SEPTEMBER 2026

UNLOCKING ONE OF **THE WORLD'S LARGEST PRECIOUS METALS DEPOSITS**

DISTRICT SCALE OPPORTUNITY IN A TIER-1 JURISDICTION,
POISED FOR THE NEXT CHAPTER

hycroftmining.com

DISCLAIMER

NASDAQ | HYMC

Financial Projections

This presentation contains financial forecasts regarding certain financial metrics of the Company. These projections should not be relied upon as necessarily indicative of future results. The independent auditor of the Company has not audited, reviewed, compiled, or performed any procedures with respect to the projections and has not expressed any opinion or provided any assurance thereon. Hycroft undertakes no obligation to update or revise the projections. The assumptions and estimates underlying the prospective financial information are inherently uncertain and subject to significant business, economic, and competitive risks that could cause actual results to differ materially from those projected. There can be no assurance that the forecasts will be achieved.

Cautionary Note Regarding Forward-Looking Statements

This corporate presentation contains "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, Section 21E of the Securities Exchange Act of 1934, as amended, and the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical fact, included in this corporate presentation that address activities, events or developments that we expect or anticipate will or may occur in the future are forward-looking statements. These include, but are not limited to, statements regarding future business strategy, plans and goals, competitive strengths, the advancement and development of the Hycroft Mine, the results and implications of metallurgical analysis and test work, and business growth.

Forward-looking statements are often identified by future or conditional words such as "estimate," "plan," "anticipate," "expect," "intend," "believe," "target," "budget," "may," "can," "will," "would," "could," "should," "seeks," "scheduled to" and similar words or expressions but the absence of these words does not mean that a statement is not forward-looking. Forward-looking statements are based on current expectations, estimates and projections that involve a number of risks and uncertainties, which could cause actual results to differ materially from those reflected in the statements. The risks include, but are not limited to: (i) risks related to changes in our operations at the Hycroft Mine, including risks associated with the cessation of mining operations at the Hycroft Mine; uncertainties concerning estimates of mineral resources; risks related to the lack of a completed feasibility study; risks related to metallurgical test work and process development; risks related to obtaining and maintaining necessary permits and regulatory approvals; and risks related to our ability to re-establish commercially feasible mining and processing operations; and (ii) industry-related risks, including fluctuations in the price of gold and silver; the commercial success of, and risks related to, our exploration and development activities; uncertainties and risks related to our reliance on contractors and consultants; and the availability and cost of equipment, supplies, energy or reagents.

Any exploration target described herein does not represent, and should not be construed to be, an estimate of a mineral resource or mineral reserve. Ranges of potential tonnage and grade (or quality) of an exploration target are conceptual in nature; there has been insufficient exploration of the relevant property or properties to estimate a mineral resource, and it is uncertain if further exploration will result in the estimation of a mineral resource.

These and other risks may cause actual results to differ materially from those expressed or implied by the forward-looking statements, and the occurrence of one or more of these events or circumstances, alone or in combination with others, may have a material adverse effect on our business, cash flows, financial condition and results of operations. Please see the "Risk Factors" outlined in our Annual Report on Form 10-K for the year ended December 31, 2025, and in other reports filed with the SEC, for more information about these and other risks. You are cautioned not to place undue reliance on forward-looking statements, which speak only as of the date of this corporate presentation. The Company undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by applicable law.

Cautionary Statements Regarding the S-K 1300 Technical Report Summary and Initial Assessment with Economic Analysis and Mineral Resources

The Initial Assessment referenced in this presentation, which was filed with the U.S. Securities and Exchange Commission on June 2, 2026, is a preliminary technical and economic study that indicates the economic potential of the mineralization to support the disclosure of mineral resources at the Hycroft Mine. However, the Initial Assessment does not constitute a feasibility study or pre-feasibility study, does not demonstrate economic viability, and does not support a development decision. Additional project planning and design are required.

As used herein, the terms "initial assessment," "PEA," "mineral reserve," "mineral resource," "measured mineral resource," "indicated mineral resource," and "inferred mineral resource" are defined in accordance with Subpart 1300 of Regulation S-K ("S-K 1300"). The Initial Assessment does not include the conversion of mineral resources to mineral reserves. Under S-K 1300, mineral resources may not be classified as mineral reserves unless a qualified person determines they can be the basis of an economically viable project.

Investors are specifically cautioned not to assume that any part or all of the mineral deposits (including any mineral resources) will ever be converted into mineral reserves. In addition, estimates of inferred mineral resources have a high degree of uncertainty as to their existence and may not be converted to a mineral reserve. Investors are cautioned not to assume that all or any part of an inferred mineral resource exists, that it can be the basis of an economically viable project, or that it will ever be upgraded to a higher category. Likewise, investors are cautioned not to assume that all or any part of measured or indicated mineral resources will ever be converted to mineral reserves.

No Offer or Sale of Securities

This presentation is for general informational purposes only and does not constitute a formal offer to sell or a solicitation of an offer to buy any securities of the Company in any jurisdiction. It should not be relied upon as investment advice.

No Representations or Warranties

No representation or warranty, express or implied, is made by Hycroft or any of its affiliates, directors, officers, employees, or advisers as to the accuracy, completeness, or reasonableness of the information in this presentation. All liability for any errors, omissions, or misstatements is expressly disclaimed. This presentation is not intended as investment, tax, or legal advice. Certain information is derived from third-party sources believed to be reliable, but no warranty is made as to its accuracy.

Industry and Market Data

Industry and market data are from third-party sources and have not been independently verified by the Company. All dollar amounts are expressed in US dollars unless otherwise stated.

