Unlocking new gold districts in Saskatchewan

High grade gold with scale and continuity in the La Ronge Gold Belt

TSX-V: ROCK I OTCQB: TRDTF I Frankfurt: 6BP0

September 2026
Corporate Presentation

Disclaimer

This presentation has been prepared by Trident Resources Corp. (“ROCK”) using its best efforts to realistically and factually present the information contained. However, subjective opinion, dependence upon factors outside ROCK’s control and outside information sources unavoidably dictate that ROCK cannot warrant the information contained to be exhaustive, complete or sufficient. In addition, many factors can effect the presentation which could significantly alter the results intended by ROCK, rendering the presentation unattainable or substantially altered. Therefore, interested uses should conduct their own assessment and consult with their own professional advisors prior to making any investment decisions.

This presentation does not constitute a prospectus or public offering for financing, and no guarantees are made or implied with regard to the success of Trident Resources Corp’s proposed ventures. Interested investors are advised to seek advice from the investment advisors.

Some of the statements in this document may be deemed to be "forward-looking statements".

All statements on in this document, other than statements of historical facts, that address events or developments that management of the Company expects, are forward-looking statements. Although management believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance, and actual results or developments may differ materially from those in the forward-looking statements. The Company undertakes no obligation to update these forward-looking statements if management's beliefs, estimates or opinions, or other factors, should change. Factors that could cause actual results to differ materially from those in forward-looking statements, include market prices, exploration and development successes, continued availability of capital and financing, and general economic, market or business conditions. Please see the public filings of the Company at www.sedar.com for further information.

This presentation does not provide full disclosure of all material facts relating to the securities offered. Investors should read the preliminary short form prospectus, final short form prospectus and any amendment for disclosure of those facts, especially risk factors relating to the securities offered, before making an investment decision.

The Knife Lake project mineral resources have been estimated in conformity with generally accepted CIM “Estimation of Mineral Resource and Mineral Reserves Best Practices” guidelines (CIM, 2014) and are reported in accordance with the Canadian Securities Administrators’ National Instrument 43-101 (CSA, 2018). Mineral resources are not mineral reserves and do not have demonstrated economic viability. There is no certainty that all or any part of the mineral resource will be converted into mineral reserve.

Cornell McDowell (P.Geo) is a member of Engineers and Geoscientists of British Columbia (EGBC) and is the Qualified Person under NI43-101 who has reviewed and approved the scientific and technical information in the presentation.

The BIG PICTURE

Trident Resources Corp. is a Canadian gold exploration company advancing a district scale exploration strategy in the La Ronge Gold Belt of northern Saskatchewan.

The Company's vision is to establish the La Ronge Gold Belt as Canada's next major gold camp by systematically advancing multiple gold deposits across a dominant regional land position.

Trident has strategically consolidated approximately **98,700 hectares** within the belt, targeting multi million ounce gold potential in one of the world's top ranked mining jurisdictions, supported by a growing regional land position of approximately **160,300 hectares** across northern Saskatchewan.

TSX -V: ROCK I OTCQB: TRDTF I Frankfurt: 6BP0

Why Trident?

Building the next district-scale gold camp in Saskatchewan

Premier mining jurisdiction
Stable and supportive environment for resource development

Strategic land package
Large scale position across a proven geological corridor

Exceptional infrastructure
Road access, power, and nearby community support

Strong resource foundation
Established gold resources supporting continued growth

Past producing Contact Lake Mine
High grade underground system with expansion potential at depth and along strike

High grade drill results validating scale and potential
Broad mineralized system with well developed high grade cores

Experienced management team
Combining strong technical and capital market expertise

TSX -V: ROCK I OTCQB: TRDTF I Frankfurt: 6BP0

Capital Structure and Ownership

Tight share structure and strong balance sheet support near-term growth.

Share Price:	**C$4.22**
Issued & Outstanding:	**40.9 M shares**
Fully Diluted:	**47.2 M (2.5 M warrants, 3.8 M options)**
Cash & Marketable Securities:	**≈ C$ 20 M**
Market Cap. / Enterprise Value:	**≈ C$ 172.6M /≈ C$ 152.6 M**
Average 3-Month Trading Volume:	**53.1k Shares**
Ownership	**Insiders own ≈ 18%**

TSX Venture50 2026

Share price (Sept 15, 2026)

Leadership

Jonathan Wiesblatt
CEO & Director

20 + years in finance; ex-Sprott PM; deep mining-sector network.

Jordan Trimble
President & Director

Entrepreneur with experience in resource finance, marketing, and corporate development; CEO of Skyharbour Resources.

Cornell McDowell
VP Exploration & QP

Professional Geologist (P.Geo.) with 20+ years of field experience in mineral exploration in multiple jurisdictions

Lubica Keighery
IR & Corp.Dev

15+ years expeirence in strategic communications, IR & Corporate Development

Chantelle Collins
CFO CPA (CGA)

Public-company financial reporting expertise with 10 years' experience working in the public sector.

Paul Kremer, M.Sc.
Exploration Manager

Geologist with 20+ years of mineral exploration experience across the Canadian Shield; previous Exploration Manager for SSR Mining.

Board and Advisors

Tim Termuende
(P.Geo.) Chairman:

35 + years' experience; founded Copper Canyon (acquired by NovaGold for $65 M).

Ross McElroy
(P.Geo.) Director:

Discovered Triple R Deposit; former CEO of Fission Uranium (sold to Paladin for $1 B).

Joseph Gallucci
Director

Ventum Financial; 15 + years in mining finance. focused on mining at BMO Capital Markets, GMP Securities, Dundee Securities and Laurentian.

Ron Netolitzky
Strategic Shareholder/Advisor

Discovered Eskay Creek & Snip mines; Canada. Director of several publicly traded exploration companies. In 2015, he was inducted into the Canadian Mining Hall of Fame.

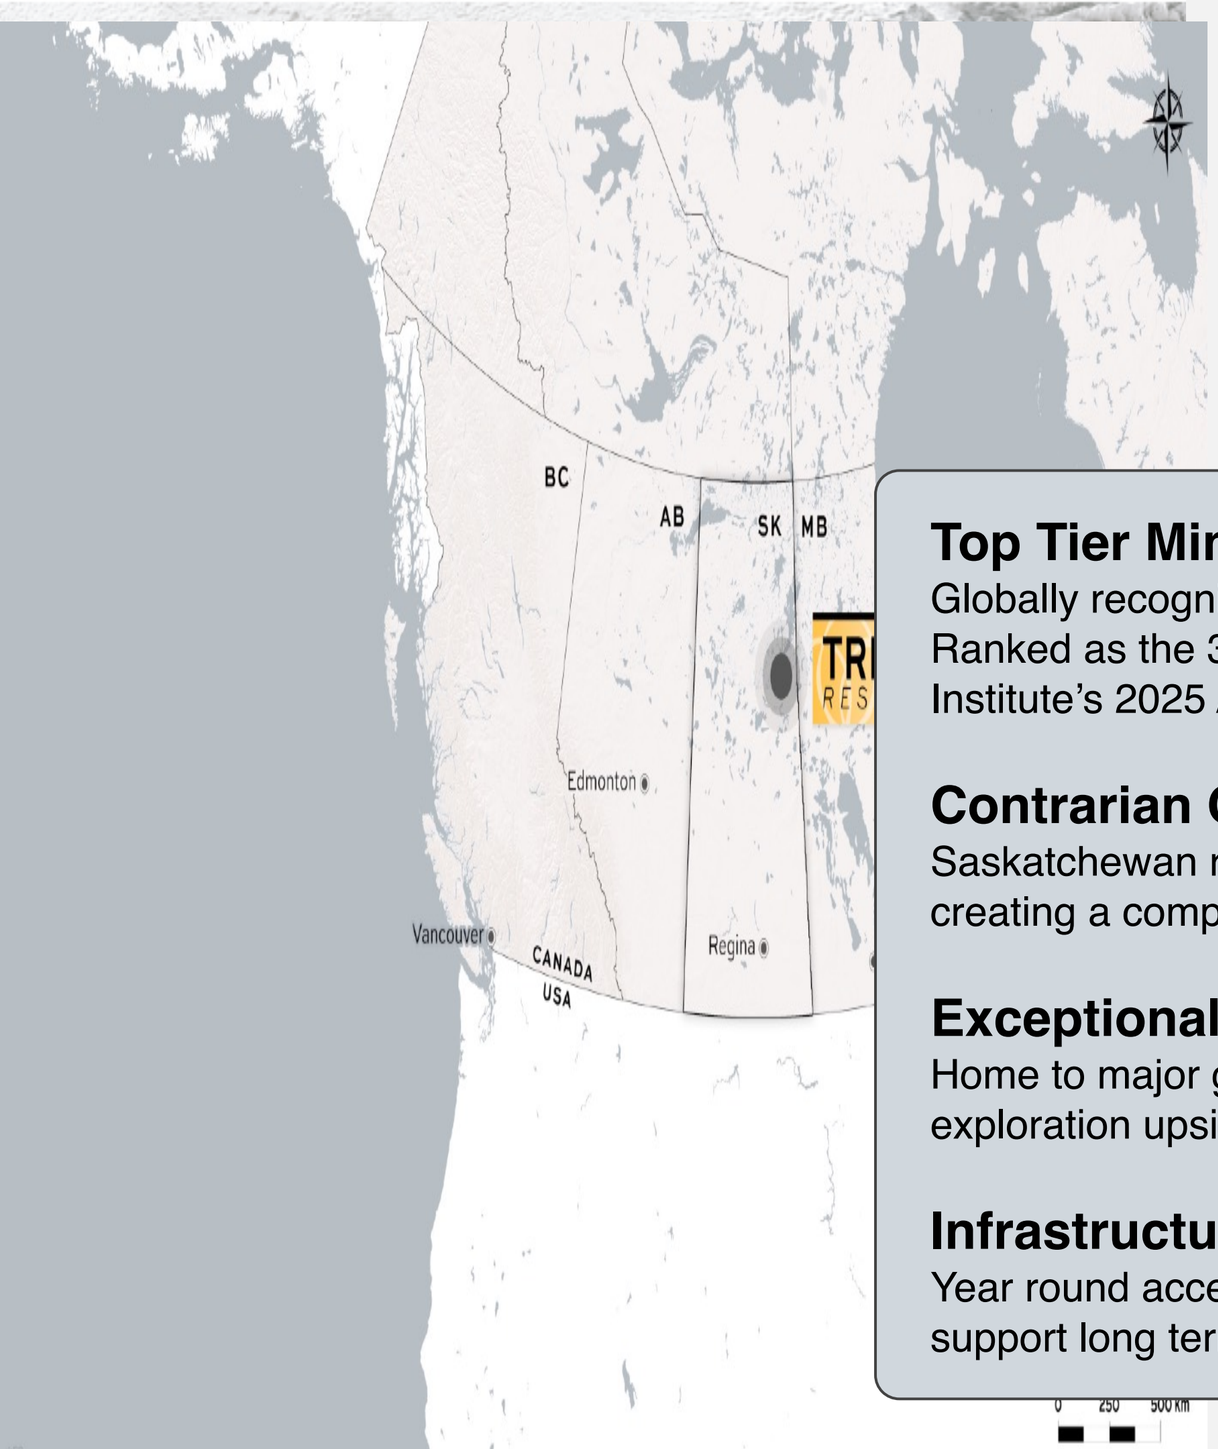

Scott Broughton
(P.Eng.) Advisor

35+ years in mine development; former senior leader at Stantec, BGC, Klohn Crippen Berger; past Chair, Mining Association of BC.

David Chan
Technical Advisor

Professional Geologist with 36 years of experience and direct expertise in the La Ronge Gold Belt and Contact Lake.

Saskatchewan

A Premier Jurisdiction for Mining Investment

Top Tier Mining Jurisdiction

Globally recognized for mining stability, infrastructure, and resource development. Ranked as the 3rd most attractive mining jurisdiction globally in the Fraser Institute's 2025 Annual Survey of Mining Companies.

