LAHONTAN GOLD CORP · SANTA FE PROJECT

Disclaimers

Information Contained In This Presentation

This presentation (the "**Presentation**") has been prepared by Lahontan Gold Corp. (the "**Company**") solely for informational purposes. None of the Company, its affiliates or any of their respective employees, directors, officers, contractors, advisors, members, successors, representatives or agents makes any representation or warranty as to the accuracy or completeness of any information contained in this Presentation and shall have no liability for any representations (expressed or implied) contained in, or for any omissions from, this Presentation. This Presentation shall not constitute an offer, nor a solicitation of an offer, of the sale or purchase of securities. This Presentation does not constitute an offering of securities of the Company and under no circumstances is it to be construed as a prospectus or advertisement or public offering of securities.

No securities regulatory authority or similar authority has reviewed or in any way passed comment upon the document or the merits of the Company's securities and any representation to the contrary is an offence. Except where otherwise indicated, the information contained in this Presentation has been prepared by the Company and is given as of the date hereof. The delivery of this Presentation shall not imply that the information herein is correct as of any date after the date hereof.

Market and Industry Data

This Presentation includes market and industry data that has been obtained from third party sources, including industry publications. the Company believes that the industry data is accurate and that the estimates and assumptions are reasonable, but there is no assurance as to the accuracy or completeness of this data. Third party sources generally state that the information contained therein has been obtained from sources believed to be reliable, but there is no assurance as to the accuracy or completeness of included information. Although the data is believed to be reliable, the Company has not independently verified any of the data from third party sources referred to in this Presentation or ascertained the underlying economic assumptions relied upon by such sources. References in this Presentation to reports and publications should not be construed as depicting the complete findings of the entire referenced report or publication. the Company does not make any representation as to the accuracy of such information.

Cautionary Note Regarding Forward-looking Information

This Presentation contains "forward-looking information" within the meaning of applicable Canadian securities laws. Forward-looking information includes, but is not limited to, information with respect to the Company's strategy, plans or future financial or operating performance, and advancements at the Company's properties; Any expectations with respect to defining mineral resources or mineral reserves on any of the project's any expectation with respect to any permitting, development or other work that may be required to bring any of the projects into production; any expectation that any of the projects can be brought back into production rapidly or expeditiously; any expectations as to future exploration potential for any of the projects; any expectation as to the outcome or success of any proposed programs for any of the projects; any expectation that market conditions will warrant future production from any of the projects; statements with respect to the transaction (the "Transaction") with Energy Fuels Inc. ("Energy Fuels"), the timing of closing of the Transaction and the impact on the Company's operations; any expectation that any future production payments will become due and payable and be paid. Generally, but not always, forward looking information and statements can be identified by the use of words such as "plans", "expects", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates", or "believes" or the negative connotation thereof or variations of such words and phrases or statement that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved" or the negative connation thereof.

Forward-looking information is based on the Company's current expectations, beliefs, assumptions, estimates and forecasts about the Company's business and the industry and markets in which it operates. Such forward information and statements are based on numerous assumptions, including among others, the availability of financing, the accuracy of previous exploration records and results, that the results of planned exploration activities are as anticipated, the cost of planned exploration activities, that third party contractors, equipment and supplies and governmental and other approvals required to conduct the Company's planned exploration and development activities will be available on reasonable terms and in a timely manner and that general business and economic conditions will not change in a material adverse manner. Although the assumptions made by the Company in providing forward looking information or making forward-looking statements are considered reasonable by management at the time, there can be no assurance that such assumptions will prove to be accurate.

Forward-looking information and statements also involve known and unknown risks and uncertainties and other factors, which may cause actual results, performances and achievements of the Company to differ materially from any projections of results, performances and achievements of the Company expressed or implied by such forward-looking information or statements. These factors include receipt of certain regulatory approvals in connection with the completion of the Transaction; the satisfaction of closing conditions; potential conflicts of interest between the Company and Energy Fuels; the costs associated with bringing any of the projects back into production; risks that historical mineral estimates can be updated and be verified to be current mineral resources or Mineral Reserves; permitting and regulatory delays; litigation risks; competition from others; market factors, including future demand for and prices realized from the sale of uranium and vanadium; government actions that could restrict or eliminate the ability to mine on public lands, such as through the creation or expansion of national monuments or through mineral withdrawals; the policies and actions of foreign governments, which could impact the competitive supply of and global markets for uranium and vanadium; the Company's expectations in connection with the production and exploration, development and expansion plans at the projects discussed herein being met; changes in national and local government legislation, taxation, controls or regulations and/or changes in the administration or laws, policies and practices; the impact of general business and economic conditions; fluctuating metal prices; currency exchange rates; the impact of inflation; general risks of the mining industry; failure of plant, equipment or processes to operate as anticipated; unanticipated results of future studies; seasonality and unanticipated weather changes; success of exploration activities, permitting timelines, government regulation; environmental risks; unanticipated reclamation expenses; and/or title disputes or claims.

Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those contained in the forward-looking information or implied by forward-looking information, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking information and statements will prove to be accurate, as actual results and future events could differ materially from those anticipated, estimated or intended. Accordingly, readers should not place undue reliance on forward-looking statements or information. The Company undertakes no obligation to update or reissue forward-looking information as a result of new information or events except as required by applicable securities laws.

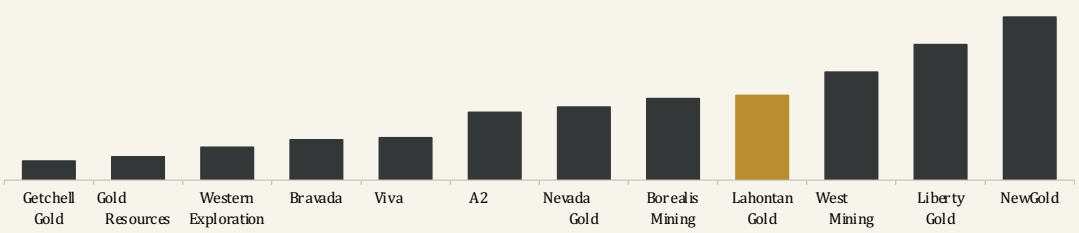

The footnotes, endnotes and appendices to this Presentation contain important information.

The Technical information in this presentation has been reviewed and approved by Brian J. Maher, M.Sc., CPG-12342, the Senior Vice President – Mine Development and Exploration for Lahontan Gold Corp, who is a Qualified Person as the term is defined in NI 43-101.

WALKER LANE, NEVADA

CHECKING ALL THE BOXES

✓ NEVADA

- #1 Jurisdiction in the USA
- Straight-forward permitting

✓ SIZE & SCALE

- 2.39M Ounces & Growing*
- District-scale land package

✓ EXCELLENT INFRASTRUCTURE

- Year-round access, substation on site, access to three water wells
- Adjacent to an operating mine

✓ PAST PRODUCER

- Santa Fe was mined from 1988–1994 by Corona Gold
- LG on track to production; permitting well underway

✓ BACK TO PRODUCTION

- Estimated timeline to production: 2027

*Please see Santa Fe Project Technical Report for detailed Mineral Resource Estimate.

LARGE–SCALE GOLD OXIDE DEPOSITS

37%+ — **SLAB + YORK**
Increase in shallow oxide resources

26%+ — **SANTA FE DEPOSIT**
Increase in combined oxide + sulfide resources

UPSIDE — **BEYOND PIT SHELLS**
Mineralization extends beyond conceptual pits

Source: Please see the Santa Fe Project Technical Report, Authors: Michael Lindholm C.P.G. and Caleb Cook, P. Eng., Effective Date: October 1, 2026, Report Date: October 4, 2026 and Lahontan Gold press release dated October 14, 2026. The Technical Report is available on the Company's website and SEDAR+ Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability.

SANTA FE DEPOSIT

SIGNIFICANT OXIDE REMAINING IN THE HIGHWALL

WHAT TO KNOW

01 **PIT OXIDE**

Significant oxide and transition material remains to be mined. Approximately 0.70 g/t oxide gold with a low strip ratio.*

02 **COMPETENT WALL ROCK**

Approximately 50° pit slopes. Mineralization crops out in the pit bottom and highwall.

03 **HIGH-QUALITY OXIDE**

Overall oxide grade ranks among the highest of comparable Nevada heap-leach operations.*

Shallow oxide mineralization supports a straightforward open-pit development concept.

Santa Fe pit looking toward the mineralized highwall

*See the Santa Fe Project Technical Report for the detailed Mineral Resource Estimate and supporting assumptions.

