Forward Looking Statements

Certain information contained in this presentation constitutes “forward-looking information” under Canadian securities legislation. This includes, but is not limited to, statements about potential payments under the contingent value right; information related to drilling programs in Guyana. Wherever possible, words such as “may”, “will”, “should”, “could”, “expect”, “plan”, “intend”, “schedule”, “anticipate”, “believe”, “estimate”, “predict” or “potential” or the negative or other variations of these words, or similar words or phrases, have been used to identify these forward-looking statements. These statements reflect management’s current beliefs and are based on information currently available to management as at the date hereof.

Forward-looking information involves known and unknown risks, uncertainties, and other factors which may cause the actual results, performance, or achievements of the Company and/or its subsidiaries to be materially different from any future results, performance, or achievements expressed or implied by the forward-looking information. Such factors include, among others, commodity prices, general business, economic, competitive, political and social uncertainties, changes in project parameters as plans continue to be refined, accident, labour disputes and other risks of the mining industry, delays in obtaining governmental approvals or financing, as well as the risk factors set out in “Risk Factors – Risks Relating to G3 and the Spin-Out” in the Circular. Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking information, there may be other factors that could cause actions, events or results to differ from those anticipated, estimated or intended. Forward-looking information contained herein are made as of the date of this news release. There can be no assurance that forward-looking information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. The Company undertakes no obligation to update forward-looking information if circumstances or management’s estimates or opinions should change, except as required by applicable securities laws. Accordingly, the reader is cautioned not to place undue reliance on forward-looking information.

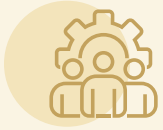

The Company assumes no obligation to update or revise them to reflect new events or circumstances, except as required by law. Dan Noone, CEO and Director of G3 Goldfields Inc., is the qualified person, within the meaning of NI 43-101 and has reviewed the technical content of this presentation.

Finding and Defining Gold Resources in Guyana

Spin-out of G2 Goldfields in July 2026 with C$45M and CVR optionality

- Well-funded with C$45M and CVR of up to US$200M based on future M&I in G Mining Ventures (GMIN-T)
- Same G2 leadership team that discovered Oko-Ghanie Project
- Large management ownership position of 20%
- Management spent ~C$85M in G2 to create ~C$3B in equity value

Management with Proven Discovery Track Record in Guyana

- Proven legacy of discoveries and mine development
- Two major past mine discoveries totaling +11 Moz Au (Aurora, Oko-Ghanie)
- 30+ years local knowledge of geology and structures in the Cuyuni Gold Basin
- Management responsible for four of five past discoveries within Oko gold belt