Contrarian Gold Opportunity

Saskatchewan remains underrecognized for gold despite its geological potential, creating a compelling opportunity ahead of broader market attention.

Exceptional Geological Potential

Home to major gold, copper, uranium, and potash discoveries with significant exploration upside.

Infrastructure Built for Exploration

Year round access, power, skilled workforce, and strong mining infrastructure support long term growth.

The Trans Hudson Orogen

A Fertile Geological Setting

World Class Geological Belt

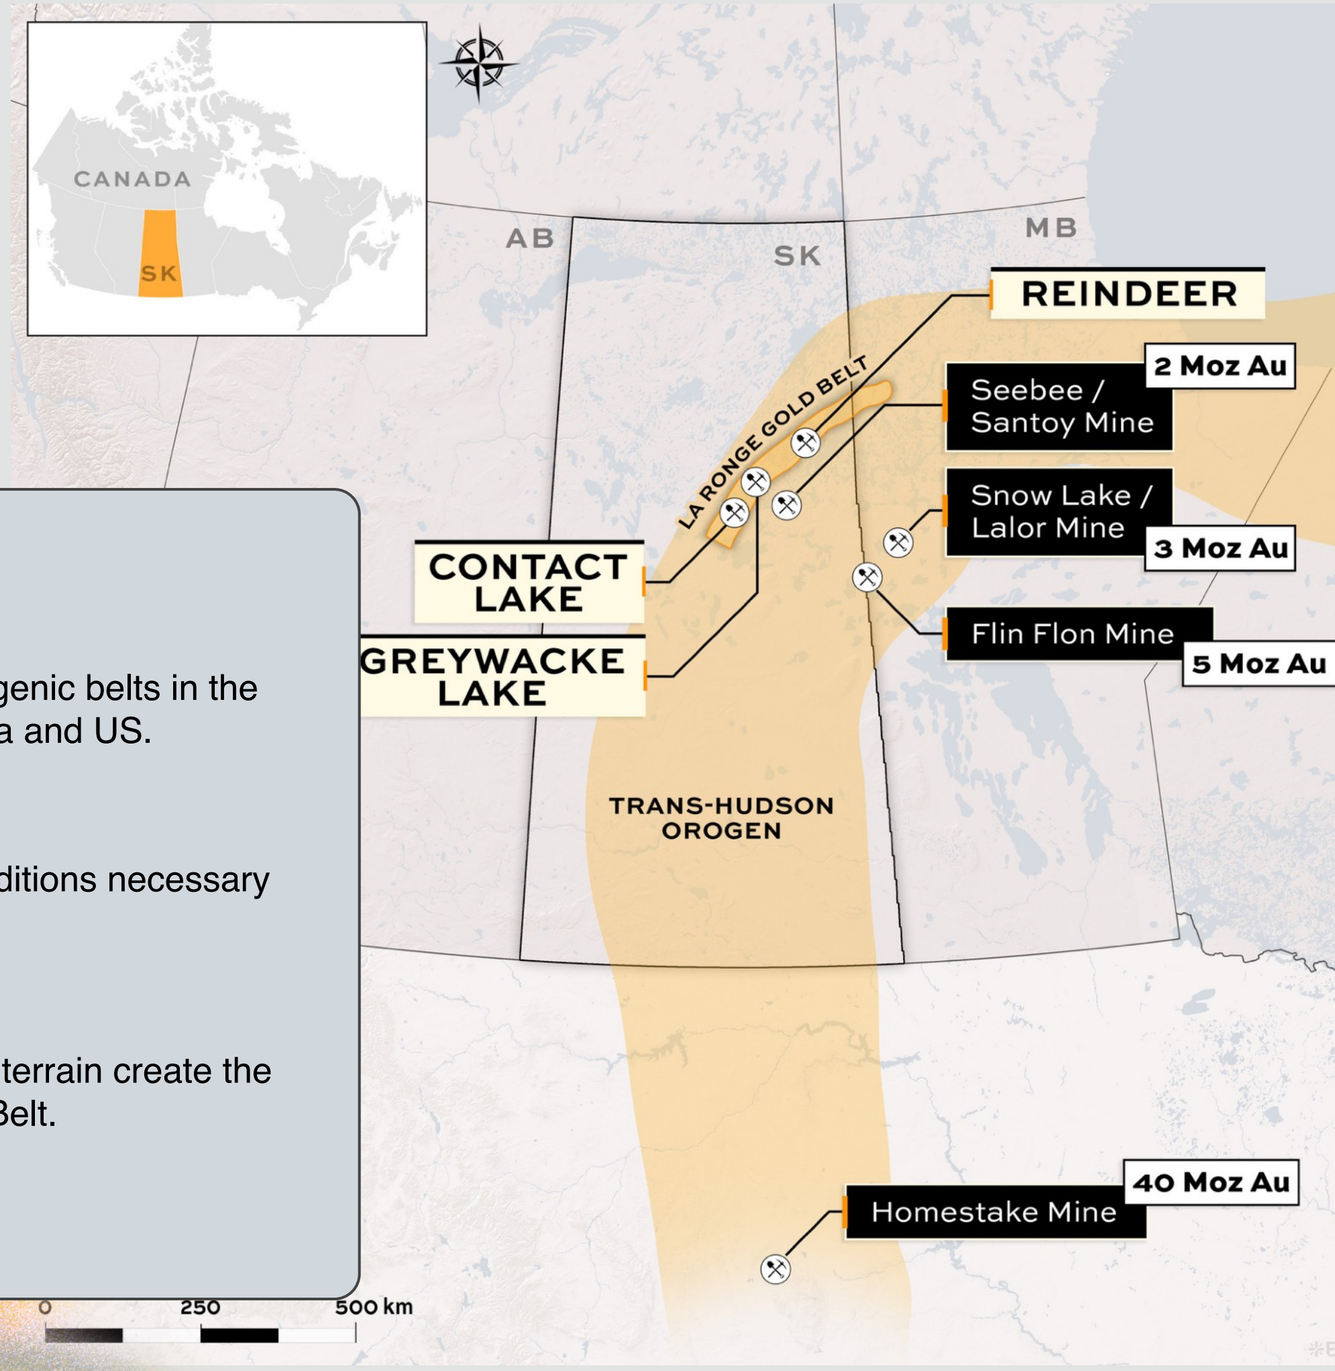

The Trans Hudson Orogen is one of the largest Paleoproterozoic orogenic belts in the world and hosts numerous significant mineral deposits across Canada and US.

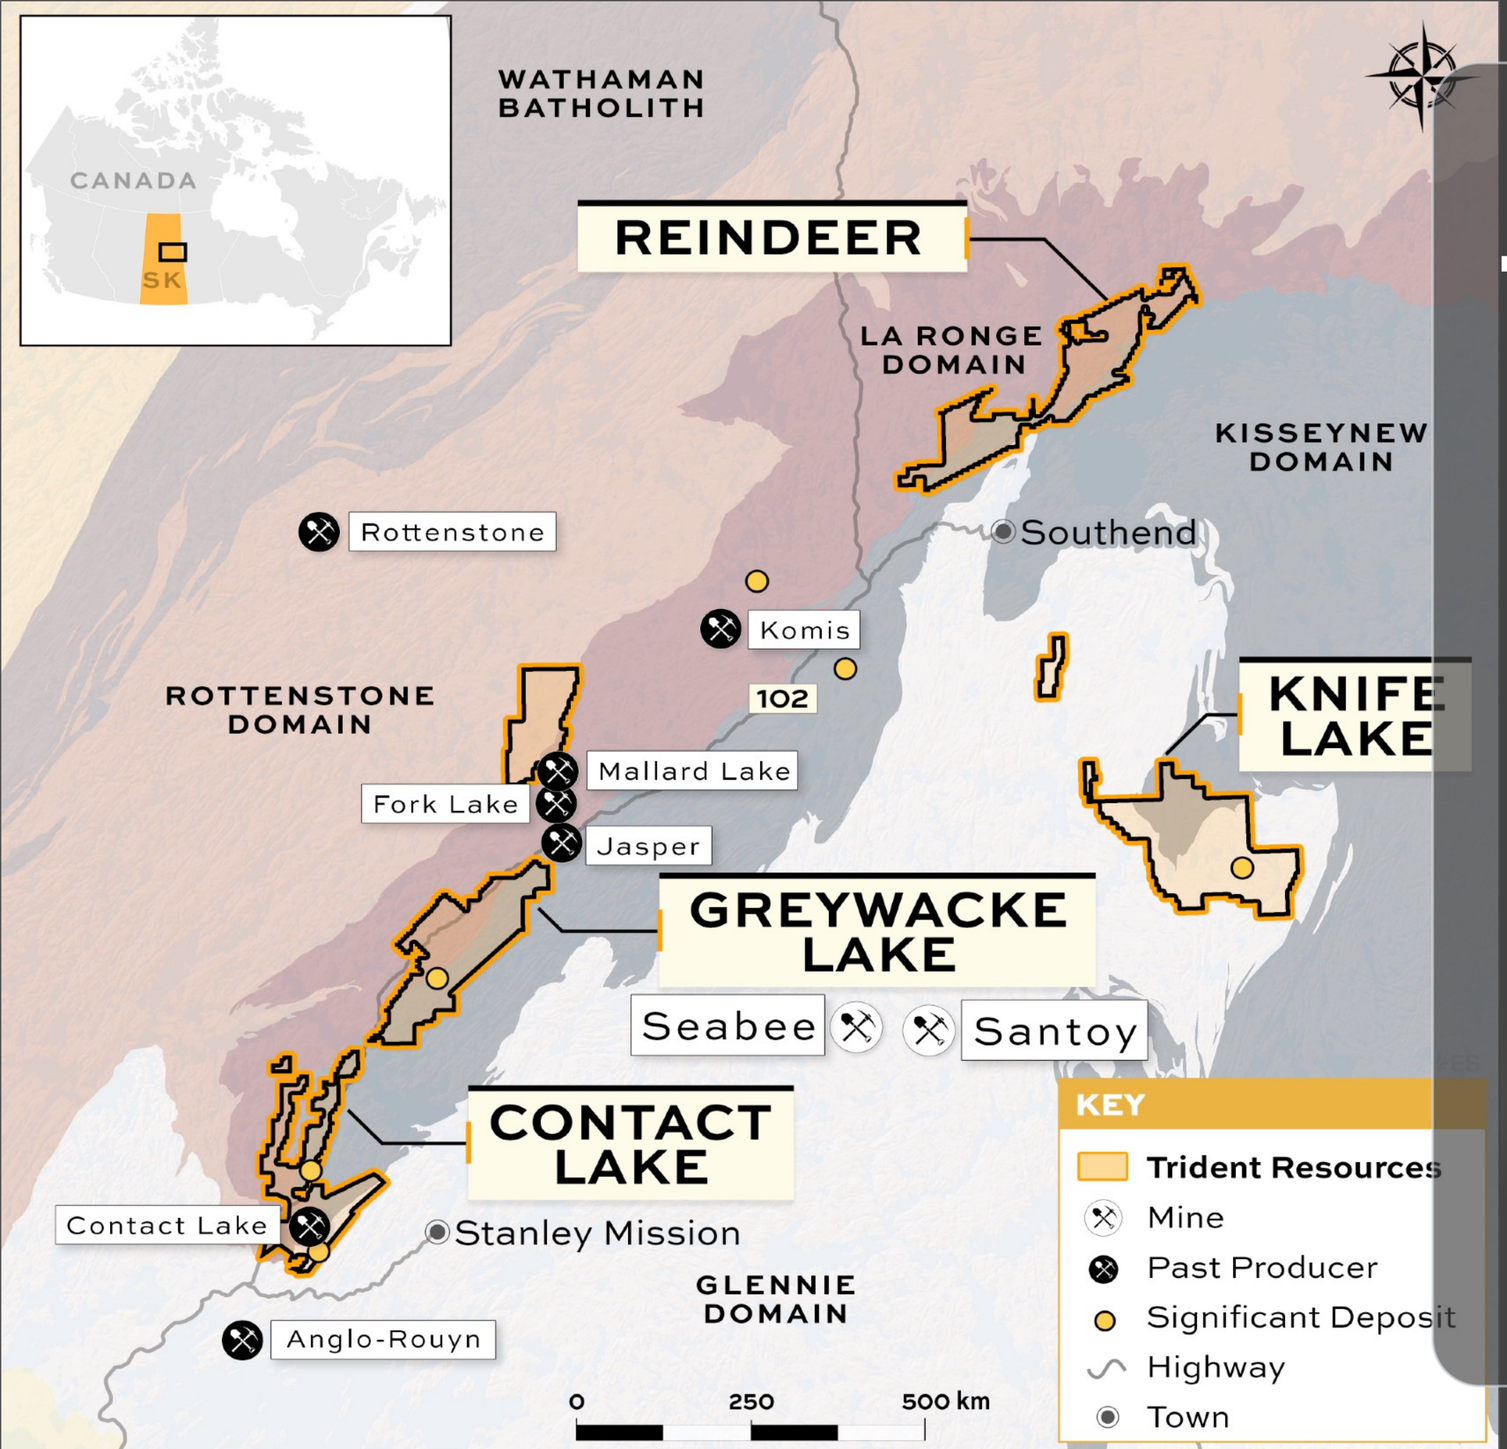

Ideal Setting for Gold Systems

The geological architecture provides the structural pathways and conditions necessary for the formation of large scale orogenic gold systems.

