

Mining Americas Inc.

**Building a U.S. Focused
Intermediate Gold Producer**

TSX: MAI | OTCQX: MAIFF

September 2026 Presentation

Forward Looking Statement & Cautionary Note

Cautionary Statement Regarding Forward Looking Statements

This presentation contains “forward-looking information” within the meaning of applicable Canadian securities laws. Forward-looking information includes statements that use forward-looking terminology such as “may”, “could”, “would”, “will”, “should”, “intend”, “target”, “plan”, “expect”, “budget”, “estimate”, “forecast”, “schedule”, “anticipate”, “believe”, “continue”, “potential”, “view” or the negative or grammatical variation thereof or other variations thereof or comparable terminology. Such forward-looking information includes, without limitation, statements regarding the growth of Mining Americas Inc. (“**Mining Americas**”, “**MAI**”, or the “**Company**”) into a mid-tier producer; execution of the Company’s capital markets strategy; the anticipated impacts and benefits of the Acquisition on the Company’s business, operations, results of operations, and financial position; statements regarding future mineral production; expectations, strategies and plans for its properties and the Nevada Assets; the Company’s planned exploration, development and production activities; adding or upgrading MAI resources and mineral reserves; future replacement of mineral reserves; developing new mineral deposits; future capital and operating costs; the costs and timing of future exploration and development; the timing, receipt and maintenance of necessary approvals, licenses and permits from applicable governments, regulators or third parties; estimates for future prices of gold and other minerals; future valuation and performance of the Company’s securities; expectations regarding liquidity, capital structure, and competitive position; and any other statement that may predict, forecast, indicate or imply future plans, intentions, levels of activity, results, performance or achievements.

Forward-looking statements reflect the Company’s expectations and assumptions about the future based on management’s perception of historical trends, current conditions, and expected future developments, and other factors that management believes are appropriate in the circumstances as at the date of this presentation. In preparing the forward-looking information, the Company has made various material assumptions, including, but not limited to: the ability of the Company and Equinox to obtain all necessary consents and approvals required to complete the Acquisition and the timing for completion thereof; closing of the financing transactions to fund the cash purchase price for the Acquisition; the anticipated impact of the Acquisition on the operations of the Company; the projected financial and operational information of the Company upon completion of the Acquisition; the Company’s present and future business strategies and operating performance; anticipated future production and cash flows; local and global economic conditions and the environment in which the Company will operate in the future; the price of gold other key commodities; projected mineral grades; international exchange rates; anticipated capital and operating costs; and the availability and timing of required stock exchange, regulatory, governmental and other approvals. These assumptions are inherently subject to significant business, social, economic, political, regulatory, competitive and other risks and uncertainties, contingencies and other factors that could cause actual actions, events, conditions, results, performance or achievements to be materially different from those projected in the forward-looking information. Many assumptions are based on factors and events that are not within the control of the Company and there is no assurance they will prove to be correct.

Forward-looking information involves known and unknown risks, uncertainties and other factors, and does not guarantee future performance. Such factors include risks related to the closing of the Acquisition and the concurrent financing; risks related to the financial impact that tariffs placed on Canada or Mexico by the United States and risks related to retaliatory tariffs placed on the United States by either Canada or Mexico; risks related to new members of management of the Company, and the risks described in the “Risk Factors” section of the Company’s annual management’s discussion and analysis dated December 31, 2025, and the Company’s annual information form dated May 7, 2025, and the Company’s other continuous disclosure documents, and with respect to the Nevada Assets, the risk factors as described in the annual management discussion and analysis of Calibre Mining Corp. (“Calibre”) for its financial year ended December 31, 2024, and the annual information form of Calibre dated March 24, 2025, all of which are available on SEDAR+ at www.sedarplus.ca. Although the Company has attempted to identify important factors that could cause actual actions, events, conditions, results, performance or achievements to differ materially from those described in forward-looking information, there may be other factors that cause actions, events, conditions, results, performance or achievements to differ from those anticipated, estimated or intended. There can be no assurance that forward-looking information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such information. Accordingly, readers should not place undue reliance on forward-looking information.

Forward-looking information contained herein is made as of the date of this presentation or as of the date indicated, and the Company disclaims any obligation to update or revise any forward-looking information, whether as a result of new information, future events or results or otherwise, except as and to the extent required by applicable law. The Company expressly disclaims any obligation to update or revise any such forward-looking statements.

