**MADE IN THE U.S.A.**

CREATING A NEVADA-BASED,  
MID-TIER GOLD PRODUCER

Precious Metals Summit | Beaver Creek  
September 10, 2025

# CAUTIONARY DISCLAIMER REGARDING FORWARD-LOOKING STATEMENTS

Certain statements in this presentation constitute “forward-looking statements” or “forward-looking information” within the meaning of applicable securities laws, including but not limited to statements or information regarding: statements regarding preliminary economic assessment results for each project; the Company's future plans and operations; the perceived merit of projects or deposits; and the impact and timing, and execution of the Company's new development plan and recapitalization plan, including seeking new debt providers as well as working with current partners to reschedule existing debt obligations; the intended use of proceeds from the bought deal equity Offering and the Concurrent Private Placement; 2025 production outlook targets; anticipated average annual production targets; the anticipated growth expenditures; the anticipated timing of permitting, production, project development or completion dates for feasibility studies and technical studies; execution and timing of all asset advancements in the New Development Plan; the Granite Creek dewatering campaign; the potential to utilize Lone Tree autoclave infrastructure to process mineralized material pending the outcome of the 2025 refurbishment class 3 engineering study; Ruby Hill permitting for underground development expected in 2025; further de-risk the projects through additional technical work; the anticipated exploration upside with all deposits; and the Company's ability to achieve mid-tier production status, including its target of producing 500,000 ounces of gold per annum.

Such statements and information involve known and unknown risks, uncertainties and other factors that may cause the actual results, performance or achievements of i-80, its projects, or industry results, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements or information. Such statements can be identified by the use of words such as “may”, “will”, “could”, “intend”, “expect”, “believe”, “plan”, “anticipate”, “estimate”, “scheduled”, “forecast”, “target” and other similar terminology, or may state that certain actions, events or results “may”, “would”, or “could” be taken, occur or be achieved.

The Preliminary Economic Assessments (“PEA”) are preliminary in nature and include inferred mineral resources that are considered too speculative geologically to have economic considerations applied to them, and there is no certainty that the forecasts set out in the PEAs will be realized.

These statements reflect the Company's current expectations regarding future events, performance and results and speak only as of the date of this presentation. The Company disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise except as required by applicable law.

Forward-looking statements and information involve significant risks and uncertainties, should not be read as guarantees of future performance or results and will not necessarily be accurate indicators of whether or not such results will be achieved. Readers are cautioned that the assumptions used in the preparation of information, although considered reasonable at the time of preparation, may prove to be inaccurate and, as such, reliance should not be placed on forward looking statements. The Company's actual results, performance or achievement could differ materially from those expressed in, or implied by, these forward-looking statements and, accordingly, no assurance can be given that any of the events anticipated by the forward-looking statements will transpire or occur, or if any of them do so, what benefits, if any, that the Company will derive there from. By their nature, forward looking statements are subject to numerous risks and uncertainties, some of which are beyond the Company's control, including general economic and industry conditions, volatility of commodity prices, title risks and uncertainties, ability to access sufficient capital from internal and external sources, the Company may be required to adopt one or more alternatives, such as selling assets, restructuring debt or obtaining additional equity capital on terms that may be onerous or highly dilutive. The Company's ability to refinance its indebtedness will depend on the capital markets and its financial condition at such time, currency fluctuations, construction and operational risks, licensing and permit requirements, environmental risks, competition from other industry participants, the lack of availability of qualified personnel or management, imprecision of mineral resource, or production estimates and stock market volatility. Please see “Risks Factors” in the Annual Report on Form 10-K for the fiscal year ended December 31, 2024 for more information regarding risks pertaining to the Company, which is available on EDGAR at [www.sec.gov/edgar](http://www.sec.gov/edgar) and SEDAR+ at [www.sedarplus.ca](http://www.sedarplus.ca). Readers are encouraged to carefully review these risk factors as well as the Company's other filings with the U.S. Securities and Exchange Commission and the Canadian Securities Administrators. All forward-looking statements contained in this press release speak only as of the date of this press release or as of the dates specified in such statements. The Company disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise except as required by applicable law. Additional information relating to i-80 Gold can be found on i-80 Gold's website at [www.i80gold.com](http://www.i80gold.com), SEDAR+ at [www.sedarplus.ca](http://www.sedarplus.ca), and on EDGAR at [www.sec.gov/edgar](http://www.sec.gov/edgar).

**Cautionary Note to U.S. Investors Concerning Estimates of Resources:** This presentation uses the term “inferred resources”. “Inferred resources” have a great amount of uncertainty as to their existence, and great uncertainty as to their economic and legal feasibility. Under Canadian rules, estimates of inferred mineral resources may not form the basis of a feasibility study or prefeasibility study, except in rare cases. Information contained in this presentation containing descriptions of any mineral deposits may not be comparable to similar information made public by U.S. companies subject to the reporting and disclosure requirements under United States federal securities laws and the rules and regulations thereunder that disclose mineral reserves and mineral resources, including the SEC's new mining disclosure rules in Regulation S-K Subpart 1300 (“S-K 1300”). Under S-K 1300, reserve and resource definitions are substantially similar to the corresponding definitions under Canadian rules, including the Canadian Institute of Mining, Metallurgy and Petroleum Definition Standards. However, there are differences between National Instrument 43-101 – Standards of Disclosure for Mineral Projects (“NI 43-101”) and S-K 1300, and therefore information contained in the presentation may not be comparable to similar information made public by public U.S. companies pursuant to Regulation S-K 1300. mineral resources, and inferred mineral resources as a relative measure of the level of confidence in the resource estimate. Readers are cautioned that mineral resources are not economic mineral reserves and that the economic viability of mineral resources that are not mineral reserves has not demonstrated economic viability

**Caution Regarding Mineral Resource Estimates:** This presentation uses the terms measured mineral resources, indicated mineral resources, and inferred mineral resources as a relative measure of the level of confidence in the resource estimate. Mineral resource estimates may be materially affected by geology, environmental, permitting, legal, title, socio-political, marketing or other relevant issues. However, other than as disclosed in this presentation, i-80 is not aware of any known environmental, permitting, legal, title, socio-political, marketing or other relevant issues that could materially affect the estimates of mineral resources disclosed herein. It cannot be assumed that all or any part of an inferred mineral resource will ever be upgraded to the category of indicated mineral resource or measured mineral resource. The mineral resource estimate is classified in accordance with the Canadian Institute of Mining, Metallurgy and Petroleum's CIM Definition Standards on Mineral Resources and Mineral Reserves adopted in 2019 and incorporated by reference into NI 43-101. Under Canadian rules, estimates of inferred mineral resources may not form the basis of feasibility or pre-feasibility studies or economic studies except for a preliminary economic assessment as defined under NI 43-101. Readers are cautioned not to assume that further work on the stated resources will lead to mineral reserves that can be mined economically.

**No Advertisement or Solicitation and Technical Information:** This presentation is not, and under no circumstances is to be construed as, a prospectus, an advertisement or a public offering of these securities in Canada, the United States or any other jurisdiction. No securities commission or similar authority in Canada or the United States has reviewed or in any way passed upon this document or the merits of the securities described herein, and any representation to the contrary is an offence. This presentation does not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of the securities of i-80 in any jurisdiction in which such offer, solicitation or sale would be unlawful. The securities described herein have not been and will not be registered under the United States Securities Act of 1933, as amended (the “1933 Act”), or any state securities laws and may not be offered or sold within the United States or to, or for the account or benefit of U.S. persons (as defined in Regulation S under the 1933 Act) absent an exemption from registration.

Unless otherwise indicated, i-80 has prepared the technical information in this presentation (“Technical Information”) based on information contained in the technical reports (collectively the “Technical Reports”) concerning the Ruby Hill project, the Lone Tree project, the Cove project and the Granite Creek project available under i-80's profile on SEDAR+ at [www.sedarplus.ca](http://www.sedarplus.ca) and on EDGAR at [www.sec.gov/edgar](http://www.sec.gov/edgar). Each Technical Report was prepared by or under the supervision of a qualified person (a “Qualified Person”) as defined in NI 43-101. For readers to fully understand the information in this presentation, they should read the Technical Reports in their entirety, including all qualifications, assumptions and exclusions that related to the information set out in this presentation which qualifies the Technical Information. Readers are advised that mineral resources that are not mineral reserves do not have demonstrated economic viability. The Technical Reports are each intended to be read as a whole, and sections should not be read or relied upon out of context. The Technical Information is subject to the assumptions and qualifications contained in the Technical Reports. All maps and diagrams are for illustrative purposes only and not to scale.

The technical information in this presentation has been reviewed by Tyler Hill, VP Exploration, i-80 Gold Corp., who is a qualified person within the meaning of NI 43-101 and S-K 1300.

**Comparable Information:** The comparable information about other issuers was obtained from public sources and has not been verified by the Company. “Comparable” means information that compares an issuer to other issuers. The information is a summary of certain relevant operational and valuation attributes of certain mining and resource companies and has been included to provide the prospective investor an overview of the performance of what are expected to be comparable issuers. The comparables are considered to be an appropriate basis for comparison with the Company based on their industry, size, operating scale, commodity mix, jurisdiction, capital structure and additional criteria The comparable issuers face different risks from those applicable to the Company. Readers are cautioned that there are risks inherent in relying on comparables and that past performance is not indicative of future performance and that the performance of the Company may be materially different from the comparable issuers.

The information contained in this presentation reflects our assumptions, opinions, estimates, plans, beliefs and expectations as **September 10, 2025** and is subject to change without notice.

## COMPANY OVERVIEW

# OPPORTUNITY IN A TIER 1 MINING JURISDICTION

- ✓ Industry-leading pipeline of Nevada-based gold projects
- ✓ Pathway to +500koz Au in annual production by early 2030s<sup>(3)</sup>
- ✓ Fourth largest mineral resource holder in Nevada with all deposits open for expansion
- ✓ Well-understood geology and metallurgy
- ✓ Experienced management team

## TOTAL GOLD MINERAL RESOURCES

- 6.5Moz M&I + 7.5Moz Inferred

## HIGH-GRADE UNDERGROUND RESOURCE BASE

- 1.0Moz @ 8.4 g/t Au M&I + 2.5Moz @ 8.5 g/t Au Inferred

## OPEN PIT RESOURCE BASE

- Granite Creek Open Pit: 1.4Moz @ 1.18 g/t Au M&I
- Mineral Point Open Pit:  
3.4Moz @ 0.48 g/t Au M&I + 2.1Moz @ 0.34 g/t Au Inferred
- *Significant silver resource base at Mineral Point:  
106.5Moz M&I + 93.4 Moz Inferred*