Built for Scale Potential

Major shear zones, regional structures, and extensive underexplored terrain create the potential for district scale gold discoveries within the La Ronge Gold Belt.

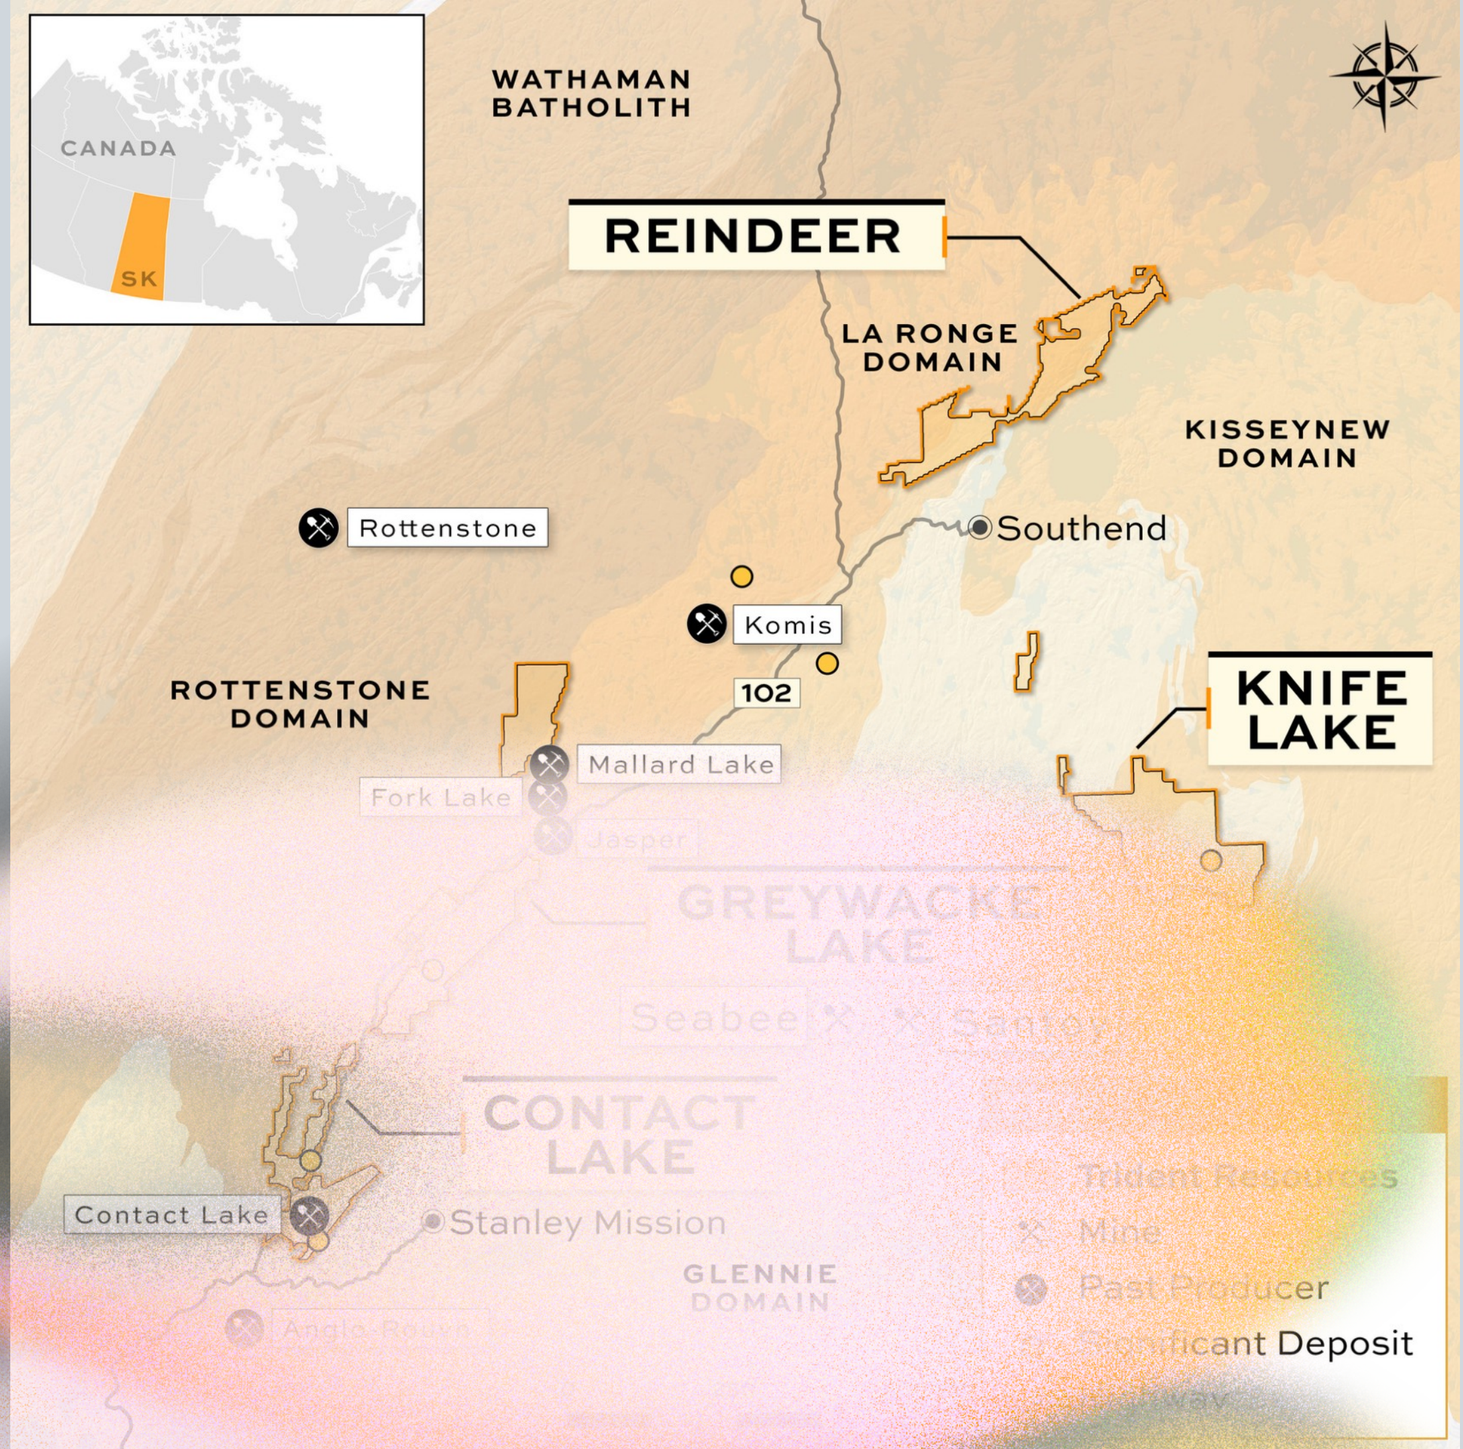

The La Ronge Gold Belt Opportunity

- Underexplored high grade belt
- Historic production and active mines
- District scale geological setting
- Infrastructure
- SSR Mining proof of concept

Current Portfolio

A strategic consolidation of approximately 98,700 hectares in Saskatchewan's prolific La Ronge Gold Belt, targeting multi million ounce gold potential within one of the world's top ranked mining jurisdictions, supported by a growing total land position of approximately 160,300 hectares across the region.

Contact Lake Gold Project

Past producer (~190 koz @ 6.16 g/t Au); 2025 drill program completed (6,838m). 2026 drilling program ongoing (~13,000m)

Preview (SW & North), North Lake Deposits (Contact Lake)

Road-accessible. Open along strike & depth.

Greywacke Lake Gold Project

Road-accessible. Open along strike & depth

Knife Lake Copper Project

Advanced-stage Cu (+ Ag, Zn, Co, Au); historical resource 3.8 Mt @
1.02 % CuEq (Ind.), 7.9 Mt @ 0.67 % CuEq (Inf.).
Under option agreement with Apogee Minerals Ltd.

Hailstone Project

8 newly-acquired claims with multiple gold showings that are contiguous with Trident's Greywacke Lake Gold Property.

Reindeer Project

27,930 ha of highly prospective land that straddles the La Ronge and Kisseynew Domain contact with multiple SMDI gold showings located within its boundaries. Recent acquisition to Trident.

Existing Resources

A Strong Starting Point

For more details, please see the end note 1 (last page)

Class	Deposit	In Situ Tonnage and Grade		Au Metal
		Tonnage (tonnes)	Au (gpt)	(oz)
Indicated	North Lake	16,410,000	0.89	469,664
	Preview SW	6,369,000	1.54	314,729
	Preview North	933,000	1.36	40,774
	Greywacke	1,021,000	2.17	71,364
	Total	**24,733,000**	**1.13**	**896,530**
Inferred	North Lake	20,666,000	0.72	481,311
	Preview SW	14,831,000	1.12	531,854
	Preview North	366,000	0.63	7,386
	Greywacke	2,732,000	1.24	109,092
	Total	**38,595,000**	**0.91**	**1,129,643**