100% Guyana Focused; Strategic Land Position in Oko Gold District

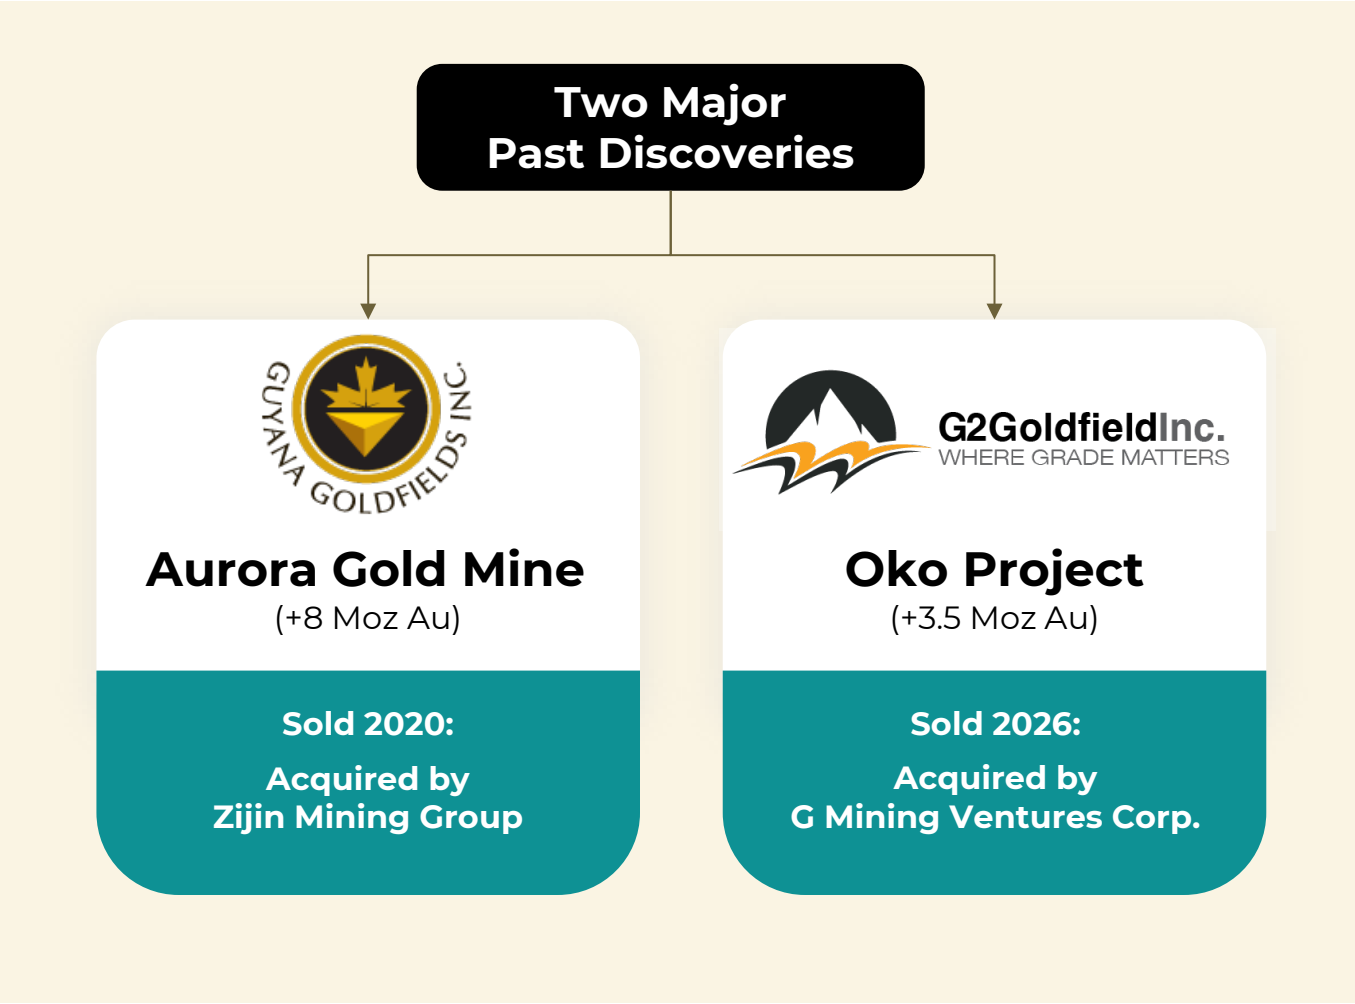

- Guyana: Leading country to explore, permit and mine in the Guiana Shield
- Underexplored territory offering Tier-1 discovery potential at surface
- Strategic land package in prolific Oko gold belt (+9 Moz Au); additional acquisitions in progress
- Claims contain permitted, bonanza grade historical producer + highly prospective discovery exploration targets

Multi-Million Ounce Discovery Potential Across Numerous Targets

- Multiple Tier-1 scale anomalies and targets
- Positioned within favorable geological structures known to host significant gold deposits
- Initial drill program focused on Peter's Mine, a past producer with +41 g/t Au bonanza-grades
- Focused on making the next major gold discovery in Guyana

Management - Track Record of Multiple Discoveries & Value Creation

- **Sector specialists in gold discovery** and exploration in Guyana
- **Two major past discoveries in Guyana exceed 11 Moz Au**
- **Over 30 yrs "boots on the ground" operating experience** – ability to acquire / advance projects quickly
- Goal of **surfacing value through exit transactions**
- **Repeatable spin-out strategy** unlocking greater shareholder value
- **Large insider management positions** with disciplined capital allocation

Capital Structure and Ownership

Capital Structure – CSE: GTRE

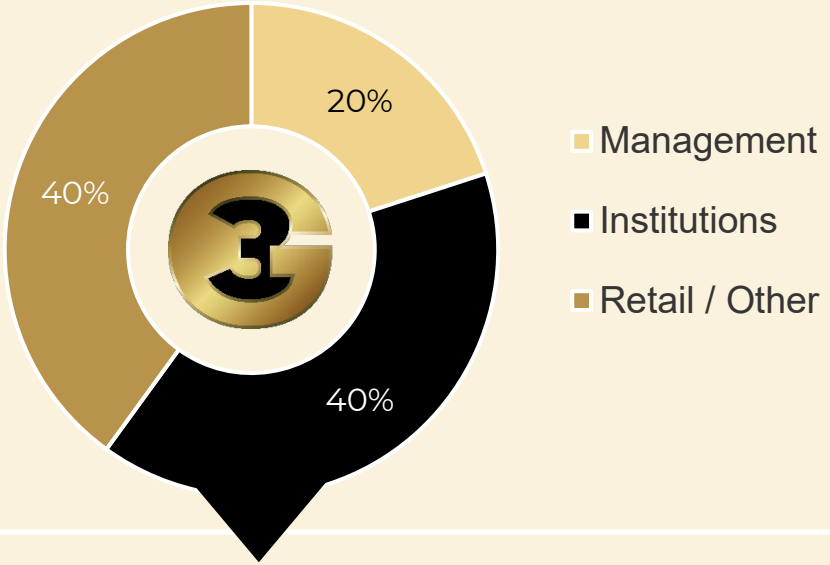

Common Shares Outstanding	142,700,531
Management & Board (~20%)	28,271,081
Fully Diluted Shares	146,700,531
Cash (unaudited)	C$46.5M

Analyst Coverage

ATB CORMARK CAPITAL MARKETS

Price Target: C$2.00

Ownership

Top 10 Institutional Investors

1. Ithaki Ltd
2. BlackRock
3. Ixios Asset Mgmt.
4. Van Eck
5. Merk Investments
6. Amati Global Investors
7. DWS Investment
8. U.S. Global Investors
9. Franklin Advisors
10. Sprott Asset Mgmt.

