This presentation has been prepared by Adyton Resources Corp (“Adyton” or the “Company”). The information contained in this presentation is for information purposes only and has been prepared for use in conjunction with a verbal presentation and should be read in that context.

The information contained in this presentation is not investment or financial product advice and is not intended to be used as the basis for making an investment decision. Please note that, in providing this presentation, Adyton has not considered the objectives, financial position or needs of any particular recipient. Adyton strongly suggests that investors consult a financial advisor prior to making an investment decision. It may not be reproduced, disseminated, quoted or referred to, in whole or in part, without the express consent of Adyton.

No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this presentation. To the maximum extent permitted by law, none of Adyton, its related bodies corporate, shareholders or respective directors, officers, employees, agents or advisors, nor any other person accepts any liability, including, without limitation, any liability arising out of fault or negligence for any loss arising from the use of information contained in this presentation.

This presentation includes “forward – looking statements” and “forward – looking information” within the meaning of securities laws of applicable jurisdictions (collectively “forward – looking statements”). Forward looking statements can generally be identified by the use of the words “anticipate”, “believe”, “expect”, “project”, “forecast”, “estimate”, “likely”, “intend”, “should”, “could”, “may”, “target”, “plan” “guidance” and other similar expressions. Indications of, and guidance on, future earning or dividends and financial position and performance are also forward-looking statements.

Such forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties and other factors, many of which are beyond the control of Adyton and its officers, employees, agents or associates, that may cause actual results to differ materially from those expressed or implied in such statement. Actual results, performance or achievements may vary materially from any projections and forward-looking statements and the assumptions on which those statements are based. Readers are cautioned not to place undue reliance on forward looking statements and Adyton assumes no obligation to update such information. Specific regard (amongst other things) should be given to the risk factors outlined in this presentation.

This presentation is not, and does not constitute, an offer to sell or the solicitation, invitation or recommendation to purchase any securities and neither this presentation nor anything contained in it forms the basis of any contract or commitment. This presentation is not an offer to sell, or a solicitation of an offer to buy, securities in the United States or in any other jurisdiction. No securities may be sold in the United States absent registration or an exemption from registration under the U.S. Securities Act of 1933 and applicable state law.

Non-IFRS Measures - The Company supplements its financial information reporting determined under International Financial Reporting Standards (IFRS) with certain non-IFRS financial measures, including cash operating costs, All-In Sustaining Cost, EBITDA, NPV, IRR and project payback. The Company believes that these measures provide additional meaningful information to assist management, investors and analysts in understanding the financial results and assessing our prospects for future performance.