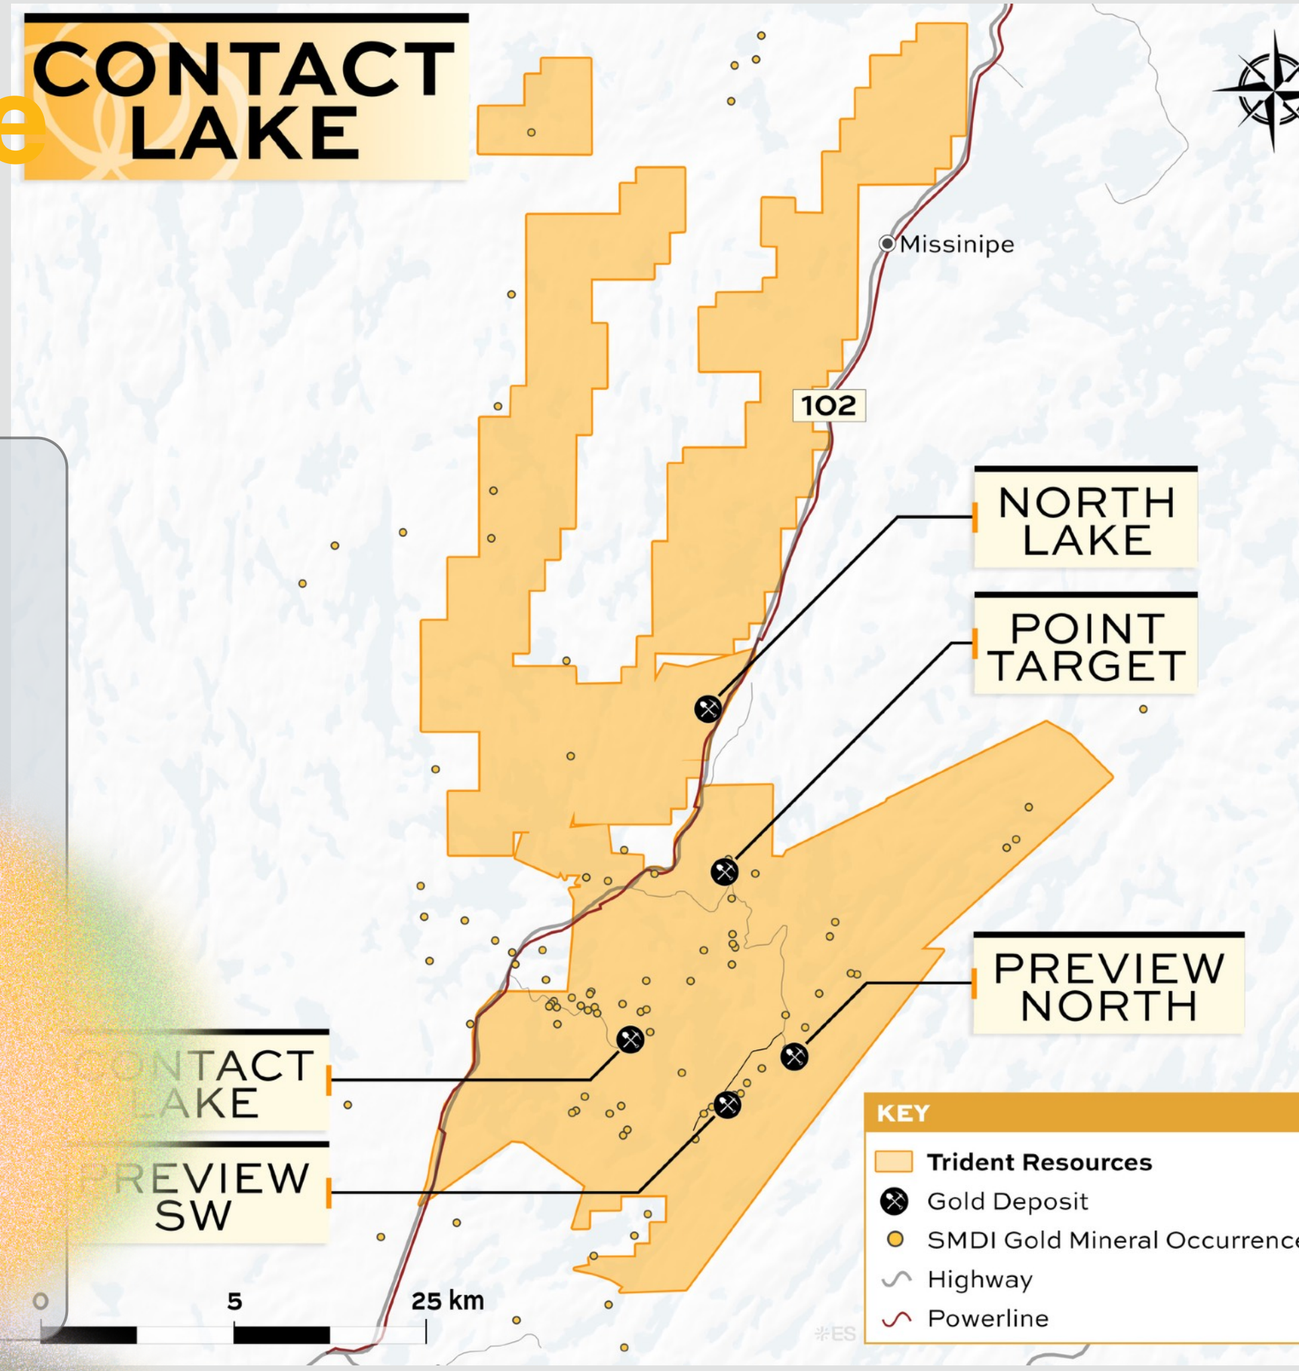

Conforms to CIM and NI 43-101 standards (2019 Effective Date)

Cut-off grade - 0.25 g/t Au | Effective Date November 6, 2025

Focus on Contact Lake Gold Project

An aggressive growth opportunity with scale

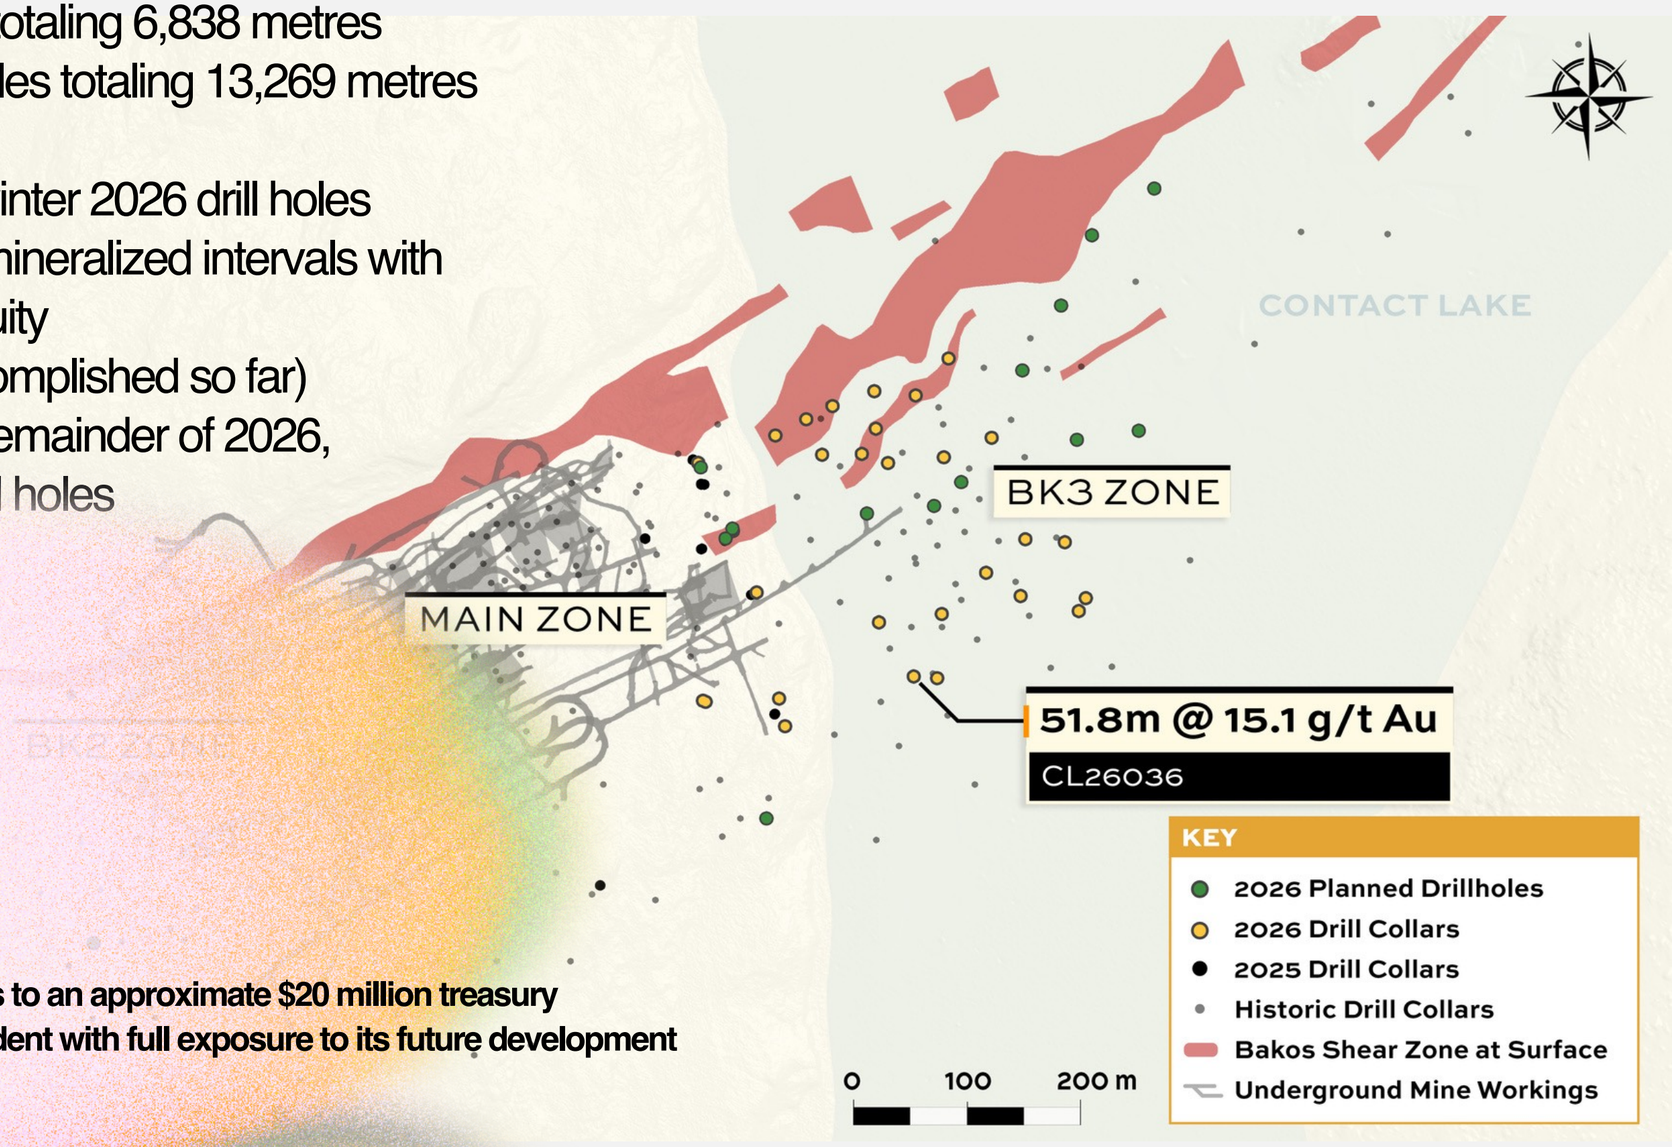

- Approx. 22,790 hectare land package in Saskatchewan's La Ronge Gold Belt
- Includes the past producing **Contact Lake Mine operated by Cameco Corporation between 1994 to 1997**
- Produced ~190,000 oz gold at 6.16 g/t Au with ~95% recovery
- Closed when gold traded near US$300/oz, with unmined stopes and depth extensions identified internally by Cameco
- Cameco was focused on its growing uranium business
- Also hosts the Preview SW, Preview North, and North Lake gold deposits

Contact Lake Gold Mine

Drill Program 2025/2026

- 2025 drill campaign completed 19 holes totaling 6,838 metres
- Winter 2026 program expanded to 29 holes totaling 13,269 metres following strong initial results
- Assays have now been released for all winter 2026 drill holes
- Drilling continues to demonstrate broad mineralized intervals with high grade gold zones and strong continuity
- A further ~20,000 metre (~12,000 m accomplished so far) expansion program is underway for the remainder of 2026, expected to include approximately 40 drill holes

- **Exploration plans are fully funded, supported by access to an approximate $20 million treasury**
- **The project is not subject to any royalties, providing Trident with full exposure to its future development potential.**

Contact Lake Gold Mine

A past producer positioned for high-grade resource growth.