Guiana Shield – Mineral Rich and Underexplored

- Underexplored
- Modern discoveries of Tier-1 Assets at surface
- Separated by continental drift, the Guiana Shield and the West African Birimian Shield share the same gold-rich geology
- The Guiana Shield has a current gold inventory of 110+ Moz vs. 300+ Moz in West Africa; 60 Moz found in Venezuela

Guyana - Leading Country to Explore, Permit and Mine

Combining political stability with favorable mining regulations and proven geological potential

World's Fastest Growing Economy

- Real GDP growth of 64% (2022), 38% (2023), 43% (2024), 20% (2025)
- Non-oil was 14% of GDP (2025)
- Top 10 Fraser Institute Investment Attractiveness Index (2025)

Strategic Producer for the West

- Global leader in offshore oil discoveries since 2015 fueling economic growth
- ExxonMobil Guyana produces 900,000 bopd, with plans to increase to 1.7 million bopd by 2030

Continuous Pro Mining Policy

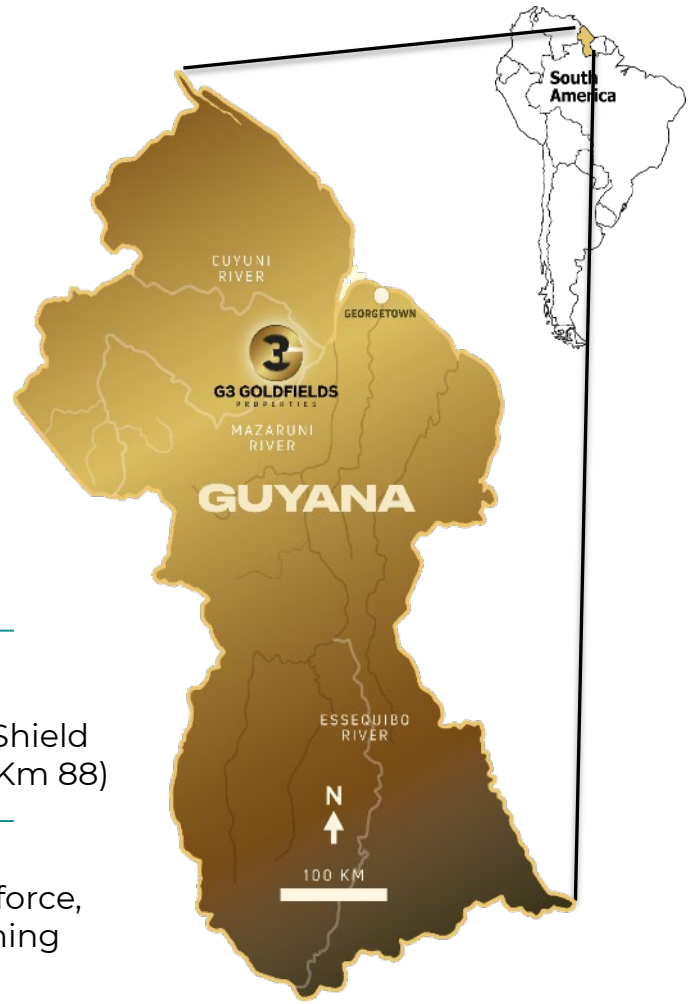

- Mining friendly and straight forward permitting
- Stable legal framework with English Common Law and Mining Act of 1989, long history of significant gold production
- Ability to advance projects quickly

Tier 1 Deposits

- Guiana Shield – Mineral rich and underexplored
- Tier 1 deposits of scale and grade within Guyana and along trend in Guiana Shield (Aurora, Oko, Omai, Rosebel, Merian, El Callo, Choco 10, Las Cristinas, Brisas, Km 88)

Established Infrastructure & Workforce

- Roads, bridges, deep water harbor and port development, skilled local workforce, and government policies that encourage foreign investment while maintaining reasonable tax frameworks

