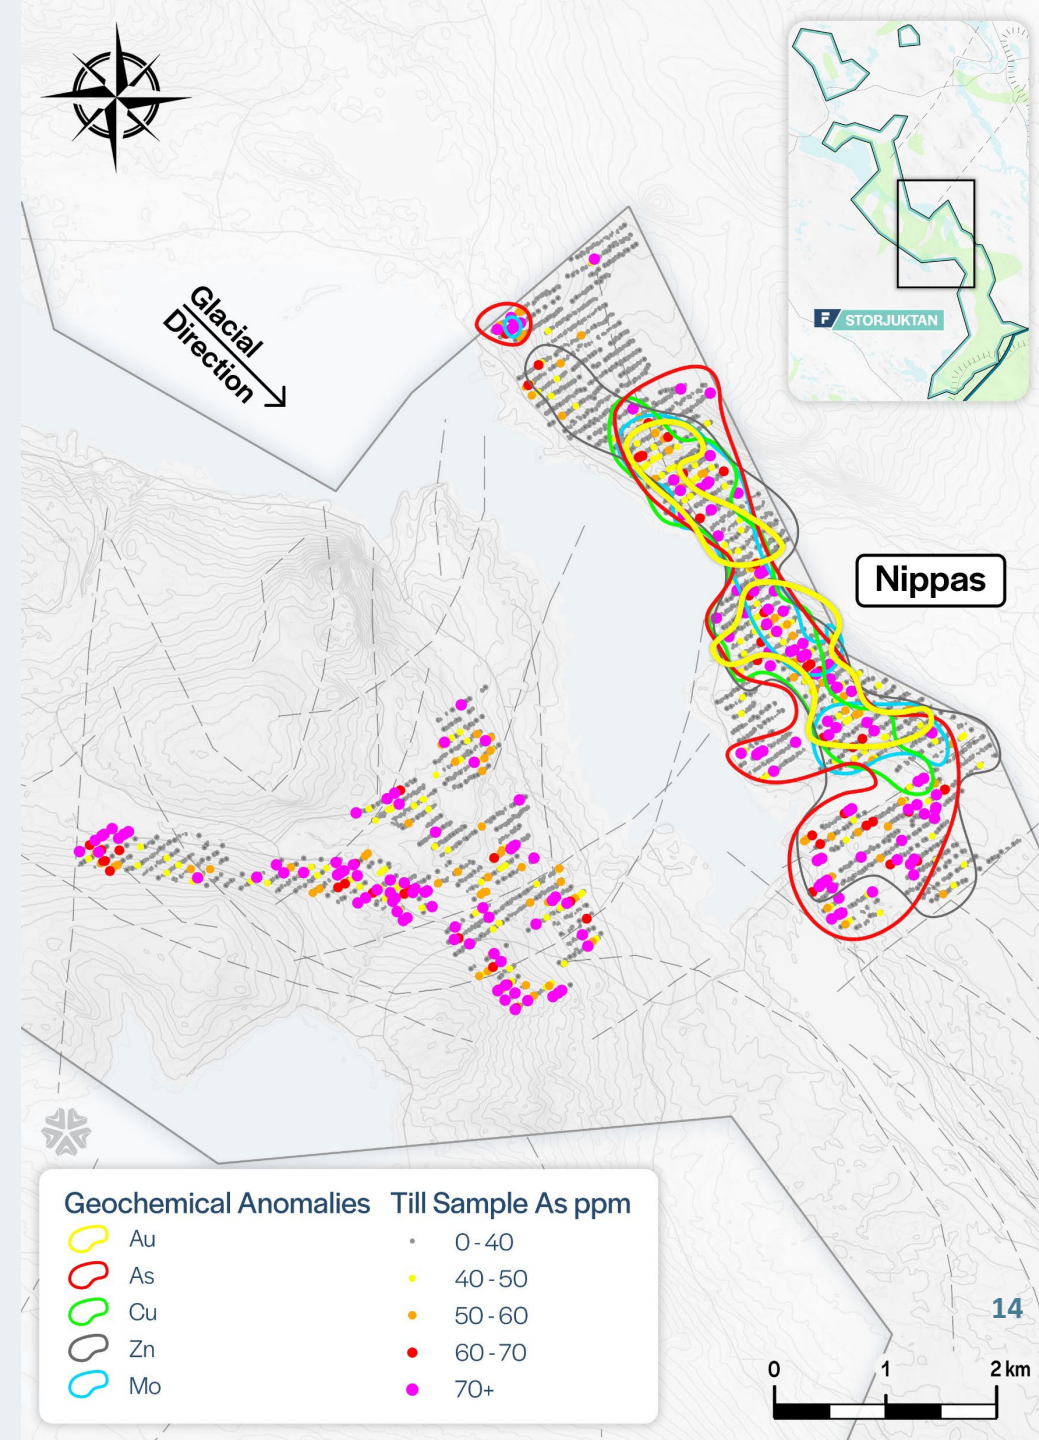

- B-horizon glacial till sampling has been completed on northern 2/3 of Paubäcken area (6,718 samples over 2022-24)
- Surface till sampling identified the Harpsund corridor, a 5.5 km As-Cu-Mo-Zn pathfinder anomaly coincident with historic ionic leach Au anomaly
- Anomalies are oriented in down-ice direction and coincident with favourable geology and prominent 2nd order structural corridor
- NEXT STEPS:
 - 4Q24 BoT drilling of corridor (~300 holes)
 - 1H25 diamond drilling