Historic High Grade Producer

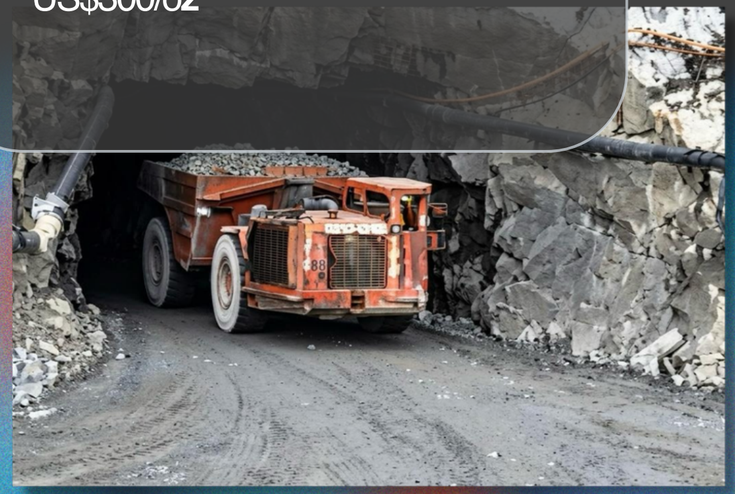

Operated by Cameco Corporation from 1994 to 1997

Produced 190 koz Au @ 6.16 g/t Au with ~95% recovery

Closed when gold traded near US$300/oz

Contact Lake Gold Mine

A past producer positioned for high-grade resource growth.

Expansion Potential Remains

Historical mining focused on BK 1 and BK 2

BK 3 zone beneath the lake remains largely untested

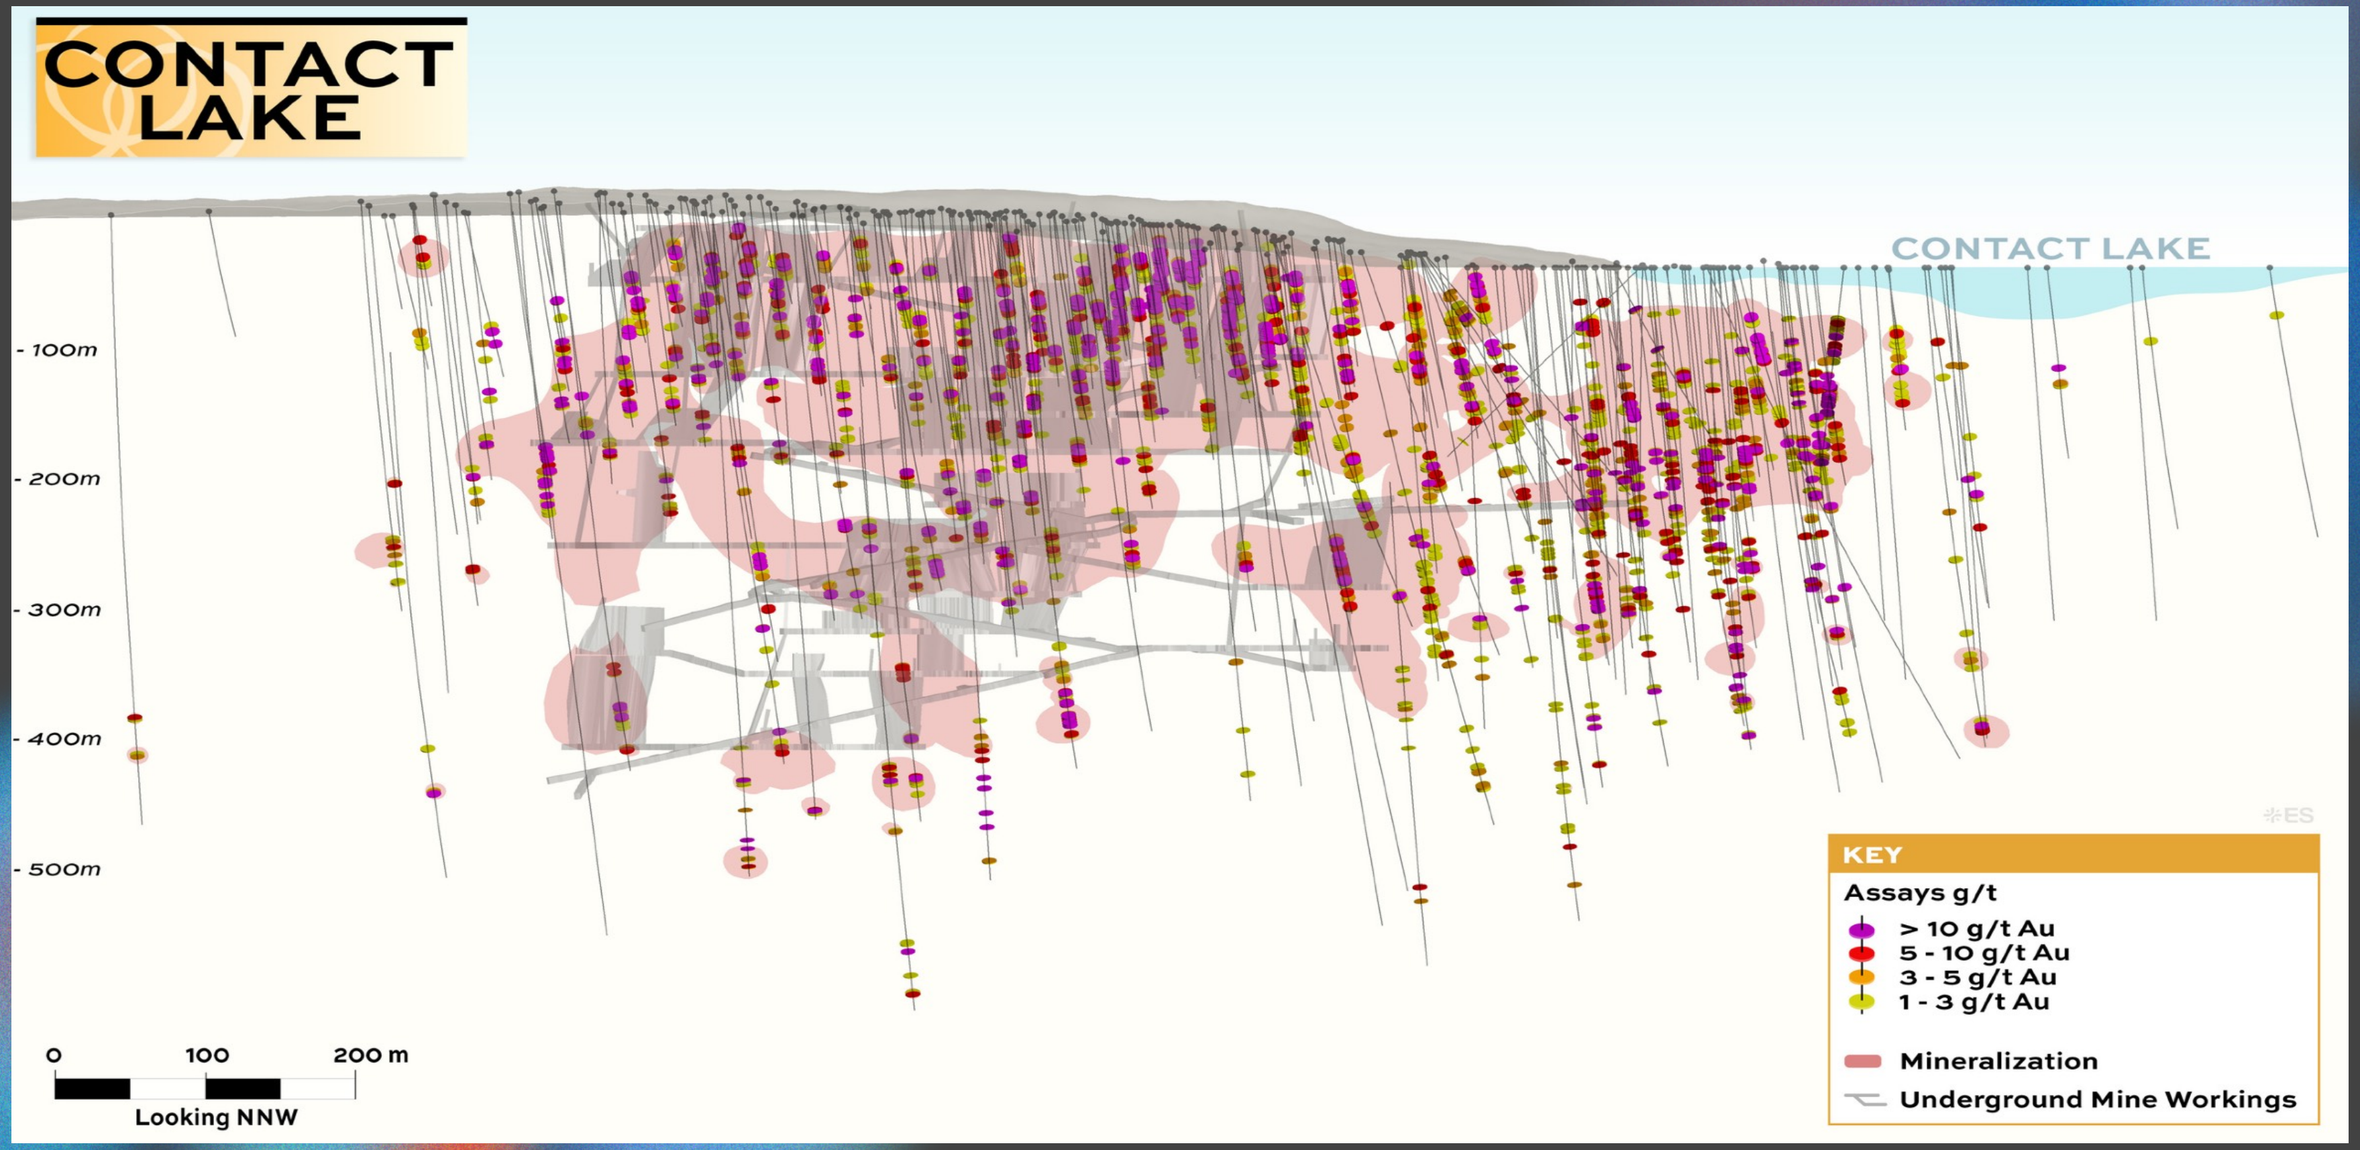

Internal Cameco reports identified unmined stopes and extensions at depth

Gold mineralization traced over 850 m within a broader 1.2 km trend
Visible gold is common throughout the system

Contact Lake Gold Mine

A past producer positioned for high-grade resource growth.

Impressive Results

2025 FALL PROGRAM

Establishing the Foundation
6,838m in 19 drill holes

Expanded from the original 5,000m program following encouraging visual mineralization.

Key Highlights - Contact Lake
- 7.03 g/t Au over 43.25m
Including 30.06 g/t Au over 9.25m (CL25003)
- 2.49 g/t Au over 29.61m
Including 27.09 g/t Au over 2.21m (CL25002)
- 4.43 g/t Au over 39.50m (CL25007)

Confirmed high grade mineralization within and around the Bakos Shear and provided important geological insight in areas with limited historical drilling.

2026 WINTER PROGRAM

Contact Lake Deposit - 29 drill holes

Key Highlights - Contact Lake
- 15.11 g/t Au over 51.83 m
- Including 20.69 g/t Au over 28.69 m
- Including 1,055.00 g/t Au over 0.50 m (CL26036)
- 41.46 g/t Au over 3.42 m
- Including 81.75 g/t Au over 1.73 m (CL26033)
- 17.88 g/t Au over 11.25 m
- Including 31.36 g/t Au over 6.25 m (CL26042)
- 93.44 g/t Au over 1.00 m (CL26035)
- 10.05 g/t Au over 9.30 m (CL26047)
- 6.78 g/t Au over 10.25 m (CL26048)
- 5.43 g/t Au over 16.00 m (CL26045)
- 5.07 g/t Au over 21.50 m (CL26032)
- 4.61 g/t Au over 38.48 m
- Including 19.98 g/t Au over 5.15 m (CL26028)

All holes intersected gold mineralization

Expanding the System ~13,000m

Preview South West - 11 drill holes

Preview SW delivers broad near-surface gold intercepts, highlighted by

- 1.32 g/t Au over 132.0m, including 2.85 g/t Au over 40.3m, starting from just 22m depth.
- Results confirm both bulk-tonnage and high-grade potential
- Located only 2.5 km southeast of Contact Lake, supporting the district-scale opportunity across the La Ronge Gold Belt.
- Mineralization remains open for expansion along strike and at depth.