Strategic Land Package in Guyana, and Growing

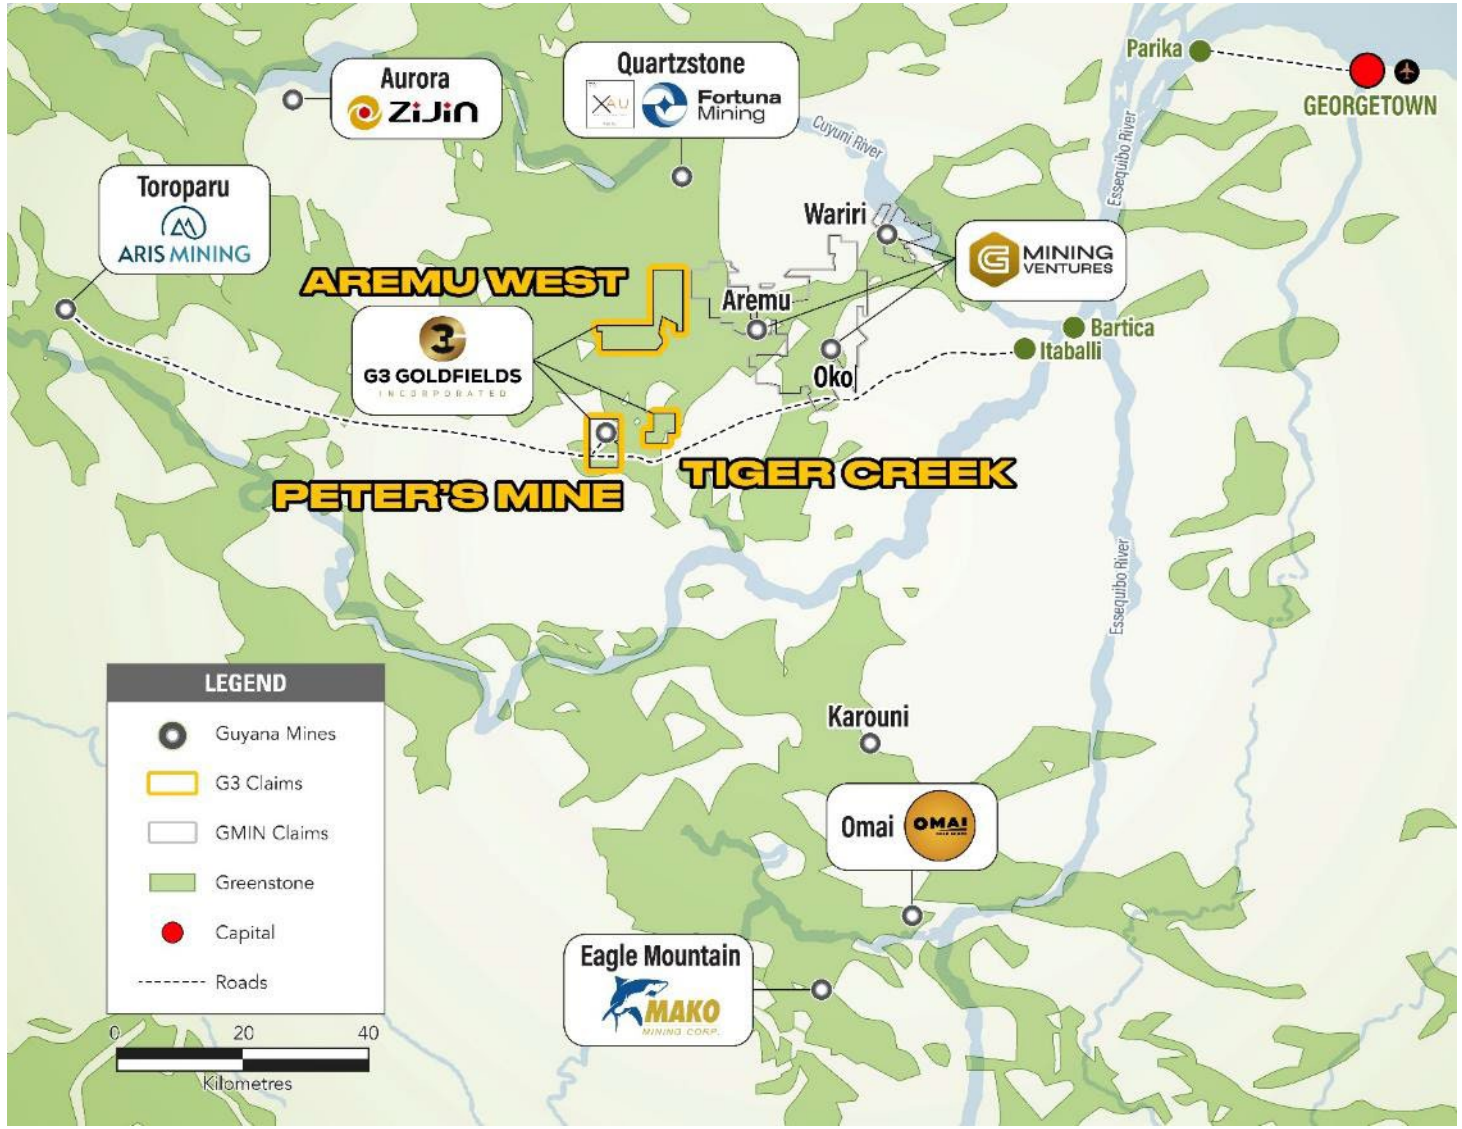

+32,000 acres land package built after +30 years of in-country presence

Exceptional discovery and exploration opportunities from multiple properties, including **past producing and permitted Peter's Mine**