The scientific and technical information in this presentation is derived from the following technical reports prepared in accordance with National Instrument 43-101 – Standards of Disclosure for Mineral Projects (“NI 43-101”) by the following “qualified persons” (as such term is defined in NI 43-101) : (i) NI 43-101 Technical Report titled “Mineral Resource Update and Preliminary Economic Assessment of the La Fortuna Gold Project, Durango State, Mexico” by CSA Global, dated July 13, 2018; (ii) NI 43-101 Technical Report titled “Preliminary Economic Assessment and Mineral Resource Estimate for the Cerro de Oro Project” dated Jan 5th, 2023; (iii) NI 43-101 Technical Report titled “Mineral Resource Estimate for the Santana Project, Sonora, Mexico” dated October 16th, 2023; (iv) NI43-101 Technical Report titled “Los Verdes Cu/Mo Project – Preliminary Economic Assessment” prepared by Golder Associates Ltd for Virgin Metals Ltd and dated May 2012; (v) NI 43-101 Technical report titled “Preliminary Feasibility Study for the Copperstone Project, La Paz County, Arizona, USA” dated September 2026; (vi) In a news release dated May 27, 2026, the Company announced the results of a pre-feasibility study on the Copperstone project. A technical report for the Copperstone PFS is being prepared in accordance with NI 43-101 and will be filed under the Company’s profile on SEDAR+ and on the Company’s website. (vii) “NI 43-101 Technical Report on Resources and Reserves at Pan Gold Mine, White Pine County, Nevada” dated March 5, 2026; and Technical Report on the Gold Rock Project (prepared for Fiore Gold Ltd.), Nevada USA prepared by APEX Geoscience Ltd and John T. Boyd Company dated April 2020 and amended September 2021.

The Preliminary Economic Assessments (PEA) discussed in this presentation are preliminary in nature, that include inferred mineral resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as mineral reserves. Inferred mineral resources are subject to uncertainty as to their existence and as to their economic and legal feasibility. The level of geological uncertainty associated with an inferred mineral resource is too high to apply relevant technical and economic factors likely to influence the prospects of economic extraction in a manner useful for evaluation of economic viability. There is no certainty that the preliminary economic assessment will be realized. Economic studies will need to be completed prior to accurate guidance and projections being provided.

Mining Americas Overview

Building a Leading, U.S. Focused Intermediate Gold Producer

Investment Highlights

Junior Gold Producer with Peer-Leading Production Growth

- Cash flowing gold production with significant margins at spot prices
- ~35 koz gold in 2026 ramping towards +150 koz by 2028
- Peer-leading production growth: **consensus 87% CAGR 2026-28 and 72% CAGR 2026-29**

Strong Balance Sheet and Cash Flow to Fund Growth

- US\$43M cash balance at Q2 2026, US\$30M excess capacity on revolving credit facility¹
- Balance sheet and cashflow from Pan to fund Copperstone, Gold Rock, and Cerro de Oro
- 2026 guidance: 32–38 koz gold production at AISC of \$1,850–2,000/oz, solid cash flow at spot gold prices

Permitted, High-Return, Low-Capital Growth Projects

- Copperstone, Gold Rock, and Cerro de Oro are permitted for development
- Copperstone and Gold Rock are both brownfield projects with past production
- All projects are well below the industry average capital intensity

Committed Management Team of Proven Mine and Company Builders

- Over C\$9 million insider buying since October 2025 Nevada assets acquisition
- Deep expertise in mine development, operations, and corporate growth
- Successful track record delivering low-cost gold projects in the Americas

Emerging Intermediate Gold Producer

Peer-leading, organically funded growth 2026-2028

**Average Annual Production
Capacity for MAI Projects
(koz Au/yr)**

Further Upside Across Portfolio

- Copperstone open pit potential
- Santana restart/expansion potential
- Exploration upside along strike at Gold Rock
- Illipah exploration potential

Recent Achievements & Upcoming Milestones

Pan Operating Complex

Open-pit, conventional heap-leach operation

Pan Mine Highlights

- Open-pit, Carlin-style gold deposit using conventional mining and heap leach processing, restarted in 2017 with continuous production (35-42 koz/year)
- +25M tonnes of additional stacking capacity on current leach pad (3-4 years capacity at current mining rates)
- P&P Reserves (September 2025) : 222 koz at 0.32 g/t; M&I Resources (incl. P&P): 240koz at 0.33 g/t; *Plus additional 33 koz of recoverable heap leach inventory*
- **2026 guidance:** 32–38 koz gold production at cash costs of \$1,750–1,900/oz gold and AISC of \$1,850–2,000/oz
- As at Q2 2026, YTD production of 17 koz at cash costs of \$1,740/oz and AISC of \$1,930/oz
- **Won the Nevada Mining Association’s Operator Safety Award in 2016-2020, 2024, and 2025.** No medical treatment injury since 2023, and surpassed 5 years no lost time injuries

Pan Mine Historical Results

	2022	2023	2024	2025
Ore on Pad (kt)	3,030	4,593	4,333	4,649
Head grade (g/t)	0.34	0.36	0.40	0.35
Au Prod. (koz)	42	41	35	35
Cash Cost (US\$)	\$1,405	\$1,429	\$1,473	\$1,636
AISC (US\$)	\$1,421	\$1,479	\$1,683	\$1,697

Pan Mine reserve replacement since 2017

Pan Mining Rates (ore + waste)