### GRANITE CREEK

- Granite Creek Underground
- Granite Creek Open Pit

### LONE TREE AUTOCLAVE\*\*

### COVE UNDERGROUND

### RUBY HILL PROPERTY\*

- Archimedes Underground
- Mineral Point Open Pit

### FAD PROPERTY<sup>Δ</sup> (non-core)

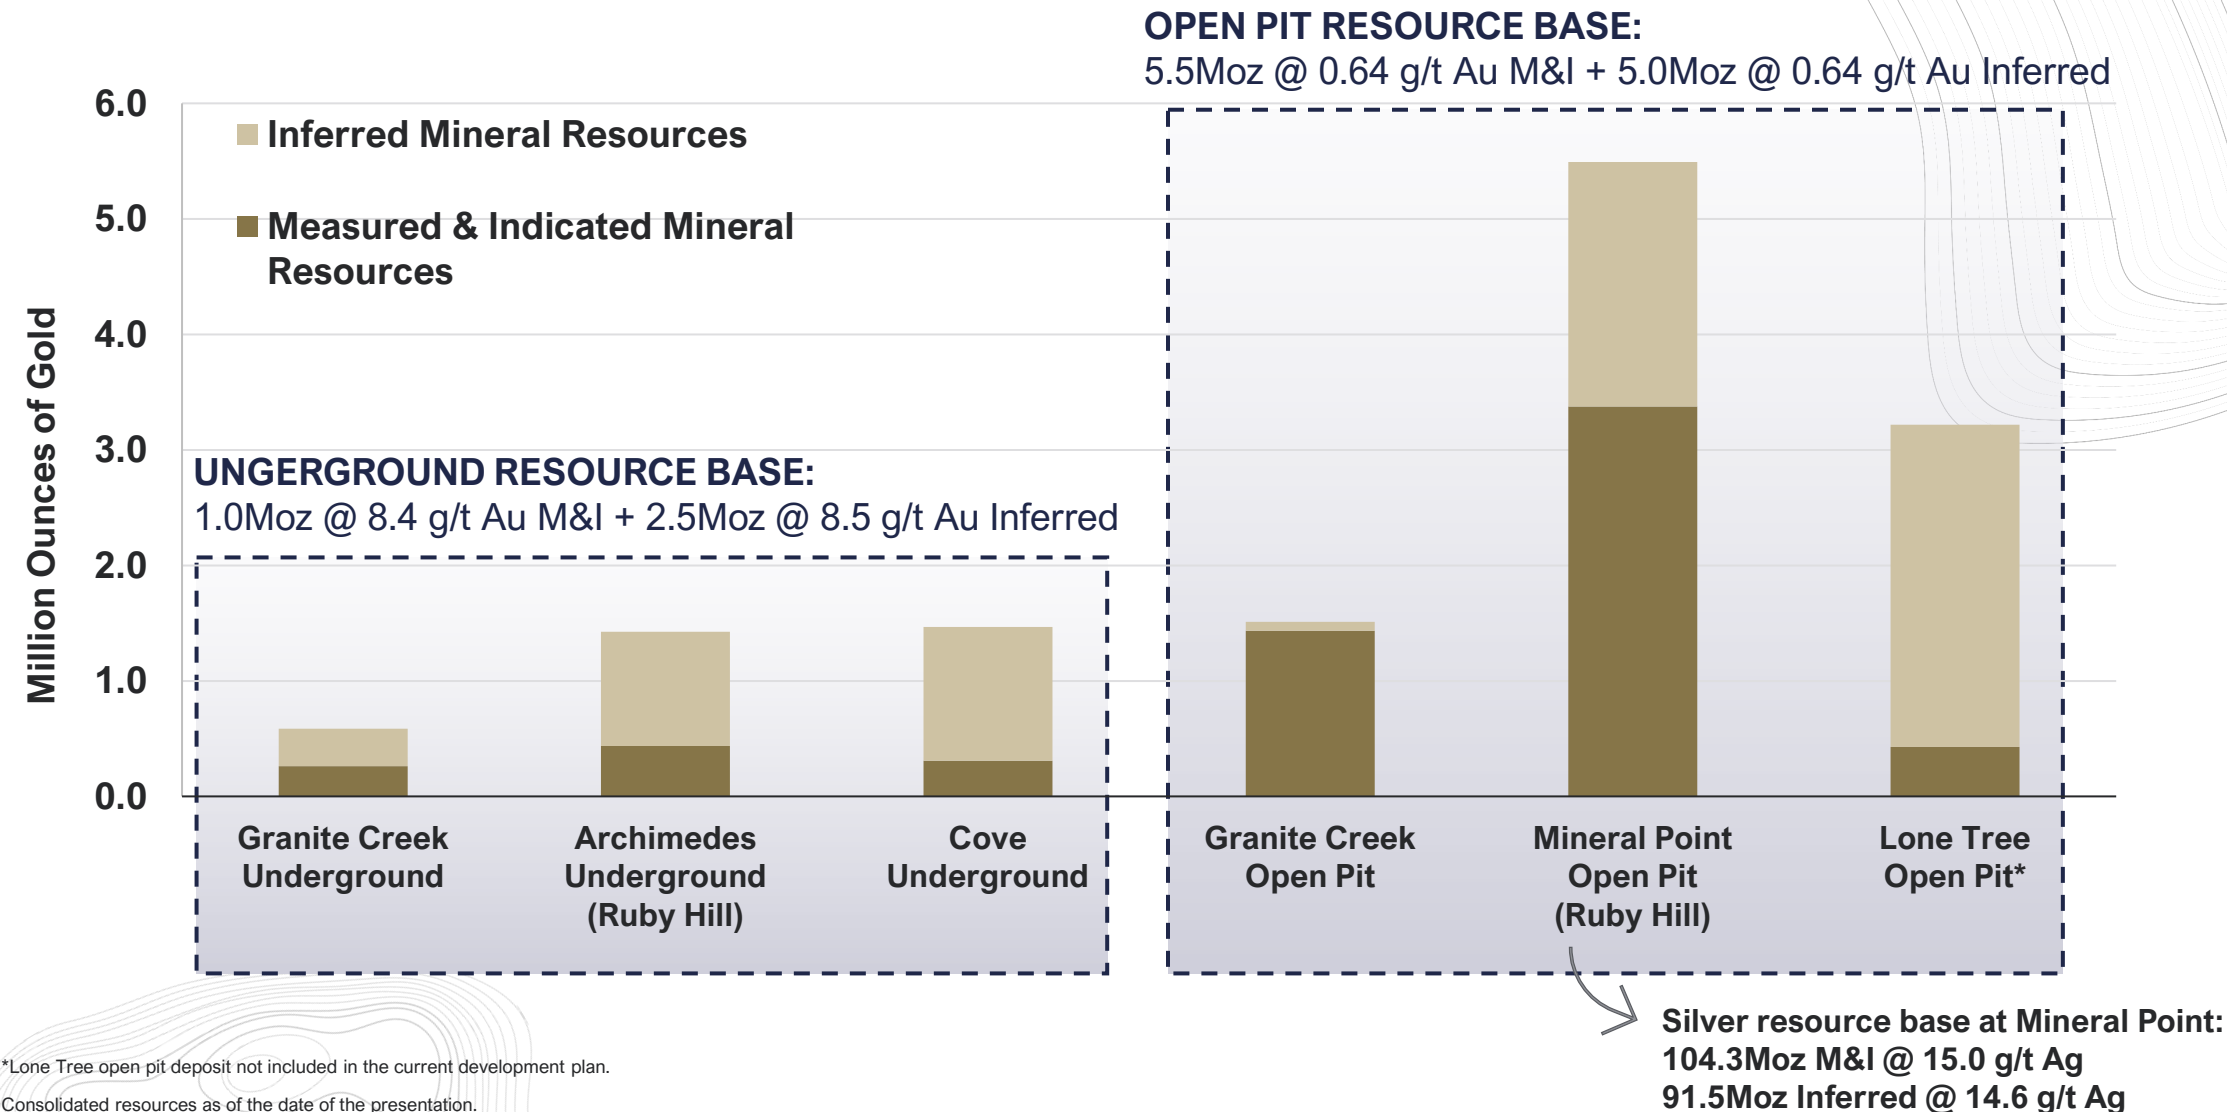

<sup>Δ</sup>The FAD property is a non-core asset currently not included in the development plan and being marketed for sale.

<sup>(3)</sup> See Endnote 3 in Appendix.

STRONG RESOURCE BASE WITH ALL DEPOSITS OPEN FOR EXPANSION

MINERAL RESOURCES DEFINED BY UNDERGROUND & OPEN PIT DEPOSITS

\*Lone Tree open pit deposit not included in the current development plan.