Aremu-Oko trend has generated multiple discoveries and drill targets, similar in geological setting and scale to Oko

Properties lie ~120 km southwest of Georgetown (capital)

Further acquisitions in progress, leveraging in-country expertise and relationships to secure highly prospective ground

Magnetic Setting: Peter's Mine, Tiger Creek and Aremu West

Three G3 properties within a district of known gold occurrences

Peter's Mine

- Historical magnetic survey indicated multiple deformation episodes; structures (possibly the Mango shear) host mineralization like the historic mine
- Surrounded by known occurrences: Main Shaft, U2 Adit, Herod Shaft, Red Hill

Tiger Creek

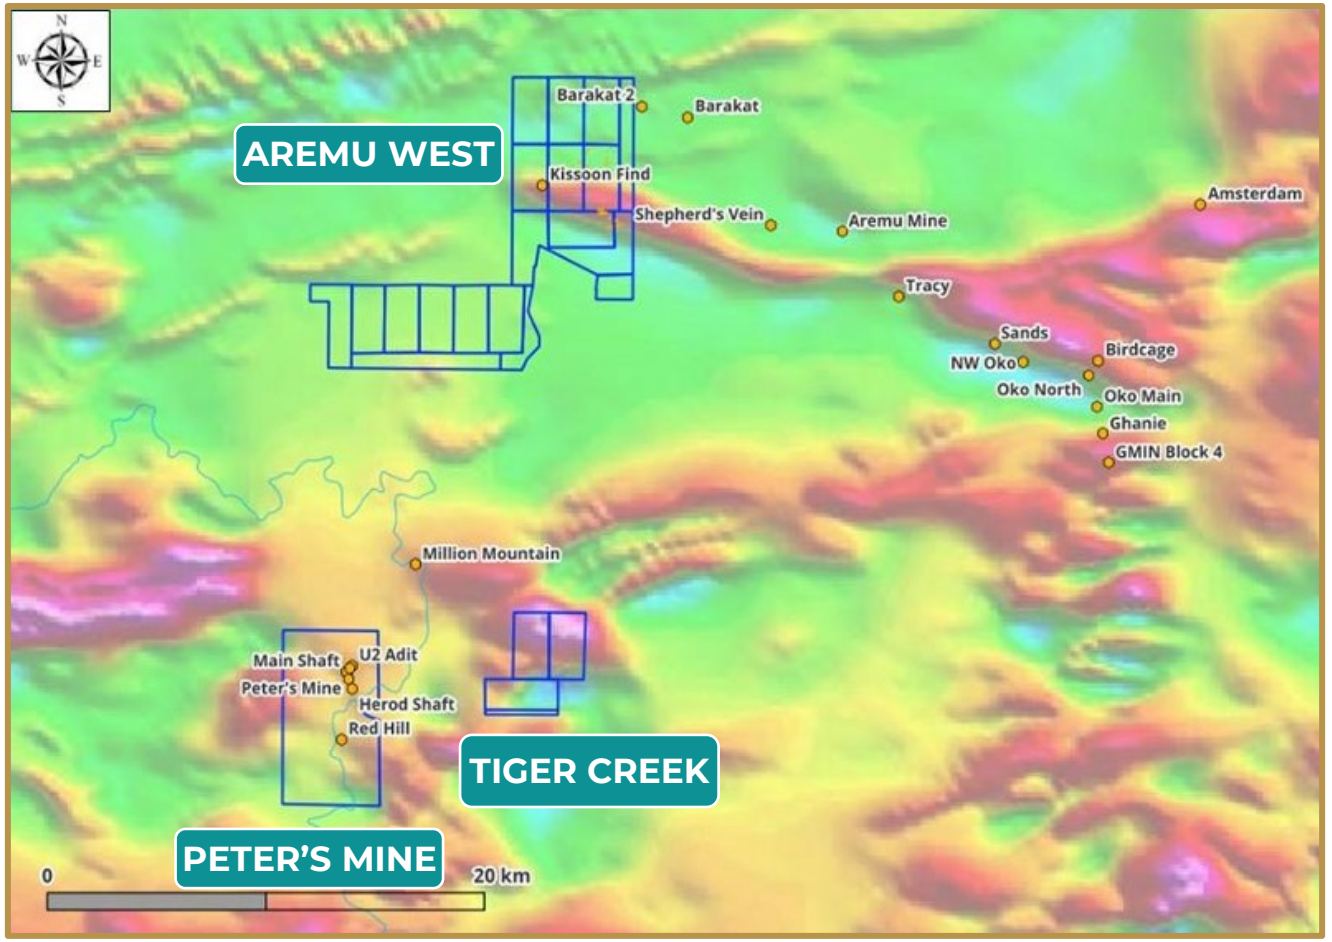

- Blocks lie ~9 km east of Peter's Mine beside a pronounced magnetic high
- Similar geology to Peter's Mine; no previous drilling