Qualified Person

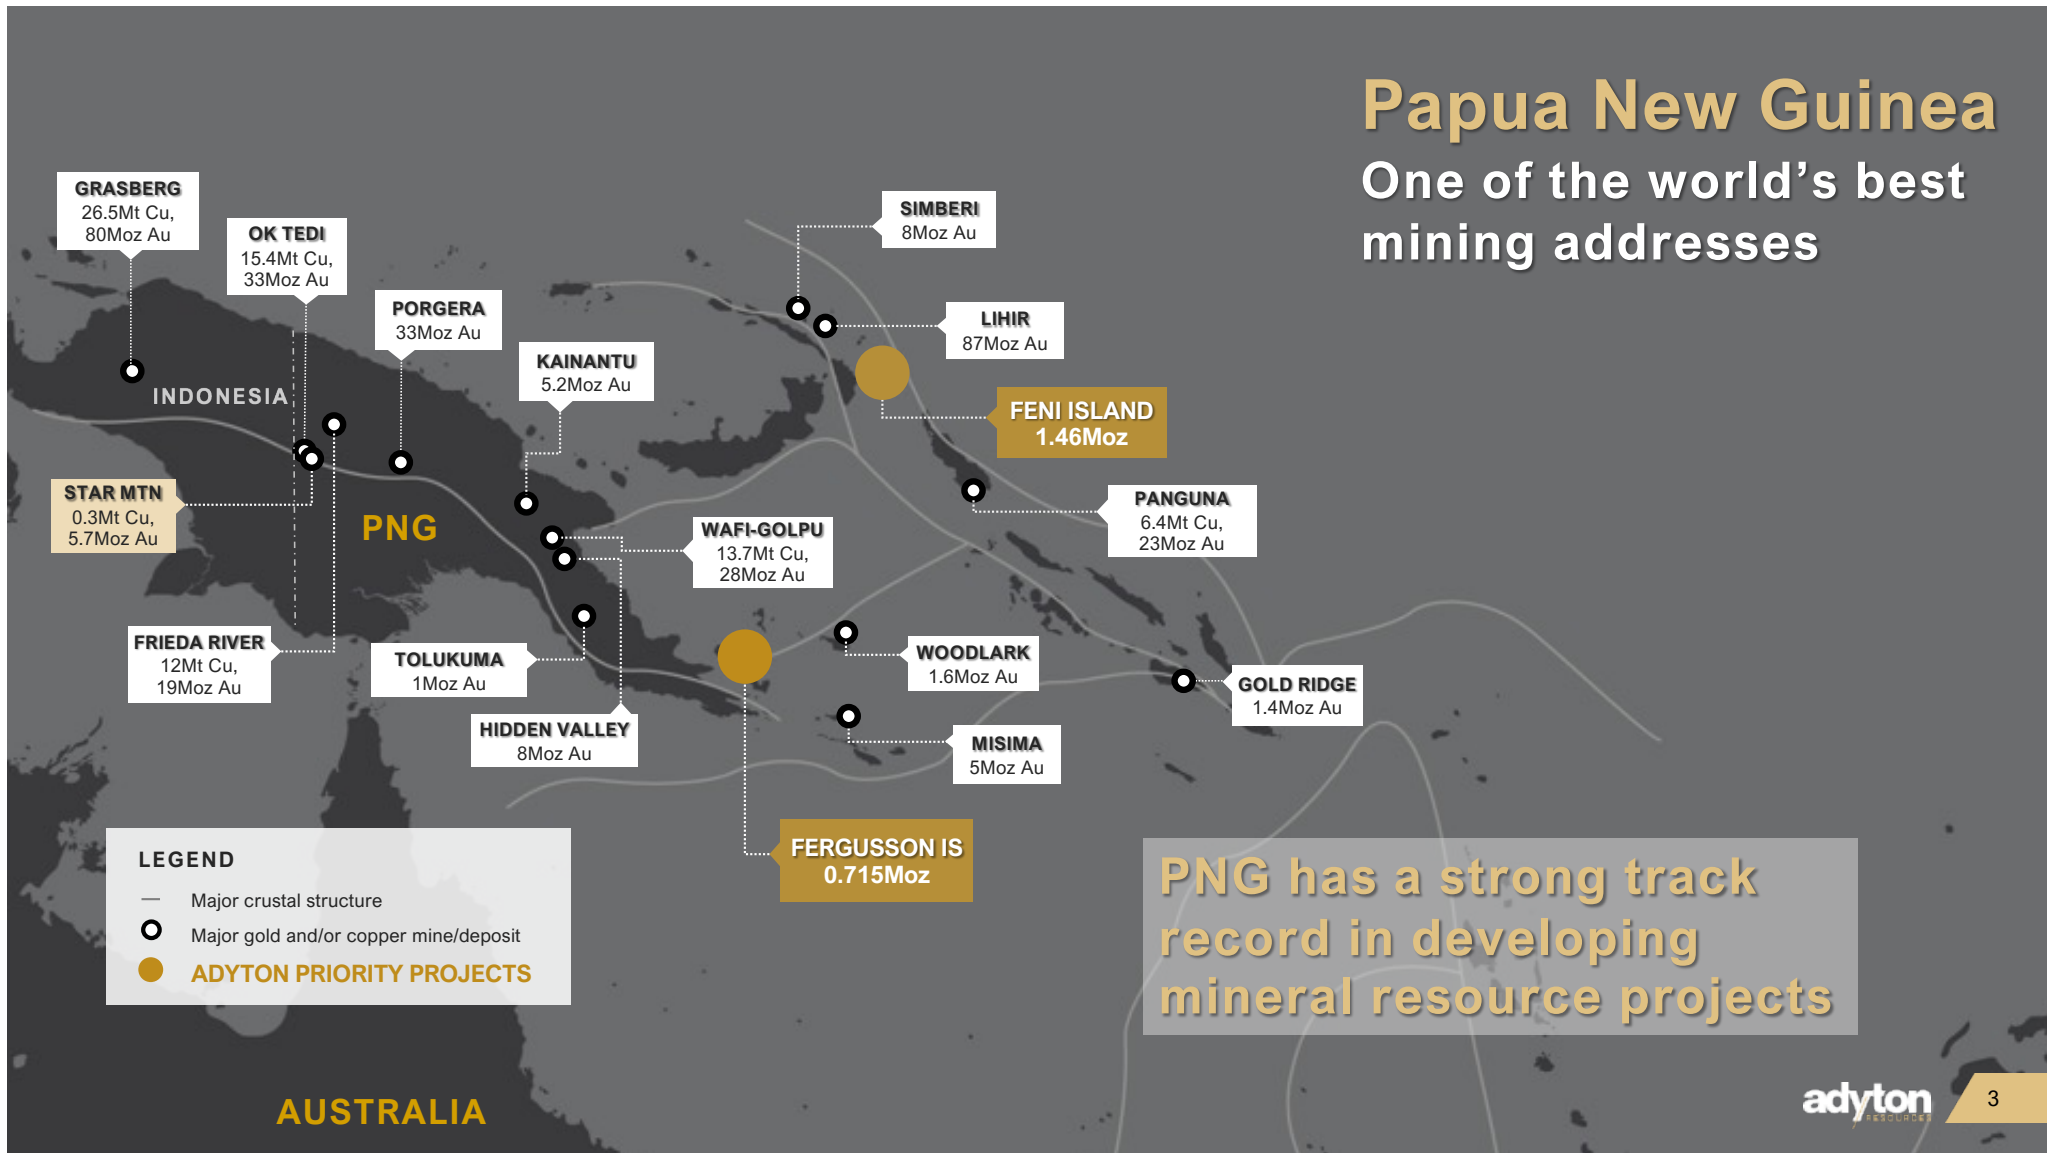

The information in this presentation has been reviewed by Dr Chris Bowden, PhD, GCME, FAusIMM(CP), FSEG, the Chief Operating Officer and Chief Geologist of Adyton, who is a “Qualified Person” as defined by National Instrument 43-101 - Standards of Disclosure for Mineral Projects (“NI 43-101”).

The Feni Island Project currently has a mineral resource prepared in accordance with NI 43-101 dated October 14, 2021. See the NI 43-101 technical report entitled “NI 43-101 Technical Report on the Feni Gold-Copper Property, New Ireland Province, Papua New Guinea” (the “Feni Technical Report”) dated October 14, 2021 and prepared for Adyton Resources by Mark Berry (MAIG), Simon Tear (MIGI PGeo), Matthew White (MAIG) and Andy Thomas (MAIG), each an independent mining consultant and “qualified person” as defined in NI 43-101, available under Adyton’s profile on SEDAR at www.sedar.com.

The Fergusson Island Project currently has a mineral resource prepared in accordance with NI 43-101 dated October 14, 2021. See the NI 43-101 technical report entitled “NI 43-101 Technical Report on the Fergusson Gold Property, Milne Bay Province, Papua New Guinea” (the “Fergusson Island Technical Report”) dated October 14, 2021 and prepared for Adyton Resources by Mark Berry (MAIG), Simon Tear (MIGI PGeo), Matthew White (MAIG) and Andy Thomas (MAIG), each an independent mining consultant and “qualified person” as defined in NI 43-101, available under Adyton’s profile on SEDAR at www.sedar.com.

Papua New Guinea

One of the world's best mining addresses

PNG has a strong track record in developing mineral resource projects

Corporate Snapshot

Board and Management

Sinton Spence
Chairman (PNG)

Principal of Sinton Spence Chartered Accountants, PNG's largest independent accounting firm.

David Irvine
Non-Executive Director (Australia)

Chief Executive Officer of Brisbane based Siecap Project Management and Advisory Group.

Michael Gray
Non-Executive Director (Canada)

Co-Founder of Agentis Capital Mining Partners.

Tim Crossley
Managing Director & CEO (Australia)

Former Deputy CEO of ASX-listed Gloucester Coal, and President and Chief Operating Officer (COO) at BHP Billiton's West Australian Iron Ore business.

Dr Chris Bowden
Chief Operating Officer

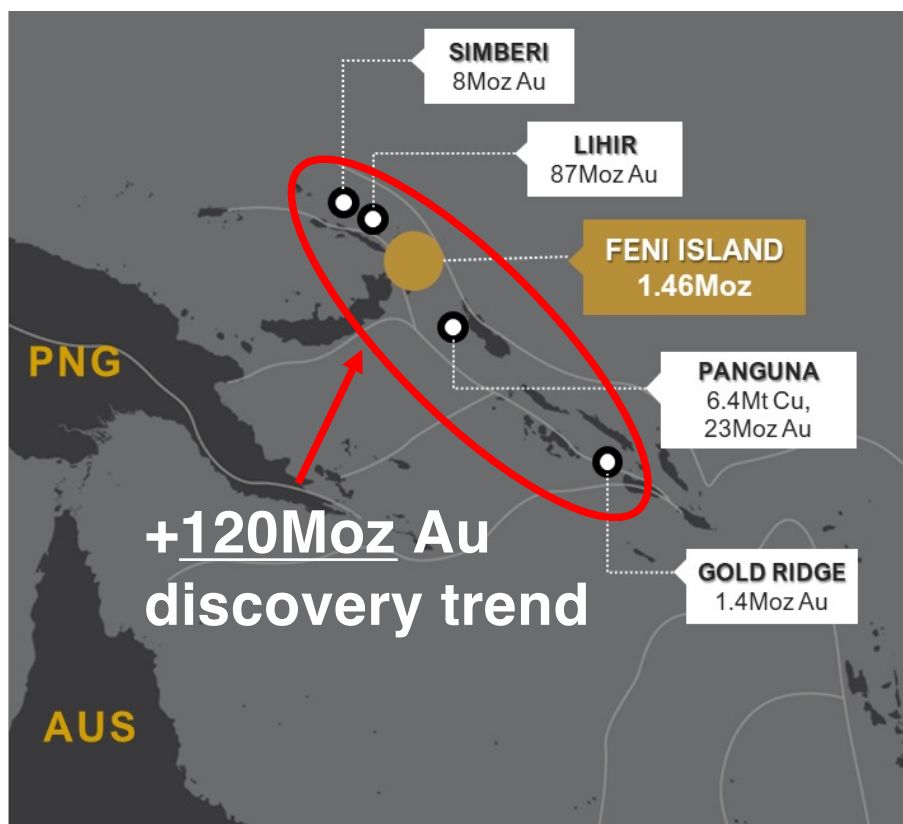

Former Exploration & General Manager ASCOM Precious Metals Mining (Ethiopia), Exploration Manager Southern Gold Ltd. (South Korea), Senior Geologist of Friedland/Ivanhoe Mines and recently Chief Geologist Megado Minerals Pty Ltd.

Chirag Patel
CFO & Co Sec (Canada)

Chartered Professional Accountant (CPA) and former PwC Audit & Assurance.

WHY ADYTON?

