Forward Looking Statements

Forward looking statements: This presentation contains certain “forward-looking information within the meaning of Canadian securities legislation and "forward-looking statements" within the meaning of the United States Private Securities Litigation Reform Act of 1995 (collectively "forward looking statements") concerning Onyx Gold’s plans for its properties, operations and other matters. Forward-looking statements include predictions, projections and forecasts and are often, but not always, identified by the use of words such as “seek”, “anticipate”, “believe”, “plan”, “estimate”, "forecast", “expect”, "potential", "project", "target", "schedule", budget" and “intend” and statements that an event or result “may”, “will”, “should”, “could” or “might” occur or be achieved and other similar expressions and includes the negatives thereof. All statements other than statements of historical fact, including, without limitation, statements regarding potential mineralization, the estimation of mineral resources, the realization of mineral resource estimates, interpretation of prior exploration and potential exploration results, the timing and success of exploration activities generally, the timing and results of future resource estimates, permitting time lines, metal prices and currency exchange rates, availability of capital to Onyx Gold, government regulation of exploration operations, environmental risks, reclamation, title, statements with respect to the future price of gold and other metals, and future plans and objectives of Onyx Gold are forward-looking statements that involve various risks and uncertainties. There can be no assurance that such statements will prove to be accurate and actual results and future events could differ materially from those anticipated in such statements. Forward-looking statements are based on a number of material factors and assumptions. Important factors that could cause actual results to differ materially from Onyx Gold’s expectations include actual exploration results, changes in project parameters as plans continue to be refined, results of future resource estimates, future metal prices, availability of capital and financing on acceptable terms to Onyx Gold, general economic, market or business conditions, uninsured risks, regulatory changes, defects in title, availability of personnel, materials and equipment on a timely basis, accidents or equipment breakdowns, delays in receiving government approvals, unanticipated environmental impacts on operations and costs to remedy same, and other exploration or other risks detailed herein and from time to time in the filings made by the Company with securities regulators. Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ from those described in forward-looking statements, there may be other factors that cause such actions, events or results to differ materially from those anticipated. There can be no assurance that forward-looking statements will prove to be accurate and accordingly readers are cautioned not to place undue reliance on forward-looking statements.

Ian Cunningham-Dunlop, P.Eng., Executive VP, Onyx Gold Corp., and a qualified person (“QP”) as defined by Canadian National Instrument 43-101, has reviewed and approved the technical information contained in this presentation.

Flipper Zone

Emerging Sediment-Hosted Gold Zone Associated with The Argus Fault – 3km Away From The Argus Gold System