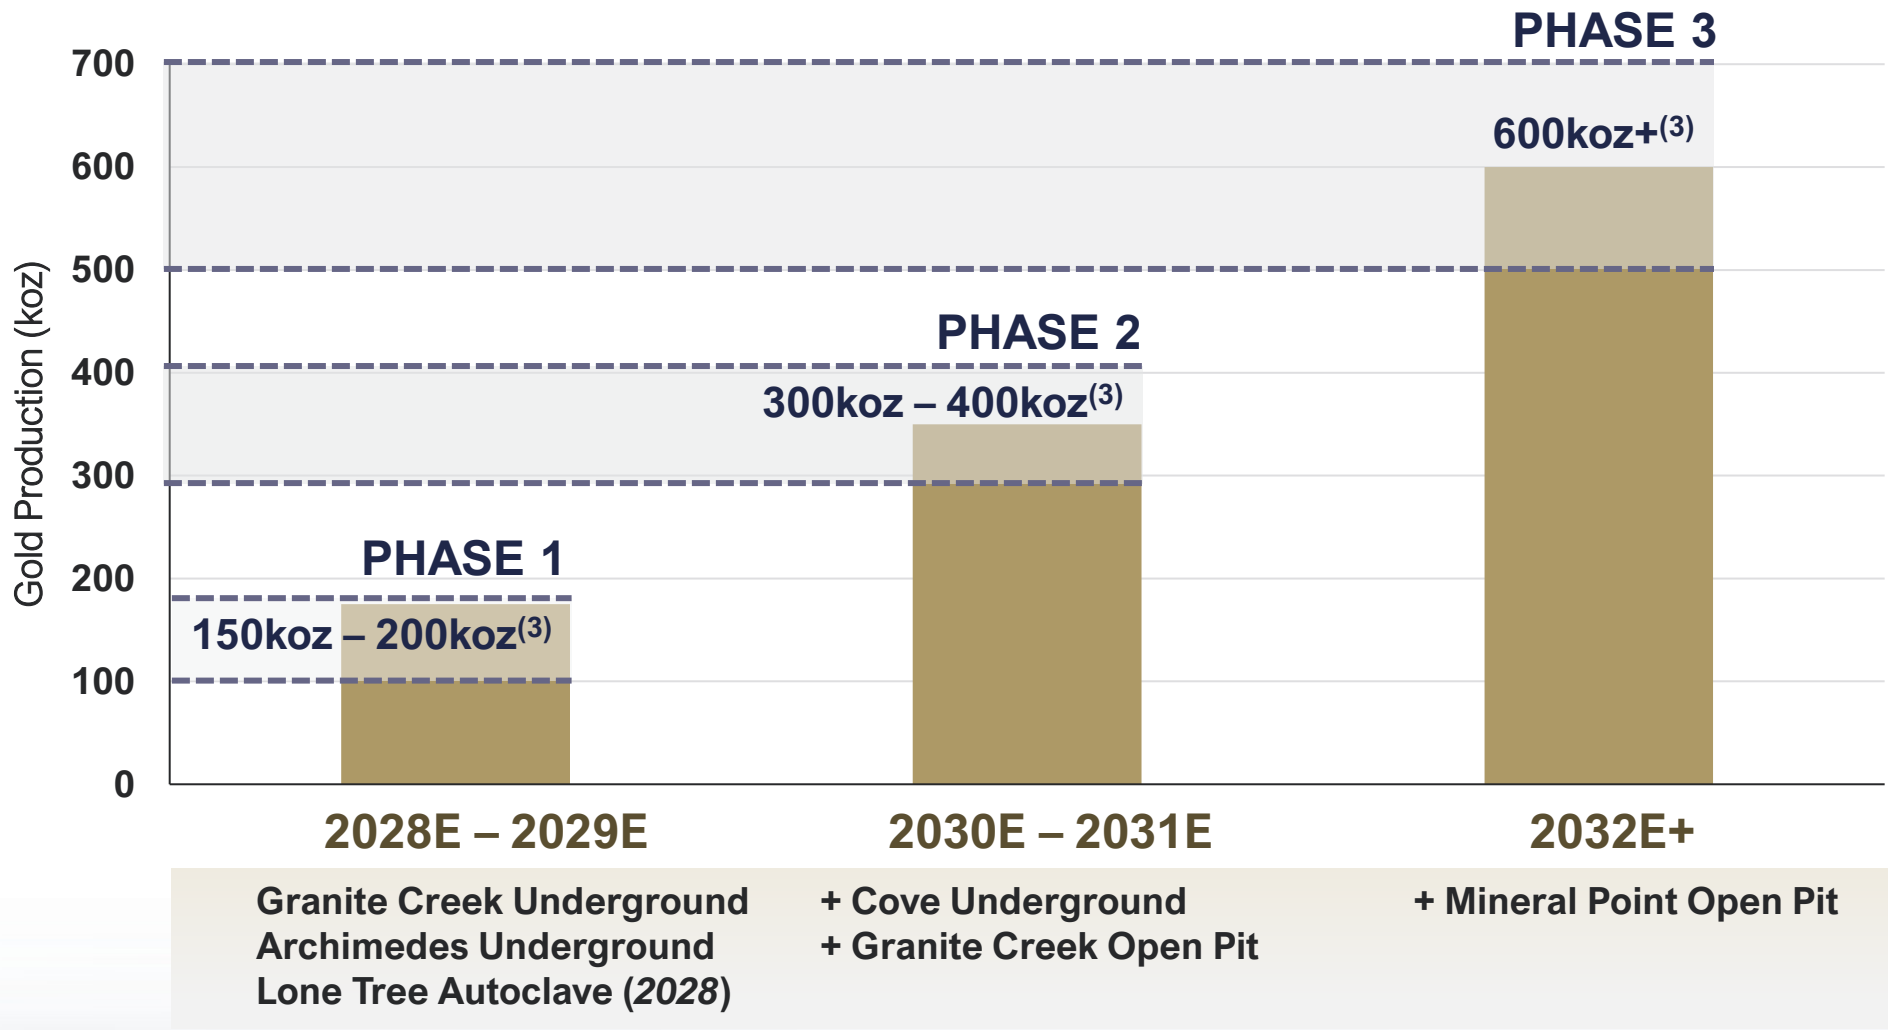

Consolidated resources as of the date of the presentation.  
Refer to the related Endnotes in the Appendix for the notes related to the following mineral resource estimates, such as classification, cutoff grades, reporting standards, and relevant assumptions..  
Mineral resources, which are not mineral reserves, do not have demonstrated economic viability.

COMPANY OVERVIEW

ESTABLISHING A SCALABLE MULTI-ASSET MID-TIER GOLD PRODUCER

ANTICIPATED AVERAGE ANNUAL GOLD PRODUCTION<sup>(3)(4)</sup>

(3)(4) See Endnotes 3 and 4 in Appendix

## COMPANY OVERVIEW

# SIGNIFICANT VALUE EMBEDDED ACROSS i-80 GOLD'S ASSET PORTFOLIO

- PEA economics expected to improve with drilling ahead of feasibility studies
- Autoclave refurbishment capital now included marking a strategic shift in the development plan driven by
  - changes to existing toll milling agreements
  - long-term potential value of Granite Creek Underground
  - economics of central autoclave processing facility
- All deposits open for expansion

	Project	After-tax NPV <sub>(5%)</sub> <sup>(1)</sup>		IRR		Average Annual Gold Production Target (following ramp up)	Production Start Year

(1)(2) See Endnotes 1 and 2 in Appendix

# RUBY HILL PROPERTY

## PROJECTS ON THE PROPERTY

- Archimedes Underground
- Mineral Point Open Pit
- FAD<sup>Δ</sup>

Dominant land position in the Eureka Mining District ~250 km to Lone Tree processing facility via road

Host to both gold and base metal mineralization

<sup>Δ</sup> Non-core asset currently not included in the development plan and being marketed for sale.

## ARCHIMEDES UNDERGROUND

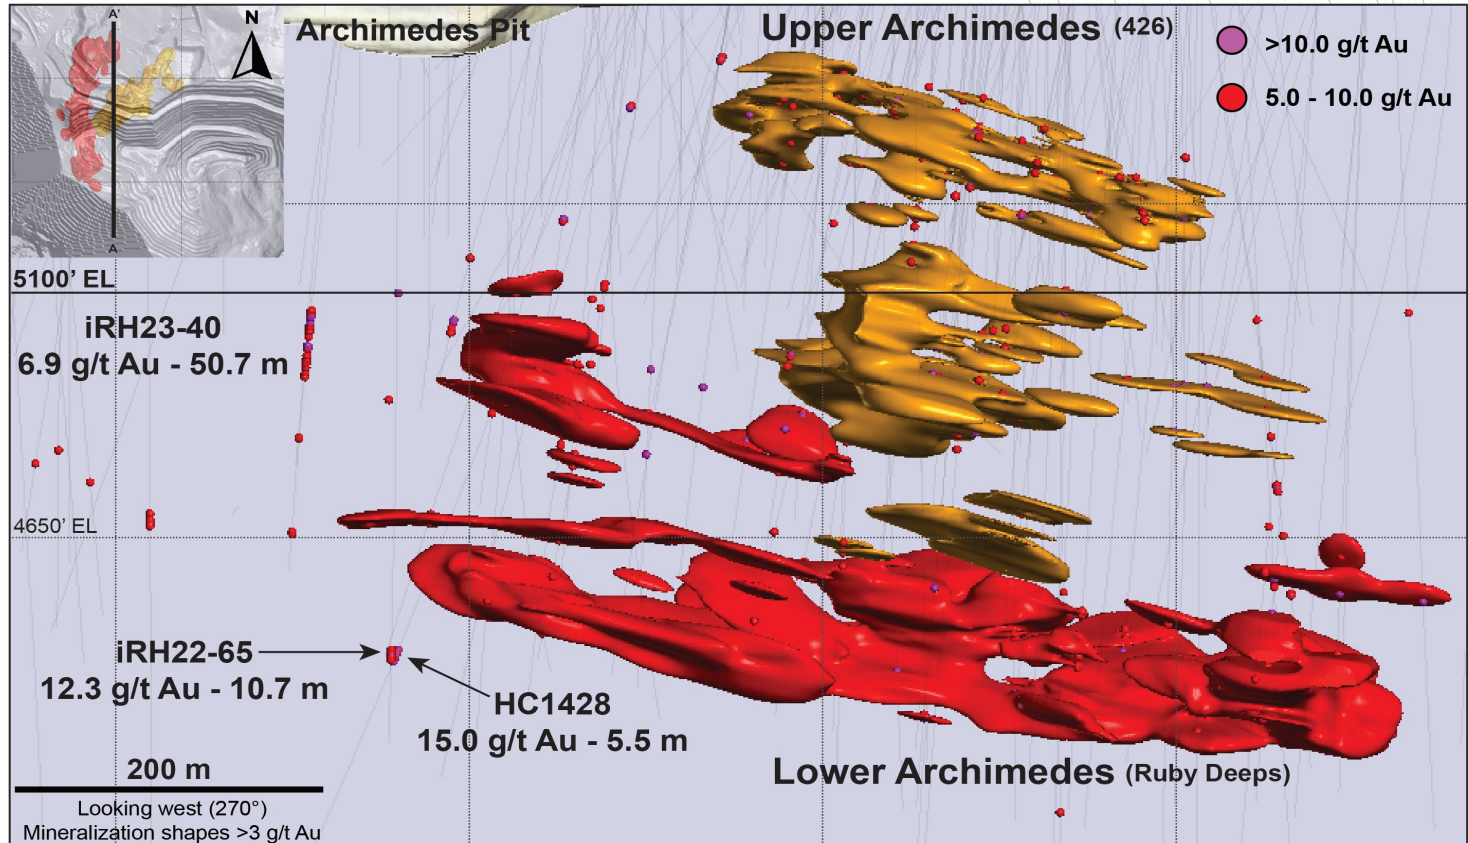

# i-80'S SECOND PLANNED UNDERGROUND GOLD MINE

- Permitted to mine above 5100' level – sequential approach through mid-2027, while finalizing approvals for lower section
- H1 2027: Feasibility study
- Growth potential to the south where iRH23-40 intersected 6.9 g/t Au over 50.7 m
- Additional target area southeast of Ruby Deeps where two holes 30 meters apart intersected 12.3 g/t Au over 10.7 m and 15.0 g/t Au over 5.5 m
- Both target areas not included in current resource
- Deposits expected to grow with additional drilling from underground

### Next Steps:

- Q3 2025: Development to access Ruby Deeps & 426 Zone
- 2026: Planned completion of underground platform to provide access for 2027 infill drill program – 50,000 meters targeting Ruby Deeps and the 426 Zone to further define resources

## LONGITUDINAL SECTION OF MINERALIZED BODIES

## PROPOSED DEVELOPMENT TIMELINE

2025	2026	2027	2028	2029	2030	2031
CONSTRUCTION		PRODUCTION				

MINERAL POINT OPEN PIT

POTENTIAL TO BECOME i-80'S LARGEST PRODUCING ASSET

- Large oxide Au-Ag deposit – largest of two oxide projects in i-80 Gold's portfolio
- Potential to become one of Nevada's largest open-pit truck-and-shovel mining operations and a key driver of future growth for i-80
- 2025 focus: baseline studies in preparation for permitting applications

Next Steps:

- 100,000 meters of drilling scheduled for updated resource estimate and feasibility study – core drilling initiated June 2025
- Strategic evaluations underway to determine optimal timing of Pre-feasibility/feasibility study

Permitting Considerations:

- Permitting approvals expected late-2029
- Large scale open pit mine with dewatering requirements
- On-site heap leach