SANTA FE EXPLORATION CAMPAIGN 2026

THREE-PROGRAM DRILL STRATEGY

2026 DRILL PROGRAM · WEST SLAB · EM · GUZZLER

RC, core and sonic drilling advance exploration, permitting and mine-life growth in parallel.

FIELD EXECUTION

Multiple drill methods support resource growth and permitting across Santa Fe.

RC PROGRAM — 10,000 m

Planned exploration drilling

West Slab · EM · Guzzler

CORE PROGRAM — 2,023 m

8 holes for rock characterization

Defines water table for mine permitting

SONIC PROGRAM — 1,740 m

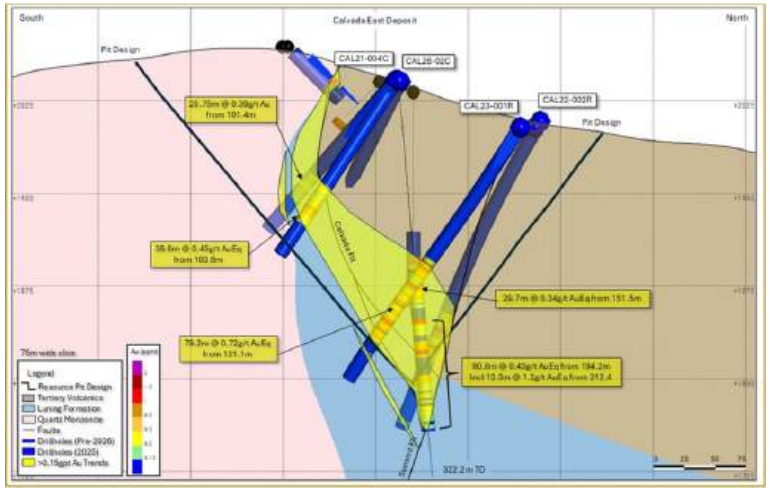

96 holes across historic heap-leach pads

Targets additional ounces and mine-life growth

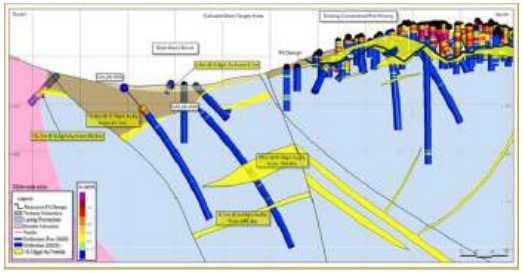

SANTA FE 2026 DRILL RESULTS

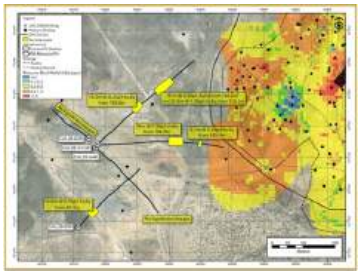

DISCOVERY + EXPANSION DRILLING

CALVADA EAST DEPOSIT

NEW WEST SLAB GOLD DISCOVERY

01 CALVADA EXPANSION

90.8 m grading 0.44 g/t AuEq, including 12.3 m grading 1.2 g/t AuEq.

02 NEW GOLD ZONE

West Slab drilling returned 35.0 m grading 0.34 g/t AuEq and 61.0 m grading 0.26 g/t AuEq.

03 OPEN FOR GROWTH

Results extend mineralization beyond the current resource pit shells and remain open along strike and at depth.

SANTA FE MINE/ PEA EXCEPTIONAL HIGHLIGHTS

Lahontan Gold Corp. • 2024 vs. 2026 base case

Metric	2024	2026	Change
After-tax NPV_5	$57 M	$820 M	+1,339%
After-tax IRR	14.0%	40.1%	+186%
Net revenue	$696 M	$3,680 M	+429%
Mine life (years)	7	11	+57%
Avg. annual AuEq (oz)	49,000	91,900	+88%
Total AuEq (oz)	345,200	1,025,000	+197%
Capex	$135 M	$172 M	+27%
Payback (years)	4.2	3.7	−12%
Base case gold price	$2,025	$3,600	+78%

14.4× NPV

- IRR nearly triples to 40.1%
- Net revenue grows to 5.3×

Nearly double annual production

- Total AuEq production nearly triples
- Mine life extends by 4 years
- Average LOM AuEq grade increases to 0.83 g/t

Just 27% more capex

- Despite substantial growth in scale Payback shortens by 12%

STILL TRADING AT JUST 15% OF PROJECT NPV*

*PEA is preliminary and includes Inferred Mineral Resources considered too speculative geologically to be categorized as Mineral Reserves. There is no certainty the PEA will be realized. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability. Source: Lahontan Gold news release, October 14, 2026, Tables 1–4. All amounts in US$.

