REVENUE GROWTH

- **Experienced Board and management team.** Team of seasoned geologists and financial professionals.
- **Focused property acquisitions in established mining camps** and along prolific structures. 40 of the properties are past producers and over 60 of the properties have either historic or 43-101 resources, and a number are in the PEA or higher-level study stage.
- **Tier One jurisdictions:** The company is focused on Quebec, Ontario, New Brunswick, Nevada and Arizona.
- **Balance sheet is strong at over $40 million[1] in cash and securities**; capital structure is tight with no warrants and a low share count.
- **The company is transaction focused** to earn income from option and property sale transactions and to generate paying royalties while continuing to add new high quality exploration properties.

>13% of the resources released January 28, 2026 by Cartier are situated in zones outside the main zone. A small amount of the ounces in the main zone sits on Globex Nordeau West royalty claims. The Contact zone, Bateman zone, Rapid and Nordeau zones include 261,800 ounces in the inferred resource category and 20,500 ounces of gold in the indicated resource category. Much of these four zones appear to be on Globex royalty claims.

Value from Optioning our Properties

Globex strives to bring partners in on its 100% owned properties because it is a successful value add strategy for three reasons:

01

Advances Exploration and Development and Adds Value to Property

Gold Focused Option Transactions:

- Joutel Gold Corp. on Joutel Eagle Northwest property (Au, Quebec).
- Joutel Gold Corp. on Gagne property (Au, Quebec).
- 101 Gold Corp. on Ramp/Maude Lake Property, (Au, Ontario).
- Emperor Metals on Duquesne West Property (Au, Quebec).

02

Revenue Source, Thereby Reducing Dilution.

Base Metal Focused Option Transactions:

- Electro Metals/BWR on Magusi/Fabie Bay Property (Cu, Zn, Ag, Au, Quebec).
- TomaGold on Lac Gwillim Property (Cu, Zn, Au, Quebec).

Reasons to Invest

Globex is financially strong company with a tight capital structure. Globex has an enviable property and royalty position along some of the biggest mineralizing structures in Canada and the USA. It owns a number of royalties that are moving forward towards production with increasing resources and more advanced economic studies being completed.

01

Tight Capital Structure with history of minimal stock dilution

02

Experienced, fiscally prudent management and board.

03

Income from Royalties and Options

04

We have No Debt, a very strong balance sheet and we own our assets.

05

Well positioned on major gold localizing structural faults such as the Cadillac and Destor Breaks, with property and our large royalty portfolio

06

We can execute exploration programs quickly with a fully functioning and staffed exploration office and no need to raise capital.

07

Royalty portfolio transitioning towards development and production.

CORPORATE PRESENTATION October 2026

Appendix

Bell Mountain Silver/Gold, Nevada – Lincoln Mining

3% GMR Royalty – Near term Production

Considerable additional exploration potential remains to be tested on the Bell Mountain project once production commences. This could add to the mine life.

2-3 year production totalling approximately 55,000 gold equivalent ounces.