2026 Drill Plan for Munro-Croesus

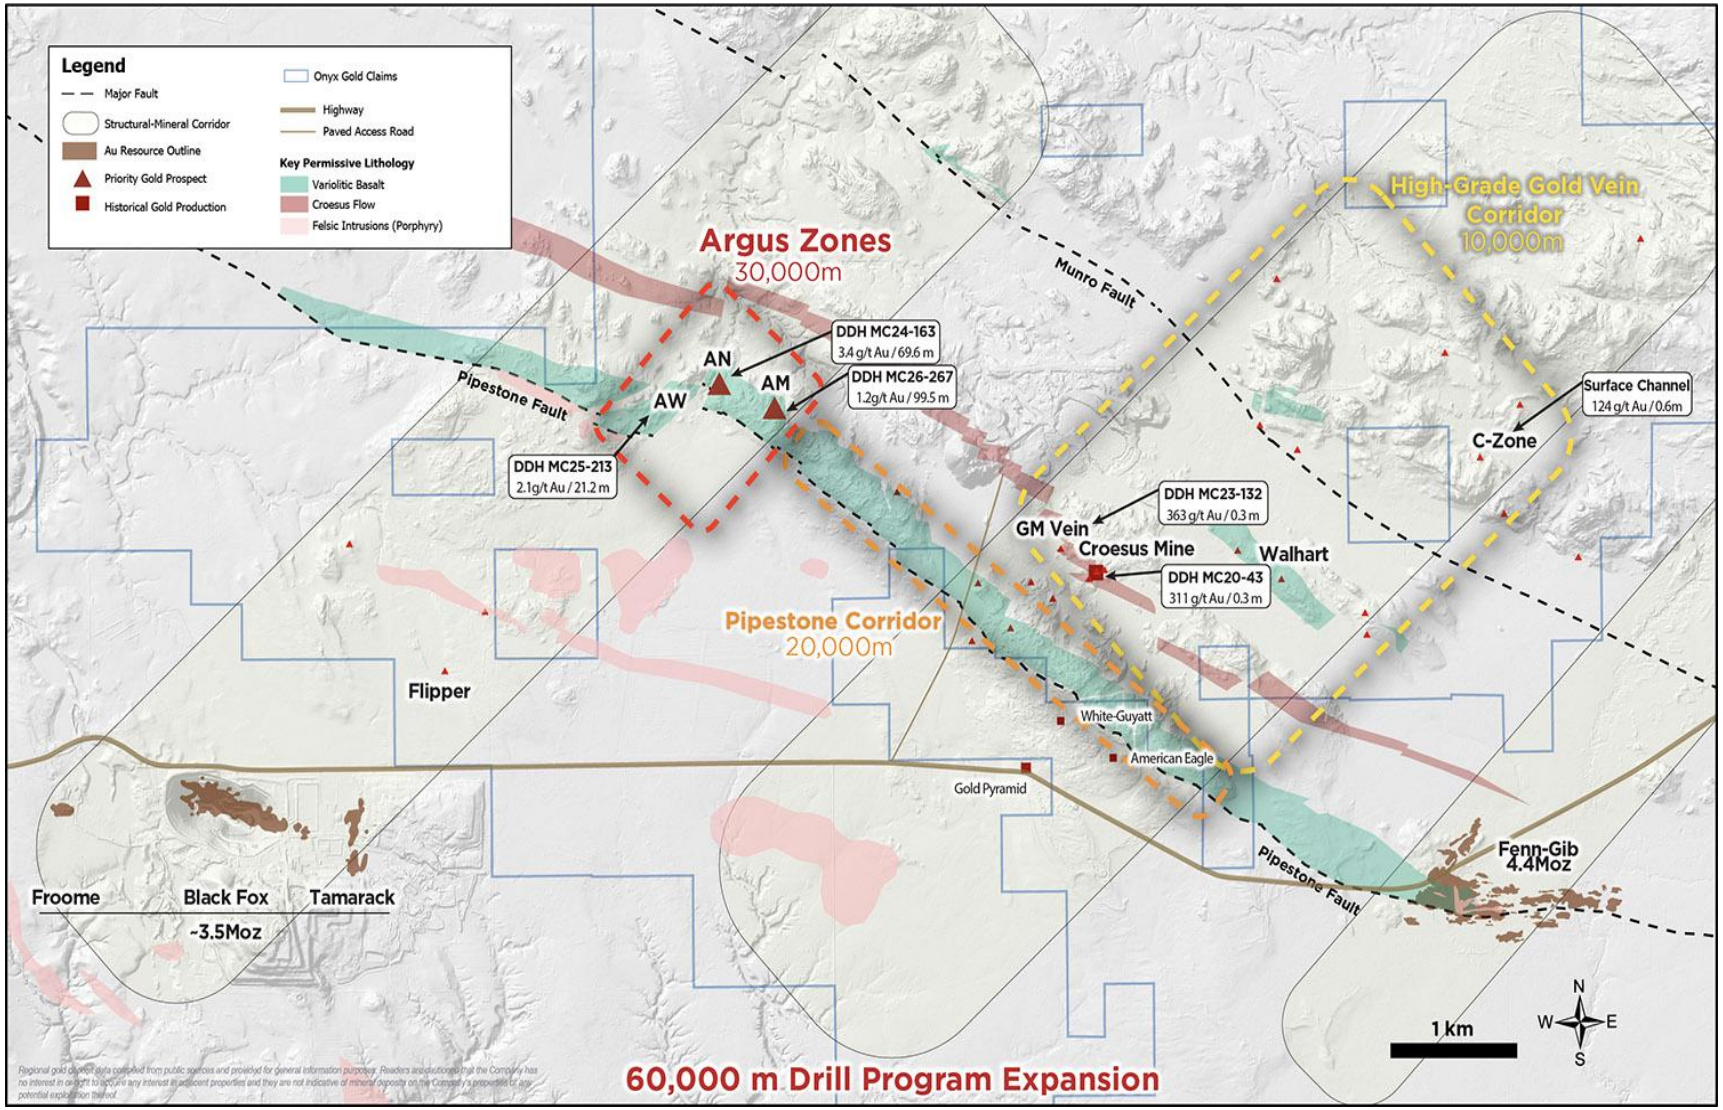

110,000m Drill Program With 4 Diamond Drill Rigs

Program Objectives

- **Expand the Argus Gold System**
  Including the higher-grade plunging zones and broader disseminated mineralized envelopes

- **Testing for Additional Mineralized Centers**
  where northeast-trending structures intersect favourable volcanic stratigraphy along the broader Pipestone Fault corridor (8 km) and Argus Fault (16 km)

- **Test the High-Grade Vein Corridor**
  Expand known high-grade vein targets and test new high-grade targets along a multi-kilometer corridor