Preview SW complements Contact Lake's high-grade discoveries, demonstrating the presence of multiple mineralized systems within Trident's growing Saskatchewan gold district.

Drilling in Progress

SUMMER/FALL 2026 DRILLING PROGRAM ADVANCING

12,066 metres completed across 17 drillholes

- **Approximately 8,000 metres remaining in the 20,000-metre program (40 drillholes in total)**
- **Current drilling targets:**
  - **Mineralization below the BK1 Main Zone**
  - **Extensions along strike at BK2**
  - **High-grade continuity between BK1 and BK3**
- **Assay results expected through Q4 2026 and into Q1 2027**

Objective:
Continue expanding the broader gold system at Contact Lake while advancing toward a district scale understanding of mineralization.

RESULTS SO FAR...

High-Grade Gold Extends Below Historical Mine

CL26050 confirms strong mineralization 220 metres below the lowest historical workings

- **8.69 g/t Au over 11.97 m**
- Including 31.98 g/t Au over 3.16 m
- Multiple parallel shear zones intersected below the Main Zone
- Demonstrates potential to extend Contact Lake well beyond the areas historically mined by Cameco

Supporting Buffer Zone results:

- CL26049: 3.46 g/t Au over 15.00 m
- CL26051: 6.43 g/t Au over 7.45 m, plus additional mineralized intervals

Takeaway:
Contact Lake remains open at depth and along strike, with multiple opportunities to expand a future resource.

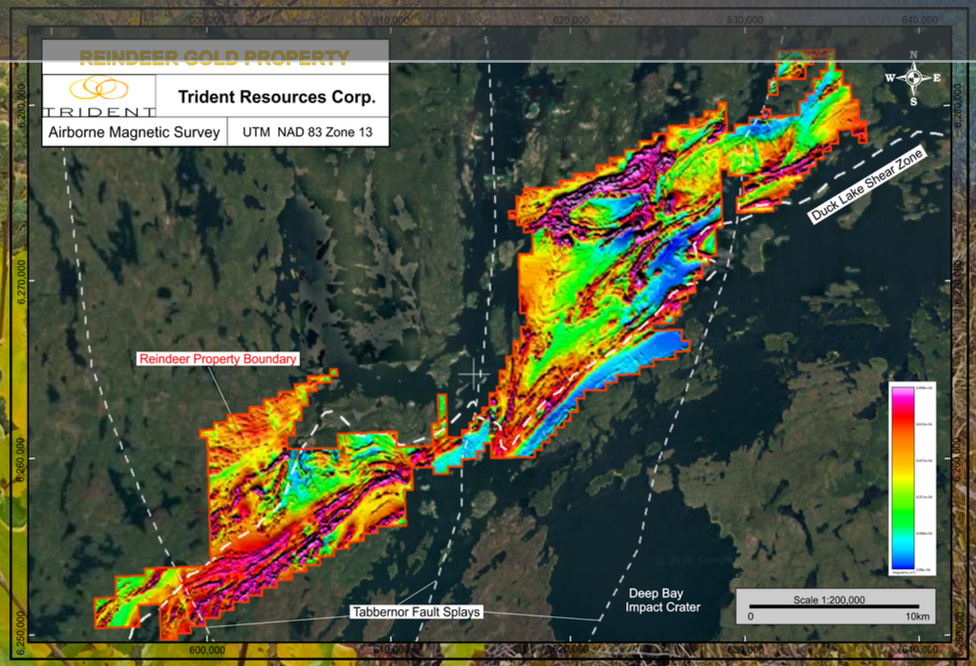

Regional Exploration Activities – 2026

CONTACT LAKE AND PREVIEW

- **~7,000 soil samples collected across three priority grids**
- **Targeting a prospective intersection of two shear zones at Contact Lake**
- **Preview grids cover strong magnetic anomalies along an underexplored mineralized trend**

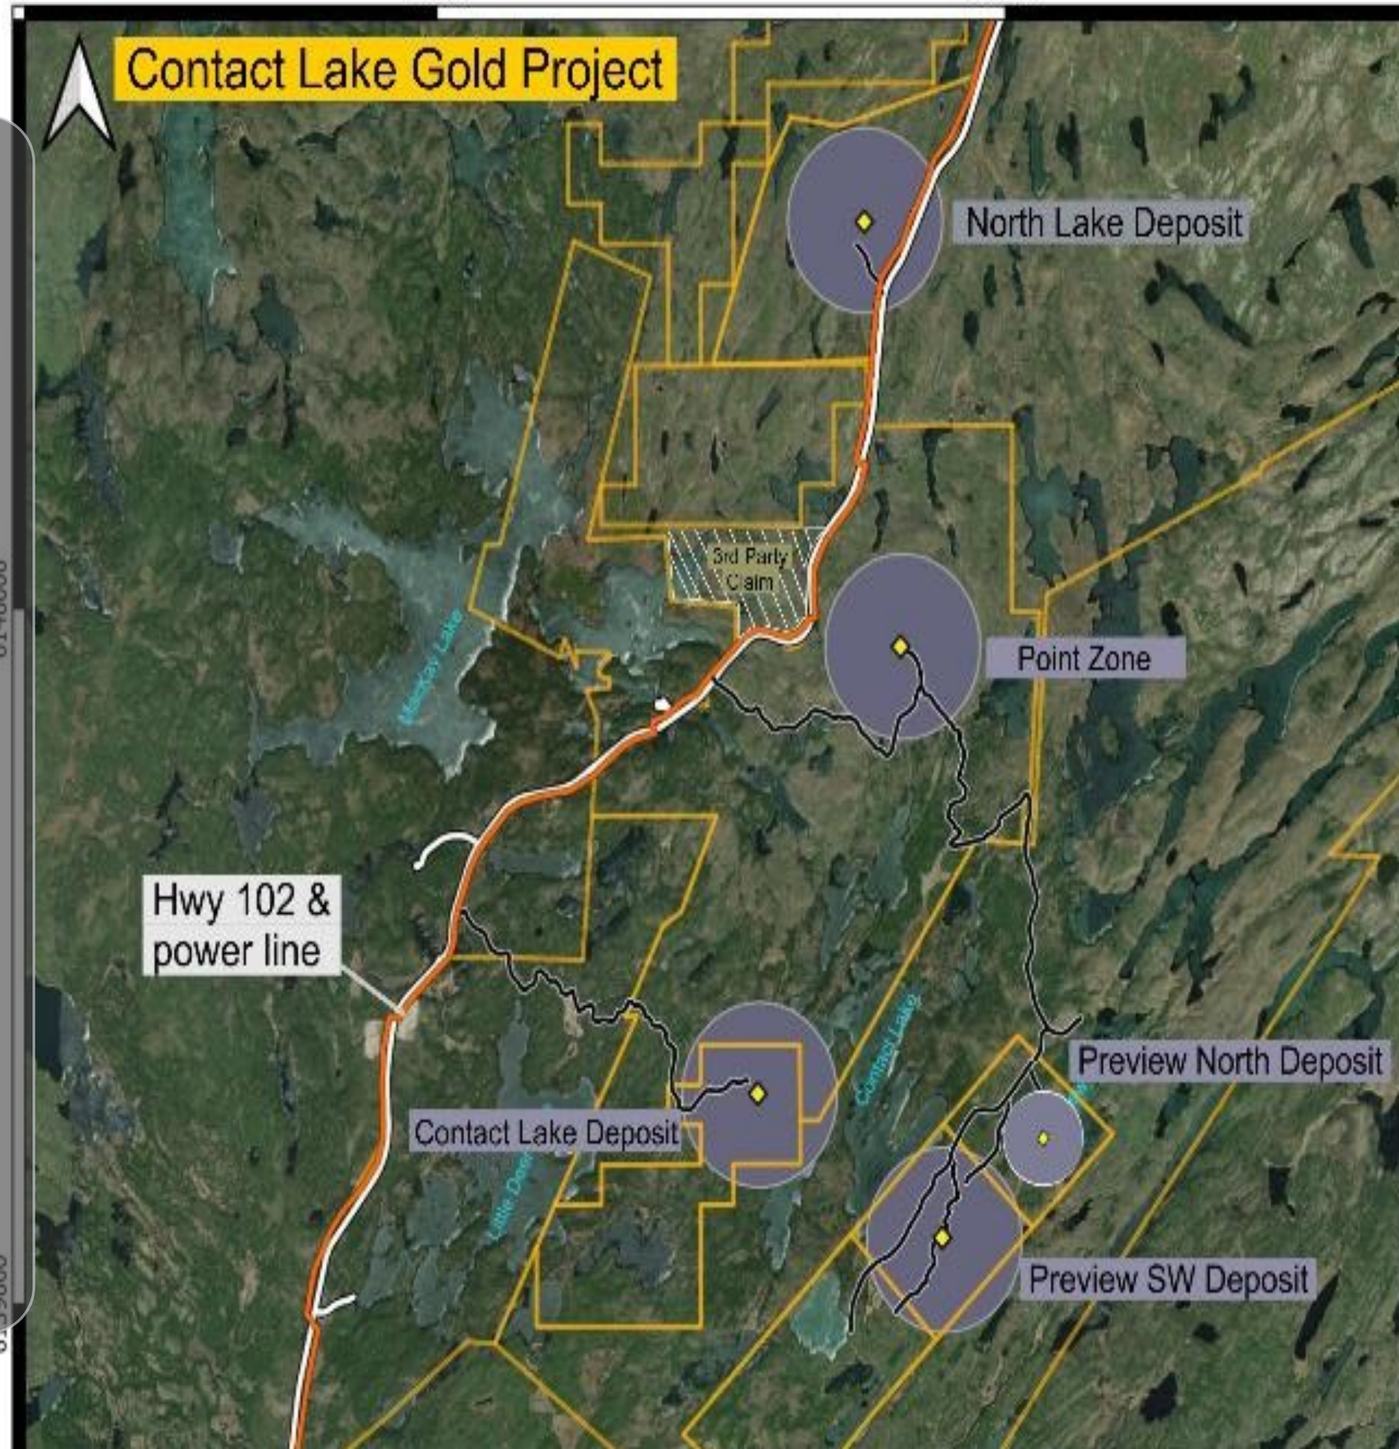

REINDEER PROPERTY

- High resolution airborne magnetic and radiometric survey covering 6,600 line kilometres at 50 metre spacing
- Survey covers the underexplored 29,300 hectare property and will help define key geological structures and lithologies
- Targets the prospective boundary between the La Ronge and Kisseynew domains, associated with past producing mines, gold deposits and mineral occurrences across the La Ronge Gold Belt

Excellent Infrastructure

- Highway, power and access already in place.
- A low-barrier environment for exploration success.