EMR ACQUISITION | STRATEGIC BENEFITS TO LAHONTAN

TRANSACTION HIGHLIGHTS

100%

WEST SANTA FE OWNERSHIP

Consolidates full ownership and adds New York Canyon, directly adjoining the Santa Fe Mine.

~C$2.39M

FUTURE PAYMENTS ELIMINATED

Removes US$1.73M of future payments and cancels 1% NSR royalties at West Santa Fe and 27 York claims.

2.0M

LAHONTAN SHARES RETURNED

Returns shares to treasury with a stated value of approximately C$540k.

EXPANDED WALKER LANE PLATFORM

>93 km² regional land package in Nevada's prolific Walker Lane

NEW YORK CANYON Adjoins the southern boundary of the Santa Fe Mine

QUEBEC PORTFOLIO Additional royalties and properties

NEVADA CLAIMS Additional leased claims

ASSUMED CONSIDERATION AND INTERESTS

US$3.5M	Fairchild promissory note
12.5M	Fairchild shares
0.5%	Golden Arrow NSR

Adds asset value while preserving direct exposure to Nevada exploration upside

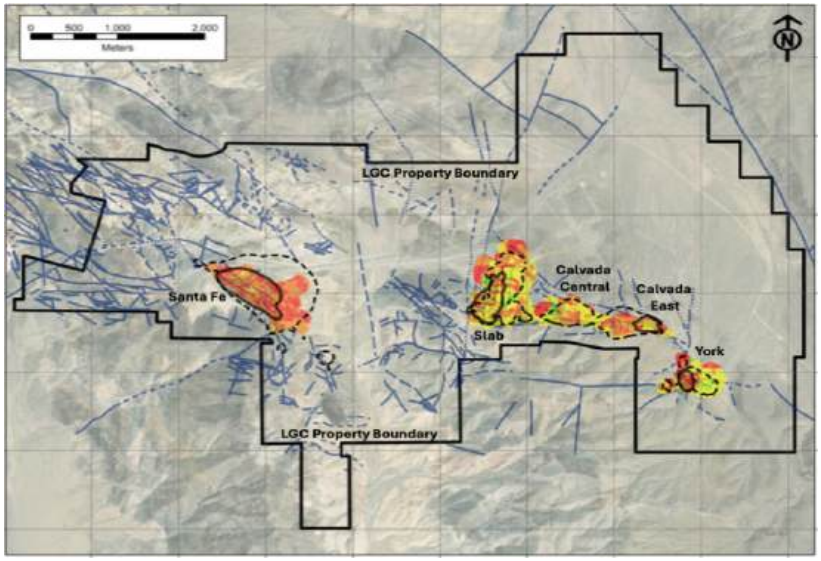

Transaction terms reflect information supplied by the Company and remain subject to definitive disclosure and completion.

SEPT 2026

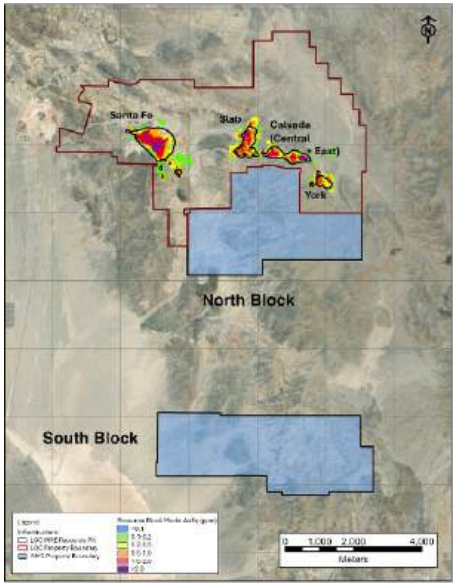

SANTA FE LAND POSITION

BEFORE AND AFTER THE EMR ACQUISITION

BEFORE EMR ACQUISITION

AFTER EMR ACQUISITION

GROWTH HIGHLIGHTS

- Santa Fe has more than doubled in size following the EMR transaction
- Santa Fe land position: 55.8 sq km
- West Santa Fe land position: 19 sq km
- Combined Santa Fe and West Santa Fe land position: 74.5 sq km