PROPOSED DEVELOPMENT TIMELINE

2025	2026	2027	2028	2029	2030	2031
TECHNICAL	PERMITTING & TECHNICAL				CONSTRUCTION	PRODUCTION

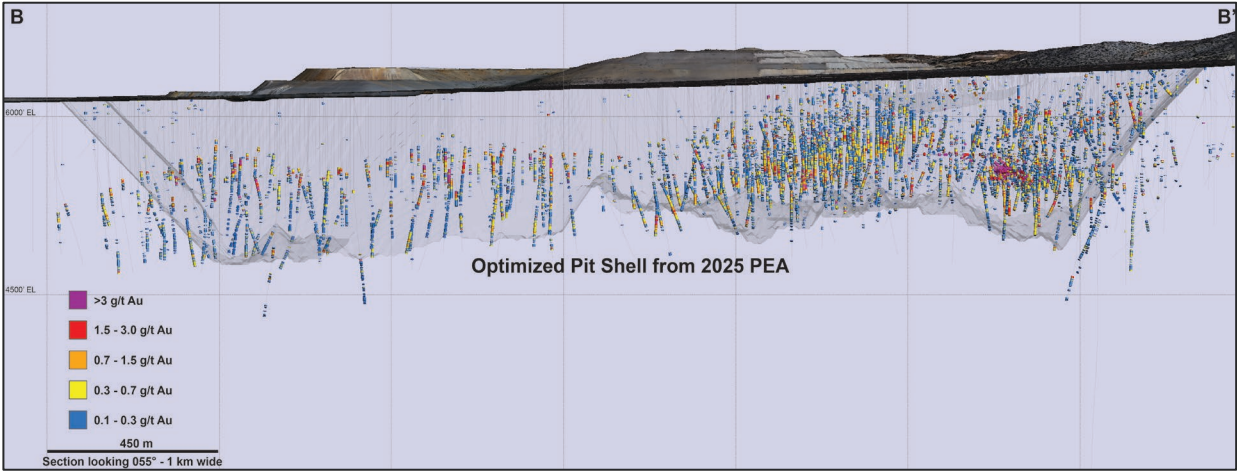

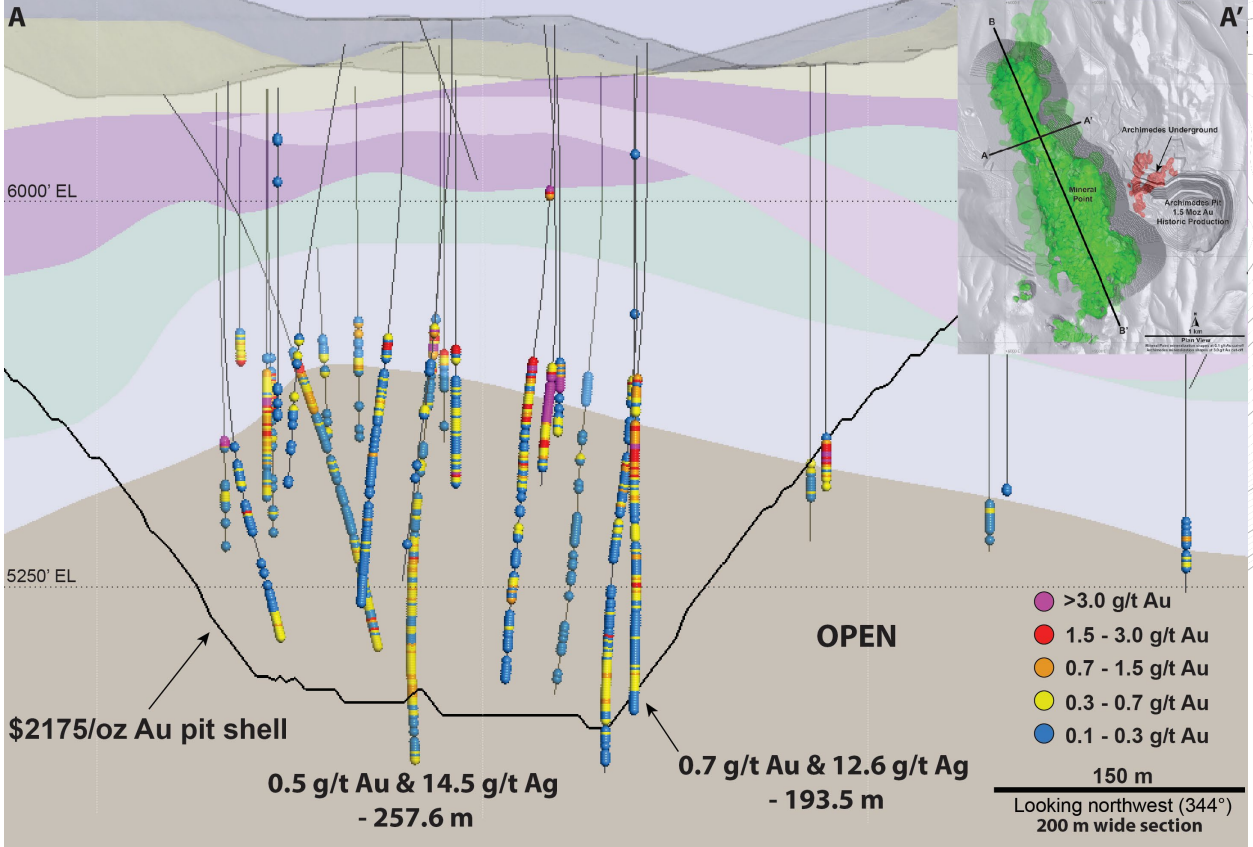

# MINERAL POINT OPEN PIT

## EXPLORATION

- Southern half of Mineral Point mostly drilled to indicated
- North half of deposit mostly drilled to inferred
- Common to see holes that ended in mineralization and mineralized holes on margin of optimized pit shell
- Good potential to add ounces with additional drilling (1 Moz -2 Moz Au)
- Completely oxidized to depths of >1300 ft in highly fractured dolomite
- Expected recoveries of 78% for gold

Mineral Resources – Mineral Point Open Pit <sup>(11)</sup>					
Category	Tonnage	Au Grade	Ag Grade	Gold	Silver
	(kt)	(g/t)	(g/t)	(koz)	(koz)
Indicated	216,982	0.48	15.0	3,376	104,332
Inferred	194,442	0.34	14.6	2,117	91,473

See Disclaimer for Notes, Forward-Looking Statements & referenced technical reports  
(11) See Endnote 11 in Appendix

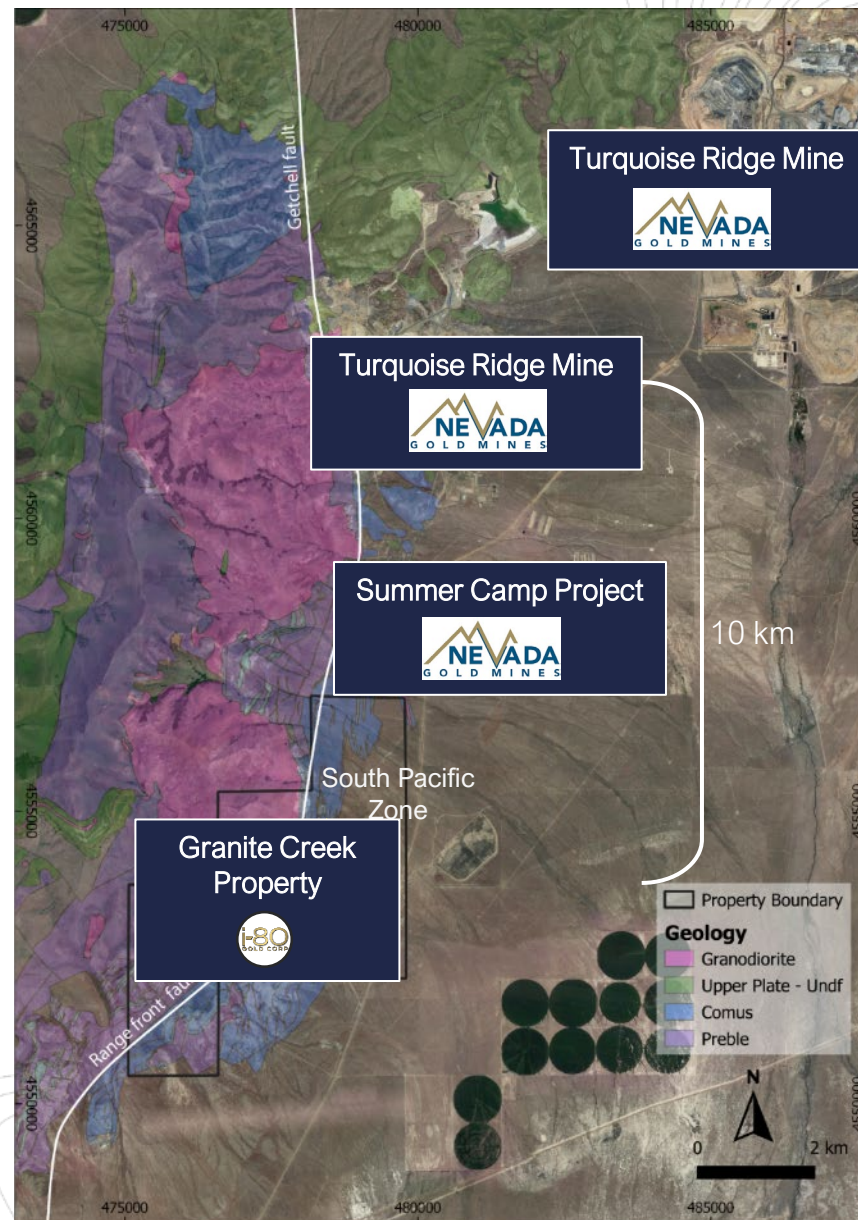

# GRANITE CREEK PROPERTY

## PROJECTS ON THE PROPERTY

- Granite Creek Underground (ramp up phase)
- Granite Creek Open Pit

Located 10 km from Nevada Gold Mines' prolific Turquoise Ridge Complex which currently hosts ~20Moz of gold resources<sup>(5)</sup>

Situated at the intersection of the highly prolific Battle Mountain-Eureka and Getchell gold trends

See Disclaimer Regarding Forward-Looking Statements & referenced technical reports.

