FORWARD LOOKING STATEMENTS

This presentation may contain certain forward-looking statements and projections regarding estimated resources and reserves; planned production and operating costs profiles; planned capital requirements; and planned strategies and corporate objectives. Figures, amounts, percentages, estimates, calculations of value and other factors used in this Presentation are subject to the effect of rounding.

Forward-looking statements are subject to a variety of known and unknown risks, uncertainties and other factors that could cause actual events or results to materially differ from those reflected in the forward- looking statements, including, without limitation: inherent uncertainties and risks associated with mineral exploration; uncertainties related to the availability of future financing necessary to undertake activities on Sinclair's properties; uncertainties related to the possible recalculation of, or reduction in Sinclair's mineral resources; uncertainties related to the outcome of studies; uncertainties relating to fluctuations in metal prices; the risk that Sinclair's title to its properties could be challenged; risks related to Sinclair's ability to attract and retain qualified personnel; uncertainties related to general economic and global financial conditions; uncertainties related to the competitiveness of the industry; risk associated with Sinclair being subject to government regulation, including changes in regulation; risks associated with Sinclair being subject to environmental laws and regulations, including a change in regulation; risks associated with Sinclair's need for governmental licenses, permits and approvals; uninsured risks and hazards; risk related to the integration of businesses and assets acquired by Sinclair; risk associated with Sinclair having no history of earnings or production revenue; risks associated with fluctuation in foreign exchange rates; risks related to default by joint venture parties (if any), contractors and agents, inherent risks associated with litigation; risk associated with potential conflicts of interest; risks related to Sinclair's lack of a dividend history; risks relating to short term investments; and uncertainties related to fluctuations in Sinclair's share price.

Sinclair's forward-looking statements are based on the assumptions, beliefs, expectations and opinions of management as of the date hereof and which Sinclair believes are reasonable in the circumstances, but no assurance can be given that these expectations will prove to be correct. These assumptions include, but are not limited to, that Sinclair's exploration of its properties and other activities will be in accordance with Sinclair's public statements and stated goals; that there will be no material adverse change affecting Sinclair or its properties; anticipated costs and timing for Sinclair's activities and such other assumptions as set out herein.

Such forward looking statements/projections are estimates for discussion purposes only and should not be relied upon. They are not guarantees of future performance and involve known and unknown risks, uncertainties and other factors many of which are beyond the control of the Company. The forward-looking statements/projections are inherently uncertain and may therefore differ materially from results ultimately achieved. The Company does not make any representations and provides no warranties concerning the accuracy of the forward-looking statements and disclaims any obligation to update or revise any forward-looking statements based on new information, future events or otherwise except to the extent required by applicable laws.

COMPLIANCE STATEMENTS

The information in this presentation that relates to the Project History, Exploration Results and Mineral Resource Estimate for the Mount Henry Gold Project is extracted from the Company's ASX releases and include:

- "Transformational acquisition of substantial WA gold project" dated 17 and 19 December 2025;
- "First Assays Extend Known Mineralization" dated 18 May 2026;
- "Drilling continues to extend known mineralisation beyond 915,000oz Resource" dated 22 July 2026;
- "Regional Targets Highlight Growth Potential" dated 29 July 2026;
- "Mt Henry Resource Doubles to 1.8Moz at 1.2g/t Gold" dated 14 September 2026;
- "Drilling Extends Mineralisation Beyond 1.8Moz Resource" dated 21 September 2026; and
- "High-Grade Gold Extends Beyond Mt Henry Resource Footprint" dated 19 October 2026.

The Company confirms that it is not aware of any new information or data that materially affects the information in the original market announcements and, in the case of the Mineral Resource Estimate, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcements continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.

NOT AN OFFER IN THE UNITED STATES OR CANADA

This presentation does not constitute an offer to sell, or the solicitation of an offer to buy, securities in the United States, Canada or in any other jurisdiction in which such an offer would be unlawful. The securities referred to in this presentation have not been, and will not be, registered under the U.S. Securities Act of 1933, as amended (U.S. Securities Act), or under the securities laws of any state of the United States, and may not be offered or sold in the United States absent registration or an applicable exemption from registration requirements. This presentation is not for distribution to U.S. wire services or for dissemination in the United States or Canada except in compliance with applicable securities laws.

MINERAL RESOURCE DISCLOSURE

It is a requirement of the ASX Listing Rules that the reporting of ore reserves and mineral resources in Australia comply with the Joint Ore Reserves Committee's Australasian Code for Reporting of Mineral Resources and Ore Reserves (JORC Code). Investors outside Australia should note that while mineral resource estimates of the Company in this document are reported in accordance with the JORC Code (such ore reserves and mineral resources reported in accordance with the JORC code being "Ore Reserves" and "Mineral Resources" respectively), they may not comply with the relevant guidelines in other countries and, in particular, may not comply with (i) National Instrument 43-101 (Standards of Disclosure for Mineral Projects) of the Canadian Securities Administrators (the "Canadian NI 43-101 Standards"); or (ii) Item 1300 of Regulation S-K, which governs disclosures of mineral reserves in registration statements filed with the SEC. Information contained in this presentation describing mineral deposits may not be comparable to similar information made public by companies subject to the reporting and disclosure requirements of Canadian or US securities laws.