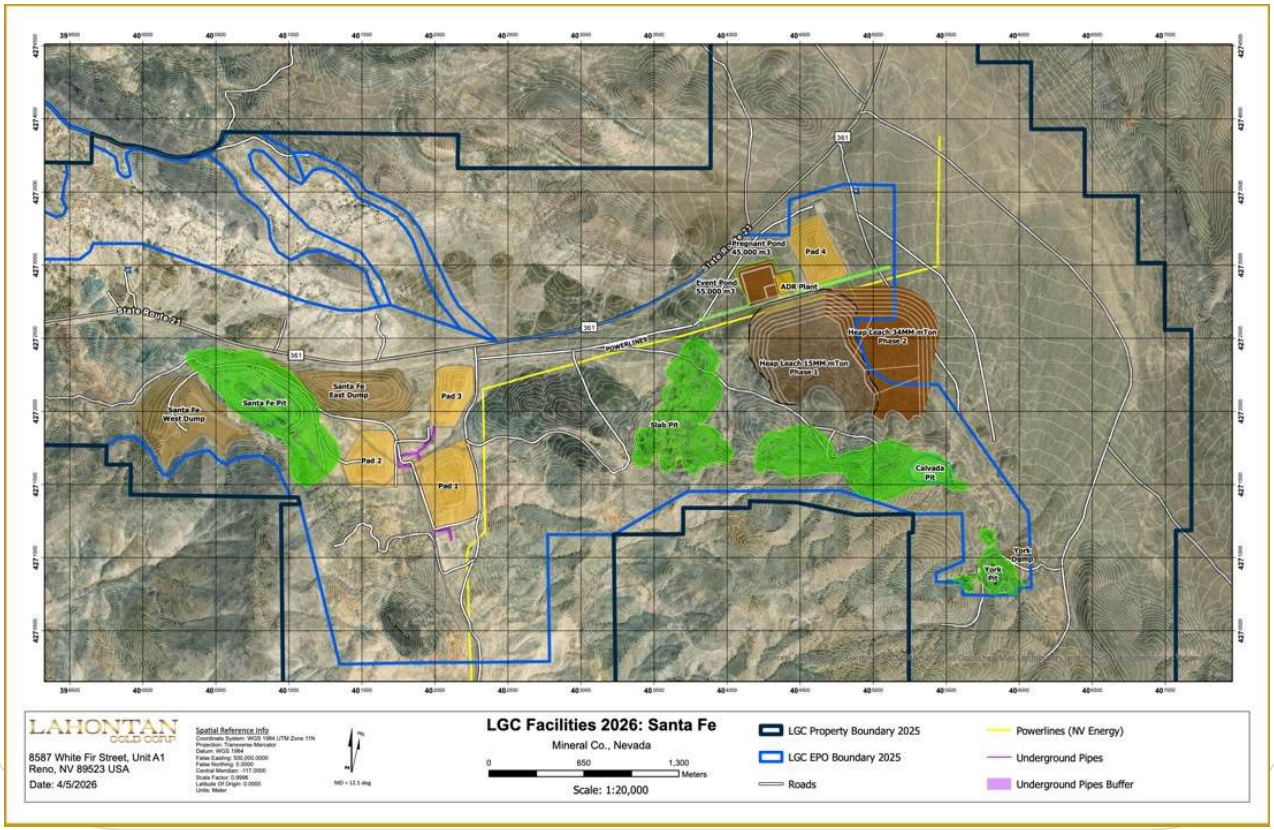

Combined total shown as stated by the company.

The EMR acquisition added the North Block and South Block to the Santa Fe land position.

SANTA FE

A FOCUS FOR

RESOURCE GROWTH

IN 2026

NEVADA · WALKER LANE

Lahontan Gold Corp.

WEST SANTA FE

SHALLOW OXIDE RESOURCE-GROWTH OPPORTUNITY

WHAT TO KNOW

01 PROXIMITY

Only 13 km west of the flagship Santa Fe Mine. District-scale 19 km² land package.