1. **Multi-million-ounce potential**, 100% interest, whole of island land position
2. **Location**: within the **>120Moz Au Lihir Island Chain** that includes the developed mines of Simberi, Lihir and Panguna – three giant Au+/- Cu deposits
3. **PNG expertise** with proven ore finding team
4. **Well-financed** with C\$20m plus in working capital, 100% for Feni Project. Fergusson JV 100% funding through to production.
5. **Drilling** underway since March 2025
6. **Island locations**: ease of access, landowner support

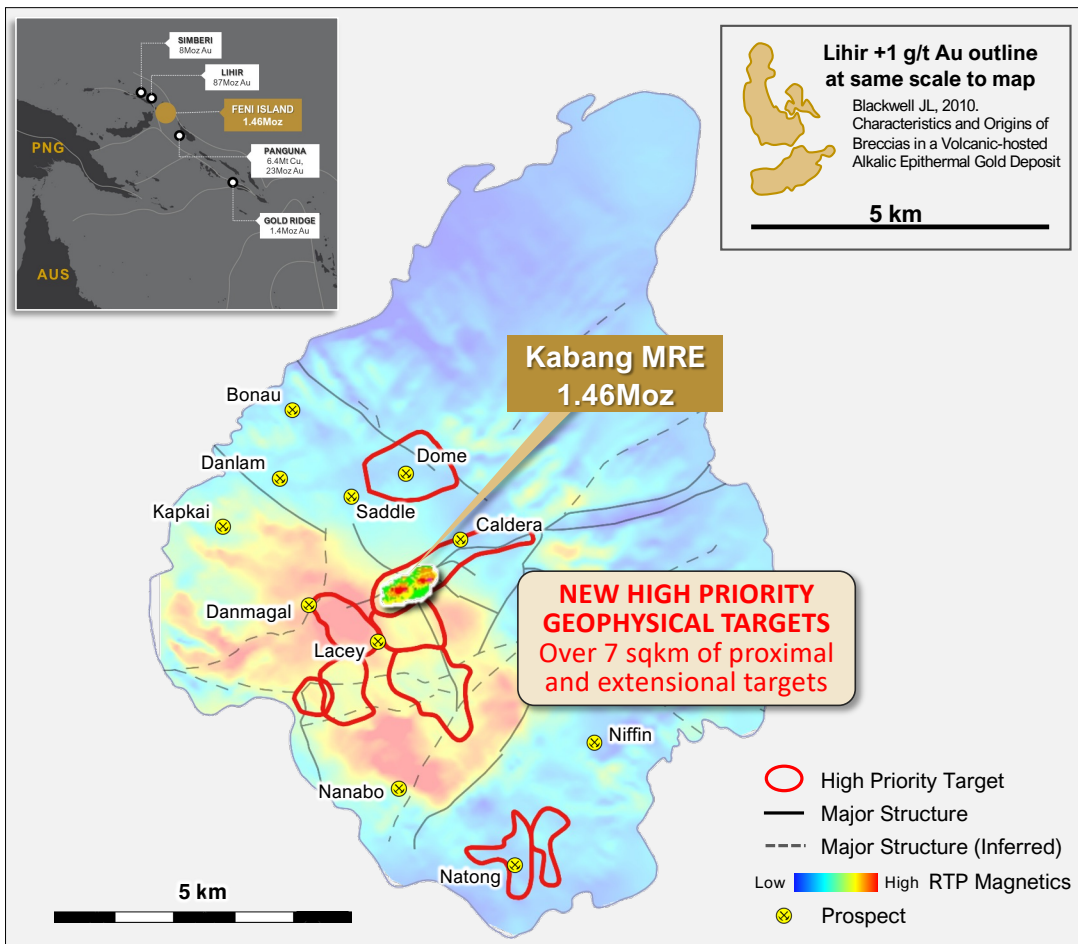

Feni has the hall marks of the style of projects the majors are looking for

Feni Island - Shares many similarities with Lihir Gold Deposit

- Within the gold prolific **>120Moz Lihir Island Chain**
- Similar host rock geology and age (ca. 0.5Ma)
- Similar mineralization styles:
 - > early porphyry-style
 - > **alkalic-epithermal bx/vn Au+/-Cu**
 - > late-stage maar/diatreme bx
- Both hosted within geothermally active extinct volcanos
- The key point of difference being Feni's mineralization is buried

Feni Island - Multiple Lihir-Style Au-Cu Targets

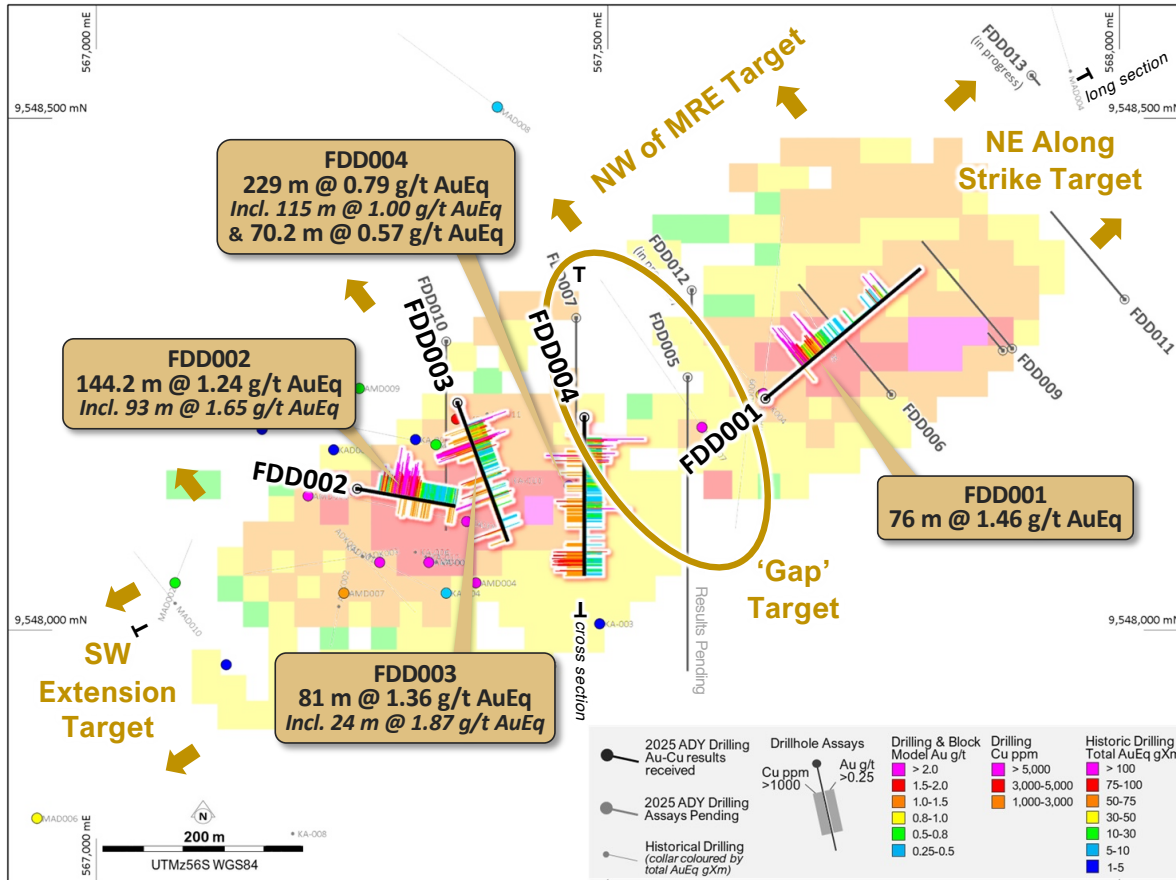

- Geophysics has identified several high-priority targets in addition to the existing Kabang Resource and current drilling focus area
- Significant upside scale exists with potential to fit multiple Lihir-sized ore bodies on Feni

In more detail:

- A central caldera complex occurs within a NW-SE (Lihir Island Chain parallel) trending pull-apart basin with low magnetic response.
- Within the caldera complex the Kabang, Dome, Saddle and Caldera targets are analogous to the structural and geological setting of the Lihir deposits.
- High reward gold-copper **alkalic-type epithermal** targets including Kabang (current MRE of 1.46 Moz Au) and its surrounding extensions (not drill tested), as well as Dome, Saddle and Caldera prospects, as well as high resolution drone targets.
- Magnetic data defines an extensive moderate to high magnetic signature in the southwest typical of a multiphase intrusive complex. **Porphyry-style** targets also appear to occur coincident with intrusive centers including Danmagal prospect.
- In addition, distal low sulphidation epithermal prospects with high grade surface rock chips occur in areas of low magnetic response at Kapkai, Natong, Niffin and Danlam-Bonau.