(5) See Endnote 5 in Appendix

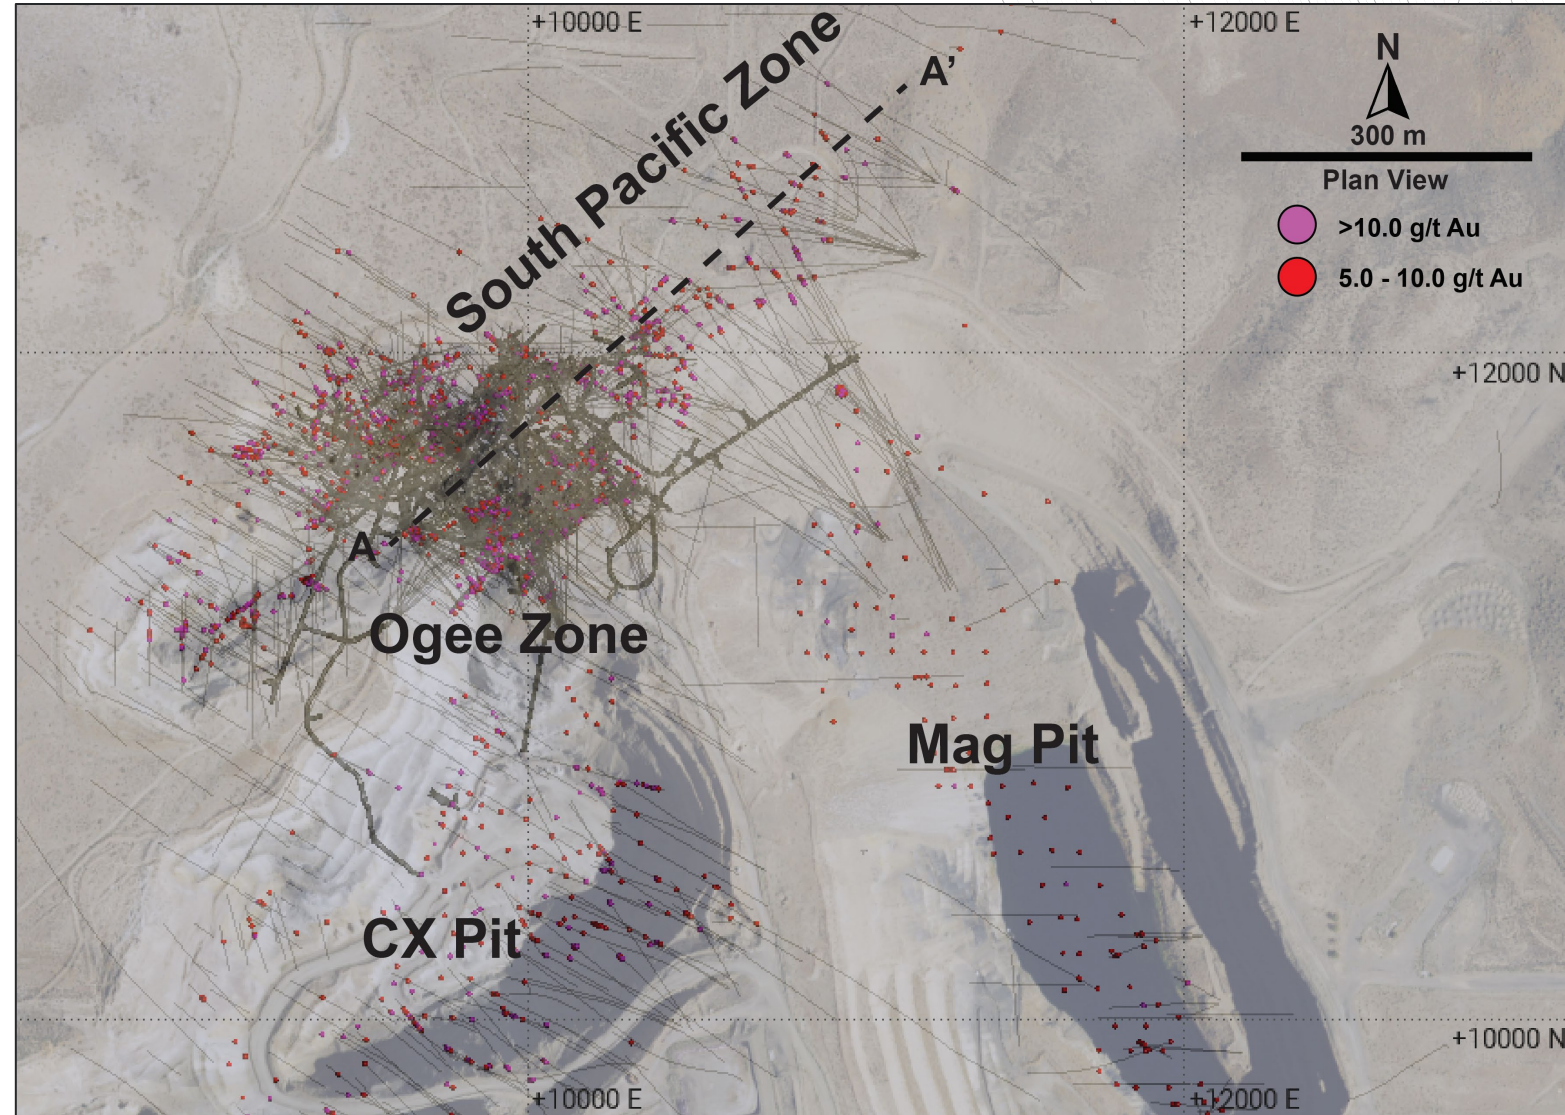

## GRANITE CREEK UNDERGROUND

# i-80 GOLD'S FIRST UNDERGROUND GOLD MINE

- Project acquired in 2021 under care and maintenance
- Significant drilling since 2021 including the discovery of the South Pacific Zone
- Drilling since 2021 has grown South Pacific Zone and Ogee Zones into what will be the future of Granite Creek
- SPZ remains open at depth and along strike – historic drilling suggests the potential to extend mineralization >1 km north

### Next Steps:

- 40 holes planned for ~14,000 meters (in progress)
- 2025 Outlook: 20,000 – 30,000 oz Au\*(7)
- H1 2026: Ramp up to steady state
- Q1 2026: Feasibility study

See Disclaimer Regarding Forward-Looking Statements & referenced technical reports

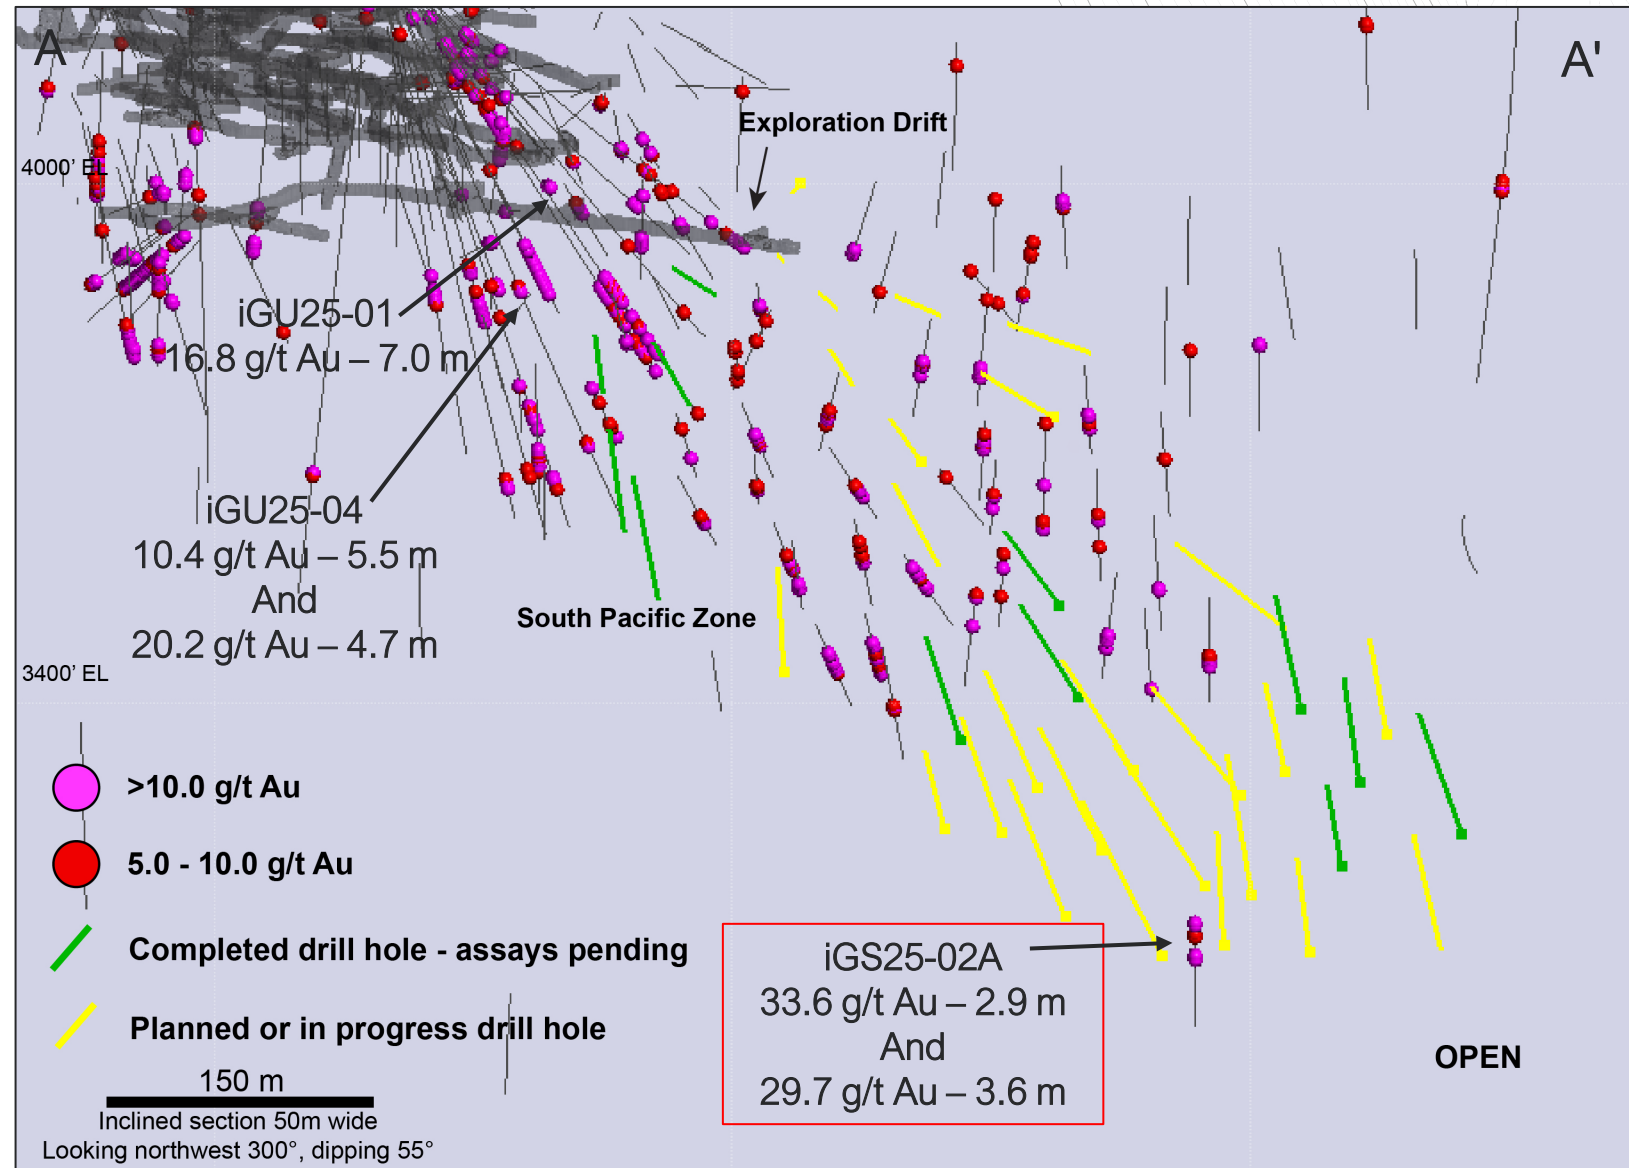

\*Differs from PEA production schedule for 2025

(7) See Endnote 7 in Appendix

## GRANITE CREEK UNDERGROUND

# EXPANDING THE SOUTH PACIFIC ZONE

- South Pacific Zone infill drill program currently underway to advance feasibility study
- 40 holes planned for ~14,000 meters
- Results in-line with expectations
- Furthest north and deepest step-out hole to date intersected 33.6 g/t Au over 2.9 m and 29.7 g/t Au over 3.6 m
- Excellent potential to further expand mineralization to the north and at depth
- Large step-out holes being drilled at depth as part of this year's exploration program