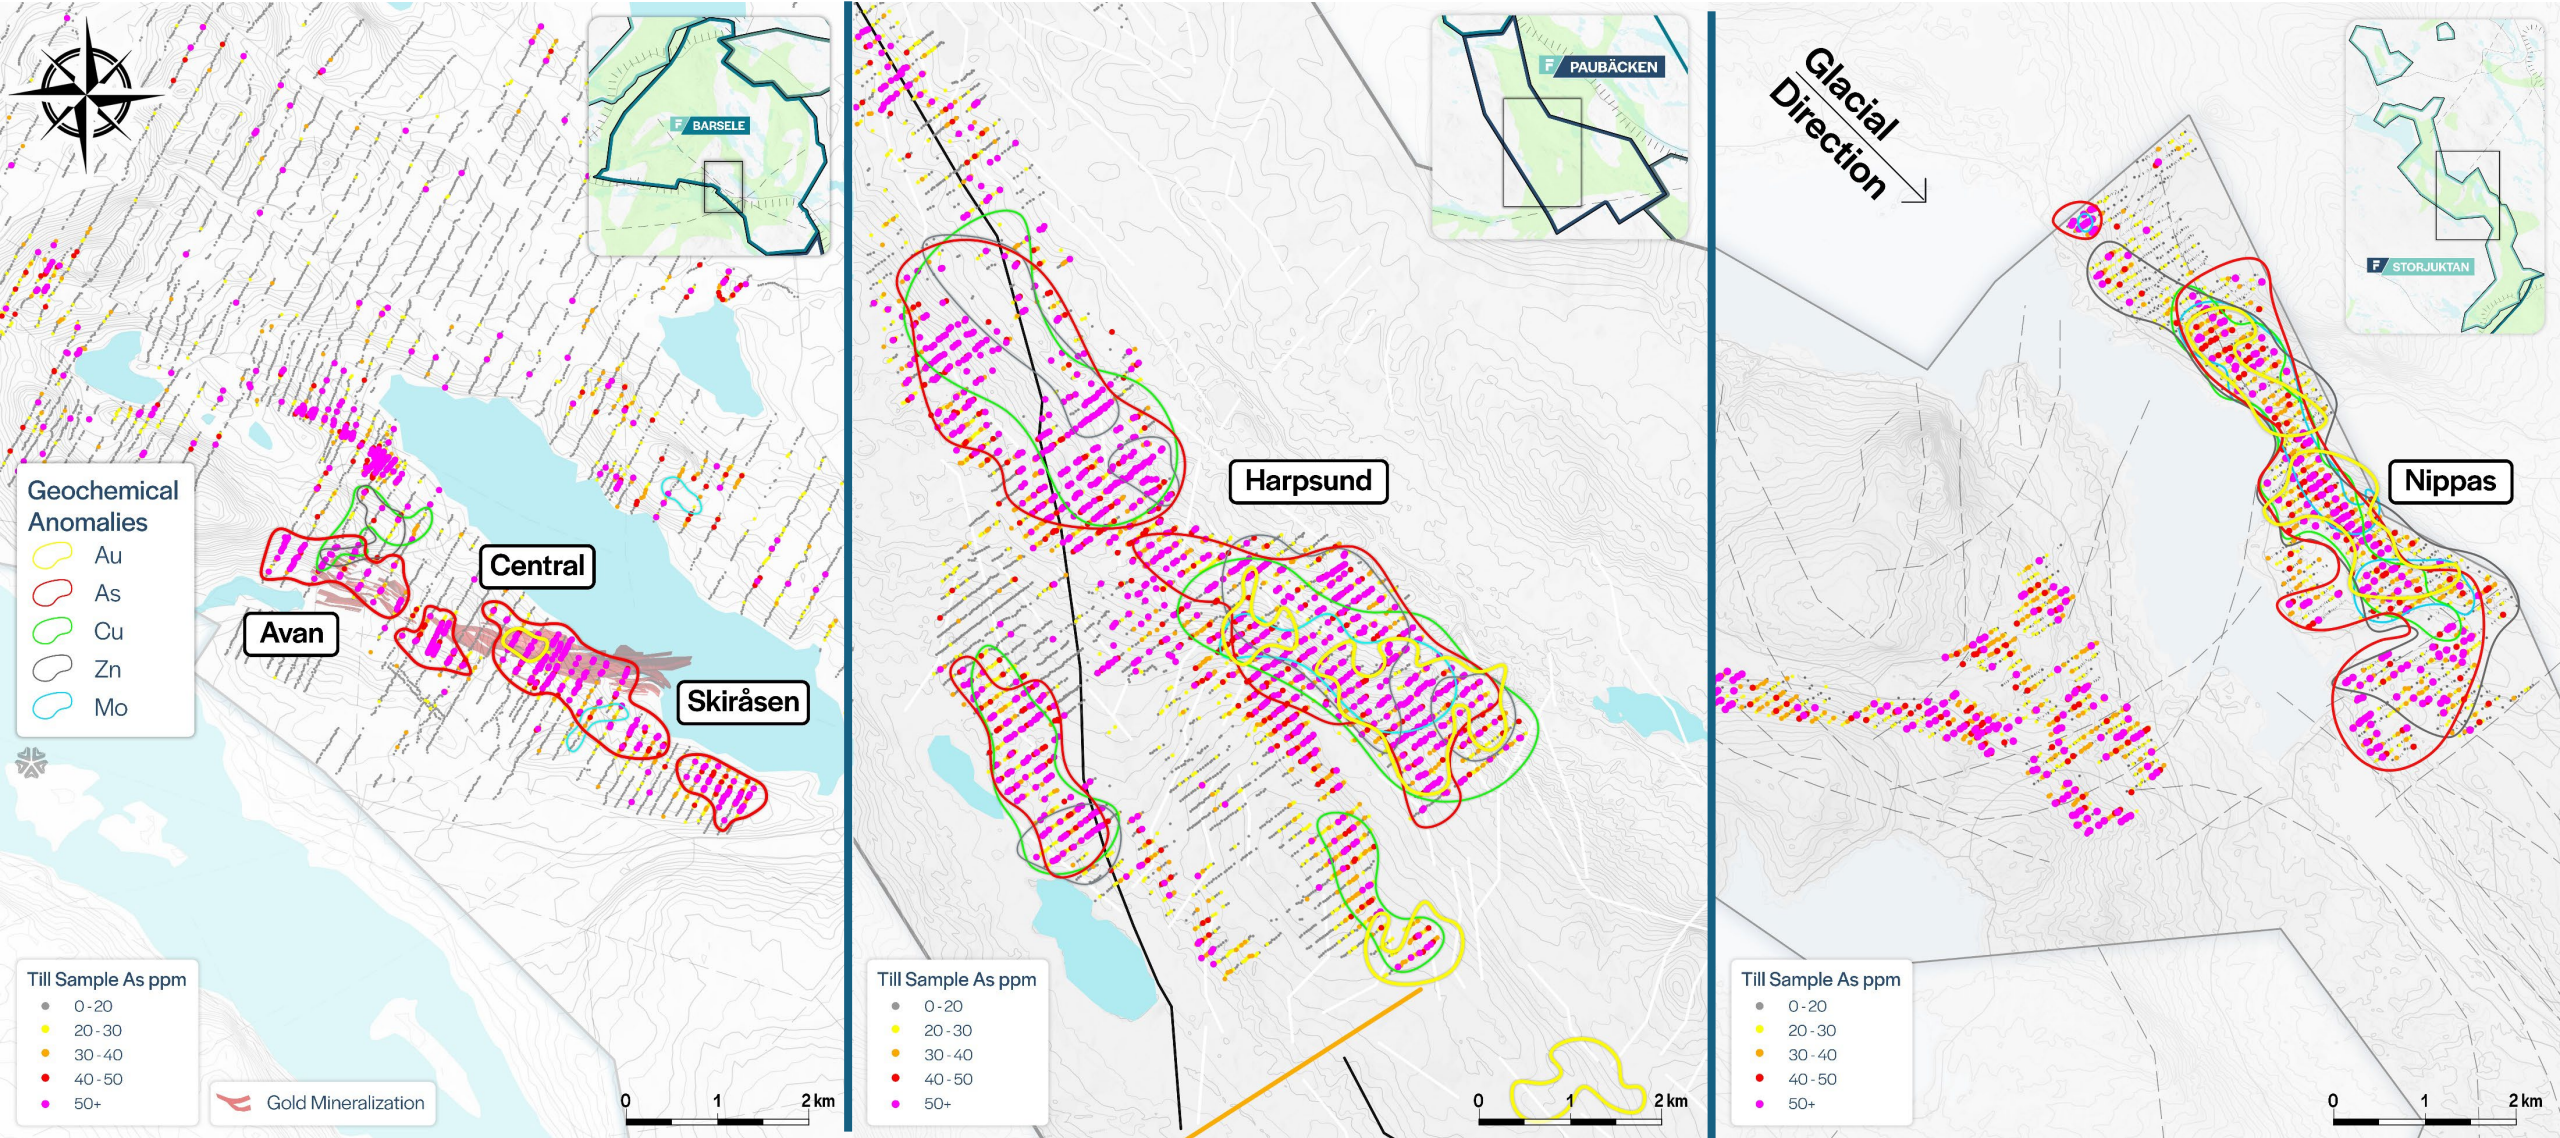

Target 3 - Storjuktan | *Nippas*

5 km geochem anomaly, ready for BoT Drilling

- 4,357 B-horizon glacial till samples collected over the Nippas Target area in the central portion of the Storjuktan Project
- Surface till sampling identified a large 5.0 km by 1.0 km As-Cu-Mo-Zn pathfinder anomalies coincident with historic ionic leach Au anomaly
- Anomalies are oriented in the down ice direction and are coincident with favorable geology and a prominent second order structural corridor
- **NEXT STEPS:**
 - 4Q24 - high resolution airborne UAV magnetic survey over entire project area (5,700 line-km)
 - 4Q24 – BoT drilling on Nippas target
 - 1H25 – diamond drilling on Nippas target
 - 1H25 – till sampling over entire greenstone belt area of project

Geochemistry | Target 2 & 3 vs. Barsele

Target 4 - Klippen

5 km Gold-in-Soil Anomaly, currently BoT Drilling

- Historic work by other operators: till sampling, Base-of-till (BoT) drilling & few diamond drillholes ~20 holes.
- Historic work interpreted to not have tested main source of anomaly
- Historic DD focused on NW extent of >5 km anomaly and encountered all criteria for large hydrothermal system:
 - Wide deformation zone
 - Broad zones of intense sericite and carbonate alteration
 - Kinematic granodiorites
 - Au associated Pre- to syn- ed with quartz carbonate veins
 - Individual assays up to 31.4 g/t Au
- Historic drilling interpreted to be distal to the main source of Au anomaly
- Most recently FNM completed 2,600 Regional MEFFA till samples along structural corridor
- **NEXT STEPS:** new target area along structural corridor identified for follow up, **currently being BoT-drilled**

Oijärvi Project

Limited exploration historically has been completed beyond the Kylmäkangas resource footprint