Feni Island - Drill Targets: Immediate and Forward Focus Catalysts

Short Term:

- Kabang Resource Upgrades
 - ❑ “Gaps” within the historical block model
 - ❑ Along strike extensions: “NE”, “SW”, “NW”
 - ❑ At depth targets

Medium Term:

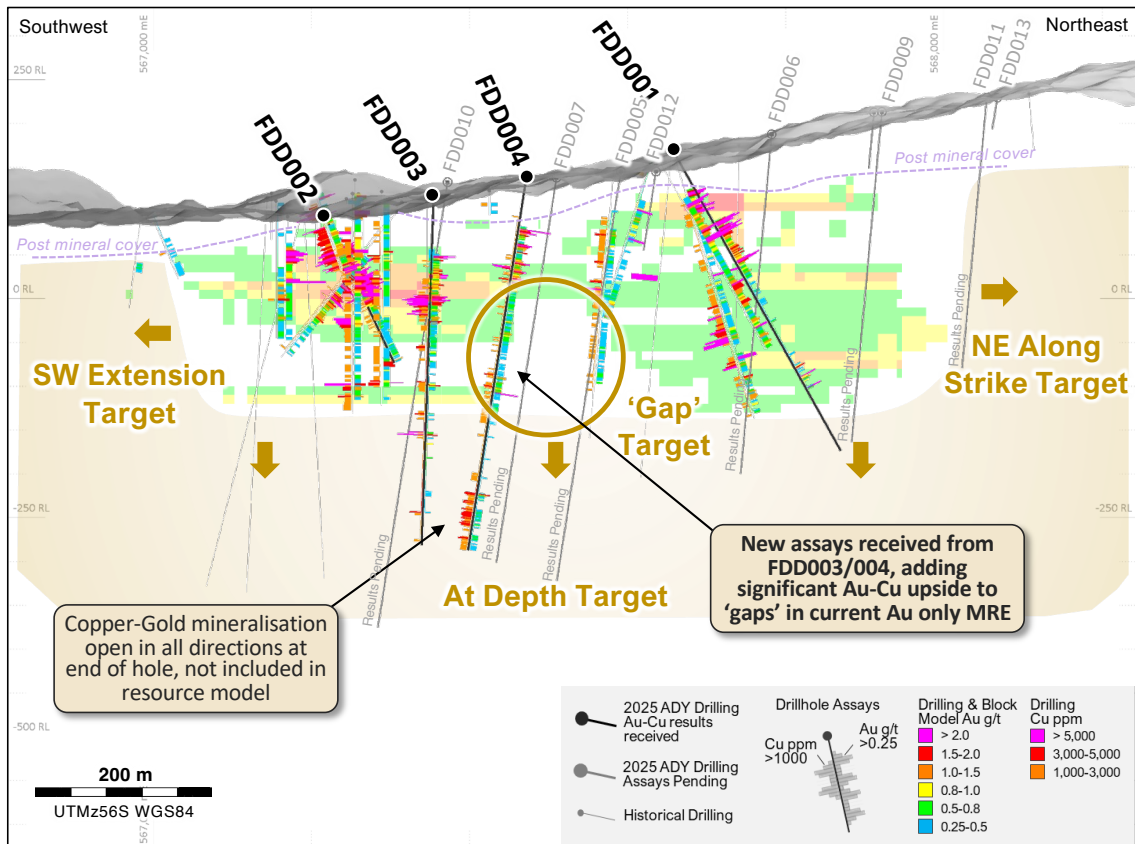

- Kabang Resource Expansion
 - ❑ As develop better understanding of controls to Au+Cu mineralization at Kabang, expand the near-MRE drill targeting

Longer-Term:

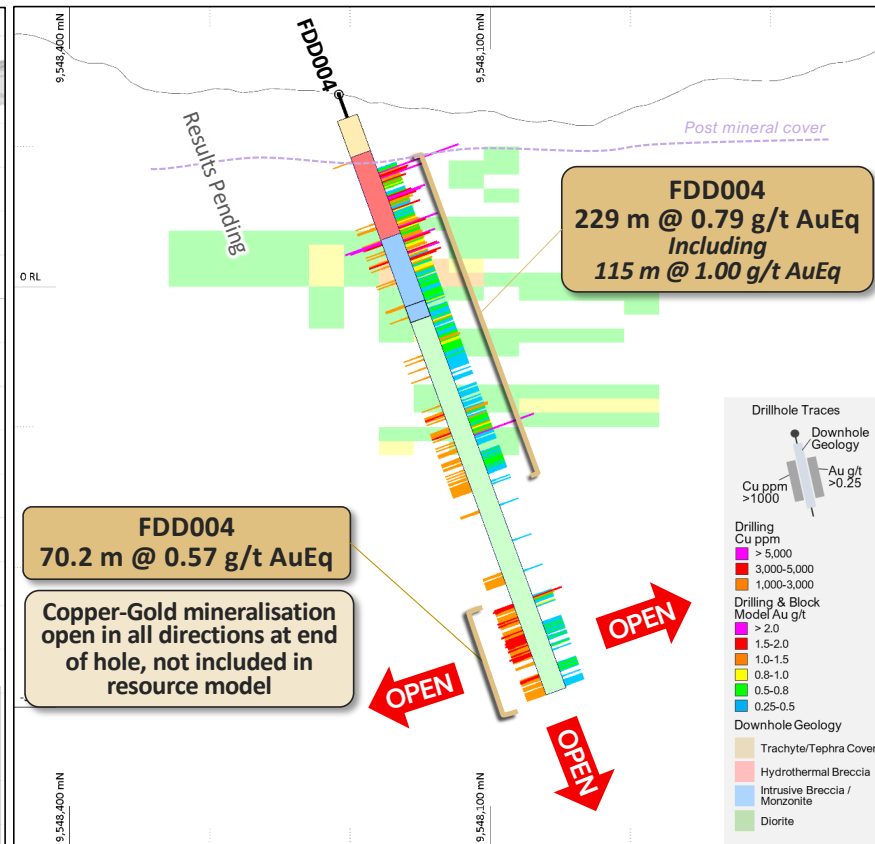

- New Discovery Targets
 - ❑ Rest of Feni Island prospects and targets

Feni Island - Solid 1.46 M oz (Au only) Foundational Resource to grow from

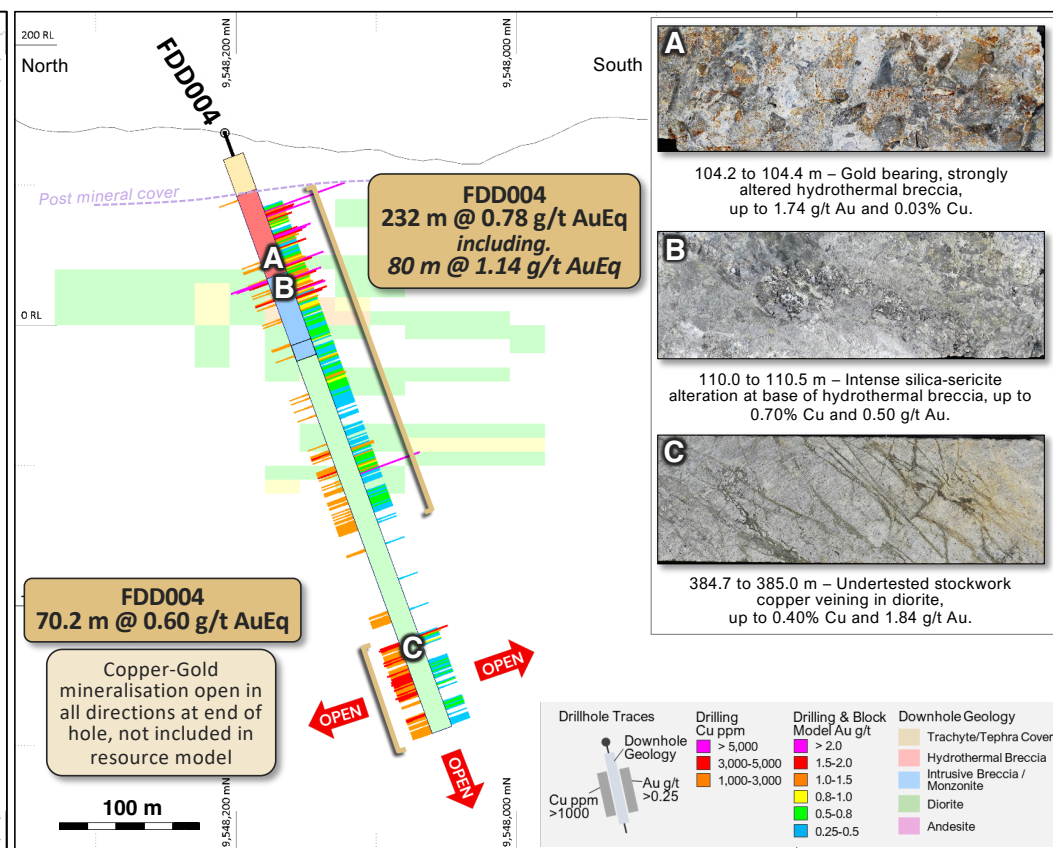

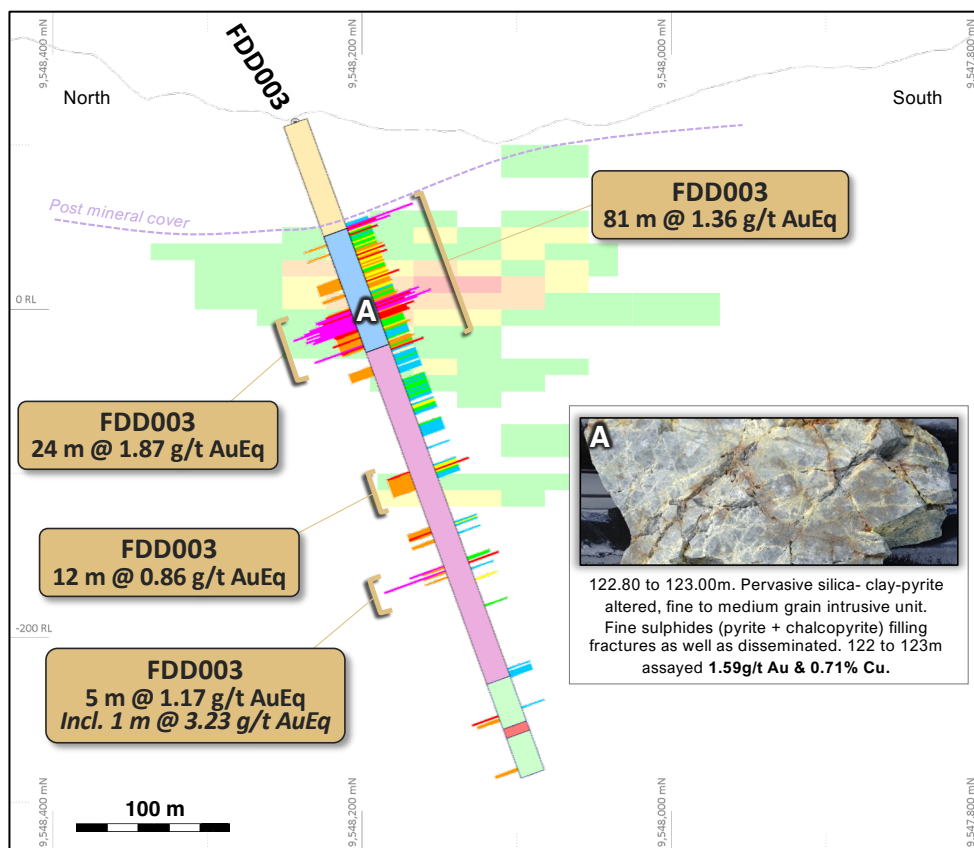

Long Section

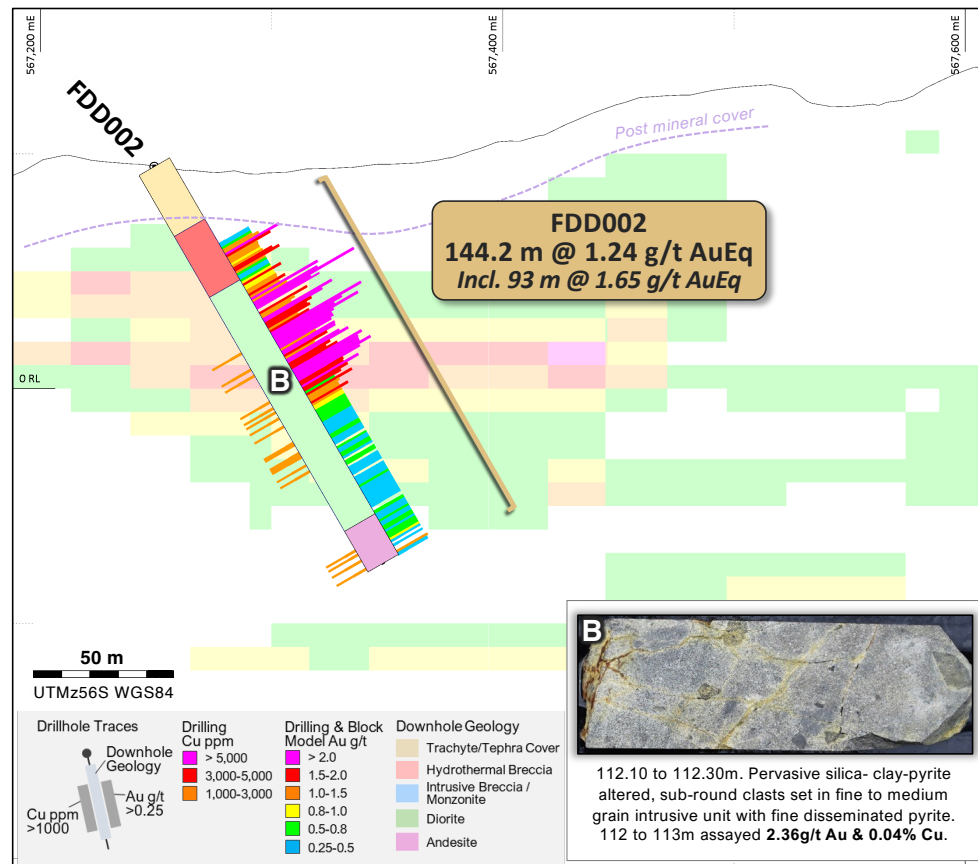

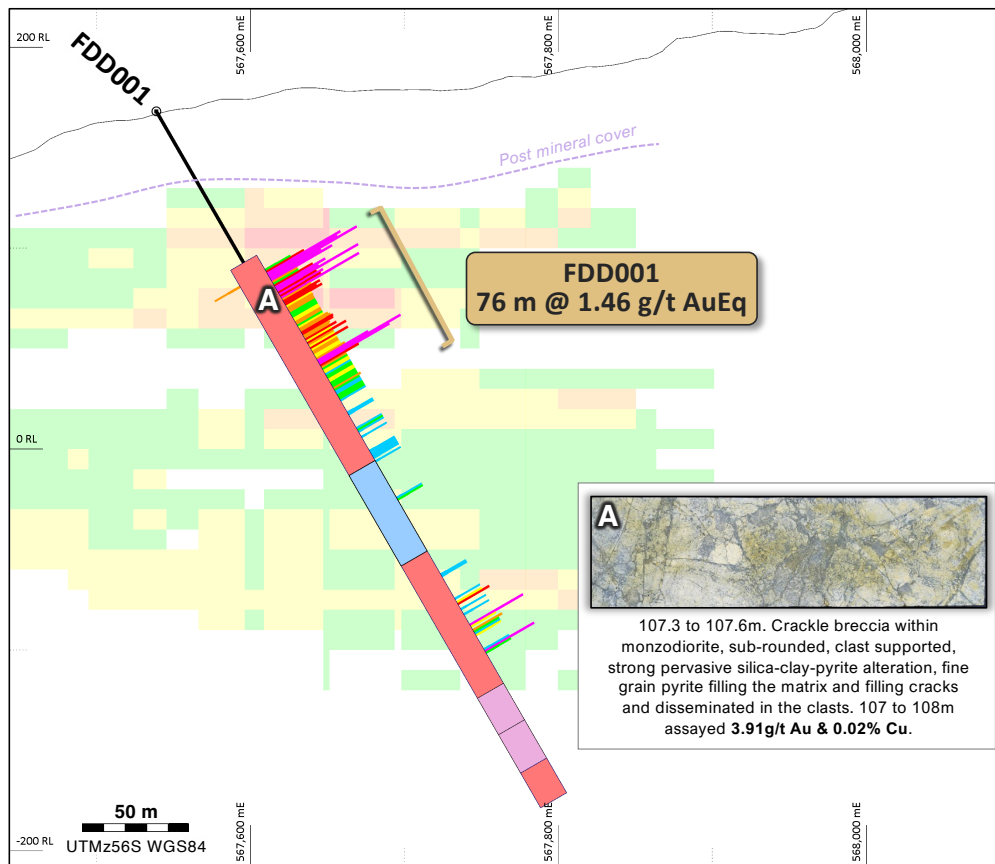

Cross Section

Plan view of drillholes and historical block model at the Kabang mineralized corridor

Feni Island - Significant Copper Assays not included in the Kabang MRE

- Only a small number of historical holes were assayed for copper — yet several holes that were assayed for copper returned significant copper assays over large down-hole intervals.
- Previous drilling by Adyton and explorers prior to Adyton confirmed the presence of near surface gold-copper mineralization and high-grade copper-gold mineralization beneath and proximal to the existing Kabang MRE.
- Copper is not included in the current Kabang MRE of 1.46 Moz Au as most historical holes were not assayed for copper.
- In holes that were gold and copper was assayed, the Au Eq. grade (gold and copper) is up to 56% higher than Au only grades.
- The gold-copper assay results of previous Adyton drilling, which was proximal to the existing MRE, were not included in the MRE despite the long and significant gold-copper intercepts.
- **Inclusion of copper in the next Kabang MRE, plus inclusion of existing Adyton drill holes, is likely to have a very significant positive impact on Au Eq. grade and total Au Eq. resource.**