Accomplished

District Established

- Consolidated dominant land position in the La Ronge Gold Belt
- Multiple deposits and targets emerging across a district-scale gold system
- Unlocked the value of the non-core copper asset, Knife Lake, through an option agreement

Funded to Execute

- $22.5M treasury in place - Fully funded to advance exploration and resource growth

Large Drill Program Executed

- ~7,000m drilled in 2025
- ~13,000m completed in Winter 2026

High Grade Confirmation

- Multiple high-grade intercepts validating scale
- Broad mineralized intervals with well-developed high-grade cores
- High-grade and bulk-tonnage potential confirmed across multiple deposits

System Expansion

- BK3 extended beyond the historic mine
- Wider, more complex mineralized system identified
- Mineralization remains open in all directions
- Multiple deposits support growing district-scale potential

In Progress

Near Term News Flow

Summer 2026 drill program results pending (17 drillholes completed so far)

Expanded Drill Program

- Phase 2 drilling underway (~12, 000 m completed out of 20,000m)
- Follow up drilling at Contact Lake, open at depth and along strike

Regional Exploration

- Testing new targets and advancing regional exploration

Growth and Development

- Expansion of current MRE
- Initial metallurgical work underway

Market and Investor Engagement

- Engagement with institutional and retail investors, bankers and analysts

Stakeholder and Rightsholder Engagement and Strategic Initiatives

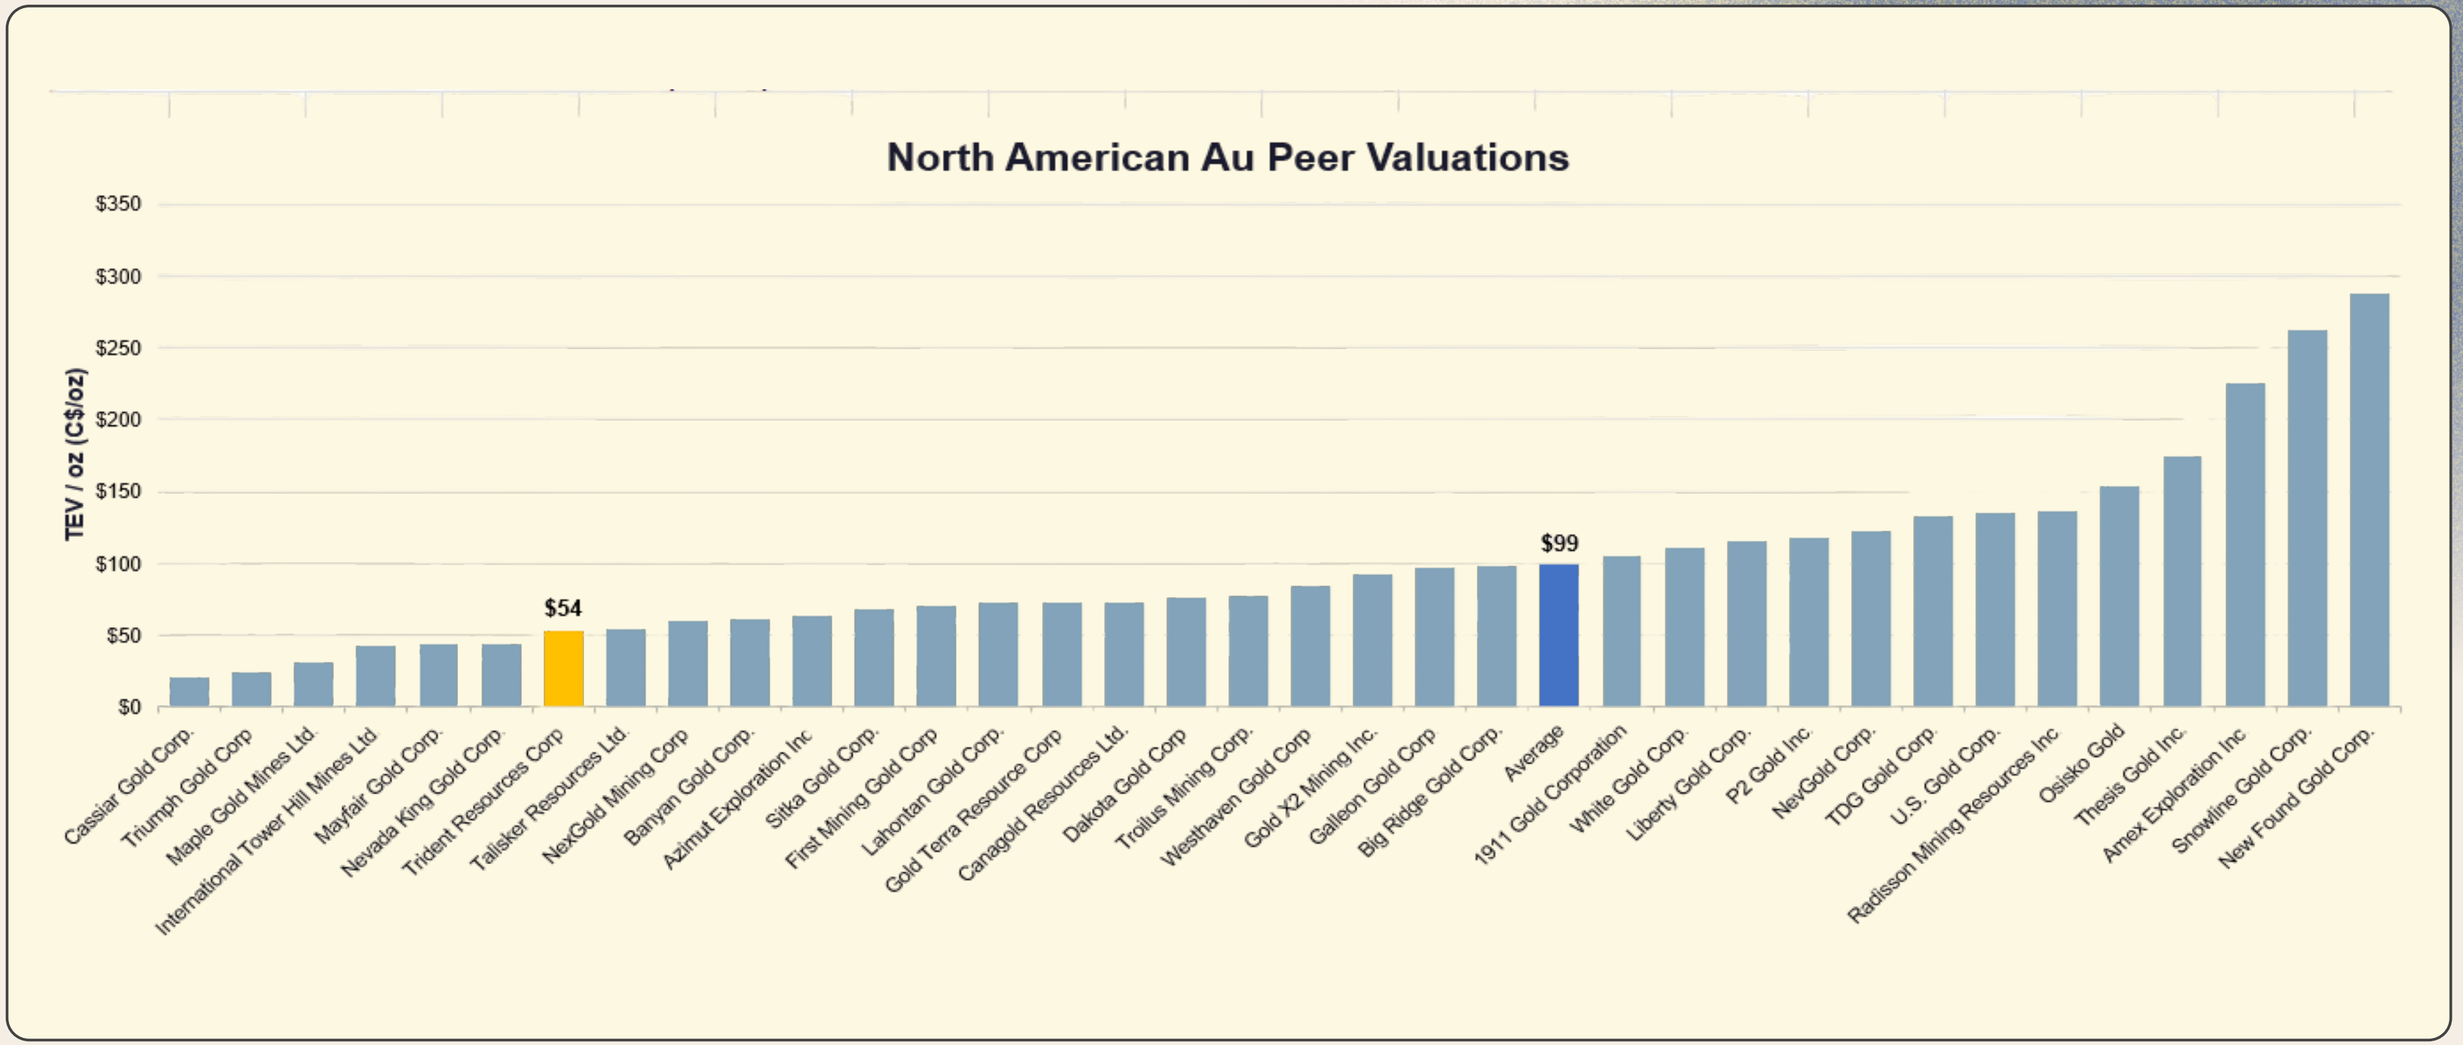

- Engagement with local communities and government

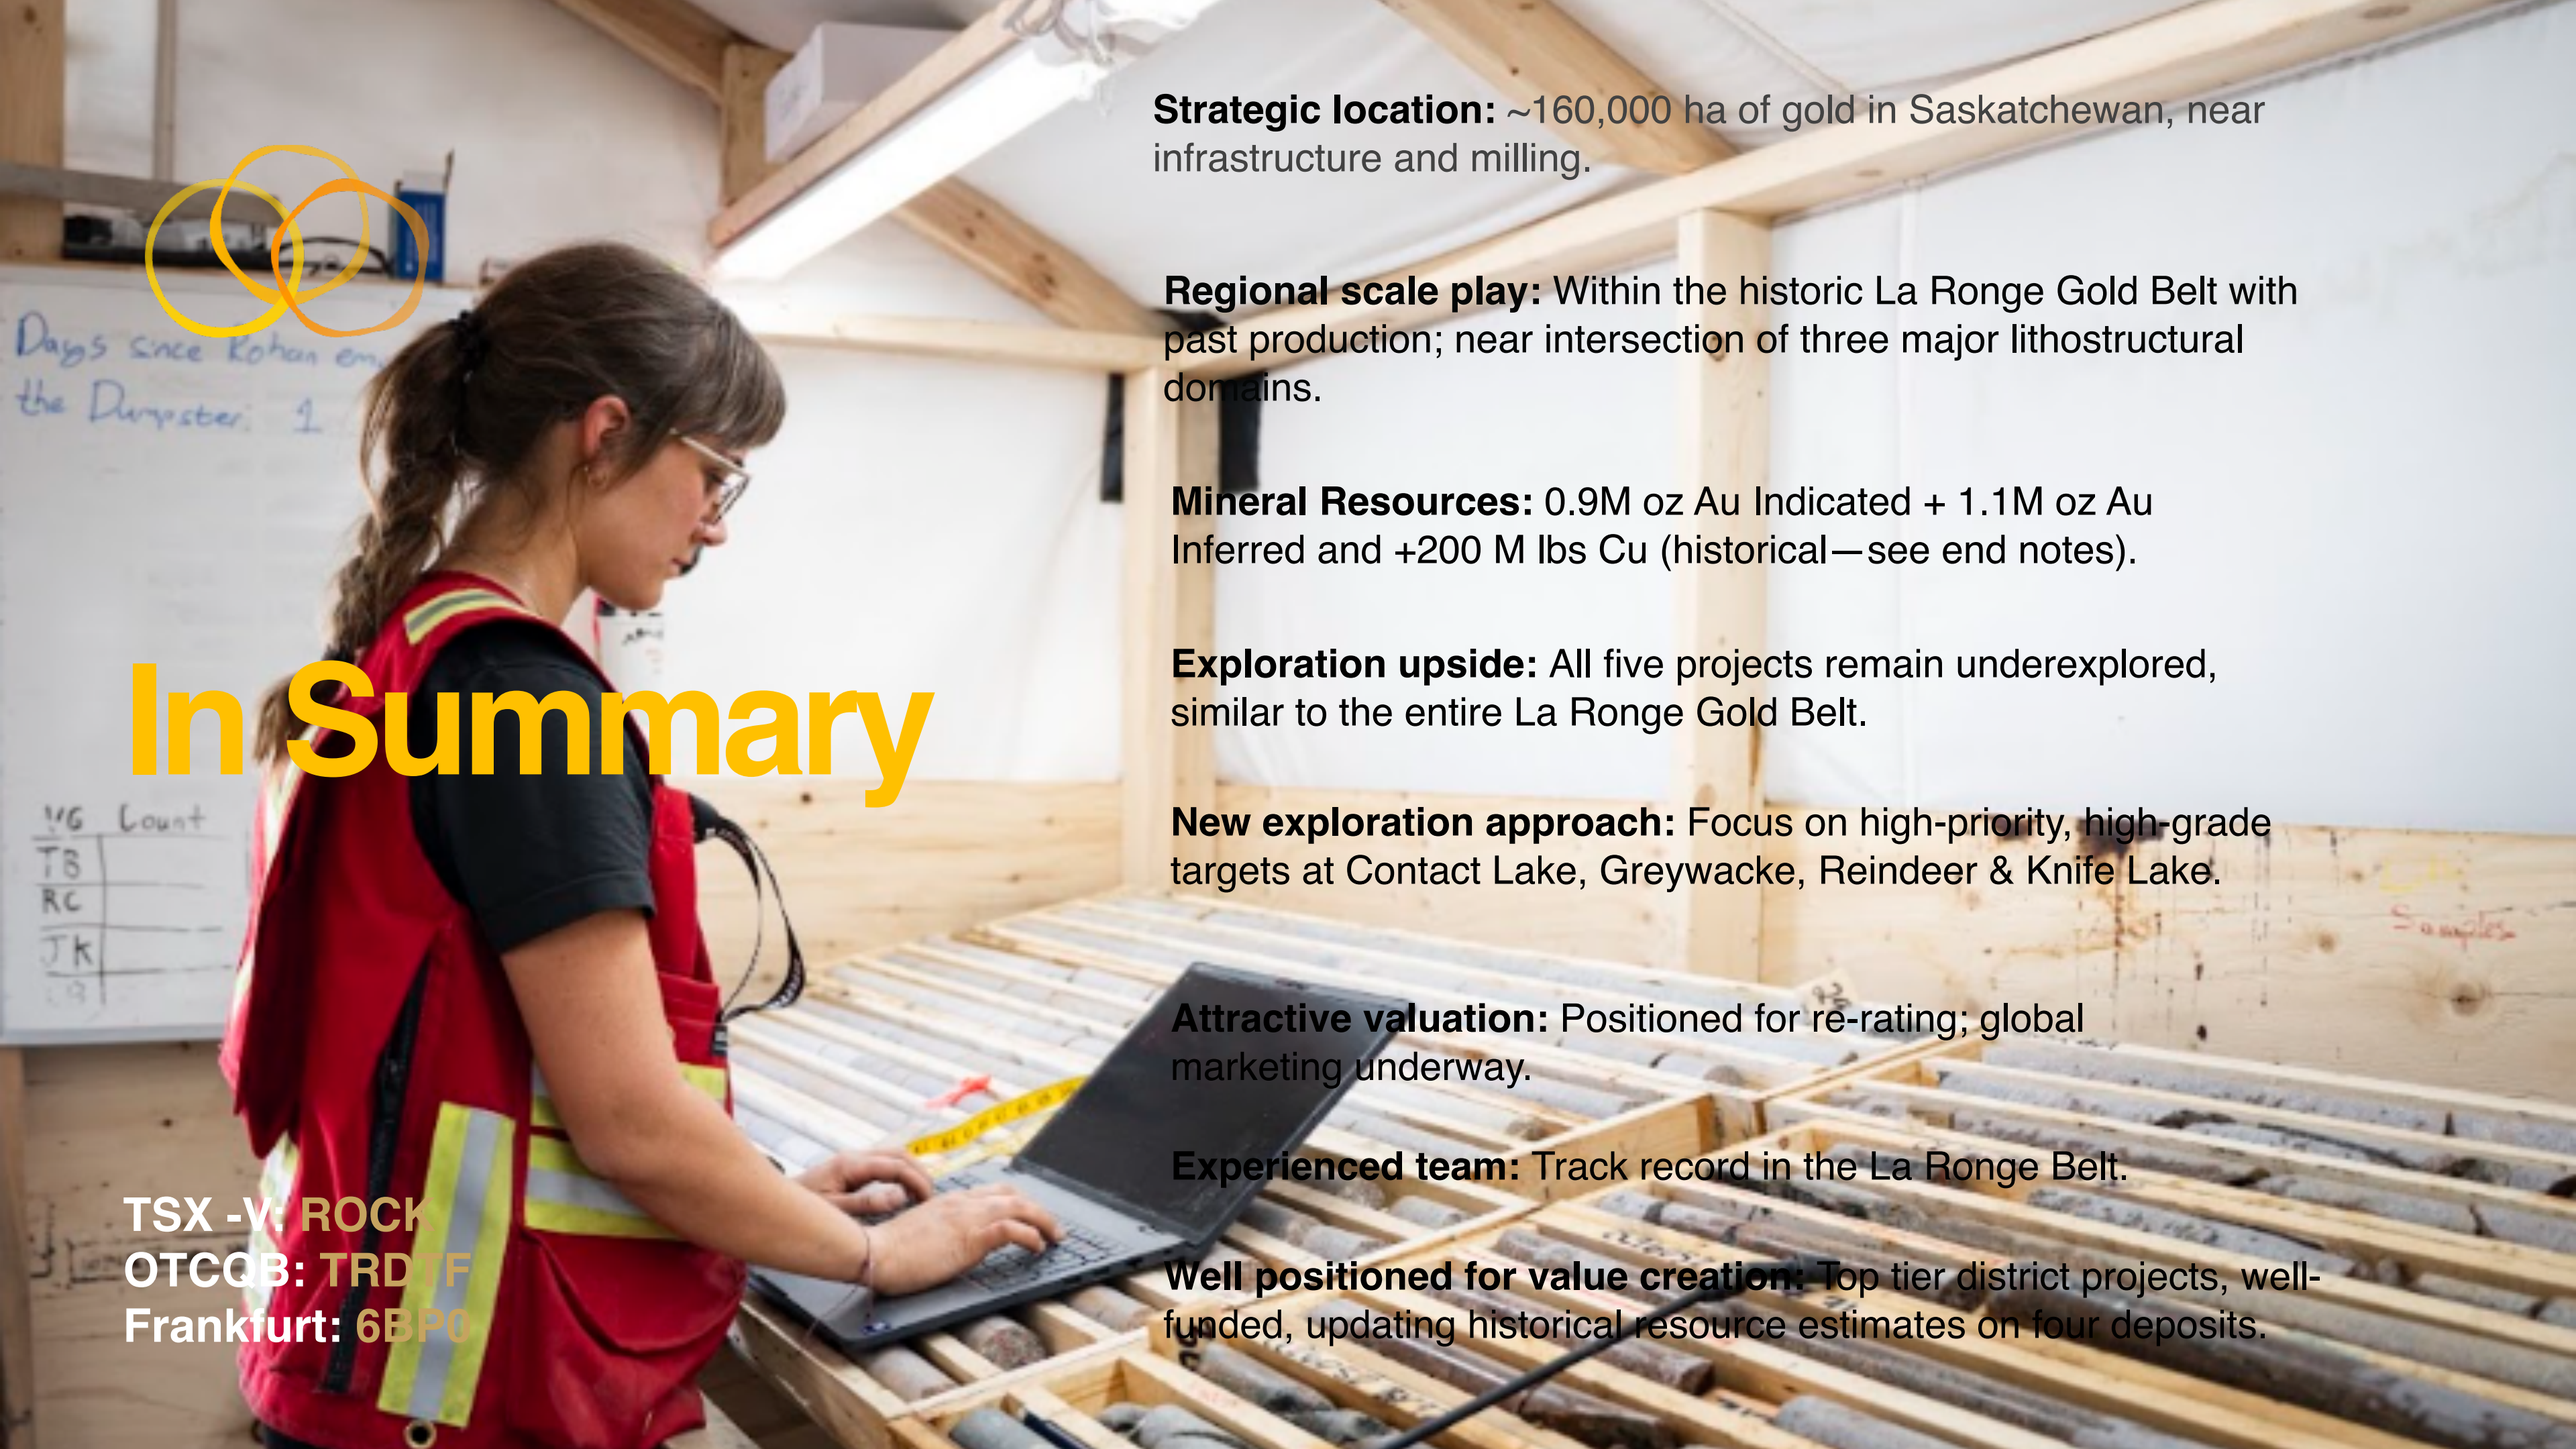

Building Scale

Trident is building a district scale gold opportunity in Saskatchewan through aggressive drilling, strategic land consolidation, and expansion of the high grade Contact Lake system. Supported by a strong treasury and a large regional land position, the Company’s goal is to unlock multiple gold deposits across the La Ronge Gold Belt.

Opportunity

Trident trades at a fraction of peer valuations despite strong asset base and funding.

In Summary

Strategic location: ~160,000 ha of gold in Saskatchewan, near infrastructure and milling.

Regional scale play: Within the historic La Ronge Gold Belt with past production; near intersection of three major lithostructural domains.

Mineral Resources: 0.9M oz Au Indicated + 1.1M oz Au Inferred and +200 M lbs Cu (historical—see end notes).