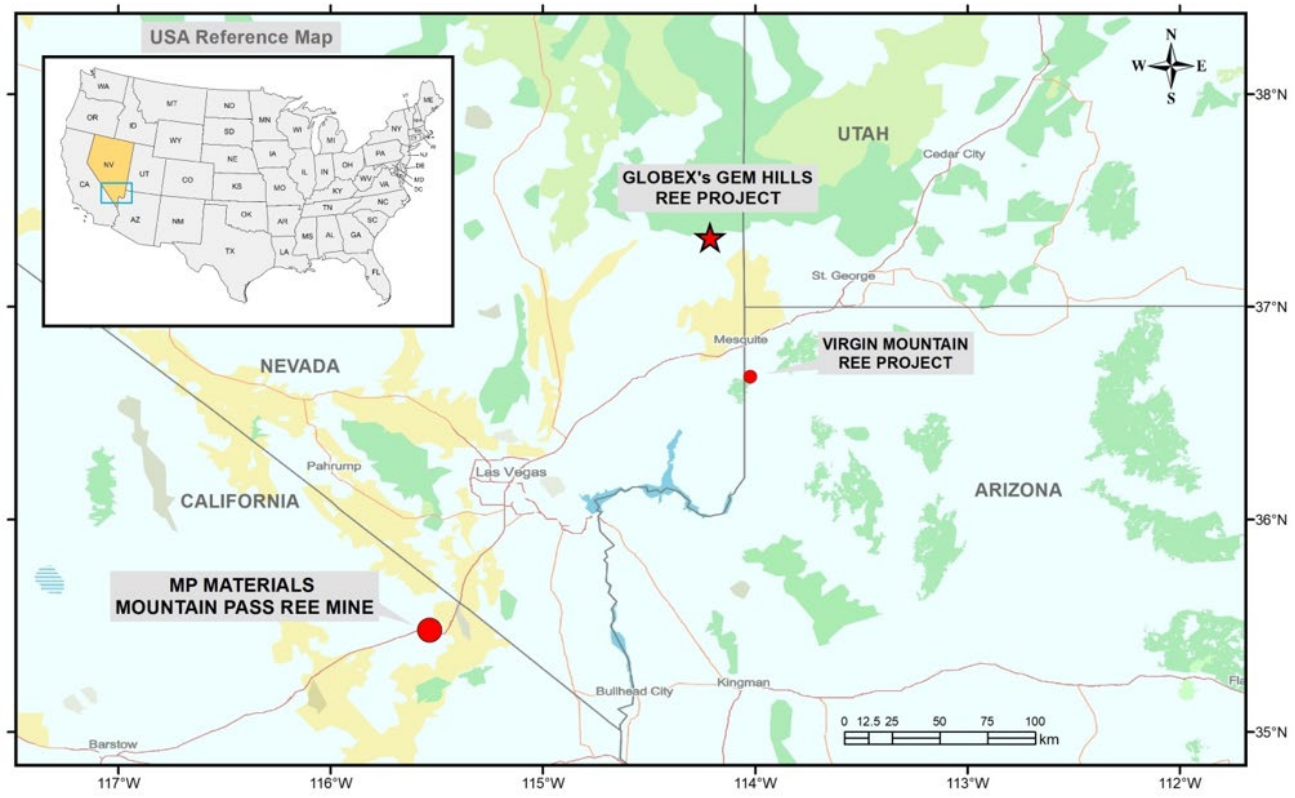

Bell Mountain – Potential Exploration Areas

At today's gold prices this would result in significant cash flow to Globex.

Expected to start production in late 2027.