HOLE ID	From (m)	To (m)	Interval (m)	Au (g/t)	Cu (%)	Au.eq (g/t)	% Difference Au versus Au Eq.

Feni Island - Island vs Highland Location

Feni Island - Mobilisation for drill programme

Feni Island

Community Engaged and Fully Supportive

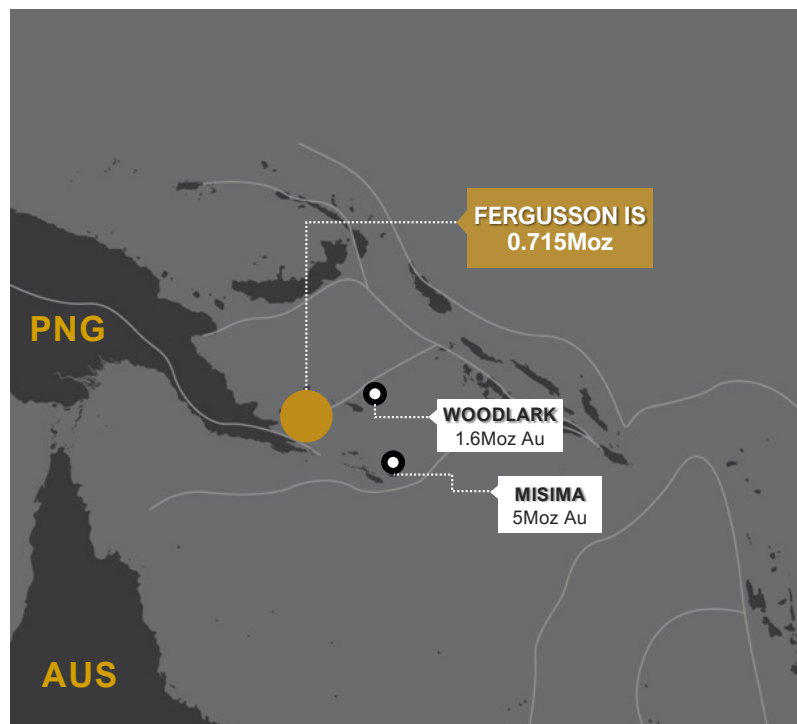

Dr Chris Bowden Adyton COO welcomed by Church leader Oscar Robtank during predrilling customary ceremony

Feni community leaders performing pre - drilling customary welcome

Fergusson Island - Two advanced exploration assets

- Located at the western end of the Woodlark Basin, which hosts significant gold mineralization: Misima (**5Moz**), Woodlark (**1.6Moz**), as well as Gameta and Wapolu (**0.715Moz**) on Fergusson Island.
- Epithermal gold mineralization shares many similarities to the Misima epithermal gold deposit, including being fault hosted with plunging high-grade shoots.
- Significant historical work including several drill campaigns allowed for mineral resource estimates, metallurgical studies and completion of feasibility studies at Wapolu and Gameta.
- Wapolu previously operated as a small gold mine and remnants of the original mine infrastructure remain.
- Favorable distance and infrastructure between projects allows for simple dig, float and barge operation.
- Fergusson Island is easily accessible with low-cost barge access. Landholders are supportive of Adytons exploration and potential development plans.