Pan Operating Complex

Gold Rock Opportunities

Gold Rock Project Highlights

- Located in Nevada, ~12 km SE of Pan Mine, along Battle Mountain trend; 100% owned by Mining Americas
- Brownfields: Alta Gold mined and produced 52 koz gold from the EZ Junior pit from 1989 to 1994
- 2021 PEA outlines a 6.5 year mine life with average annual production of ~55koz Au
- Indicated resource of 403koz at 0.66 g/t Au & Inferred resource of 84koz at 0.87 g/t

Exploration Highlights

- Gold Rock hosts Carlin-type mineralization in folded and faulted Paleozoic carbonate rocks, similar to major Nevada gold belts
- Gold is structurally controlled along a regional fault zone, with alteration features like silicification and decalcification
- The project has strong potential for expansion, with multiple untested targets along a 16.5 km mineralized trend.
- Fiore Gold reported drill highlights including 45.7 m of 1.00 g/t gold and 41.1 m of 0.90 g/t gold, confirming near-surface and deeper mineralization continuity

Heap Leach Project Scenario

- Fully permitted and bonded
- Compared to 2021 PEA, MAI contemplating heap leaching scenario without VAT leaching. Dedicated two-stage crushing and stacking, leach pad and adsorption plant at Gold Rock, and trucking the loaded carbon to Pan for desorption and recovery.
- This simplified, synergistic scenario is expected to result in lower capex by removing VAT leaching circuit, with potential gold recoveries similar to those experienced at Pan.
- MAI owns crushing equipment and grasshopper conveyors in Mexico, currently refurbishing and will be transported to Gold Rock, for capex savings

Copperstone Project

2026 Pre-Feasibility Study Highlights

Initial 6.3-Year Mine Life

- **291 koz** gold produced
- **\$57M** low initial capital
- **46 koz/yr** average annual gold production
- **54 koz/yr** peak annual production in year 2
- **\$1,064/oz** LOM average total cash costs
- **\$1,338/oz** LOM average AISIC

Low initial capital due to significant existing infrastructure including:

- 4 km of underground development
- Processing facilities including crushing plant
- Tailings storage facility
- Admin buildings, workshop, warehouse, assay lab
- Grid power connection and transformer

TSX: MAI | OTCQX: MAIFF | [miningamericas.gold](https://www.miningamericas.gold)

Base Case **\$3,500/oz** gold price

\$341M after-tax NPV5%

111% after-tax IRR

1.1 years payback period

Spot Case **\$4,500/oz** gold price

\$503M after-tax NPV5%

160% after-tax IRR

0.75 years payback period

Copperstone Project

2026 Pre-Feasibility Study Highlights

PFS LOM Tonnes and Grade

PFS LOM Annual Production

Copperstone Project

Resource Conversion and Exploration

Resource Conversion

- There are **328 koz gold M&I** and **52 koz gold Inferred not included in Reserves**
- Some resources were excluded from mine plan and not converted to reserves because they are above the existing pit-bottom elevation (~152m from surface), and may be more economical to mine via open pit methods in the future
- Infill drilling to occur largely from underground starting in 2027 to update R&R in 2028

Underground Exploration

- Step-out drilling from underground down-dip of the plunging mineralization, and exploration drilling can test the Southwest Target near the Cyprus Decline to the west

Open Pit Potential

- Two initial zones of interest – West OP and East OP zones
- 2026 RC drill program mostly testing West zone target, with historical results including: **70m grading 4.3 g/t Au**, **35m grading 3.1 g/t Au**, and **49m grading 1.2 g/t Au**
- Open pit mining would require additional permitting, but could potentially be done as a separate heap leach facility on site, concurrent with underground mill production

Classification	Tonnes (kt)	Au Grade (g/t)	Contained Gold (koz Au)
Measured	2,198	5.08	359
Indicated	1,856	4.54	271
Total Measured & Indicated	4,054	4.83	630
Inferred	401	4.04	52

Classification	Tonnes (kt)	Au Grade (g/t)	Contained Gold (koz Au)
Proven	1,052	5.06	172
Probable	882	4.61	131
Total Proven & Probable	1,934	4.87	303

Cerro de Oro Overview

Federal Permit Approvals Received

Location Map

Initial 8.2-year Mine Life

- **477 koz** gold produced
- **58 koz/yr** average annual gold production
- **\$842/oz** LOM average total cash costs
- **\$151M** NPV_{5%} at \$1,600/oz
- **\$28M** low initial capital
- **65 koz/yr** average annual gold production years 1-4
- **\$873/oz** LOM average AISC
- **\$718M** NPV_{5%} at \$4,000/oz

Simple open pit, heap leach gold project

- Inferred MRE at **\$1,600/oz Au**: 67Mt grading 0.37 g/t Au containing **790 koz Au**
- Inferred MRE at **\$1,900/oz Au**: 78Mt grading 0.35 g/t Au containing **865 koz Au**
- Mining rate of 20,000 tpd
- **LOM strip ratio of 0.30:1**

Competitive Positioning

Poised for re-rating to Junior/Intermediate Producer Peer valuation multiples

Market Capitalization (US\$B)