Gem Hills Rare Earth Project, Nevada – 100% Globex

Sampling results – High TREO grades, and significant HREE

TREO Grades: 0.28% to 5.26% TREO

HREO Distribution: account for an average of 8% of the TREO

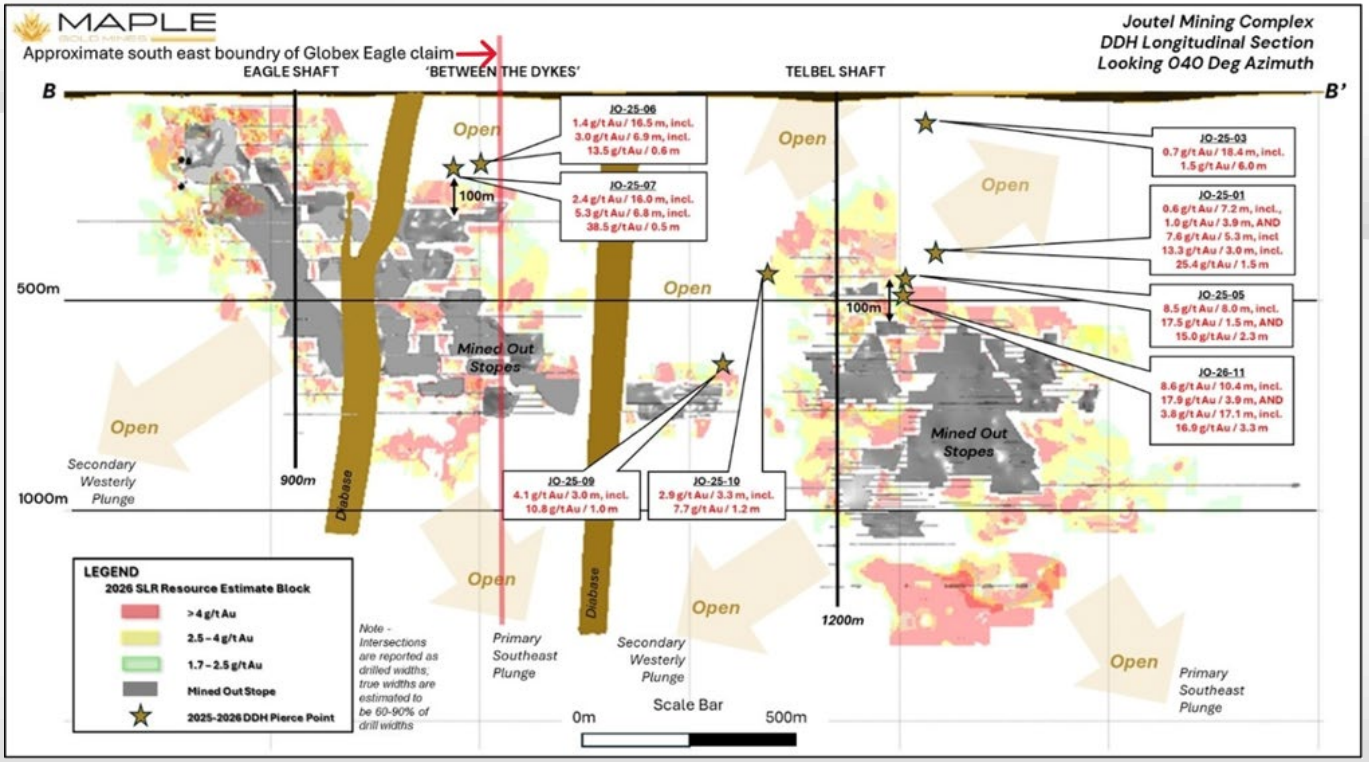

High-Value REO Share: High value critical oxides average roughly 17% of the total mix, spanning from 1.5% up to 39.7%.

Magnet Feedstocks (Nd+Pr): Combined Neodymium and Praseodymium (Nd_2O_3 + Pr_2O_3) average 13.7% of the TREO.

Targeted HREE Enrichment: Premium elements like Dysprosium and Terbium show intense, localized enrichment, peaking at 0.09% Dy_2O_3 (0.9 kg/t) and 0.016% Tb_2O_3 (0.16 kg/t), respectively.