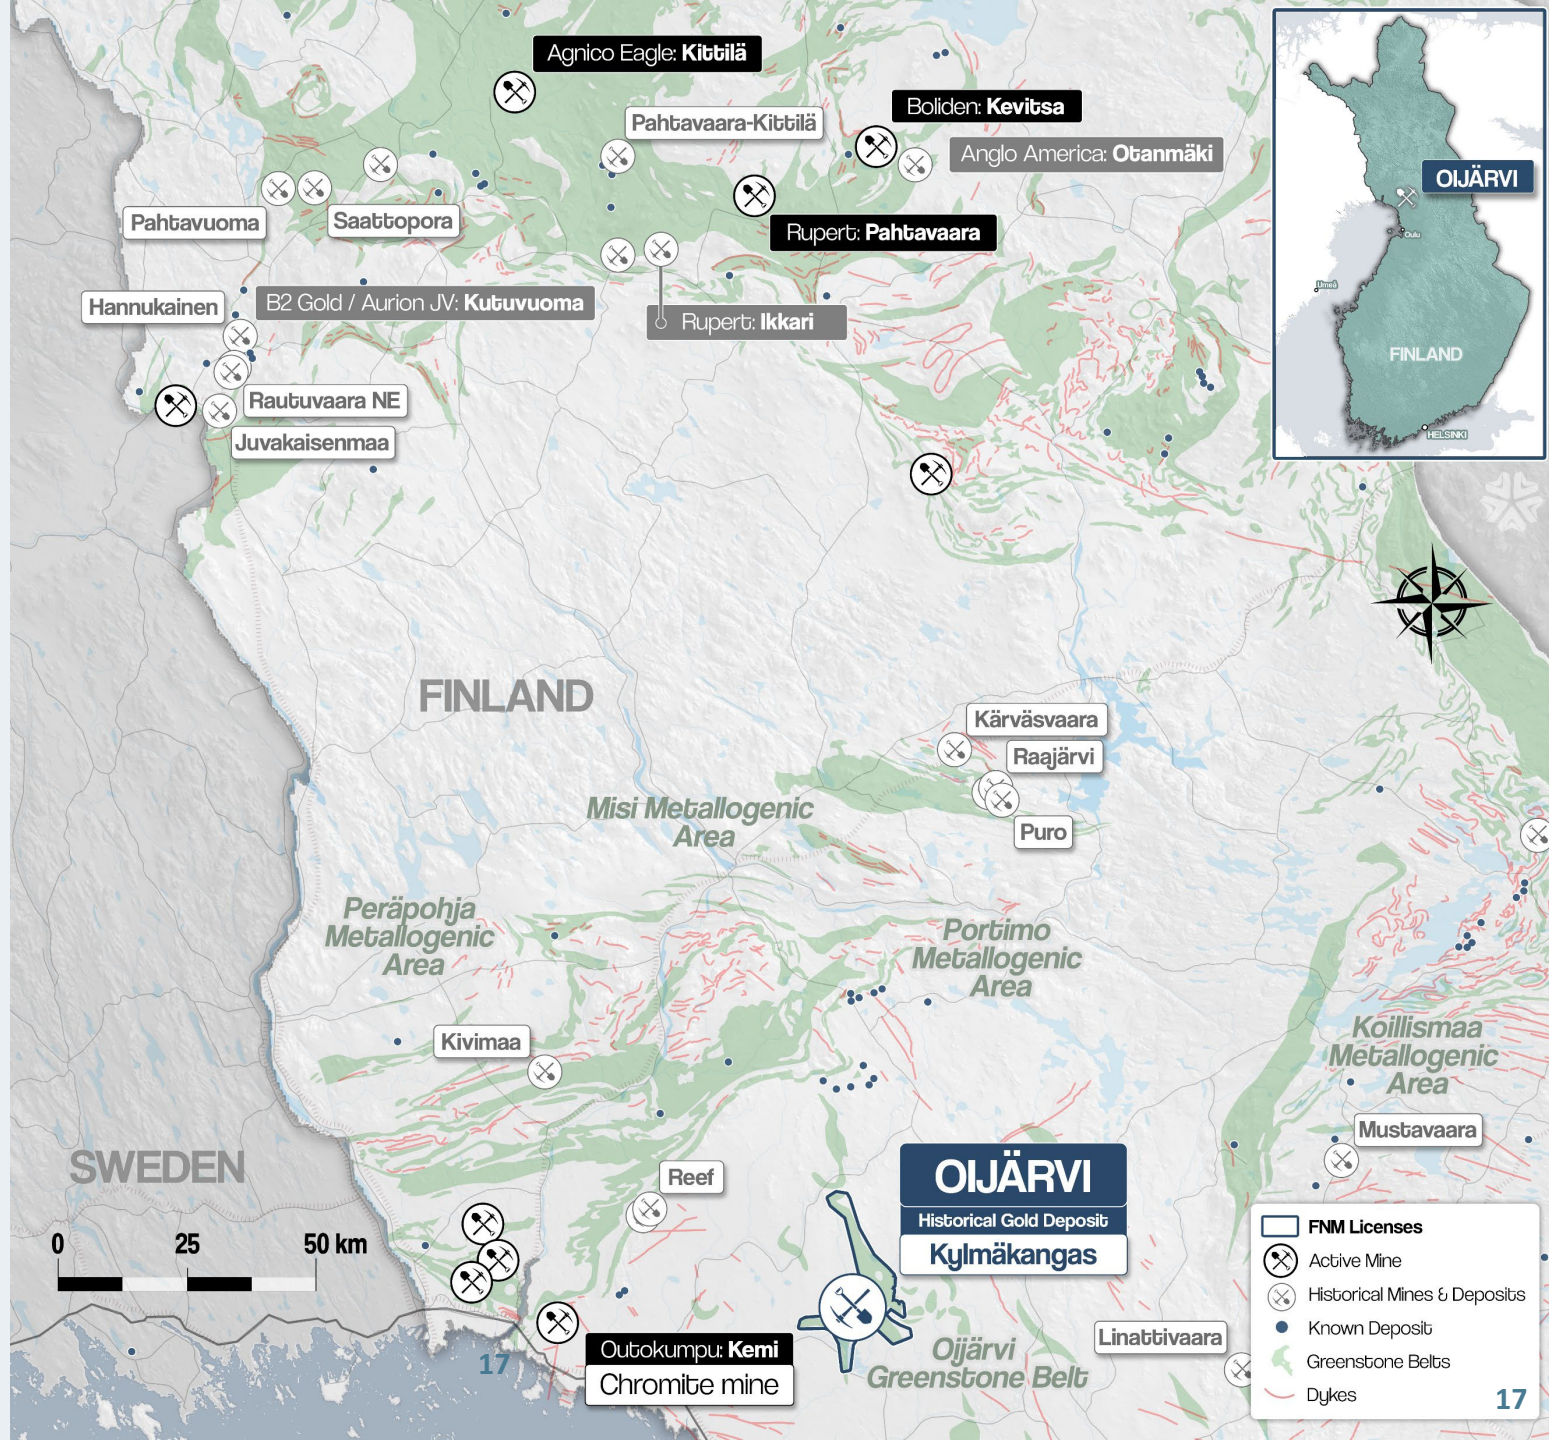

Contains several zones of mineralization, highlighted by the drill-defined **Kylmäkangas** deposit

Regional and local scale zones of structural complexity favourable for hosting potentially large Au deposits are present, with many still untested and the shear corridor remains open in all directions

The Oijärvi Greenstone Belt shares similar characteristics to those found elsewhere in Finland and in the Canadian Shield