Aremu West

- Sits on the ENE magnetic trend towards Oko
- 2,006 soil samples define multiple gold-in-soil anomalies, some untested

Distance to Existing Occurrences

- Oko is ~28 km east-northeast of Aremu West and Tiger Creek

Regional magnetic image. Source: Property of Merit technical report (G3 Goldfields, Aug 2026)

Peter's Mine: Historical Producer, Modern Exploration Opportunity

2025 drilling and surface sampling identify targets around historical workings

Historical Producer With Bonanza-Grades

- Past producer of **>41koz @ +41g/t Au** (1905-1909) according to the USGS (1966)
- Underground workings reached ~91 m

Fully Permitted, Active Gold Mine Located Within Highly Prospective Gold District

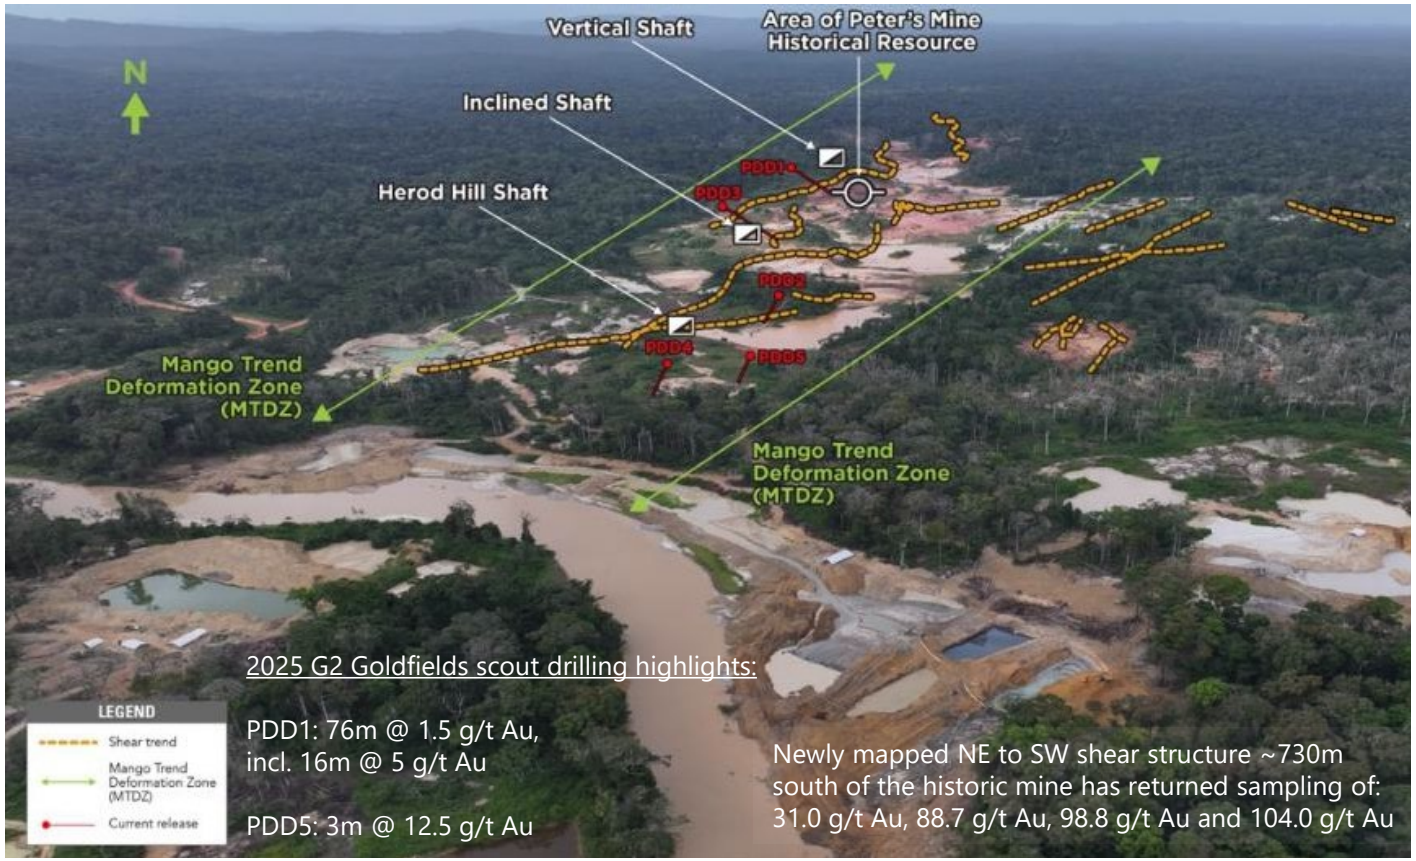

- Largest gold producing district in Guyana

Strong Geological Indicators for Scale

- Classic shear-hosted quartz vein system typical of major orogenic deposits
- British Guiana Geological Survey report (1961) identified a 4km mineralized shear within a ~14-km Mango Trend
- Visible gold in rocks, located adjacent to basin margin (just like the Oko-Ghanie district)