02 HISTORIC DATABASE

Historical work outlines a shallow oxide gold-and-silver system of approximately 0.5–1.0 Moz beginning at surface.*

03 SANTA FE ANALOGUE

Open-pit configuration with potential to become a low-cost satellite operation to Santa Fe.

04 LOW-COST ACQUISITION

Seven-year, back-end-loaded option. US$1.8M total buyout and US$1.4M in expenditures to define a maiden resource estimate.

*The West Santa Fe exploration target is conceptual. Historical information has not been fully verified by a qualified person and should not be relied upon.

WEST SANTA FE

EXCELLENT RESOURCE-GROWTH POTENTIAL

WHAT TO KNOW

01 **HISTORIC DRILLING**

Gold and silver begin at surface. Mineralization continues down-rake and is entirely oxide.

02 **0.31 g/t Au SHELL**

Comparable geometry to Santa Fe, with potential for a low-cost satellite operation. Historical drilling outlines a large Au–Ag system.*

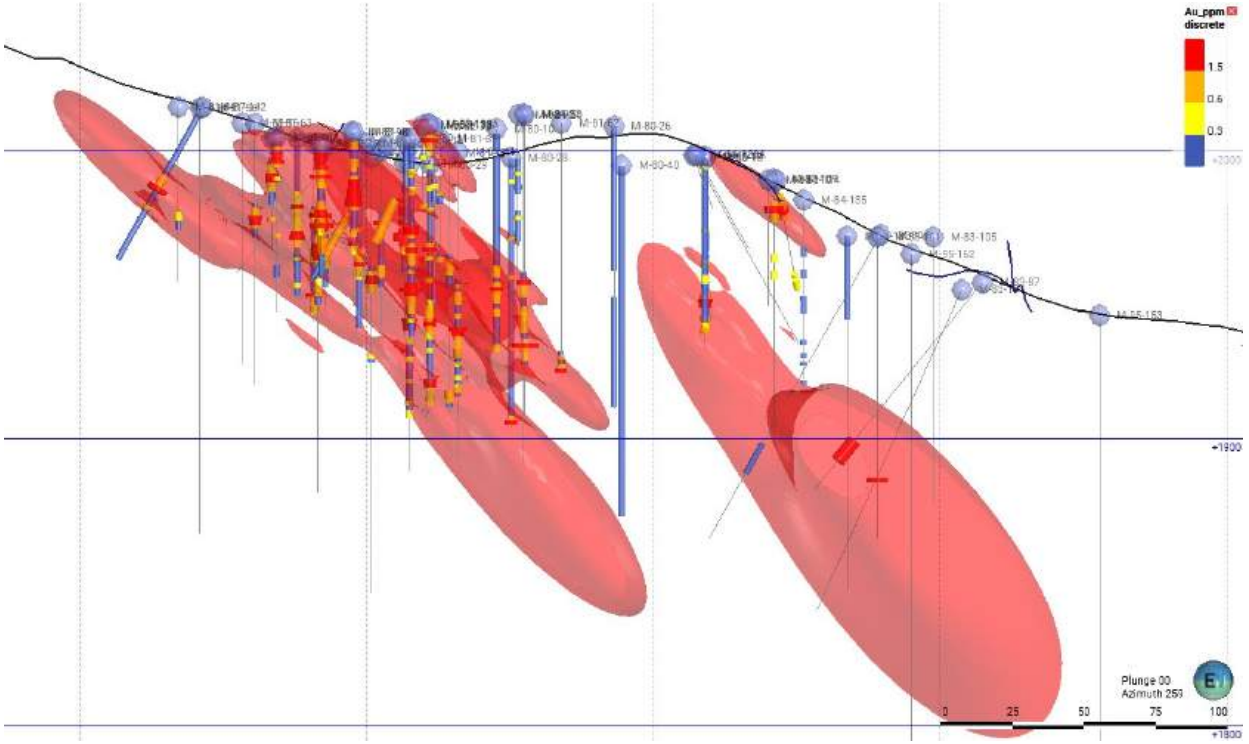

03 **CURRENT PROGRAM**

Six drill holes completed in December, with additional drilling planned in 2026.

04 **METALLURGY**

Historic KCA column-leach testing indicated approximately 70% gold recovery and 50% silver recovery.