Yukon's Eastern Tombstone Belt

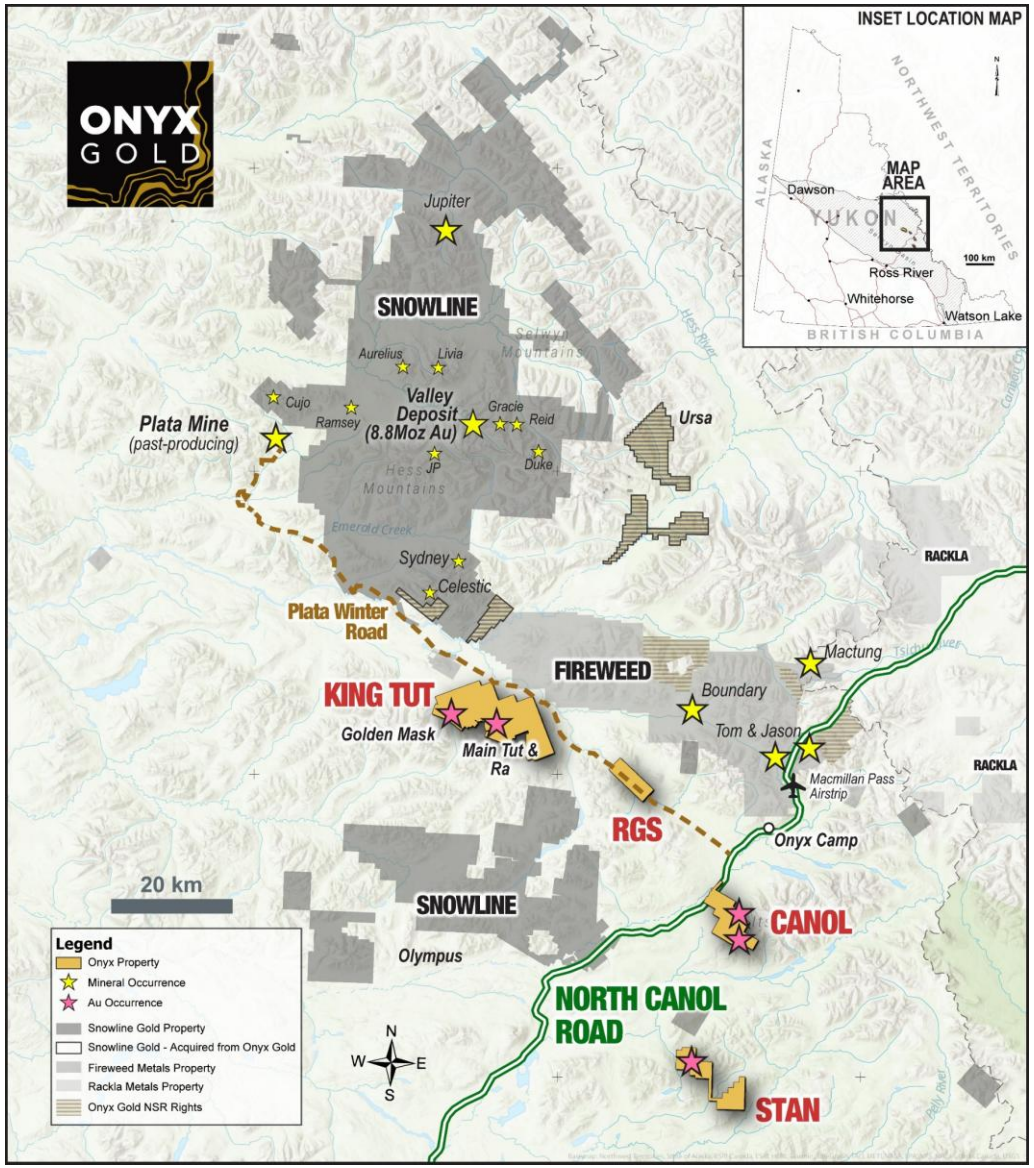

Commanding Land Position in a Rising Resource District

Yukon Portfolio Highlights

- **4 Gold Properties** | 227km² in the Tombstone Gold Belt
- **Proven Neighbourhood** | Near Snowline's Valley discovery & Fireweed's Macpass / Mactung deposits
- **Intrusion-Related Upside** | Multiple targets analogous to multi-Moz gold systems
- **Infrastructure Leverage** | Adjacent to North Canol Rd.; C$51.4M gov't funding committed

Conclusion

Discovery-focused Explorer in Two of Canada's Top Gold Jurisdictions

- One of the **largest exploration programs** by a junior in Canada at Munro-Croesus
- **~90%** of the fully-funded expanded 110,000-meter **drill program completed** - steady news flow throughout 2026
- **Low exploration costs** of ~C$200/metre all-in drilling year-round – infrastructure is key to low discovery cost
- **Excess milling capacity** in the Timmins camp could drive M&A activity for juniors with strategic deposits and land packages
- Drilling is unlocking both **bulk-tonnage and higher-grade gold potential** across multiple zones.
- **Strategic investments** by Gold Fields and other majors
- **Multiple new high-grade structures** identified across a large, mineralized corridor suggesting the potential for more repeatable "Argus-Style" gold systems