## GRANITE CREEK OPEN PIT

# LARGE HIGH-GRADE, LOW-CAPEX OPEN PIT PROJECT

- Key component to growing production profile towards mid-tier status
- Former producing mine with substantial existing infrastructure
- Significant oxide and transitional mineralization remains below and adjacent to historic pits
- 95% of resource in M&I category

### Next Steps

- 2025 focus: Early-stage permitting, trade off analyses to optimize project economics, and technical studies to advance project
- H1 2026: Pre-feasibility study/feasibility study

## GRANITE CREEK OPEN PIT LAYOUT

## PROPOSED DEVELOPMENT TIMELINE

2025	2026	2027	2028	2029	2030	2031
PERMITTING & TECHNICAL			CONSTRUCTION		PRODUCTION	

### Mineral Resources – Granite Creek Open-Pit<sup>(9)</sup>

Category	Tonnage (kt)	Au Grade (g/t)	Gold (koz)
M & I	37,700	1.2	1435
Inferred	2,150	1.1	75

See Disclaimer Regarding Notes, Forward-Looking Statements & referenced technical reports  
See appendix of this presentation for a summary of the Company's mineral resources.  
(9) See Endnote 9 in Appendix

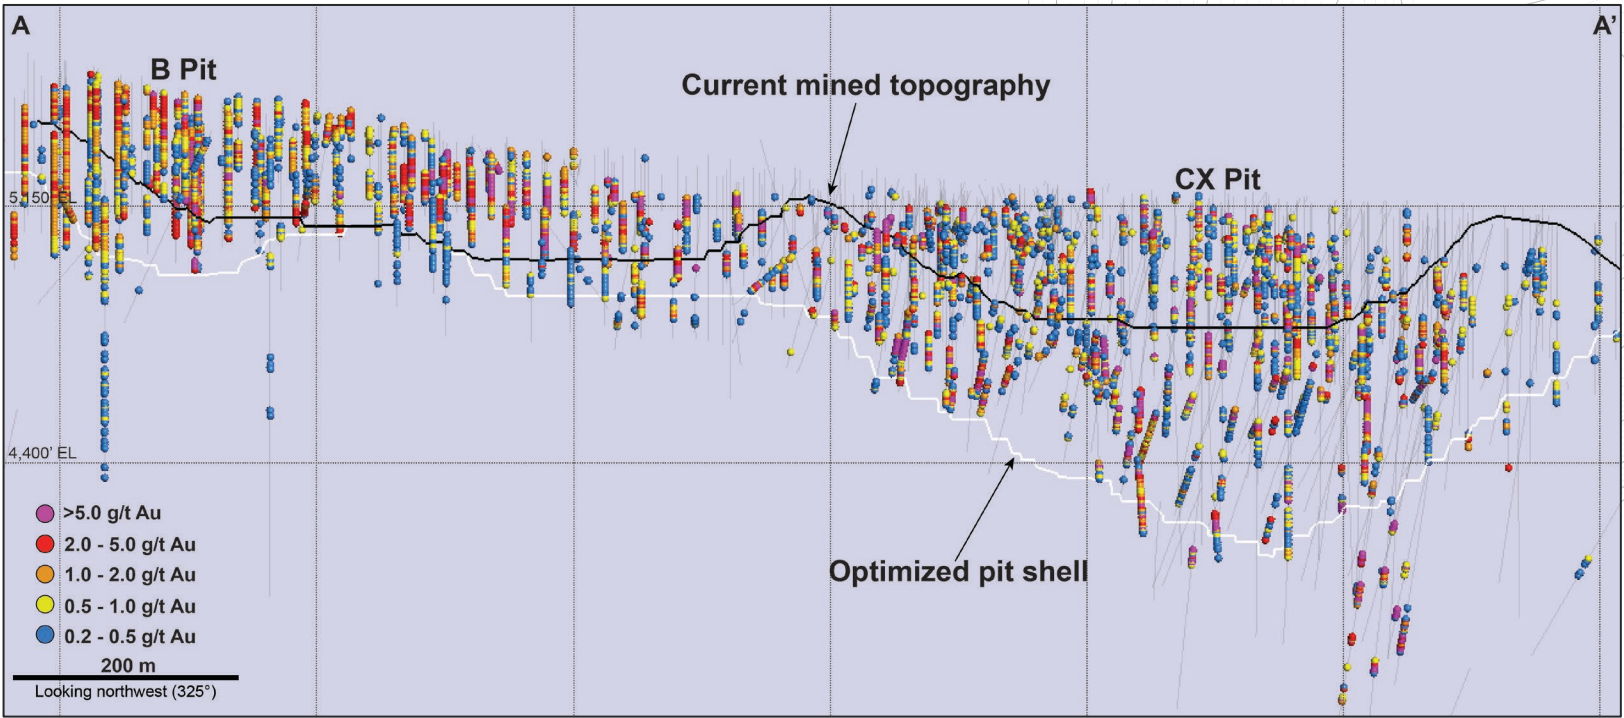

# GRANITE CREEK OPEN PIT

- CX and Mag Pit are composed of 85% of material in mine plan
- Potential to expand pits at depth and along strike with additional drilling
- Very limited drilling in and adjacent to pits since 1980s
- Structural and stratigraphic controls well understood

Mineral Resources – Granite Creek Open-Pit <sup>(9)</sup>			
Category	Tonnage (kt)	Au Grade (g/t)	Gold (koz)
M & I	37,700	1.2	1435
Inferred	2,150	1.1	75

See Disclaimer for Notes, Forward-Looking Statements & referenced technical reports  
 See appendix of this presentation for a summary of the Company's mineral resources.  
 (9) See Endnote 8 in the Appendix.

# COVE UNDERGROUND EXPLORATION

- Completed >40,000 metres of infill drilling on Helen and Gap zones ahead of FS
- Anticipate success upgrading resources & expect the same at other projects
- 2201 Zone not included in PEA mine plan has significant exploration upside (26.7 g/t Au) – limited number of holes with no drilling since 2015
- CSD zone also not included in PEA mine plan, provides potential for a separate deposit mined concurrently with Helen and Gap
- Further expansion of Helen and Gap concurrent with mining

## PROPOSED DEVELOPMENT TIMELINE

2025	2026	2027	2028	2029	2030	2031

Inferred	4,046	8.9	1,156

See Disclaimer for Notes, Forward-Looking Statements & referenced technical reports  
 See appendix of this presentation for a summary of the Company's mineral resources  
 (12) See Endnote 12 in Appendix

LONE TREE AUTOCLAVE

PERMITTED AUTOCLAVE WITH SHORT CONSTRUCTION TIMELINE

ONE OF TWO NEVADA COMPANIES WITH AN AUTOCLAVE PROCESSING FACILITY

- Key to unlocking value of underground deposits
- Eliminates reliance on costly third-party toll milling
- Shift from toll-milling underground material to owner-operated processing increases payability on refractory material from 55% - 60% up to ~ 92% recovery
- Existing processing facility permitted; Additional permits and renewals required in the normal course for processing and environmental controls in the refurbishment plan

Next Steps:

- Q4 2025: Autoclave refurbishment Class 3 engineering study expected completion

PROPOSED DEVELOPMENT TIMELINE

- Includes 346M units recently issued upon closing of a bought deal public offering on May 16, 2025, and 22M units upon closing of a concurrent private placement on May 26, 2025.
- Includes 173M warrants recently issued upon the closing of the bought deal public offering on May 16, 2025, and 11M warrants issued upon closing of a concurrent private placement on May 26, 2025.
- As at May 2, 2025.
- Assumes the exercise or redemption of all outstanding warrants, RSUs and DSUs of the Company. Does not include out of the money convertible options.
- On December 31, 2021, the Company completed a financing package which includes a \$60M convertible loan which bears an interest rate of 8% per annum for four years with a conversion price of CA\$3.275 per share.
- On February 22, 2023, the Company completed a \$65M convertible loan which bears an interest rate of 8% per annum for four years with a conversion price of US\$3.38 per share.

# Q2 FINANCIAL HIGHLIGHTS

- ~8,400 ounces in gold sales, an increase over the same prior year period
- ~\$28M in total revenue, an increase driven by
  - higher ounces sold
  - higher average realized gold price of \$3,301 per ounce
- Net loss position of \$0.05 primarily due to the ramp up and development stage of the business
- Q2 cash balance of ~\$134M, a significant increase from previous quarter due to
  - Net proceeds from the bought deal public offering and private placement
  - Partly offset by settling gold and silver prepay instrument repayments, \$31M and \$11M respectively

<b>Cash and cash equivalents</b>	\$000s	<b>133,691</b>	47,812	<b>133,691</b>	47,812
<b>Drilling</b>	ft	<b>8,717</b>	48,796	<b>23,479</b>	40,487
<b>Gold ounces sold</b>					
Granite Creek	oz	5,981	1,809	<b>9,086</b>	3,384
Lone Tree leach pad	oz	1,754	1,126	<b>3,149</b>	3,168
Ruby Hill leach pad	oz	665	510	<b>1,117</b>	954
<b>Total gold ounces sold<sup>1</sup></b>	oz	<b>8,400</b>	3,445	<b>13,352</b>	7,506
<b>Average realized gold price<sup>2</sup></b>	\$/oz	<b>3,301</b>	2,337	<b>3,124</b>	2,188

1. Gold ounces sold include attributable gold from mineralized material sales at a payable factor of 57% in 2025 (2024 - 58%).

2. This is a Non-GAAP Measure; please see "Non-GAAP Measures" section.

## 2025 OUTLOOK: 30,000 TO 40,000 oz Au<sup>(7)</sup>

- Granite Creek Underground is expected to contribute 20,000 to 30,000 oz Au
- Ruby Hill & Lone Tree heap leach operations are expected to contribute ~10,000 oz Au

## TORONTO OFFICE

# PROVEN TRACK RECORD IN DEVELOPING AND FINANCING MINING OPERATIONS

**RICHARD YOUNG**

President &  
Chief Executive Officer,  
Director

Former President & CEO of Teranga Gold, leading its growth and acquisition strategy.

Proven track record in mine development, operations, corporate strategy, and value creation in the mining sector.

Previously held senior leadership roles at Barrick Gold.

Brings over 30 years' experience in mining, including finance and capital markets.

**PAUL CHAWRUN**

Chief Operating Officer

Executive mining engineer with 30+ years of technical, operating, and corporate leadership experience.

Proven track record developing mines from permitting through to production.

Previously COO & EVP at Centerra Gold, as well as COO of Teranga Gold, and oversaw technical services at Detour Gold for the development of the Detour Lake Project.

**DAVIS SAVARIE**

Senior VP, General Counsel

20+ years of international experience as in-house and external counsel, senior executive, and director.

17 years specializing in gold mining, focusing on project development, permitting, financing, and operations across Eastern Europe, West Africa, and North America.

Recently served as SVP, General Counsel at Teranga Gold and Argonaut Gold before their acquisitions.

**KATERINA DELUCA**

VP Treasury

20+ years of experience in financial reporting and analysis, tax, treasury, financing and M&A, specializing in gold mining.

Recently served as the VP Treasury and Financial Planning & Analysis at Argonaut Gold, and Senior Finance Director at Teranga Gold prior to their acquisitions.