Oijärvi Project

Kylmäkangas Deposit

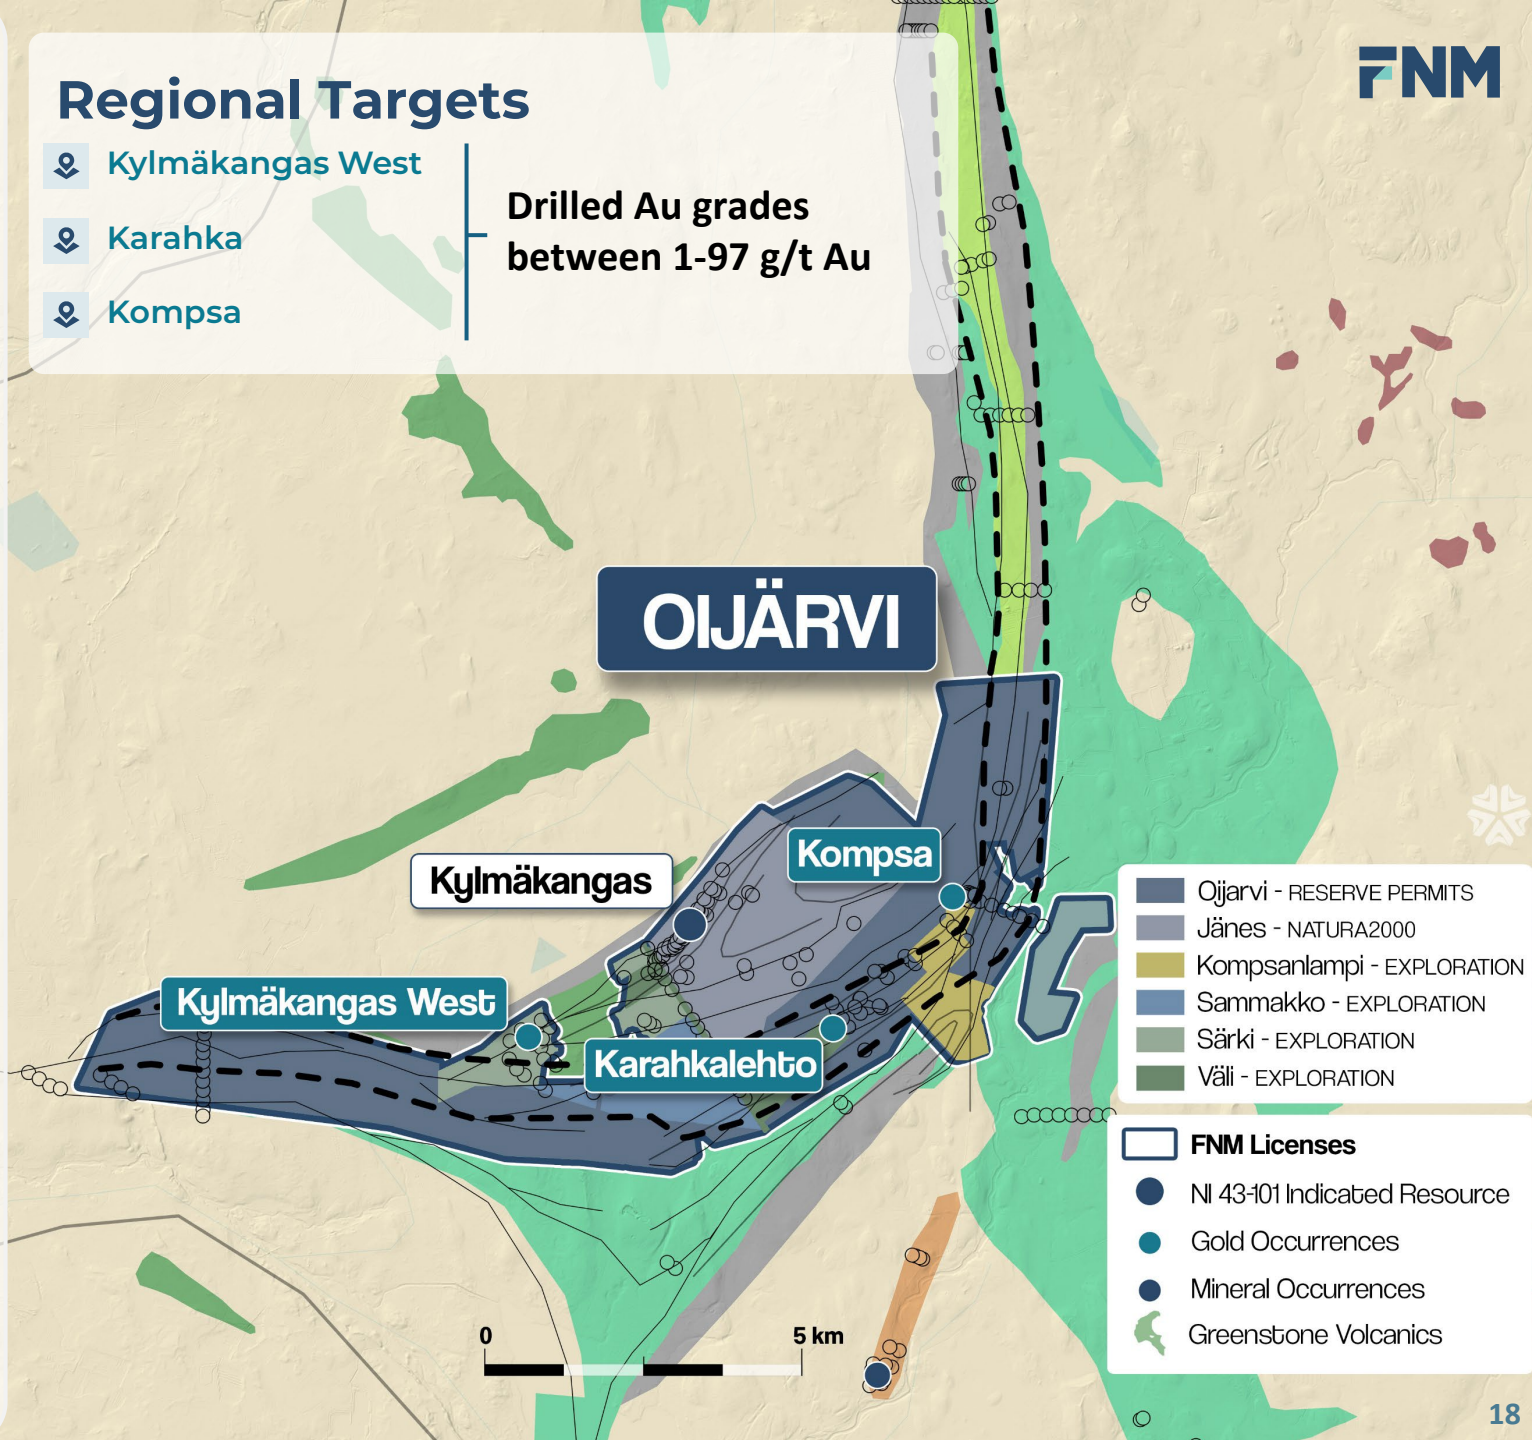

Mineral Resource Estimate (2022)						
Tonnage	AuEq	Au	Ag	AuEq	Au	Ag
Mt	g/t	g/t	g/t	Koz	Koz	Koz
Indicated	1.07	4.6	4.1	35.4	159	143
Inferred	1.63	2.9	2.7	15.2	152	142
TOTAL	2.70	3.6	3.3	23.2	311	285

- Shear zone hosted orogenic gold deposit
- Resource covers 1.5 km of strike; same mineralization + grades hit 2.5 km away W along high deformation shear corridor
- Current resource estimate is based on 67 drill holes totaling 17,678 m
- Drilled to average depth of only 215 m; significant depth potential exists
- 11 m of 23 g/t Au, 126 g/t Ag @ 102 m

Regional Targets

- 📍 Kylmäkangas West
- 📍 Karahka
- 📍 Kompsa

Drilled Au grades between 1-97 g/t Au

- Oijärvi - RESERVE PERMITS
- Jänes - NATURA2000
- Kompsanlampi - EXPLORATION
- Sammakko - EXPLORATION
- Särki - EXPLORATION
- Väli - EXPLORATION
- FNM Licenses
- NI 43-101 Indicated Resource
- Gold Occurrences
- Mineral Occurrences
- Greenstone Volcanics

Oijärvi Project

Kylmäkangas Deposit

The Kylmäkangas Au-Ag deposit is open to depth and down plunge and there is the potential for additional down dip zones.