HISTORIC DRILLING · 0.31 g/t Au SHELL OUTLINE

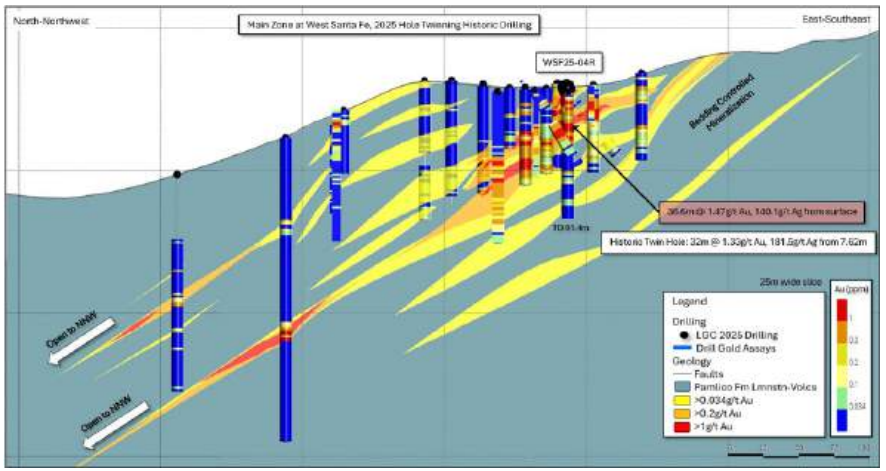

Shallow oxide system remains open down-rake and across the broader target area.

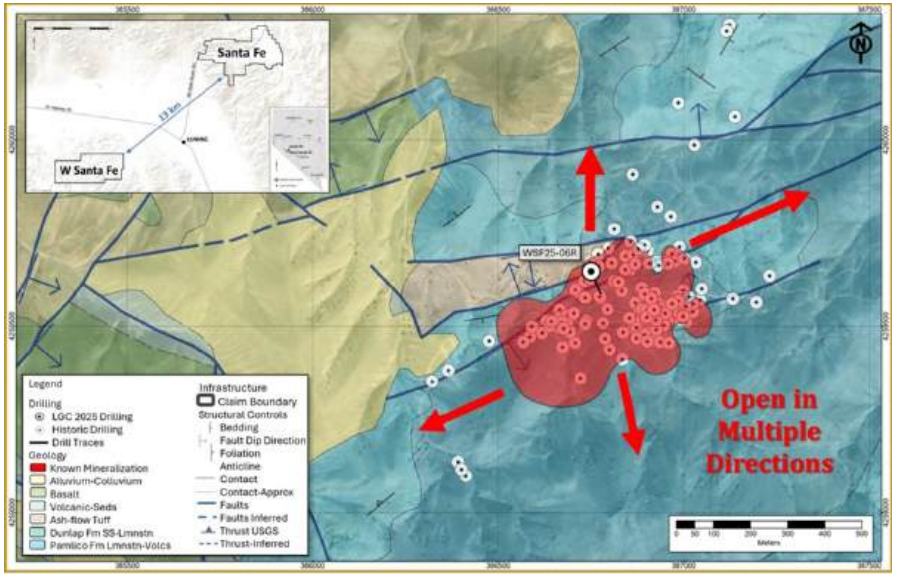

*The West Santa Fe exploration target is conceptual. Historical information has not been fully verified by a qualified person and should not be relied upon.

WEST SANTA FE

RESULTS CONFIRM HISTORIC DRILLING

SYSTEM OPEN IN MULTIPLE DIRECTIONS

01 SHALLOW OXIDE INTERCEPT

WSF25-04R returned 36.6 m grading 3.11 g/t AuEq from surface, all oxide.