Eagle Gold Mine Royalty, Maple Gold

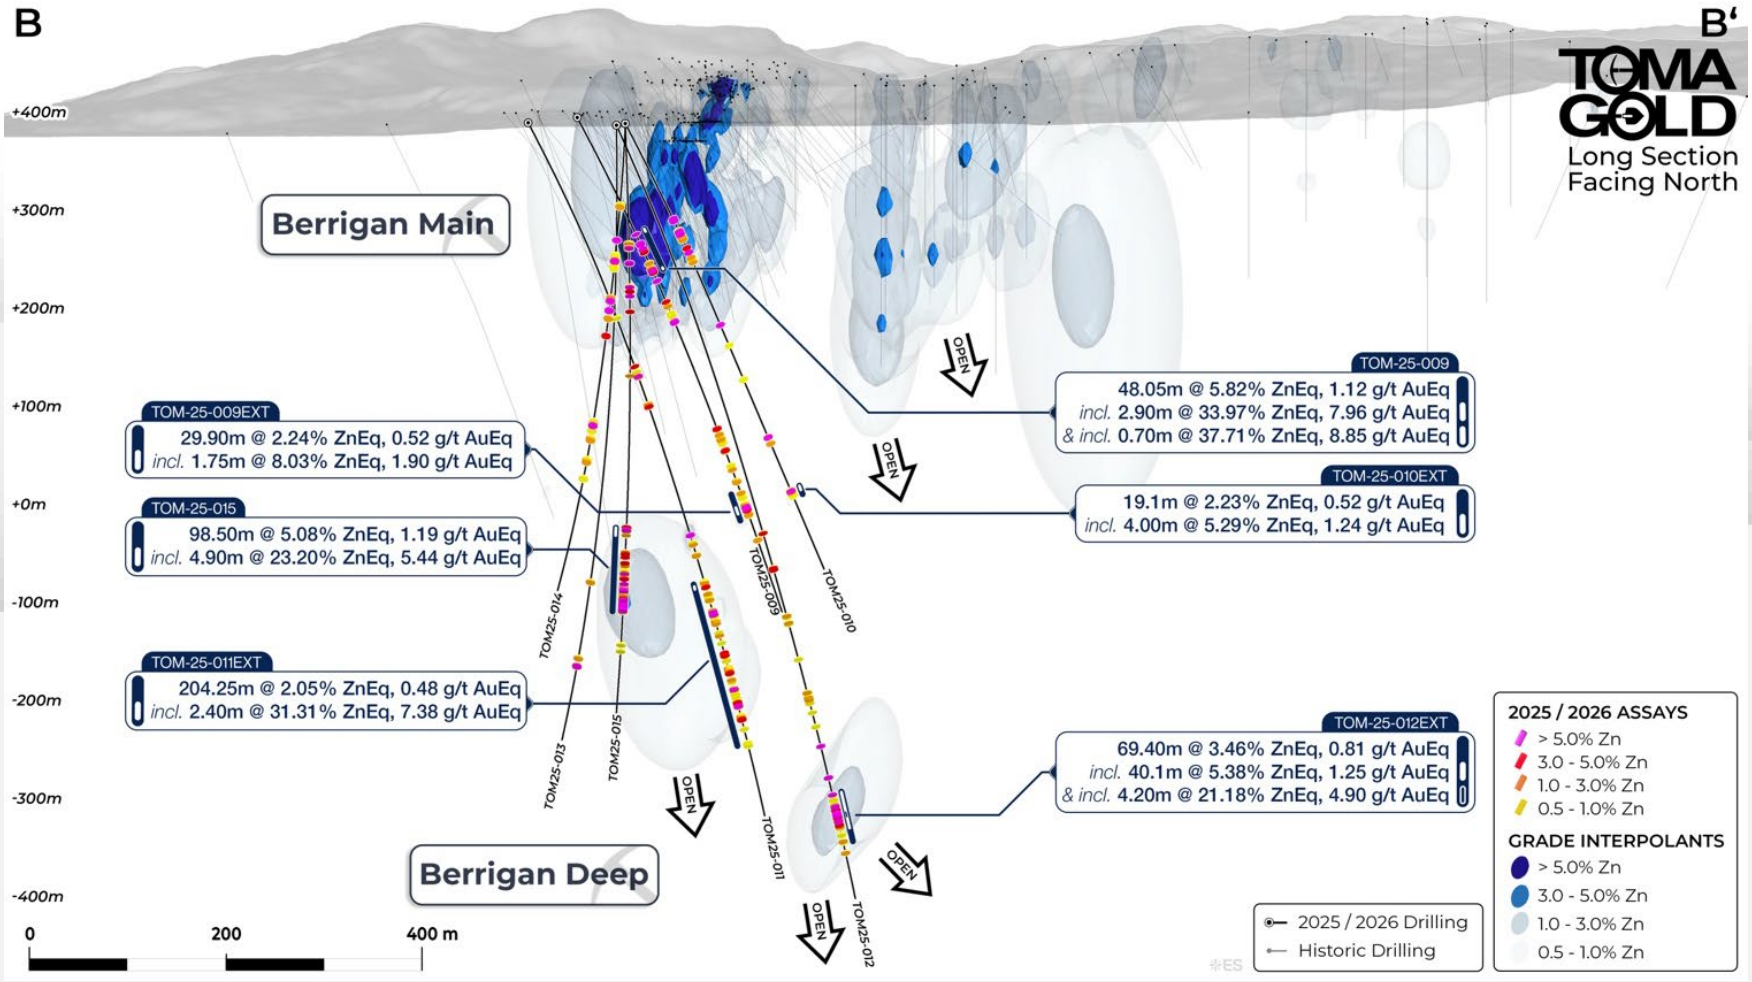

Royalty – 2.5% GMR – First NI 43-101 Mineral Resource released

- 2026 resource: Indicated 0.5 mt at 5.04 g/t Au and Inferred 3.0 mt at 4.07 g/t Au, total 459,000 ozs (see June 11, 2026 Maple Gold NI 43-101 report)
- Maple Gold has commenced an aggressive Fall Program at Joutel, including 25,000 m of diamond drilling
  - Filling in the gaps between and around the past-producing Eagle and Telbel mines.
  - Strengthening the overall resource base, by improving drill density, confidence and classification
  - Testing the highest-priority expansion zones

Notes to accompany the Mineral Resource Estimate:
1. The independent and qualified persons for the mineral resource estimate, as defined by NI 43 101, are Marina Iund, P.Geo. and Simon Boudreau, P.Eng., both of Norda Stelo Inc. The effective date of the estimate is April 2, 2025.
2. These mineral resources are not mineral reserves, as they do not have demonstrated economic viability. The mineral resource estimate follows current CIM definitions and guidelines.
3. The results are presented in situ and undiluted and considered to have reasonable prospects of economic viability.
4. The estimate encompasses one mineralized domain using the grade of the adjacent material when assayed or a value of zero when not assayed.
5. The authors are not aware of any known environmental, permitting, legal, title-related, taxation, socio-political, or marketing issues, or any other relevant issue not reported in the Technical Report, that could materially affect the Mineral Resource Estimate.