Underexplored with Significant Upside

- Limited drilling to date; 2025 drilling (744m) returned 76m @ 1.5 g/t Au incl. 16m @ 5 g/t Au and sampling up to 104 g/t Au

Source: See G2 Goldfields press release dated May 13, 2025

Tiger Creek: District-Scale Exploration Upside

Strong potential for new discoveries within a proven mineralized corridor

Proven Gold District

- Widespread historical gold workings
- Extensive small scale artisanal mining taking place
- Laterite ridge with gold shedding off

Exploration Upside

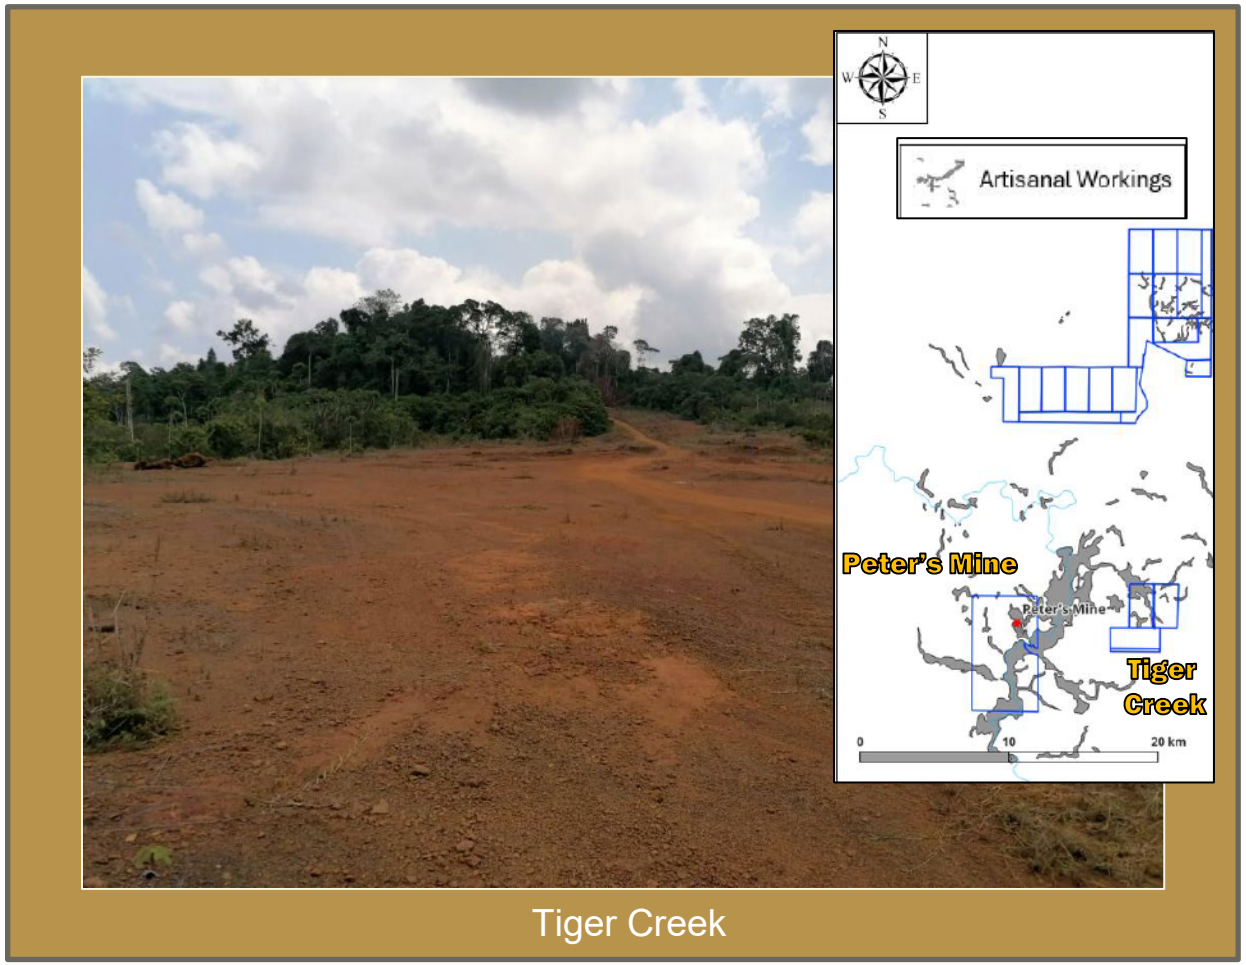

- Multiple gold-in-soil anomalies and untested structural targets

Favourable Geology

- Similar geology to Peter's Mine
- Small gold-bearing quartz stringers and veins occur in basic schists