WHY INVEST IN HYCROFT?

WORLD-CLASS SCALE

Among the world's largest gold and silver deposits

FINANCIAL STABILITY

US\$221M Cash and No Debt¹

EXPLORATION UPSIDE

High-grade discoveries that are open in all directions, only 15% of acreage explored

ADVANCING TO PRODUCTION

Near-term decision on the most attractive path forward

TOP MINING JURISDICTION

Nevada, USA, a Tier-1 jurisdiction

MEANINGFUL LEVERAGE

Significant leverage to rising gold and silver commodity prices

TOP INVESTORS

Increased institutional ownership signals conviction in the asset, reinforced by inclusion in major indices

DIVERSE EXPERIENCE

Expanded team and strengthened Board who have the experience to deliver

1. At June 30 2026.

NEVADA – THE WORLD’S TOP MINING JURISDICTION¹

NASDAQ | HYMC

DEEP,
EXPERIENCED
LABOR MARKET

PROJECT ADVANCING TOWARDS OPTIMAL PATH

NASDAQ | HYMC

RE-STARTING EXISTING HEAP LEACH PROCESSING

NASDAQ | HYMC

THE OPPORTUNITY:

- Historical 2019-2021 operating history
- Assessing the economic viability of the historical leach material as part of the broader development plan
- Existing pads on site are available: North/Jungo, Brimstone
- RC drilling underway to evaluate the restart decision near-term

LEACHING WILL ALWAYS BE A PART OF PRODUCTION. THIS ASSESSMENT IS TO DECIDE OPTIMAL TIMING, BE THAT WITH THE RE-START OF MINING ACTIVITIES, OR SOONER.

OPTION 1 | HIGH-GRADE UNDERGROUND MINING

NASDAQ | HYMC

Brimstone visible silver
HD24-6010, 0.3m at 20,280 g/t Ag

THE OPPORTUNITY

- Advance high-grade ounces forward in the mine life
- Up to multi-thousand g/t intercepts over 20–40 meter true widths at Brimstone and Vortex
- High-grade silver-bearing domain at Brimstone and Vortex¹: 90.2 Moz silver and 299,000 oz gold
- Underground declines would be used for both exploration and production and would improve drill efficiency and cost

EXPLORATION DECLINES IMPROVE DRILLING EFFICIENCY
AND ACCELERATE ACCESS TO THE HIGH-GRADE SYSTEMS

1. Measured + Indicated Mineral Resource, as of January 2026. See page 9 of the S-K 1300 Technical Report Summary and Initial Assessment for more details.

CONCEPTUAL UNDERGROUND MINE DESIGN

NASDAQ | HYMC

BRIMSTONE AND VORTEX MINED TOGETHER

DEVELOPMENT APPROACH

- Two independent declines
- Simultaneous development of both systems
- Brimstone contributes higher-grade feed
- Vortex contributes greater tonnage
- Long-hole open stoping, with selective cut-and-fill

OPTION 2 | OPEN-PIT MINING AND PROCESSING

NASDAQ | HYMC

THE OPPORTUNITY:

- Multi-decade mine life at scale, one of the largest gold-silver deposits globally
- PEA on POX processing of the sulfide resource outlines attractive economics with significant leverage to rising gold and silver prices
- Assessing roasting as an alternative processing method, which would generate third revenue stream of sulfuric acid
- Simultaneous open-pit and underground hybrid mining options to be assessed, which is common in the jurisdiction

DETERMINING THE HIGHEST VALUE PATH TO UNLOCK THE SULFIDE RESOURCE, WITH SIMULTANEOUS OPEN-PIT AND UNDERGROUND HYBRID MINING OPTIONS BEING ASSESSED

TECHNICAL REPORT (PEA) SUMMARY¹

NASDAQ | HYMC

CONVENTIONAL POX PROCESSING PROVES ATTRACTIVE ECONOMICS

VALUE

\$4.3 Billion (after-tax NPV₅)²

16.9% IRR

LEVERAGE

\$10.0 Billion (after-tax NPV₅)³

30.1% IRR

ATTRACTIVE PAYBACK

4.7 years post-tax (base case)

2.9 years post-tax (spot prices)

MULTI-DECADE

51-year mine life

295,000 oz avg. annual production
(AuEq)⁴

UPSIDE

**6.8M oz not included in mine
plan (inferred resource AuEq)**

System remains open

PRUDENT PLANNING

**Base case commodity prices:
Au \$3,600/oz and Ag \$48/oz**

1. Source: S-K 1300 Technical Report Summary (May 14, 2026). 2. Base case: \$3,600/oz gold, \$48.00/oz silver. 3. Spot prices: \$4,569/oz gold, \$77.98/oz silver. 4. AuEq based on a silver-to-gold ratio of \$48.00 to \$3,600 .

EXPLORATION TO UNDERPIN VALUE CREATION

NASDAQ | HYMC

THE OPPORTUNITY:

- Known high-grade systems at Brimstone and Vortex remain open in all directions and at depth
- Well under 15% of the ~64,000-acre land package has been explored
- Drill program is testing both extensions of the known systems and new district-scale targets (Wildrose and Manganese)
- New discoveries provide future growth potential
- Two core rigs and one RC rig on site, adding two additional rigs in coming months

DRILL PROGRAM IS TESTING THE EDGES OF BRIMSTONE AND VORTEX, NEW DISTRICT-SCALE TARGETS, AND WORKING TO INFORM THE FUTURE, HIGHEST-VALUE PATH TO PRODUCTION