Exploration upside: All five projects remain underexplored, similar to the entire La Ronge Gold Belt.

New exploration approach: Focus on high-priority, high-grade targets at Contact Lake, Greywacke, Reindeer & Knife Lake.

Attractive valuation: Positioned for re-rating; global marketing underway.

Experienced team: Track record in the La Ronge Belt.

Well positioned for value creation: Top tier district projects, well-funded, updating historical resource estimates on four deposits.

End Notes

1 The 2025 MRE was issued to Trident Resources and has an Effective Date of November 6, 2025.
Notes to the Resource Estimate Tables:
The Mineral Resource Estimates was completed by Sue Bird, P.Eng. who is independent of the Company, with an effective date of November 6, 2025.
The Mineral Resource Estimate for all four deposits have been confined by an open pit with “reasonable prospects of eventual economic extraction” using the following assumptions:
Metal price of US$2,600/oz Au;
Payable metal of 99% for Au;
Offsite costs (TC/RC/Transport) for Au of US$5.80/oz;
Pit slopes are 45 degrees;
Mining cost of mineralized material of CDN$2.56/t and CDN$2.40/t for waste, and;
Processing costs of CDN$15.60/t with G&A costs of CDN$7.20/t.
Metallurgical recoveries are 90% for all deposits.
Forex = 0.72 $US:$CDN
The NSR equation is: NSR (CDN$/t) = (Au*90%*CDN$114.68/g)
The specific gravity for each deposit and lithologies or domains ranges from 2.40 to 2.91.
Numbers may not add due to rounding.

2 The Knife Lake Mineral Resource estimate was issued to Rockridge Resources Ltd. by Qualified Person Sue Bird, P.Eng. with an Effective Date of June 12, 2019. The accompanying report is titled “NI 43-101 Mineral Resource Estimation for the Knife Lake Property, Saskatchewan”. Metal price assumptions include (USD); Cu $2.80/lb, Zn $1.20/lb, Co $18.00/lb, Au $1300/oz, Ag $17.00/oz. Recovery assumptions include; Cu 95%, Zn 90%, Co89%, Au 80% and Ag 55%. An exchange rate of $CDN:$USD of 0.77 was used with a mining cost of $1.30/tonne (CDN) and a royalty of 2% applied to the NSR values. Lerch-Grossman pits with a pit slope of 50° and the base cut-off grade was chosen as 0.40% CuEq, which conforms to an NSR cut-off grade of approximately $30.00 (CDN). CuEq calculation formula is CuEq= Cu% + (Zn%*0.398) + (Co%*5.901) + (Au g/t*0.553) + (Ag g/t*0.005).