Known Mineralization

1.5 KM STRIKE

within a NE/SW striking high deformation shear corridor

NEXT STEPS:

- High resolution UAV magnetic geophysics survey aimed at targeting similar anomalies along strike and on parallel shear corridors within the Oijärvi Greenstone Belt
- Diamond drilling to follow up on extensions of lodes & regionally

FNM

FNMCF

HEGO

Management Team

Taj Singh

President, CEO, & Director

Taj Singh has over 22 years of experience in mining and has held prominent roles, including President & CEO of Gold Line Resources and founding President and CEO of NOA Lithium Brines. As the founder, President, and CEO of Discovery Silver, he grew the company from \$10 million to \$750 million. Additionally, he served as the Lead Independent Director of GT Gold, which was acquired by Newmont for \$400 million. His career also includes a position as a Mining Research Analyst at Macquarie Capital and 10 years at Inco and Vale in Engineering and Capital Projects. Taj holds an M.Eng, P.Eng, and CPA.

Adam Cegielski

Chief Development Officer

Adam Cegielski has over 20 years of experience in the venture capital industry, having worked in sectors ranging from mineral exploration, technology, health care, and education. He started his career by developing an industrial mineral project in Uganda, which he later sold to Rio Tinto. He was a founding director of Cayden Resources, which was sold to Agnico Eagle Mines for \$205 million. Additionally, Adam is the founder, CEO, and director of Binovi Technology Corp, a neurotechnology company focused on enhancing human performance through the use of Binovi technology.

Ross Wilmot

CFO & Director

Ross Wilmot has over 50 years of experience as a Chartered Accountant (CPA), providing senior financial management services to public companies. He is currently a Director of Silver Viper and was formerly the CFO of Barsele Minerals. Ross has extensive knowledge of reporting practices and requirements for public companies in both Canada and the USA, and has been involved in numerous business valuations, acquisitions, and international mining operations.

Benjamin Gelber

Chief Technical Director

Benjamin Gelber has over 18 years of industry experience, specializing in orogenic gold systems. He served as VP Exploration of Gold Line for 2 years, demonstrating a deep understanding of geological and structural controls on mineralization in orogenic systems at all scales. Benjamin has developed and managed large and complex district to camp scale exploration programs. His past roles include Exploration Manager, Guyana, at Barrick Gold, Generative Exploration Manager, and Group Geology Manager at Asanko Gold (now Galiano Gold). He is also a P.Geo.

Board of Directors

Toby Pierce

Chairman

Toby Pierce is a seasoned professional with over 25 years in the natural resources sector. He is currently the CEO of TAG Oil and has previously served as Chair of Gold Line Resources. Toby is the founder and director of several publicly traded companies, including Benchmark Metals (now Thesis Gold), and has held the role of Head of Mining Research at GMP Securities in London. He is also a licensed Professional Geoscientist (P.Geo).

Marc Legault

Director

Marc Legault has 34 years of experience in the mining industry, primarily with Agnico Eagle Mines where he held various roles, including Chief Geologist at the LaRonde Division in Cadillac, Quebec. He retired in 2022 as SVP of Southern Operations. Before joining Agnico, Marc worked as an exploration geologist for several junior and intermediate companies. He is a Professional Engineer (P.Eng) registered in Ontario and Quebec.

Gary Cope

Director

Gary Cope has over 35 years of experience in capital markets. He is the former founding President and CEO of Barsele Minerals and has also served as President, CEO, and Director of Orko Silver, which was acquired by Coeur Mining for \$268 million. Additionally, Gary has been a Director of Silver Viper Minerals and the President and CEO of Dolly Varden. He arranged financing for the South Kemess project and was involved in its sale to Royal Oak Mines. Over the past 15 years, he has held senior officer and director roles in various public companies.

Jeff Couch

Director

Based in London, England, Mr. Couch is a capital markets executive with deep experience in natural resources and emerging markets. He is CEO of Lydian Mining and Alufer Mining, both part of a global private equity firm managing several billions in assets. For 10 years he was Head of Investment Banking at BMO Capital Markets, Europe and he also held senior roles at Credit Suisse and Citigroup. He has substantial board experience on the Toronto and London Stock Exchanges and holds degrees in business and law.