How Big Could a Shallow 0.9Moz Resource Become

BIBRA - 2016

Resource[2]:	26Mt @ 1.1g/t Au for 0.9Moz (100% Inferred @ 0.5g/t cut-off)
Geometry[2]:	~25° dip
Mineralised extent[3]:	~270m vertical
Oz / vm[4]:	9,000 (peak)

SELENE - 2026

Resource:	25Mt @1.1g/t Au for 0.9Moz (81% Indicated, 19% Inferred, 0.5g/t cut-off)
Geometry:	~20° dip
Mineralised extent:	~200m vertical
Oz / vm:	6,800 (peak)

Drilling is testing the limits of Selene!

Note: Bibra is shown for illustrative comparison only. The comparison is based on Resource scale, grade, geometry and vertical extent at the dates shown and does not imply that Selene will achieve a similar Mineral Resource, Ore Reserve or development outcome. Selene remains at the Resource and exploration stage, with further drilling required to determine its ultimate scale.

The Next Generation of Potential Growth

SinclairGold

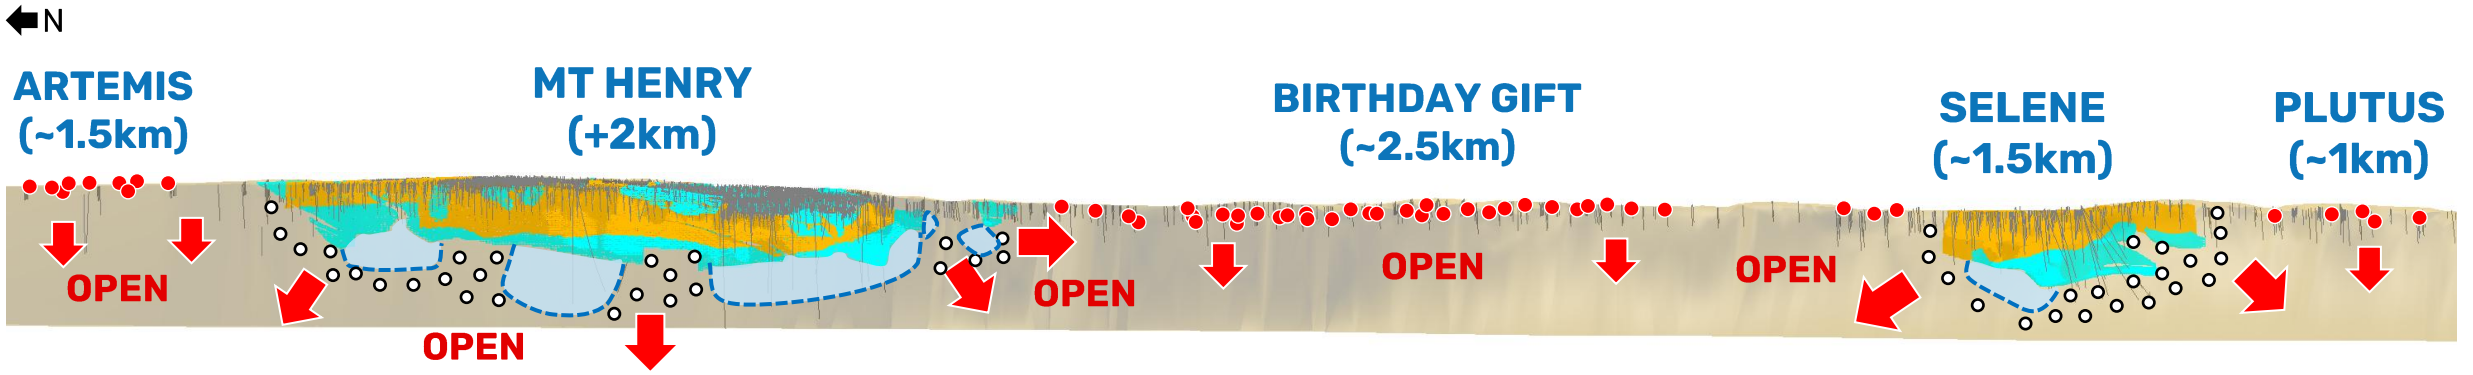

Note: Refer ASX announcements dated 29 Jul 2026 and 19 Oct 2026.

Are We Seeing The Start of Something Much Bigger?

What if the current Resource areas and regional prospects grow towards each other and at depth…

…Could this be the start of a much larger gold system with the potential to support a series of open pits?

~10 km from Artemis to Plutus

Long section looking East

Note: This slide is conceptual in nature and presented for illustrative purposes only. Regional prospects (Artemis, Birthday Gift and Plutus) shown do not currently support JORC (2012) Mineral Resources and do not form part of the current Mt Henry Gold Project Mineral Resource Estimate. Further exploration, Resource definition and studies are required to determine the continuity of gold mineralisation and the potential for any future open-pit development.

Delivering On Our Commitments

What we said we would do:

Deliver meaningful Resource growth before the end of CY26

What we delivered:

1.8Moz @ 1.2g/t Au

~100% Resource growth in only 6 months

What we have said we will do next:

Target further Resource growth, with next MRE update before the end of FY27

We're already making progress:

- **Expanded to 5 rigs**
- **Drilling continues beyond the MRE**
- **Many holes with assays pending**

SIMPLE OREBODIES **LARGE & SHALLOW** **TIER 1 JURISDICTION** **OPEN-PIT POTENTIAL**

Mt Henry holds multiple pathways for ongoing growth

Mt Henry & Selene

- **Both OPEN at depth & along Strike**
- **Drilling is ongoing**

Regional Prospects

- **Birthday Gift, Artemis, Plutus, Apollo**
- **High-grade, shallow historic results**

Broader 16km Corridor

- **Untested or underexplored areas**
- **Discovery potential**