Early-Stage Opportunity

- No previous drilling with high leverage to discovery success

Tiger Creek

Aremu West: District-Scale Discovery

Strong discovery potential within the broader Oko district

Large, Highly Prospective

- Significant land package along the **same regional north-south shear zone that hosts the Quartzstone Gold Project**, with multiple mineralized trends across a broad area with widespread alluvial gold mining

Underexplored with High Discovery Upside

- **Numerous +100 ppb gold-in-soil anomalies extending hundreds of metres**
- **Recent trench sampling of up to 15.4 g/t Au**
- No drilling to date with extensive untested targets
- True greenfield-to-emerging discovery opportunity

Favourable Geology, Greenstone-Hosted Gold Setting

- Lies in greenstone terrain, with felsic to intermediate intrusions nearby
- Gold-bearing quartz veins occur close to greenstone–granite contacts
- Orogenic gold system with shear-hosted quartz vein mineralization
- Exposure to both high-grade and bulk-tonnage potential similar to Oko-Ghanie
- High likelihood of repeatable mineralization and scalable deposits

Strategic Role Within Oko District

- Contiguous to GMIN's Aremu-Oko land package

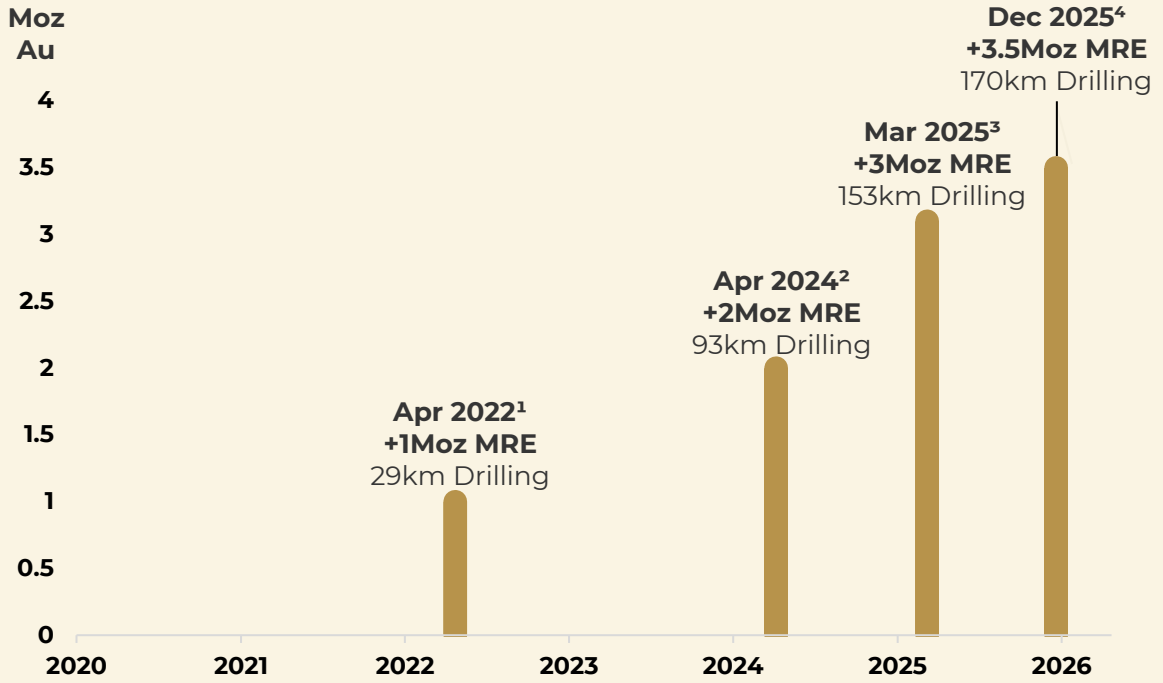

Track Record of Multiple–Times Value Creation in G2 Goldfields

Repeatable value creation formula for G3 Goldfields

G2 Goldfields Timeline: Discovery to Multi-Billion Dollar Transaction

G2 spent ~C$85M to create ~C$3B in equity value

Resource Growth: Consistent and Methodical

Timeline: Discovery to Transaction

(1) See G2 Goldfields press releases dated 1) April 26, 2022, 2) April 3, 2024; 3) March 10, 2025; 4) Dec 18, 2025, 5) April 9, 2026 and 6) July 29, 2026.

Why Invest?

- WELL-FUNDED WITH DISCIPLINED CAPITAL ALLOCATION
- STRATEGIC LAND PACKAGE IN PROVEN GOLD DISTRICT
- MULTI-MILLION OUNCE DISCOVERY POTENTIAL ACROSS NUMEROUS TARGETS
- UNDEREXPLORED JURISDICTION OFFERING TIER-1 MODERN DISCOVERIES
- MANAGEMENT WITH PROVEN DISCOVERY TRACK RECORD IN GUYANA
- DRILLING TO COMMENCE Q1 2027, ONGOING NEWSFLOW
- REPEATABLE FORMULA OF MULTIPLE-TIMES VALUE CREATION