Fergusson Island

Shallow Gold Resource with Focus on Near Term Production

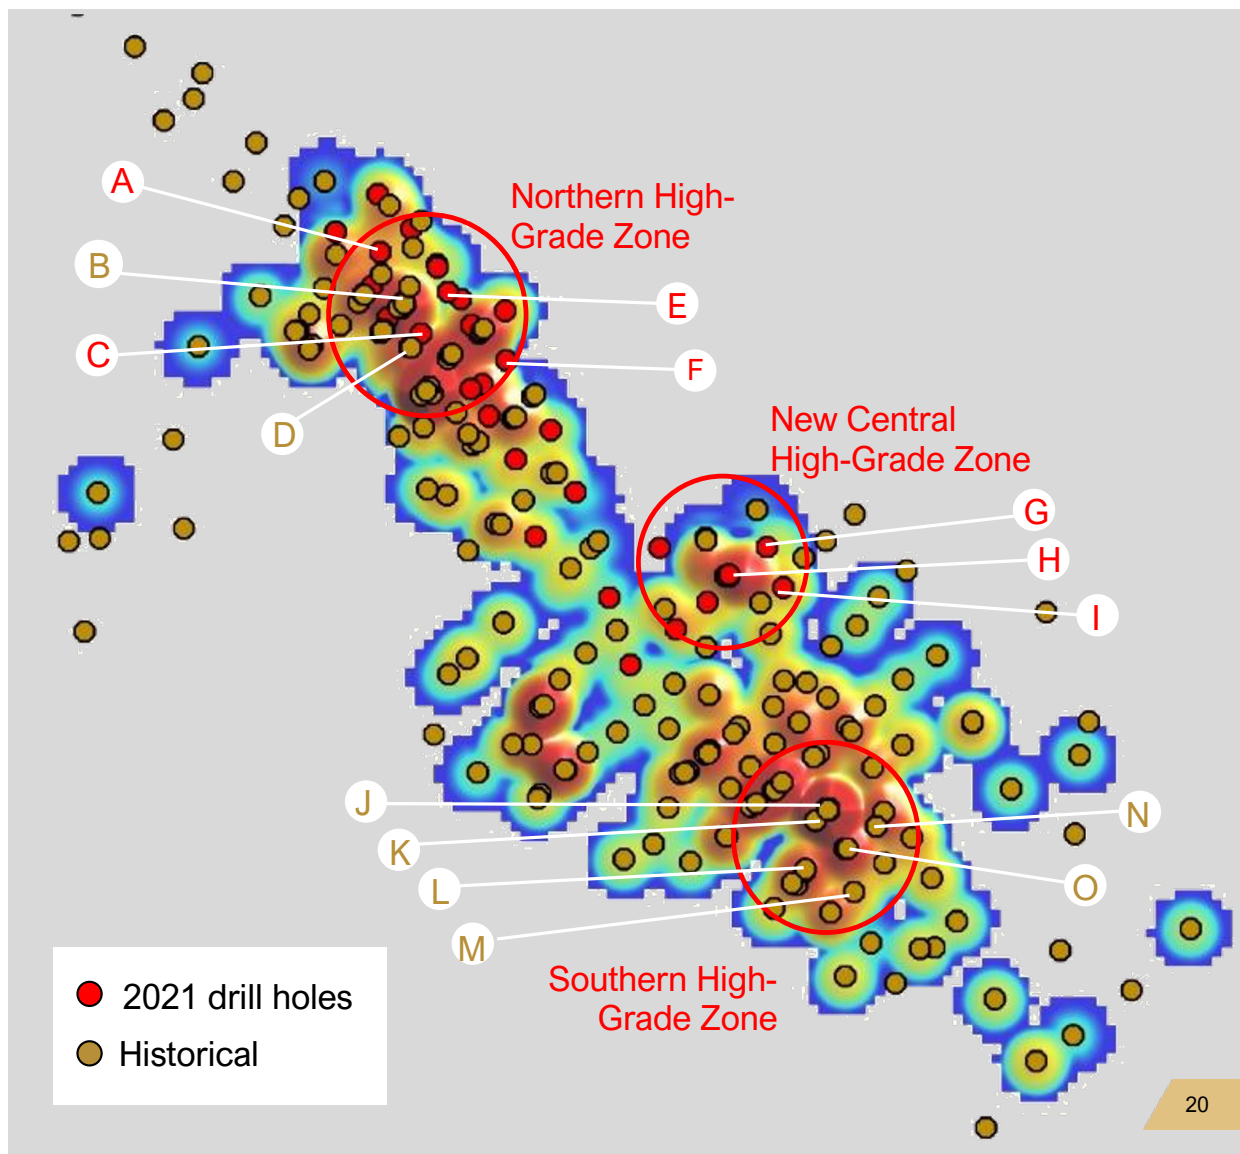

- Focus on restart of mining at **Wapolu** and resource definition and development to mining at **Gameta**
- Resources at Wapolu and Gameta are open at depth, down dip and along strike, providing robust targets for potential resource expansion.
- ADY completed a 38 hole (3400 m) diamond drill program at Gameta in 2021 which defined a number of new exploration targets outside of the existing resource.
- Drilling recommenced at Wapolu in December 2024 and was completed in March 2025. The program is funded by JV partner EVIH and is focused on upgrading confidence in the MRE to enable submission of a ML application, permitting and restart of operations
- On completion of the Wapolu program drill rigs have been relocated to Gameta and drilling commenced early May 2025.

TSXV: ADY | OTC: ADYRF

Fergusson Island

Gameta Gold Deposit MRE and Metallurgy

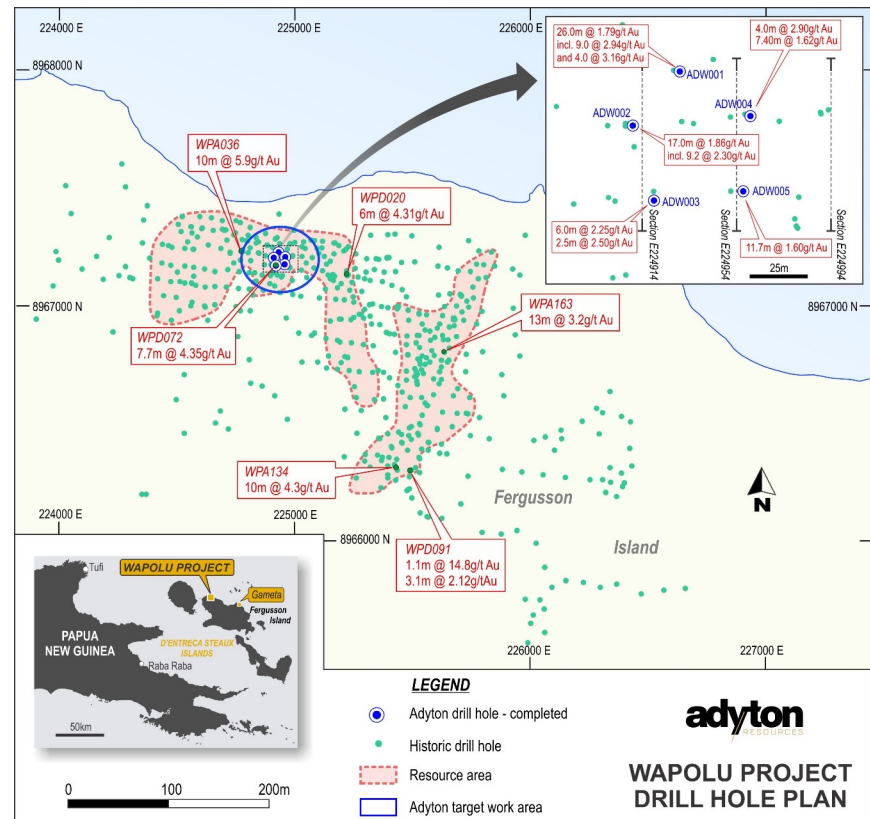

- 30 kms from Wapolu – **potential to combine resources** and execute dig and ship operations
- The Gameta deposit had a current mineral resource estimate 513,000 oz Au, is open in all directions and has significant upside potential.
- An inferred MRE of 10.5 M tonnes @ 1.01g/t Au for **340,000oz Au**
- An indicated MRE of 4.0 M tonnes @ 1.33g/t Au for **173,000oz Au**
- Historical exploration and drilling - large number of shallow holes drilled (late 1980's / early 1990's)
- Preliminary unoptimized metallurgy suggest flotation is a viable method of recovery with
 - 86.9% of gold presenting to a concentrate with a grade of 22.3 g/t Au
 - 84.6% of silver presenting to a concentrate with a grade of 32.9 g/t Au.

Fergusson Island

Wapolu Gold Deposit — Gameta Sister Deposit

- The Wapolu deposit has a current inferred mineral resource estimate of **5.8m tonnes @ 1.06 g/t Au for 200,000oz Au**.
- A small scale mine (1995 to 1997) produced >9000 oz but closed due to historically low prices.
- A limited (400 m) diamond drill program by Adyton in 2021 and confirmed near surface high grade gold mineralization with intercepts including:
 - ADW002: 17 m @ 1.86 g/t Au *incl.* 9.2 m @ 2.30 g/t Au from surface;
 - ADW001: 26 m @ 1.79 g/t Au *incl.* 9.0 m @ 2.94 g/t Au from surface.
- The system is open in all directions and there are multiple high reward near surface targets along strike and down dip.