02 HIGH-GRADE CORE

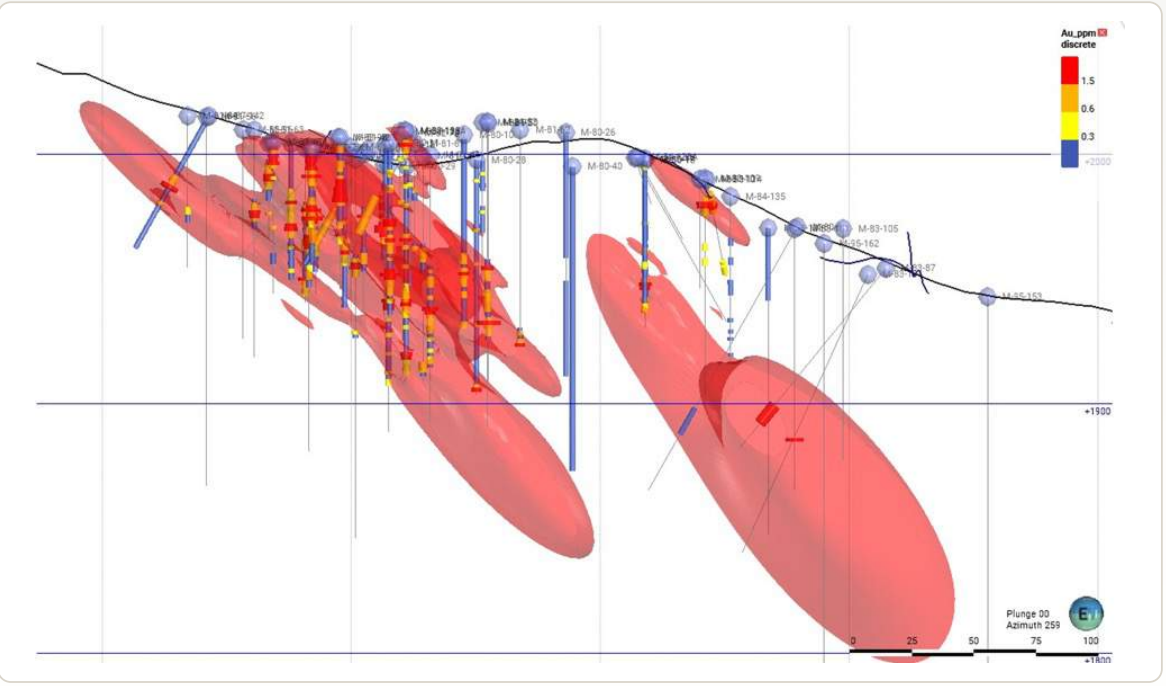

Includes 10.7 m at 5.75 g/t AuEq. Individual intercepts reached up to 648 g/t silver.

03 2026 EXPANSION DRILLING

Follow-up drilling will test in-fill, down-dip and east-northeast extensions.

WEST SANTA FE

SHALLOW OXIDE SYSTEM REMAINS OPEN

MODERN METALLURGICAL RESULTS

158
RC SAMPLES
2025 drilling

81%
AVERAGE Au RECOVERY
CN-extractable

60%
AVERAGE Ag RECOVERY
CN-extractable

RECOVERY OUTPERFORMANCE

+11 pts gold vs. historic KCA

+10 pts silver vs. historic KCA

WHY IT MATTERS

Modern CN-extractable assays support strong heap-leach recovery behavior. Current averages exceed the historic KCA assumptions of approximately 70% gold and 50% silver recovery.

01 AT-SURFACE MINERALIZATION

Gold and silver begin at surface and continue down-rake in oxide.

02 LARGE CONCEPTUAL SHELL

Historic drilling outlines a broad 0.31 g/t Au shell with geometry comparable to Santa Fe.

03 FOLLOW-UP PROGRAM

Six holes completed in December, with additional drilling planned in 2026.

*Historical information has not been fully verified. Additional metallurgical testing is anticipated.

WEST SANTA FE

CN ASSAY RESULTS CONFIRM METALLURGY

60% AVERAGE Ag RECOVERY
CN-extractable

CN-EXTRACTABLE GOLD RECOVERY DISTRIBUTION

Range: 41% to >100%

Percent CN Au recovery versus fire assay

METALLURGICAL TAKEAWAYS

MODERN TESTING

CN-extractable assays mimic gold and silver recovery behavior in cyanide heap-leach processing.

HISTORIC KCA BENCHMARK

1982 testing indicated approximately 70% Au and 50% Ag recovery.*

Current averages exceed the historic assumptions.

RECOVERY OUTPERFORMANCE

+11 pts Au vs. historic KCA

+10 pts Ag vs. historic KCA

*The 1982 metallurgical results are historical, have not been verified to modern standards by a qualified person, and should be viewed as illustrative only. Additional metallurgical testing is anticipated to verify the historic recovery estimate.