**LEILY OMOUMI**

SVP Corporate  
Development & Strategy

Over 17+ years of experience in mining and capital markets, including M&A and corporate strategy.

Previously served as VP, Corporate Development at Teranga Gold prior to its acquisition.

Former buy-side analyst at BMO Asset Management, covering mining, oil and gas equities, and sell-side analyst at Scotia Capital, focused on precious metals.

**CINDY TSEO**

VP Finance

Brings over 25+ years of experience in finance, mostly within finance leadership roles in the mining industry.

Most recently served as VP Finance at Argonaut Gold and held senior finance roles at Lundin Mining, overseeing reporting and financial reporting and analysis.

## RENO OFFICE

# A TEAM WITH DEEP NEVADA MINING EXPERIENCE

**RYAN SNOW**

Chief Financial Officer

Former VP of Finance at Nevada Copper, supporting the development of the Pumpkin Hollow mine in Nevada.

Previously held senior financial positions at Tahoe Resources Inc. based in Nevada.

Brings nearly 20 years' experience in mining, corporate finance, accounting, and project management.

**TIM GEORGE**

VP Operations

Advanced career through various operations and engineering roles in both open pit and underground mines.

Recent ten years has been focused wholly on gold mines in Nevada.

Extensive hands-on experience in Nevada's mining operations, including processing and development.

Proven track record of optimizing mine performance and efficiency.

**TODD ESPLIN**

VP Technical Services

Former senior operations and technical leader at Barrick Gold, specializing in refractory processing and optimization at the Goldstrike and Turquoise Ridge mines in Nevada.

Extensive experience in Nevada's Carlin Trend and Cortez mining districts.

Most recently Mining & Process Manager for Kinross Gold.

Expertise in mine design, metallurgy, project evaluation, and operational efficiency.

**TYLER HILL**

VP Geology

Professional Geologist with 10+ years of experience in Nevada mineral exploration and project management.

Previously worked for a subsidiary of the private equity group Waterton Global Resource Management, evaluating exploration projects across Nevada.

Part of the McCoy-Cove exploration team that discovered 1.1 Moz Au, leading to a >400% increase in the mineral resource of the Cove deposit.

**MARK MILLER**

VP Environmental & Permitting

Over three decades of experience, leading environmental management programs across multiple industries, including mining, where he has managed large-scale permitting, compliance and reclamation efforts.

Previously held senior roles at Nevada Gold Mines and Barrick Gold Corp, successfully implementing strategic plans and driving cost savings while maintaining regulatory compliance.

**CURTIS TURNER**

VP Strategic Planning

20+ years of experience spanning various facets of the mining industry, including accounting, financial reporting, finance, mergers and acquisitions, strategic planning, permitting, technical operations, and community and government relations.

Previously held key positions at Argonaut Gold, Yamana Gold, and Meridian Gold.

# EXPERIENCED BOARD OF DIRECTORS

**RON CLAYTON**

Chairman

40+ years exploration, development, construction & mine operation experience

Former President, CEO & Director of 1911 Gold Corp

Former President & CEO Tahoe Resources, SVP Operations Hecla, VP Operations Stillwater

**RICHARD YOUNG**

President & Chief Executive Officer, Director

30+ years operational & leadership experience

Former CEO of Teranga Gold Corporation

Former President & CEO of Argonaut Gold

Recipient of the 2008 & 2017 PDAC Sustainability Award

**EVA BELLISSIMO**

Director

20+ years legal, financing, merger and acquisition & corporate governance experience in the mining industry

Co-leader of McCarthy Tétrault's Global Metals & Mining Group

Lecturer on mining corporate finance

**JOHN BEGEMAN**

Director

40+ years operational & leadership experience

Director Allied Gold

Director Pan American Silver

Former Executive Chairman Premier Gold

Former Director Yamana Gold Inc.

Former CEO Avion Gold Corp

Former COO Zinifex Canada Inc

**JOHN SEAMAN**

Director

25 years experience in the public mineral and mining industry

CFO of Premier Gold Mines (2006-2012) and Wolfden Resources Inc. (2002-2007)

**ARTHUR EINAV**

Director

General Counsel and Senior Managing Director at Sprott Inc.

Co-head of Enterprise Shared Services Group with specific responsibility for legal, compliance, risk and human resources

Member of the Law Society of Upper Canada and the New York State Bar

**CASSANDRA JOSEPH**

Director

20+ experience in corporate, environmental & intellectual property law

Currently General Counsel & Corporate Secretary of Ivanhoe Electric

Former Senior VP & General Counsel for Nevada Copper

Former VP, Associate General Counsel, Corporate Secretary, & Chief Compliance Officer for Tahoe Resources

EXECUTING ON A RECAPITALIZATION STRATEGY

STRENGTHENING THE BALANCE SHEET AND FUNDING NEAR-TERM GROWTH

- Recapitalization timeline now aligned to
  - completion of Lone Tree autoclave technical study
  - maturity of existing debt obligations
- US\$184M raised through a bought-deal and private placement (\$174M net of fees)
- Ongoing discussions to further strengthen the balance sheet through
  - new senior debt facility mid-2026 (targeting \$350M-\$400M)
  - sale of non-core FAD property
  - royalty sale on Mineral Point open pit

Aligning i-80 Gold’s Financial Capacity With The Value and Opportunity Within Our Asset Pipeline

Planned Growth Spend Over the Next 12 Months

Growth Capital	12-month Timing	Amount
Underground Development <i>Archimedes Underground</i>	2025 to mid-2026	\$35M
Permitting & Environmental <i>All 5 projects</i>	2025	\$10M
Feasibility Studies <i>All 5 projects</i>	2025	\$3M
Autoclave Refurbishment <i>Class 3 Engineering Study</i> <i>Long-lead items</i>	2025 to 2026	\$23M
Infill Drilling <i>Granite Creek Underground</i> <i>Granite Creek Open Pit</i> <i>Archimedes Underground</i> <i>Cove Underground</i>	2025 to mid-2026	\$20M
Subtotal		\$92M
Corporate Capital		
Working Capital	mid-2025 to mid-2026	\$16M
Gold/Silver Prepay Settlements (National Bank* and Orion Mine Finance)	2025	\$32M
Subtotal		\$48M
TOTAL EQUITY-FUNDED CAPITAL SPEND		\$140M

\*Settled National Bank gold and silver prepayments for \$32.4M upon bought deal closing on May 16, 2025

# NON-GAAP FINANCIAL PERFORMANCE MEASURES

The Company has included certain terms or performance measures commonly used in the mining industry that are not defined under US GAAP in this document. This includes average realized price per ounce. Non-GAAP financial performance measures do not have any standardized meaning prescribed under US GAAP, and therefore, they may not be comparable to similar measures employed by other companies. The data presented is intended to provide additional information and should not be considered in isolation or as a substitute for measures prepared in accordance with US GAAP and should be read in conjunction with the Company's Financial Statements.

## Definitions

"Average realized gold price" per ounce of gold sold is a non-GAAP measure and does not constitute a measure recognized by US GAAP Accounting Standards and does not have a standardized meaning defined by US GAAP Accounting Standards. It may not be comparable to information in other gold producers' reports and filings. For a more detailed table breakdown on how this measure was calculated, please refer the section titled "Non-GAAP Financial Performance Measures" in the Annual Report on Form 10-K for the fiscal year ended December 31, 2024 which is available on EDGAR at [www.sec.gov/edgar](http://www.sec.gov/edgar) and SEDAR+ at [www.sedarplus.ca](http://www.sedarplus.ca).

"All-in sustaining costs" is a non-IFRS or US GAAP financial measure calculated based on guidance published by the World Gold Council ("WGC"). The WGC is a market development organization for the gold industry and is an association whose membership comprises leading gold mining companies. Although the WGC is not a mining industry regulatory organization, it worked closely with its member companies to develop these metrics. Adoption of the all-in sustaining cost metric is voluntary and not necessarily standard, and therefore, this measure presented by the Company may not be comparable to similar measures presented by other issuers. The Company believes that the all-in sustaining cost measure complements existing measures and ratios reported by the Company. All-in sustaining cost includes both operating and capital costs required to sustain gold production on an ongoing basis. Sustaining operating costs represent expenditures expected to be incurred at the Project that are considered necessary to maintain production. Sustaining capital represents expected capital expenditures comprising mine development costs, including capitalized waste, and ongoing replacement of mine equipment and other capital facilities, and does not include expected capital expenditures for major growth projects or enhancement capital for significant infrastructure improvements.

"Cash cost per gold ounce" is a common financial performance measure in the gold mining industry but has no standard meaning under IFRS or US GAAP. The Company believes that, in addition to conventional measures prepared in accordance with IFRS or US GAAP, certain investors use this information to evaluate the Company's performance and ability to generate cash flow. Cash cost figures are calculated in accordance with a standard developed by The Gold Institute. The Gold Institute ceased operations in 2002, but the standard is considered the accepted standard of reporting cash cost of production in North America. Adoption of the standard is voluntary, and the cost measures presented may not be comparable to other similarly titled measures of other companies.

# MINERAL RESOURCES ATTRIBUTABLE TO i-80 GOLD CORP.

## MINERAL RESOURCES

	Tonnes (kt)	Au Grade (Au g/t)	Ag Grade (Ag g/t)	Au Ounces (koz)	Ag Ounces (koz)

(6)(9)(10)(11)(12)(13)(14) Refer to the related Endnotes in the Appendix for the notes related to the following mineral resource estimates, such as classification, cutoff grades, reporting standards, and relevant assumptions.

Reported table numbers have been rounded as required by reporting guidelines and may result in summation discrepancies.

Mineral resources, which are not mineral reserves, do not have demonstrated economic viability.