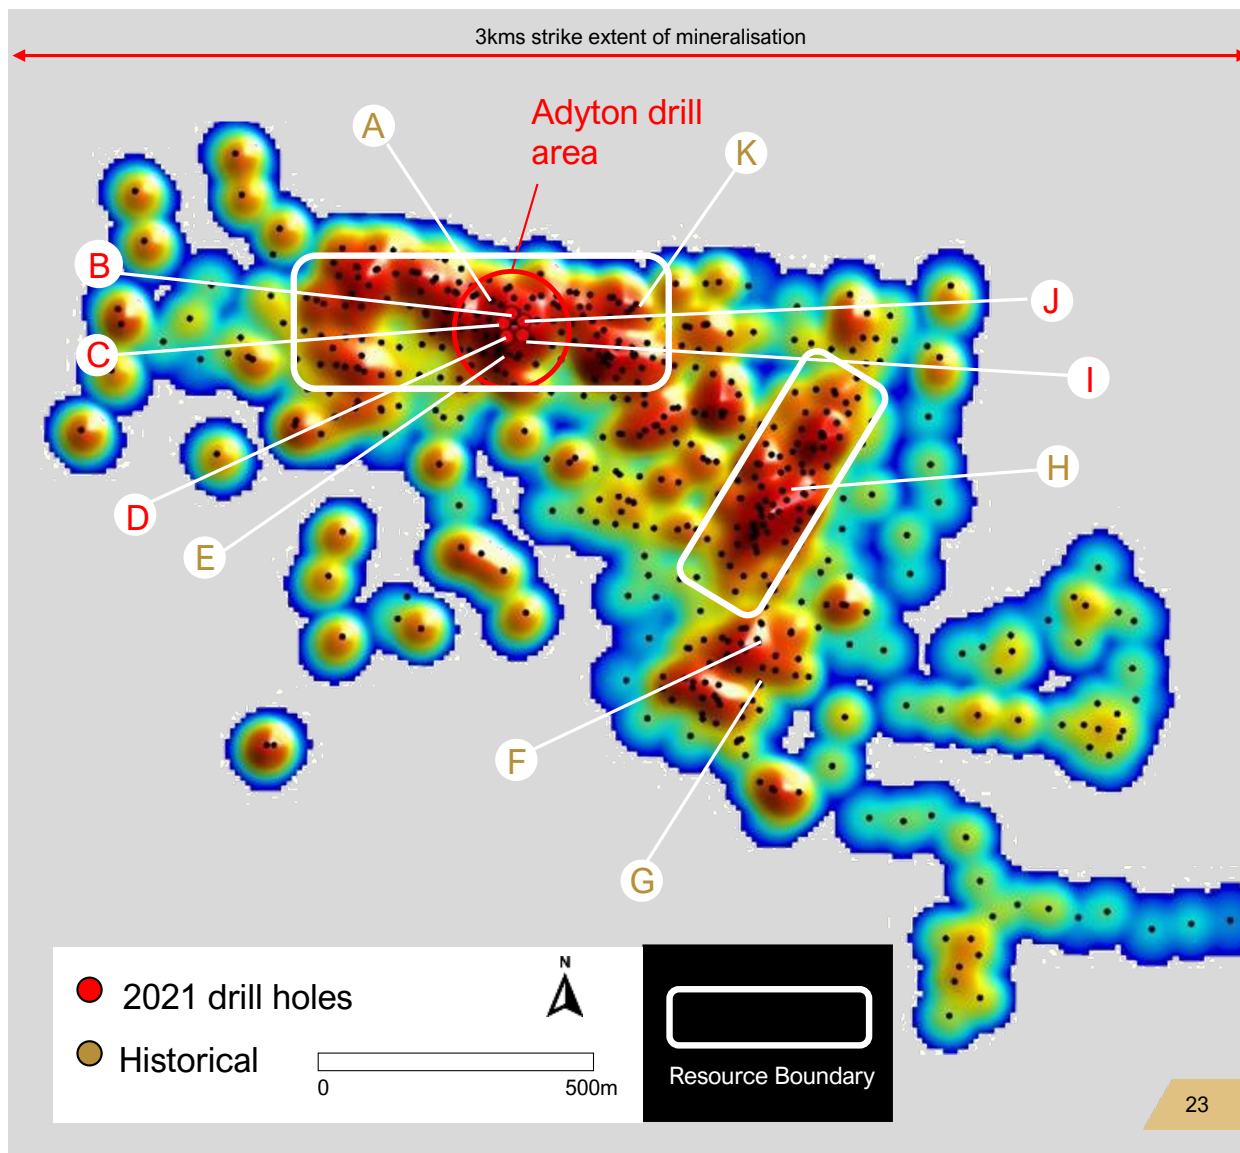

Fergusson Island

Wapolu - Historical drilling results

Fergusson Island

Wapolu - Resource Infill and Step-Out Drilling Ongoing

Drill rig set up on hole number 1 at Wapolu

- The current drill program at Wapolu comprises up to 7000 m of angled diamond drilling (>4000 m completed)
- A number of holes will be drilled as an infill program within the existing MRE to better constrain resource categories.
- Mineralization is open along strike and at depth and drilling will also target these extensions to known mineralization.
- Drilling will also provide samples for metallurgical test work and geotechnical study.
- Adyton aims to complete an updated MRE by September 30, 2025 and then immediately submit an ML application.
- The company has commenced steps to apply for ML/EP permits with Mineral Resources Authority team scheduled visit completed early March 2025 with full support of Adyton.
- Preparation for relocation of drill rigs to Gameta currently underway in April 2025.

East Vision Investment Holdings (EVIH) JV Gameta/Wapolu Gold Project

- EVIH committed to invest US\$9.5M, with US\$8.5M to fund project feasibility and permitting to shovel ready status and earn a 50% stake in Mayur Exploration PNG Pte Ltd (MRE). Shareholding of MRE once earn in complete will be 50% Adyton and 50% EVIH.
- US\$1M to be paid to the company, 50% (US\$500,000) paid to the Company as a commitment fee, a further US\$500,000 to be paid to the company on completion of undertaking a bulk sample
- EVIH agree to provide shareholder loan (8% interest) to MRE to fund the development of a minimum 2Mtpa ROM project, EVIH to be repaid via a preferential cash sweep
- Expected timeline to achieve shovel ready status - 1 to 2 years
- Feasibility and bulk sample planning underway

PNG – Key facts

PNG has a strong track record in developing mineral resource projects

PAPUA NEW GUINEA

- Strong and successful track record of developing world class Mineral Resource projects
- Continued large oil, gas, infrastructure, agriculture and resource investments
- Centralized government with a Westminster system of parliamentary democracy
- Infrastructure continuing to develop with ample services and suppliers
- Strong G to G relationship with Australia

FINANCIALS

- GDP average growth of circa 4% since 2000 with 26% of GDP exclusively from natural resources
- In 2019 a GDP of USD\$24.97 billion was recorded
- Corporate tax rate of 30%
- PNG Mineral Resources Authority and third party royalties – 2% + 0.5% production levy

MINING REGULATIONS

- EL – Exploration lease: Initial term of up to 2 years with renewal increments of 2 years
- SML – Special Mining lease: Large mines up to 40 years with specific renewal provisions
- ML – Mining lease: Initial 20 year term up to 60km² and renewal in 10 year increments
- PNG Government has a one time right upon conversion from EL to ML or SML to purchase up to a 30% interest in project at sunk cost

Investment Summary

Near-term gold production, from two strategic assets, Wapolu & Gameta drilling commenced in December 2024, plus feasibility, met, and Mining Licence applications.

Favourable mining regime in PNG and supportive social license to operate
Transparent, supportive and ready workforce – potential access to geothermal power resources.

All Mineral Resources are OPEN at all 3 sites. Plus new gold-copper discovery potential exists across all projects including Gameta, Wapolu, and Feni

Strategically located assets – island based in highly prospective address in PNG allows much easier and safer logistics and future operations.

Funded through to potential cashflow no immediate need to raise dilutive capital from the market, can potentially self-fund growth organically.

Copper upside not yet captured
Significant known copper results to be included in the next MRE at Feni, as well as the target for imminent drilling campaign.

Thank you