# ENDNOTES

- 1) For the Archimedes Underground Project, cash flow and NPV are calculated as of the start of construction, which is anticipated to commence in early in the second quarter 2025, subject to obtaining the necessary permits by March 31, 2025, as anticipated. After tax metrics for Archimedes Underground assumes the Company consume existing net operating losses. For the Granite Creek Underground Project, cash flow and NPV are calculated as of January 2025. For the Granite Creek Open Pit Project, cash flow and NPV are calculated as of the start of construction, which is anticipated to commence in early 2028, subject to obtaining the necessary permits by December 31, 2027, as anticipated. For the Mineral Point Open Pit Project, cash flow and NPV are calculated as of the start of construction, which is anticipated to commence in early 2030, subject to obtaining the necessary permits by December 31, 2029, as anticipated. After tax metrics for Mineral Point assumes the Company consume existing net operating losses. For the Cove Project, cash flow and NPV are calculated as of the start of construction, which is anticipated to commence in January 2028. Further information about the updated PEAs referenced in this presentation including information in respect of data verification, assay procedures, the quality assurance program, quality control measures, key assumptions, parameters, risks and other factors, are contained in each respective PEA filed by the Company and which are available on EDGAR at [www.sec.gov/edgar](http://www.sec.gov/edgar), SEDAR+ at [www.sedarplus.ca](http://www.sedarplus.ca), and the Company's website at [www.i80gold.com](http://www.i80gold.com). The PEAs in respect of Archimedes Underground, Mineral Point Open Pit, Cove, Granite Creek Underground, and Granite Creek Open Pit are each preliminary in nature and each includes an economic analysis that is based, in part, on inferred mineral resources. Inferred mineral resources that are considered too speculative geologically to have for the application of economic considerations applied to them that would enable them to be categorized as mineral reserves, and there is no certainty that the results of each PEA will be realized. Mineral resources do not have demonstrated economic viability and are not mineral reserves.
- 2) Gold equivalent ounces (AuEq oz) defined as recovered Au oz plus recovered Ag oz times the price ratio of Ag to Au.  $AuEq = Au \text{ recovered oz} + [(Ag \text{ recovered oz}) \times (\$27.25/\$2,175)]$ . LOM overall recoveries for Au and Ag are 78% and 41% respectively. Production defined as process recovered ounces.
- 3) Consolidated production estimates and average annual production targets include the Cove Project, Archimedes Underground Project, Mineral Point Open Pit Project, Granite Creek Underground Project, and Granite Creek Open Pit Project and are based on the most recent life-of-mine production schedules disclosed in the latest technical studies filed for each respective project and related property. These anticipated production figures are preliminary in nature and are based on mineral resources, which do not have demonstrated economic viability, and which are not mineral reserves. In addition, each of the foregoing technical reports are preliminary economic assessments/initial assessment that are preliminary in nature and each include an economic analysis that is based, in part, on inferred mineral resources. Inferred mineral resources are considered too speculative geologically to have for the application of economic considerations applied to them that would enable them to be categorized as mineral reserves. As such, there is no certainty that the production targets will be realized. The production target is also pending the completion of the autoclave refurbishment Class 3 engineering study (where a series of trade-off scenarios will be considered comparing full autoclave refurbishment to alternate toll milling and ore purchase agreement options that could potentially be available), Board approval, and the successful funding, development, and commissioning of the Company's Lone Tree autoclave processing facility. The production target presented herein is a Company goal and not a projection of results and should not be taken as production guidance.
- 4) Pending the completion of the autoclave refurbishment Class 3 engineering study (where a series of trade-off scenarios will be considered comparing full autoclave refurbishment to alternate toll milling and ore purchase agreement options that could potentially be available), Board approval, and the successful funding, development, and commissioning of the Company's Lone Tree autoclave.
- 5) Turquoise Ridge Complex gold mineral resource estimate of approximately 20 million ounces (110 Mt at 5.42 g/t Au) as at December 31, 2023 based on publicly filed technical reports of Barrick Gold Corporation available on SEDAR+ at [www.sedarplus.ca](http://www.sedarplus.ca) and [www.barrick.com](http://www.barrick.com). No qualified person of the Company has independently verified any mineral resource information in respect of the Turquoise Ridge Complex contained in this news release and such information is not necessarily indicative of the mineralization on the property subject to such technical reports.
- 6) Granite Creek Underground Project: Mineral resources have been estimated at a gold price of \$2,175 per troy ounce; Mineral resources have been estimated using gold metallurgical recoveries ranging from 85.2 to 94.2% for pressure oxidation and 40-70% for carbon-in-leach ("CIL") toll processing; Pressure oxidation cutoff grades range from 5.40 to 7.58 Au g/t (0.157 to 0.221 opt). The cutoff grade for CIL processing under the mineralized material sales agreement is 5.85 g/t (0.171 opt); The effective date of the mineral resource estimate is December 31, 2024; Mineral resources include drilling completed prior to December 31, 2022; Mineral resources, which are not mineral reserves, do not have demonstrated economic viability. The estimate of mineral resources may be materially affected by environmental, permitting, legal, title, socio-political, marketing, or other relevant factors; An inferred mineral resource is that part of a mineral resource for which quantity and grade or quality are estimated on the basis of limited geological evidence and sampling. Geological evidence is sufficient to imply but not verify geological and grade or quality continuity. An inferred mineral resource has a lower level of confidence than that applying to an indicated mineral resource and must not be converted to a mineral reserve. It is reasonably expected that the majority of inferred mineral resources could be upgraded to indicated mineral resources with continued exploration; and The reference point for mineral resources is in situ.

# ENDNOTES *CONTINUED*

- 7) This outlook target, is subject to various risks, uncertainties and assumptions, which may impact future performance and the Company's ability to achieve the results and targets discussed in this section. Please refer to "Cautionary Statement Regarding Forward-Looking Information" section. The Company may update this outlook depending on changes in metal prices and other factors.
- 8) This is a performance measure commonly used in the gold mining industry that is not defined under United States Generally Accepted Accounting Principles ("US GAAP"). This term should not be considered in isolation or as a substitute for measures prepared in accordance with US GAAP and should be read in conjunction with the Company's financial statements Please refer to the slide titled "Non-GAAP Financial Performance Measures in this presentation for more information.
- 9) Granite Creek Open Pit: The effective date of the Mineral Resources Estimate is December 31, 2024. The Qualified Persons for the estimate are Terre Lane QP-MMSA and Hamid Samari QP-MMSA of GRE. Mineral resources are reported at a 0.30 g/t cutoff, an assumed gold price of 2,040 \$/tr. oz, using variable recovery, a slope angle of 41 degrees, 6% royalty, heap leach processing cost \$9.04 per tonne (includes admin), CIL processing cost of \$17.22 per tonne (includes admin).
- 10) Archimedes Underground: Underground Mineral Resources have been estimated at a gold price of \$2,175 per troy ounce and a silver price of \$27.25 per ounce (Section 19.1). Mineral Resources have been estimated using pressure oxidation gold metallurgical recoveries of 96.8% and 89.5% for the 426 and Ruby Deep deposits respectively. Pressure oxidation cutoff grades are 5.06 and 5.48 Au g/t (0.148 and 0.160 opt) for the 426 and Ruby Deep deposits respectively. Detailed input mining, processing, and G&A costs are defined in Section 18.1. Units shown are metric. The contained gold ounces estimates in the Mineral Resource table have not been adjusted for metallurgical recoveries. Numbers have been rounded as required by reporting guidelines and may result in apparent summation differences. A Mineral Resource is a concentration or occurrence of solid material of economic interest in or on the Earth's crust in such form, grade or quality and quantity that there are reasonable prospects for eventual economic extraction. The location, quantity, grade or quality, continuity and other geological characteristics of a Mineral Resource are known, estimated or interpreted from specific geological evidence and knowledge, including sampling. An Inferred Mineral Resource is that part of a Mineral Resource for which quantity and grade or quality are estimated on the basis of limited geological evidence and sampling. Geological evidence is sufficient to imply but not verify geological and grade or quality continuity. An Inferred Mineral Resource has a lower level of confidence than that applying to an Indicated Mineral Resource and must not be converted to a Mineral Reserve. It is reasonably expected that the majority of Inferred Mineral Resources could be upgraded to Indicated Mineral Resources with continued exploration. Mineral Resources, which are not Mineral Reserves, do not have demonstrated economic viability. The estimate of Mineral Resources may be materially affected by environmental, permitting, legal, title, sociopolitical, marketing, or other relevant factors. Mineral Resources have an effective date of December 31, 2024. The reference point for Mineral Resources is in situ.
- 11) Mineral Point Open Pit: Mineral resources have an effective date of December 31, 2024. Mineral resources are not mineral reserves and do not have demonstrated economic viability. Mineral resources are the portion of Mineral Point that can be mined profitably by open pit mining method and processed by heap leaching. Mineral resources are below an updated topographic surface. Mineral resources are constrained to economic material inside a conceptual open pit shell. The main parameters for pit shell construction are a gold price of \$2,175/oz Au, a silver price of \$26.00/oz, average gold recovery of 77%, average silver recovery of 40%, open pit mining costs of \$3.31/tonne, heap leach average processing costs of \$3.47/tonne, general and administrative cost of \$0.83/tonne processed, gold refining cost of \$1.85/oz, silver refining cost of \$0.50, and a 3% royalty. Mineral resources are reported above a 0.1 g/t Au cutoff grade. Mineral resources are stated in situ. Mineral resources have not been adjusted for metallurgical recoveries. Reported units are metric tonnes. Prepared under the supervision of, and has been reviewed and approved by Aaron Amoroso, MMSA QP (01548QP) and Jonathan Heiner, P.E., SME-RM (4143808) of Forte Dynamics, Inc, and Tyler Hill CPG., Vice President Geology for the Company, who are all qualified persons within the meaning of NI 43-101 and S-K 1300.
- 12) Cove Underground Project: Mineral resources have been estimated at a gold price of \$2,175 per troy ounce and a silver price of \$27.25 per troy ounce; Mineral resources have been estimated using gold metallurgical recoveries ranging from 73.2% to 93.3% for roasting and 78.5% to 95.1 % for pressure oxidation; Roaster cutoff grades range from 4.15 to 5.29 Au g/t (0.121 to 0.154 opt) and pressure oxidation cutoff grades range from 3.83 to 4.64 Au g/t (0.112 to 0.135 opt); The effective date of the mineral resource estimate is December 31, 2024; Mineral resources, which are not mineral reserves, do not have demonstrated economic viability. The estimate of mineral resources may be materially affected by environmental, permitting, legal, title, socio-political, marketing, or other relevant factors; An inferred mineral resource is that part of a mineral resource for which quantity and grade or quality are estimated on the basis of limited geological evidence and sampling. Geological evidence is sufficient to imply but not verify geological and grade or quality continuity. An inferred mineral resource has a lower level of confidence than that applying to an indicated mineral resource and must not be converted to a mineral reserve. It is reasonably expected that the majority of inferred mineral resources could be upgraded to indicated mineral resources with continued exploration; and the reference point for mineral resources is in situ. Prepared under the supervision of, and has been reviewed and approved by Dagny Odell, P.E., (SME No. 2402150) Practical Mining LLC, and Tyler Hill CPG., Vice President Geology for the Company, who are all qualified persons within the meaning of NI 43-101 and S-K 1300.
- 13) Archimedes Open Pit: Mineral Resources have an effective date of December 31, 2024. Mineral Resources are the portion of Mineral Point that can be mined profitably by open pit mining method and processed by heap leaching. Mineral Resources are below an updated topographic surface (below Archimedes pit). Mineral Resources are constrained to economic material inside a conceptual open pit shell. The main parameters for pit shell construction are a gold price of \$2,175/oz Au, a silver price of \$26.00/oz, average gold recovery of 77%, average silver recovery of 40%, open pit mining costs of \$3.31/tonne, heap leach average processing costs of \$3.47/tonne, general and administrative cost of \$0.83/tonne processed, gold refining cost of \$1.85/oz, silver refining cost of \$0.50, and a 3% royalty (Section 19.1). Mineral Resources are reported above a 0.1 g/t Au cutoff grade. Silver revenues were not considered in the cutoff grade. Mineral Resources are stated as in situ. Mineral Resources have not been adjusted for metallurgical recoveries. Reported units are metric tonnes. Reported table numbers have been rounded as required by reporting guidelines and may result in summation discrepancies.
- 14) Lone Tree Open Pit: Estimated resources at the end of the fiscal year ended December 31, 2024, is shown in Table 1-1. These mineral resources are estimated using a gold price of \$2,175/oz Au and an open pit Cutoff grade of 0.62 g/T Au. More details about the estimated mineral resources are presented in section 14. Mineral resources are not mineral reserves and do not have demonstrated economic viability.
